

Cisco IOS Master Command List, All Releases

First Published: February 2008

Last Updated: November 2009

This document contains a list of the commands supported in many different software releases and on many different platforms. Some of the commands may not be supported in your Cisco IOS software release. To search for a command, use the Alphabet Key in the HTML of this document, the Find function in your Web browser, or the Command Lookup Tool (<https://tools.cisco.com/Support/CLILookup>) where you will be prompted to provide your Cisco.com username and password. To access the documentation for a particular command, click on the command name. This list is intended to be used online only.
