## Drop Ceiling Grid

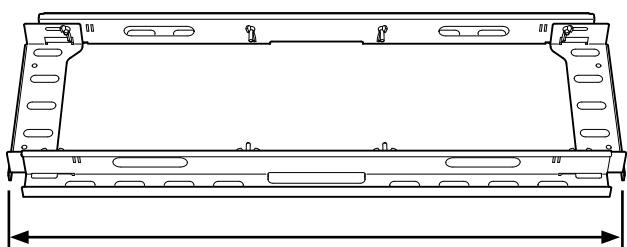

### Before you begin:

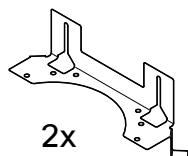

- Read the Room Preparation Guidelines.
- The microphone with ceiling frame weighs 3.5 kg/7 lbs. Ensure the ceiling can safely support the product.
- Consider placement of the ethernet cable.
- Make sure you have the mounting kit shown here:

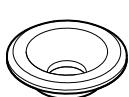

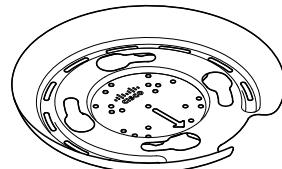

Drop Ceiling Grid Mount Kit  
CS-MIC-CLGP-DMK

592 - 620 mm  
23.3 - 24.4 in

## i Off-center placement

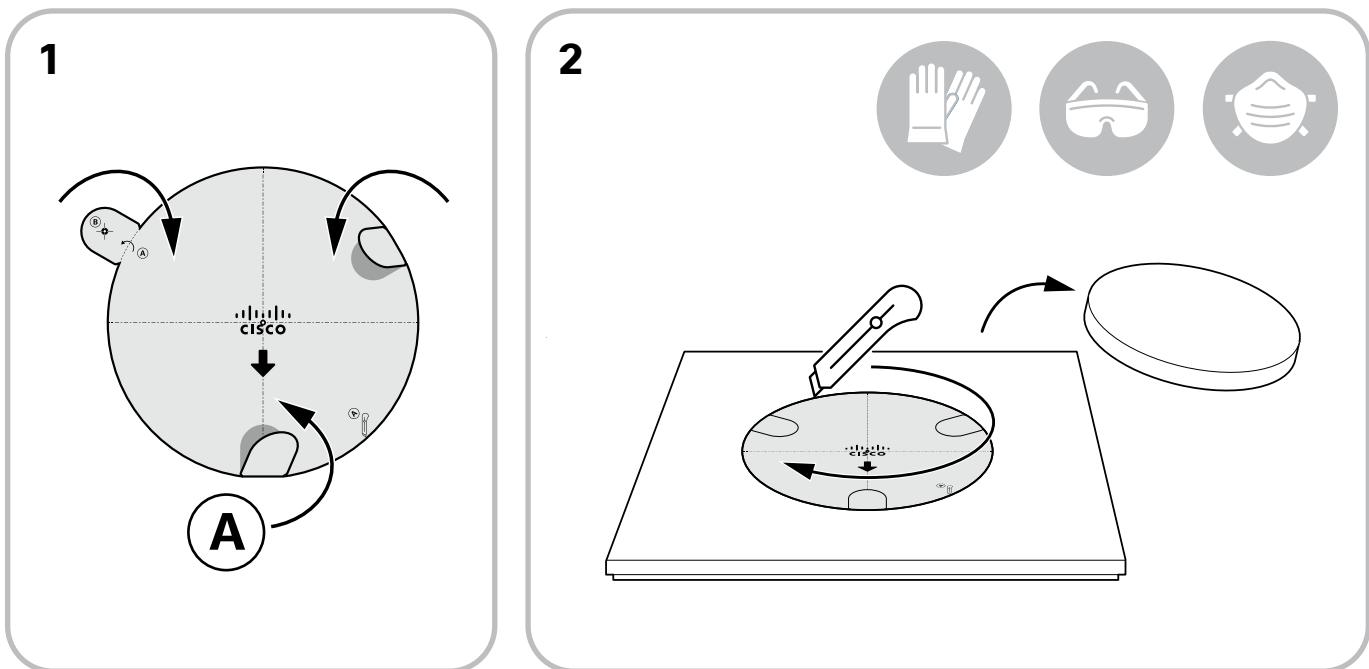

If you want to install the microphone off-centre on the tile, position the mounting frame so that it rests on the drop-ceiling t-bars.

Flexible direction of frame with microphone.

