

# OUR JOB IS YOUR DEFENSE

Today's uncertain threat environment requires a proven intelligence partner – Cisco Talos is that partner

## Who we are

Cisco Talos is a proven and trusted threat intelligence research team comprised of world-class researchers, analysts and engineers. Talos powers the Cisco portfolio with comprehensive intelligence covering every customer environment, every event, every single day, all around the world. Talos provides verifiable and customizable defensive technologies and techniques that help customers, users and the internet at-large quickly protect their assets. Our job is your defense.

## What we do

Talos powers the Cisco portfolio with comprehensive threat intelligence. We prioritize what's going on in the threat landscape. As adversaries evolve and start deploying new tactics, techniques and procedures and exploring new attack vectors, Talos can build engines to defend Cisco customers from evolving attacks.

## Raising the bar for defenders everywhere

Talos is always trying to make sure the public is aware of the threats we observe, so we are consistently publishing the details of our research publicly and talking with our intelligence partners about the effects of these threats. We have more than 60 government and law enforcement partnerships that ensure we are keeping the broader internet safe.

**Unmatched visibility across the threat landscape**

800 billion security events observed each day

~9 million emails blocked an hour

~2,000 new samples analyzed every minute

~2,000 new domains blocked every second

**Founded in fighting the good fight**

**Our global threat hunting team**

200 vulnerabilities discovered per year

60+ government and law enforcement partnerships

+45,000 critical infrastructure endpoints monitored in Ukraine

## Cisco Talos Incident Response

Cisco Talos Incident Response provides emergency response services to support customers through active incidents and proactive services to expand customers' preparedness for when, not if, the worst-case scenario happens.
