

# Cisco Security Demo Guide

## Get Ahead of Threats

Talos Threat Intelligence | Incident Response

The Cisco Talos demo highlights key clips from this past year's engagements, research, and organization communications. From trivia facts featuring Talos research to promotions of Talos' blogs and podcasts, the demo video aims to engage and inform Black Hat attendees on all things Talos.

## Stop Identity Attacks

Duo | Identity Intelligence

Cisco Identity Intelligence runs on top of customers' existing identity stores and provides unified visibility, as well as AI-driven analytics. Customers can discover their whole identity population, clean up vulnerable accounts, eliminate unused and risky privileges, detect behavior anomalies and block high-risk access attempts – without replacing their current solutions.

## Close the Exploit Gap

Hypershield

In today's threat landscape, managing vulnerabilities across modern applications is a race against time. Patching can be challenging, taking weeks or months to build, test, and deploy and sometimes may not always be the best mitigation strategy. Learn how Cisco Hypershield provides a streamlined way to prioritize and fix vulnerabilities, closing the exploit gap without disrupting the app.

## Detect and Stop Breaches

XDR | Splunk ES

Find out how using Cisco XDR and Splunk ES together, as the core foundational elements of a TDIR solution, will enhance unified security operations by integrating and streamlining process execution across detection, investigation, and response into a cohesive workflow.