## 1 Prepare the tile

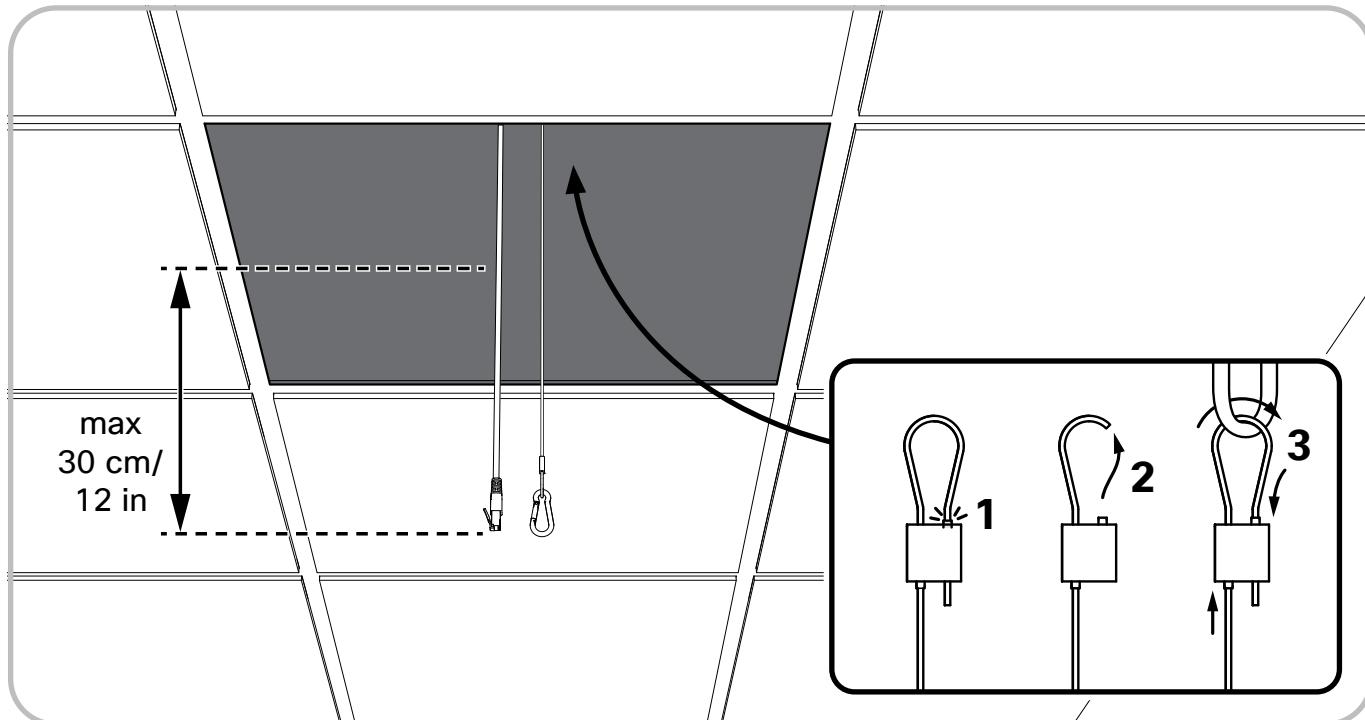

Remove the ceiling tile and use the template to cut a hole in it.

2

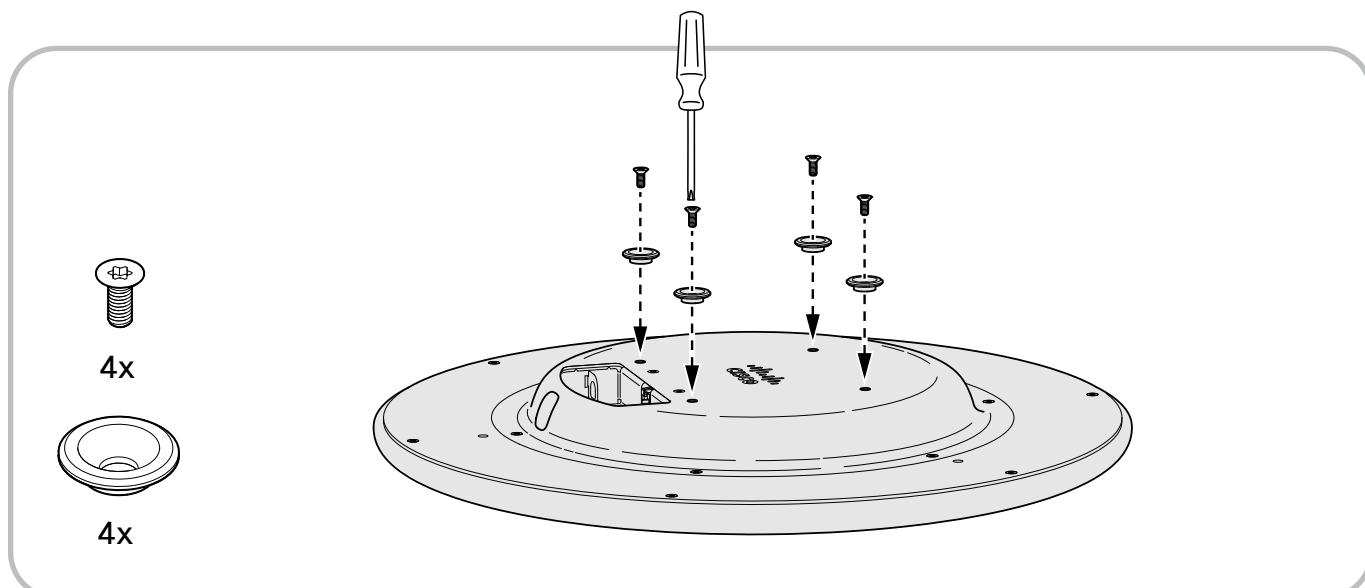

## Prepare the safety tether and ethernet cable

Fasten the safety tether to a secure point above the tiles so the hook hangs a maximum of 30 cm/12 in from the ceiling.

