Cisco TelePresence IX5000

The Cisco TelePresence IX5000 Series is a state-of-the-art triple-screen system combining high fidelity audio and video with rich collaboration functionality. It is designed to deliver the most vivid immersive collaboration experience possible. As the first single- codec H.265 triple-screen product, the IX5000 is both powerful and efficient. It provides high value and flexibility for deployment beyond the boardroom.

Cisco TelePresence Touch 12-inch

Cisco TelePresence Touch 12-inch enables simple, 'one-button' control of your meeting. The touch panel also provides the interface for annotating over content.

Camera

A powerful camera with 4K sensors captures the entire room in ultra-high definition with no camera movement. Whiteboard mode allows the integrated camera to "unskew" the image for remote participants, so you have more flexibility in placing whiteboards in the room.

Microphones

The newly designed raised microphone bar allows for optimal audio pickup and alleviates sound blockage from devices such as laptops.

Lighting

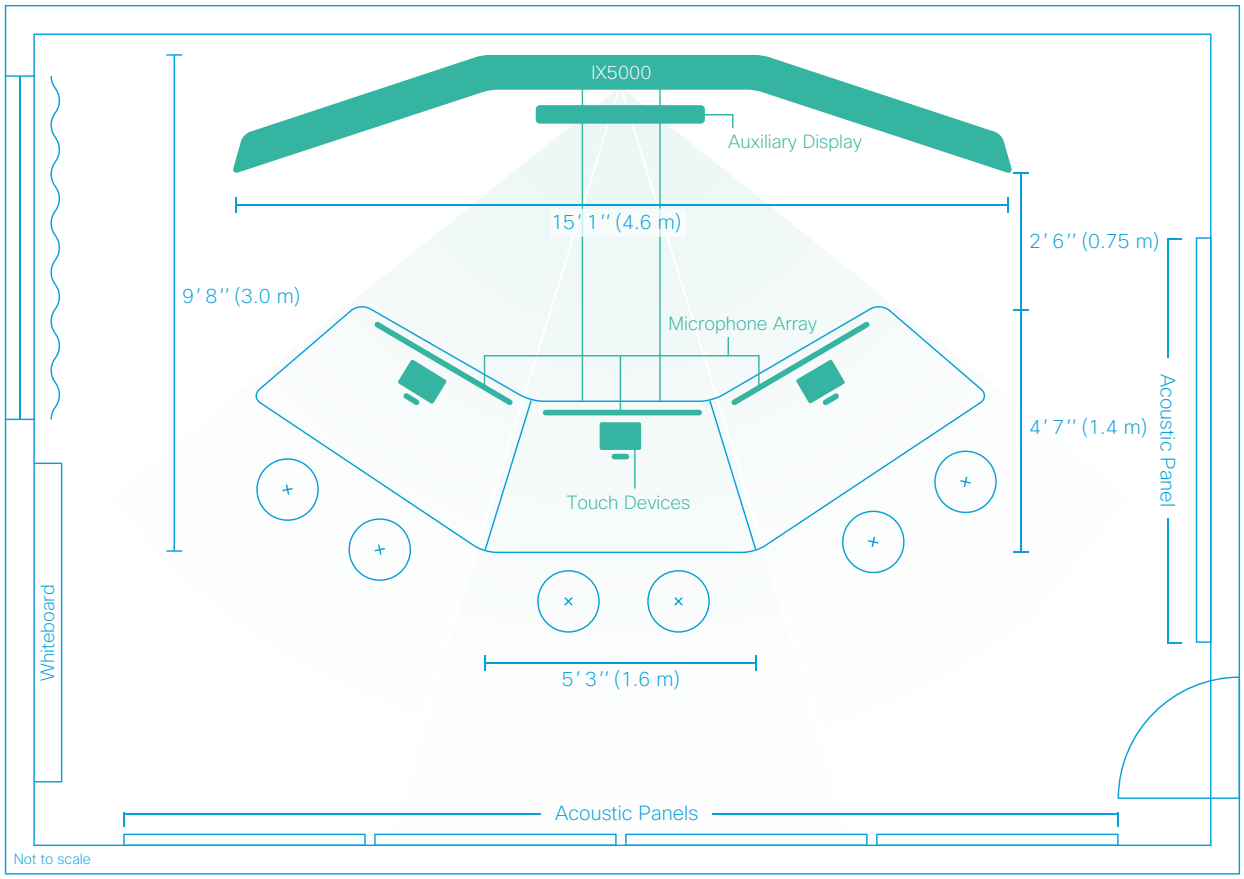

Integrated lighting delivers excellent video images while eliminating need for light reflector and room remediation.
