New Cisco 7200 Series Security Bundle that includes Port Adapter Jacket Card

PRODUCT OVERVIEW

Cisco Systems® offers high-performing, feature-rich, midrange router security and is now extending the security bundles on the Cisco® 7200 Series with the addition of the Cisco 7200VXR Series NPE-G2 Network Processing Engine VPN Acceleration Module 2+ (NPE-G2 VAM2+) bundle.

This new bundle also includes the Cisco 7200VXR Series Port Adapter Jacket Card and gives customers more slot density and flexibility. The new NPE-G2VAM2+ bundle (part number 7206VXR/G2/2+VPNK9) will be delivered with the SA-VAM2+ in the Cisco 7200 Series port adapter jacket card (part number C7200-JC-PA), freeing up additional slots since the port adapter jacket card utilizes the I/O module slot to support selected high bandwidth port adapters.

Table 1 lists the features available on the new Cisco 7200 series security bundle with NPE-G2, SA-VAM2+ and the port adapter jacket card.

Table 1. Features

Feature	Description
Additional port and slot density	Allows additional high-bandwidth port adapters to be inserted while still providing encryption services with the SA-VAM2+