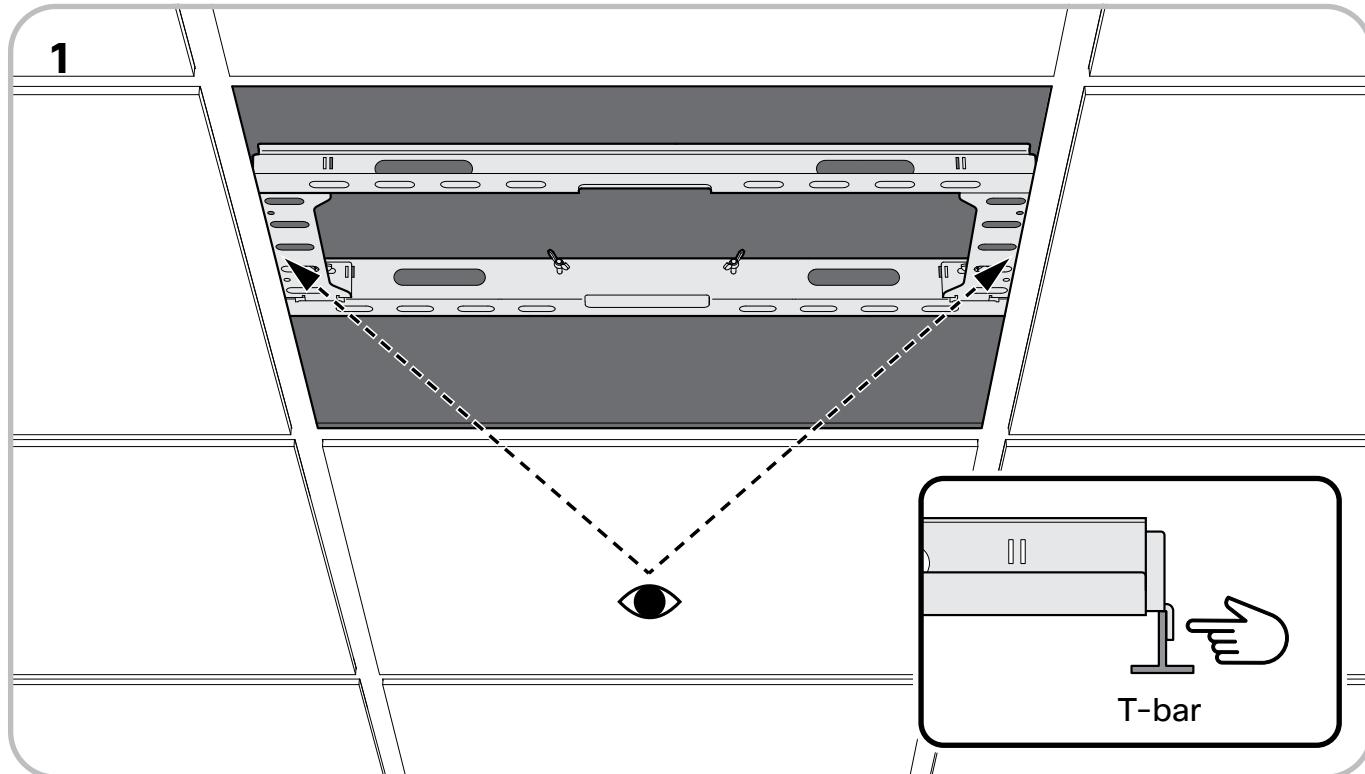

3

## Attach the four interface discs to the microphone

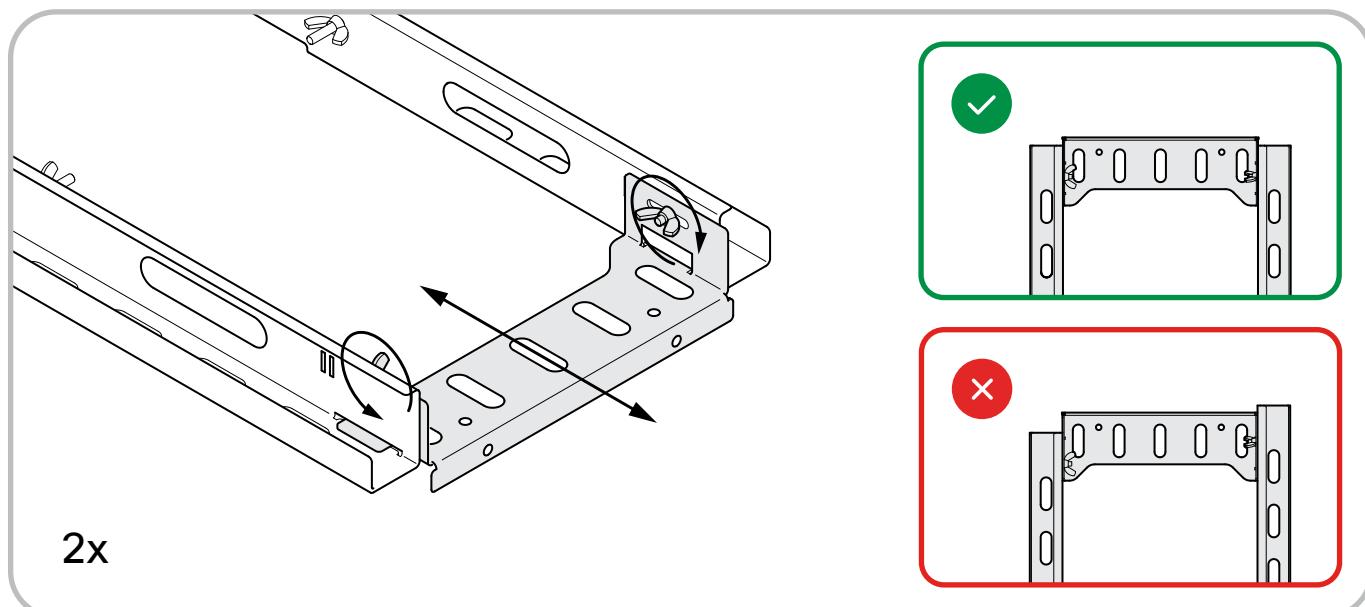

## 4 Adjust the frame

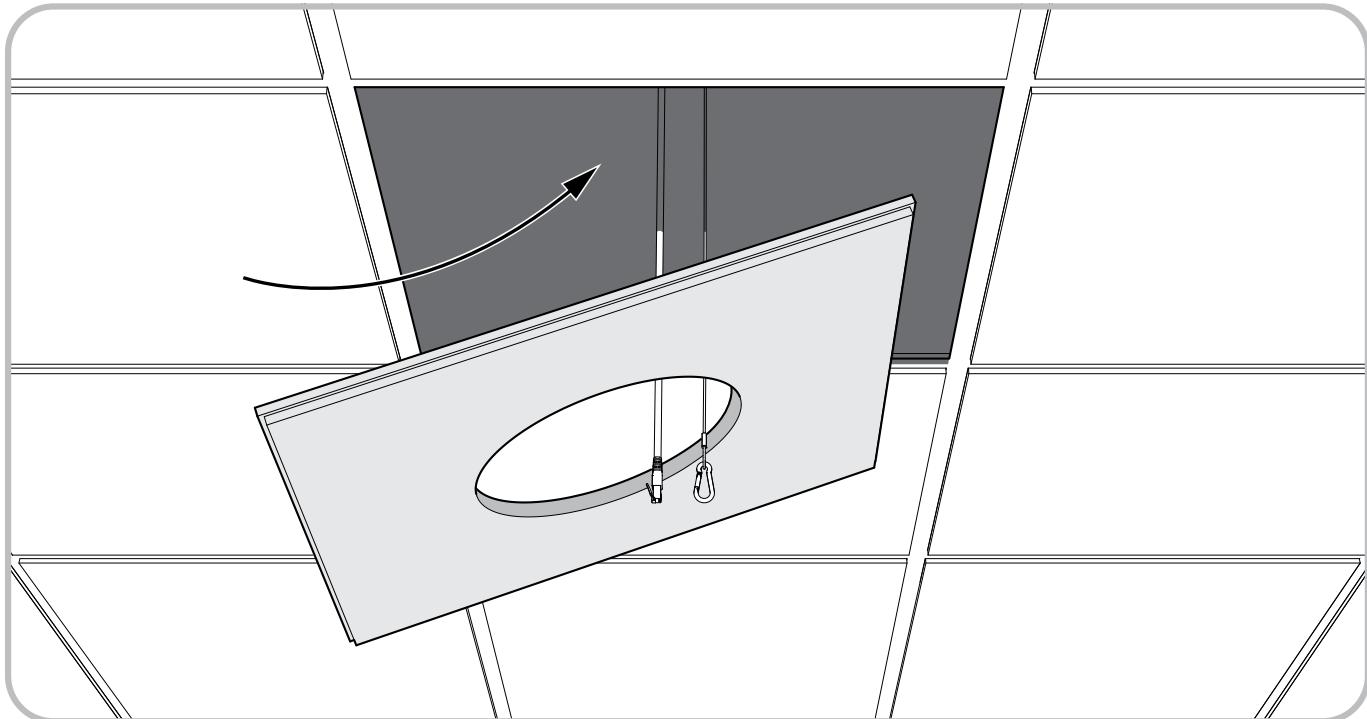

Set the frame on the T-bars and adjust until it hooks onto the T-bars. Tighten the wingnuts and take the frame down.

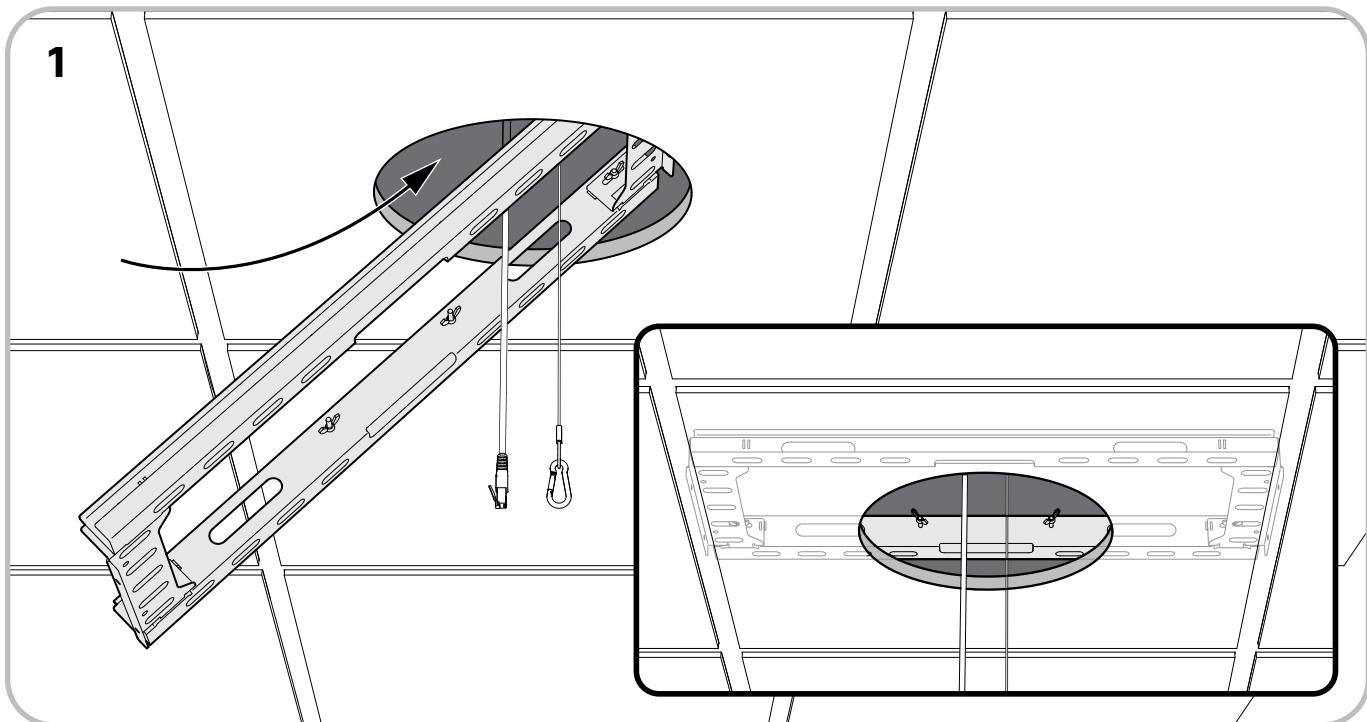

⚠ Make sure the rails are evenly aligned.

## 5 Put the tile back

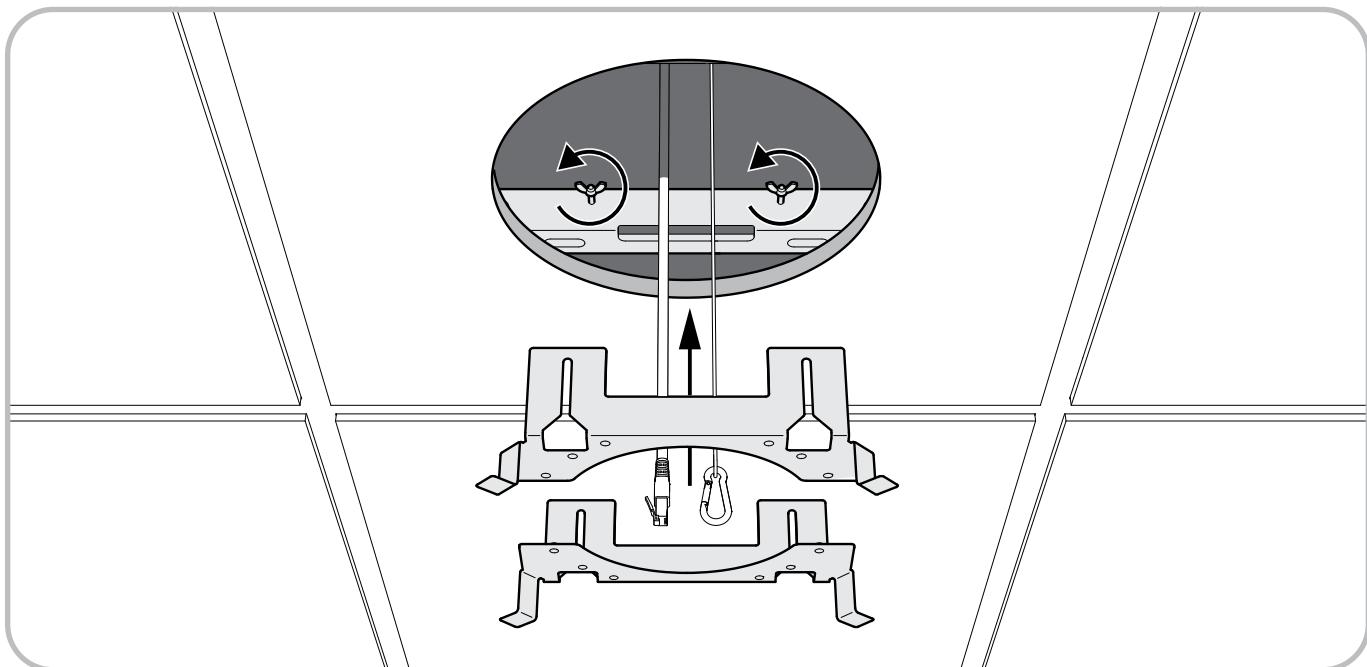

## 6 Place the frame firmly on the T-bars

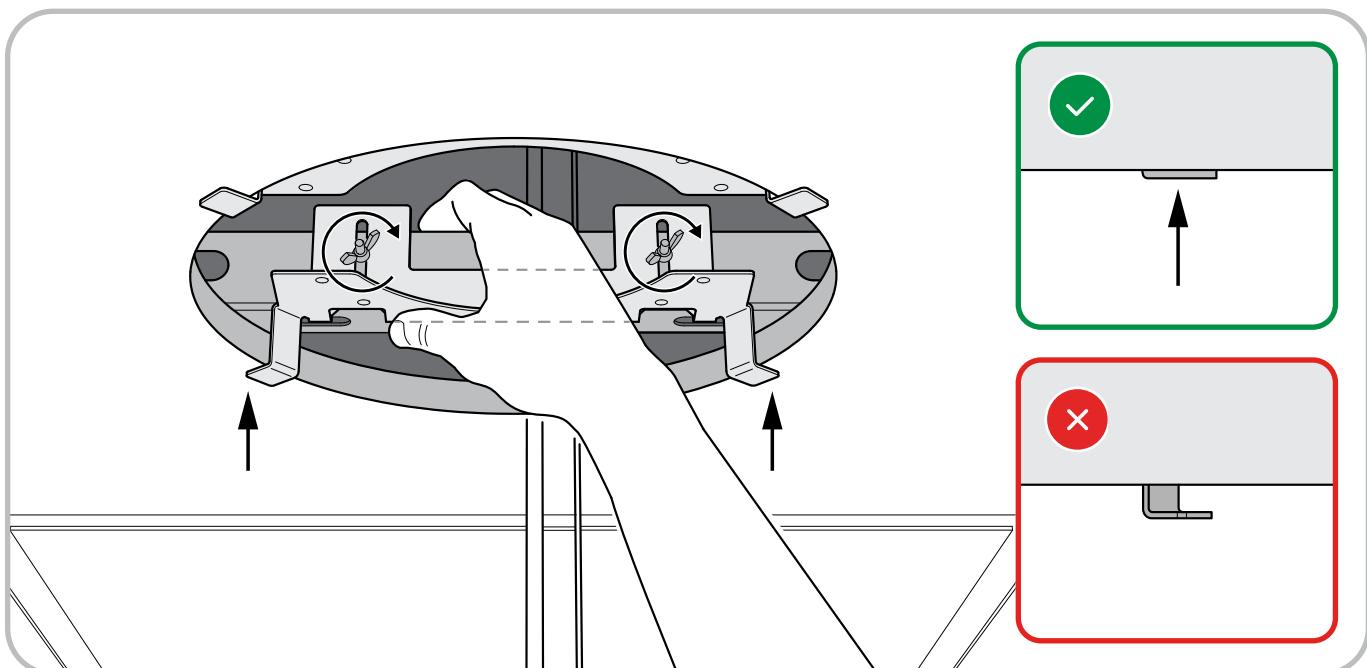

7

## Attach the brackets

Loosen the frame wingnuts and place a bracket on each side of the frame.

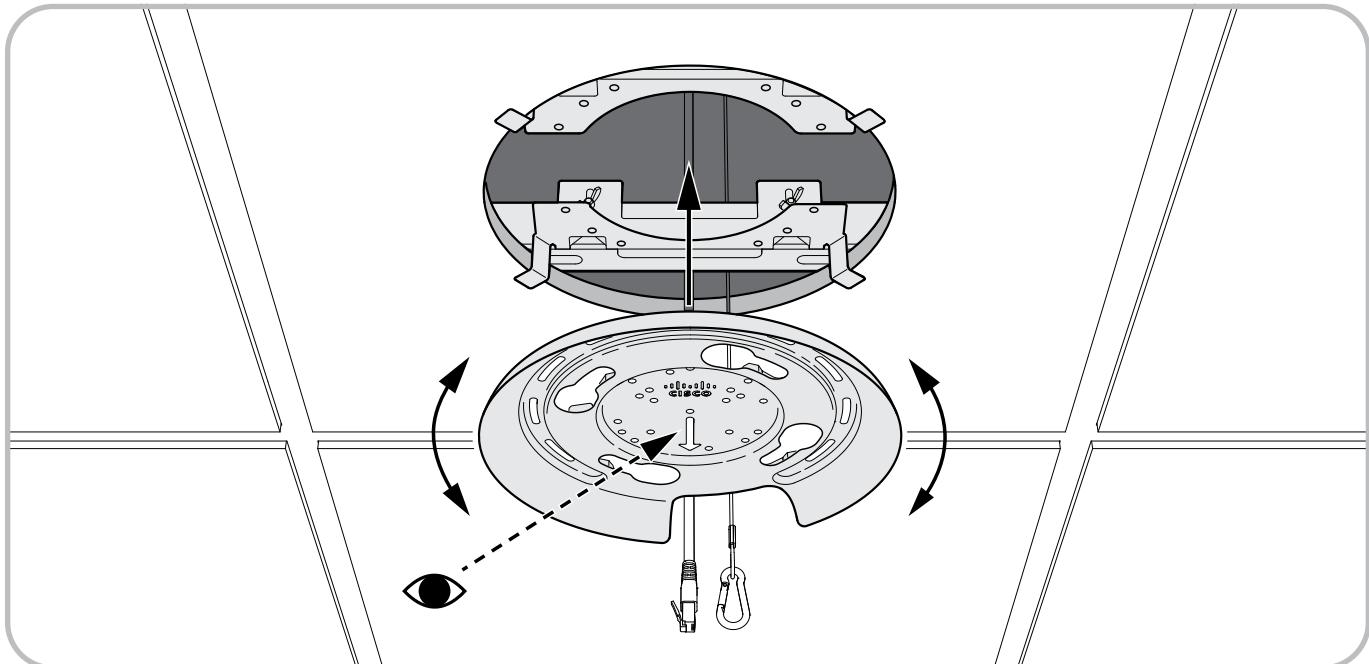

Adjust the bracket height so that the hooks are flush with the outside of the ceiling tile. Tighten the frame wingnuts firmly.

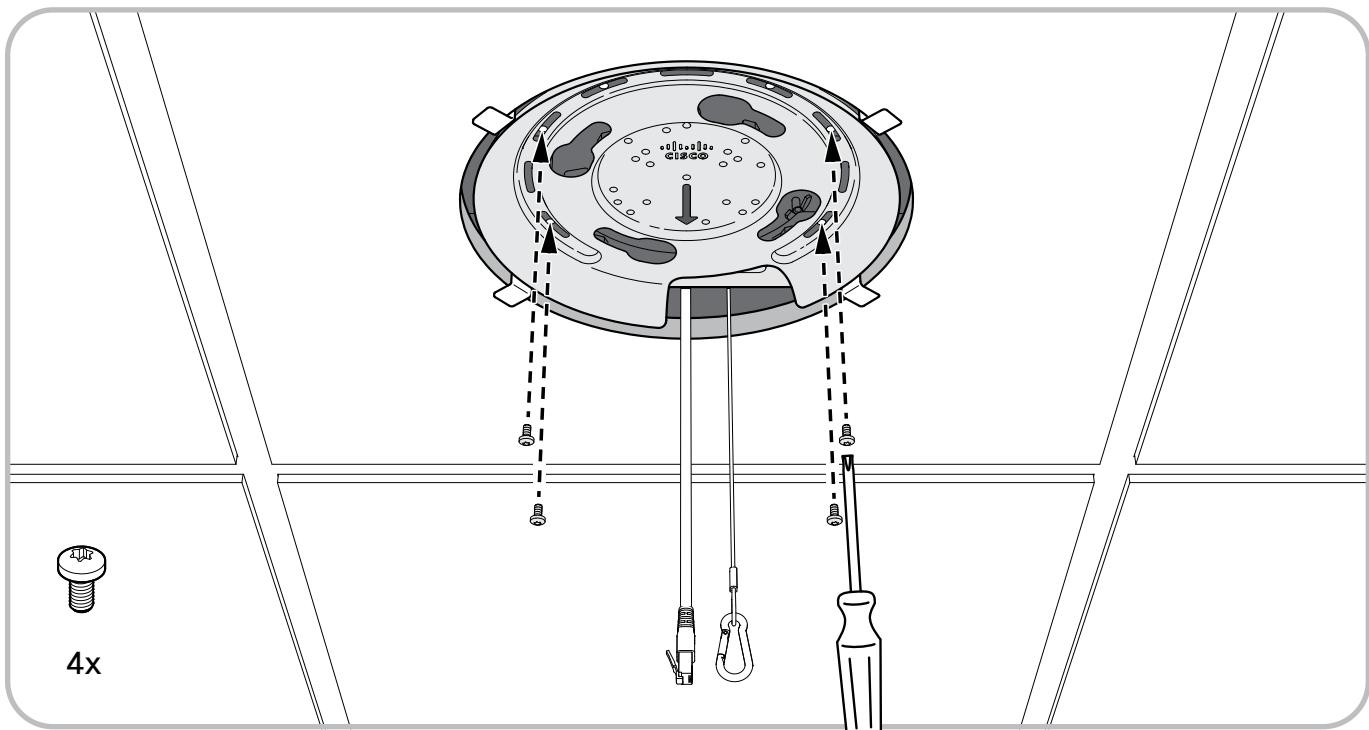

## 8 Mount the bowl

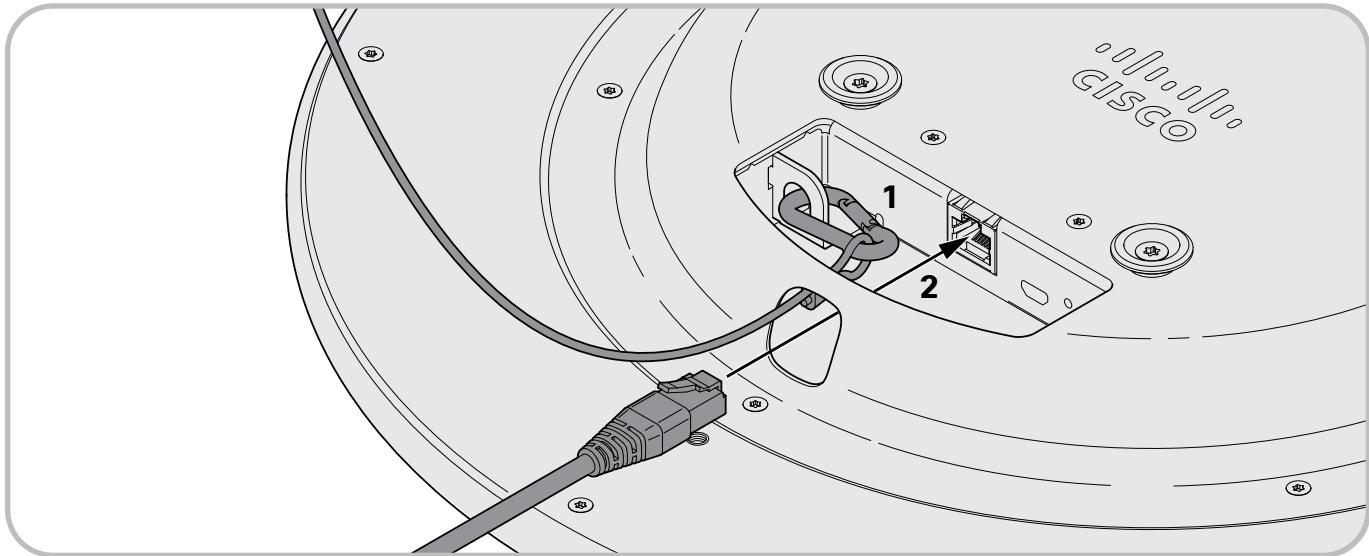

Position the bowl so the arrow points at the main screen.  
Make sure the cables go through the cable duct.

Fasten the bowl to four of the frame holes.  
If four holes don't align, revisit step 4.

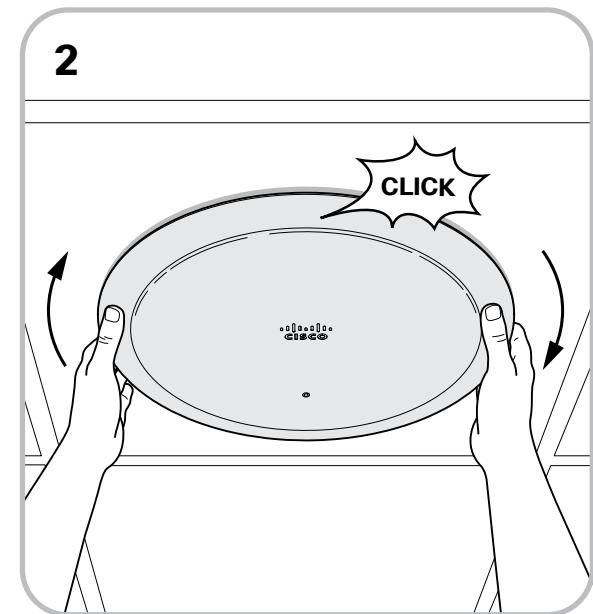

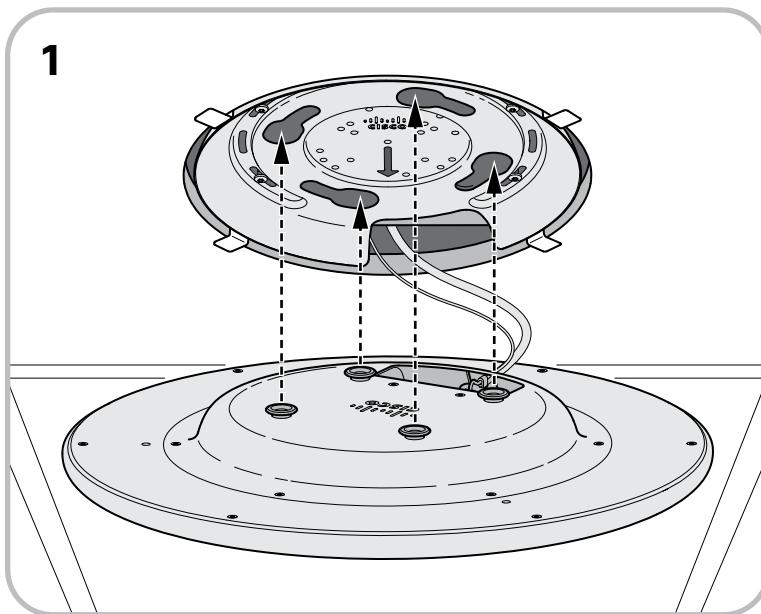

## 9 Connect the safety tether and ethernet cable to the microphone

## 10 Attach the microphone

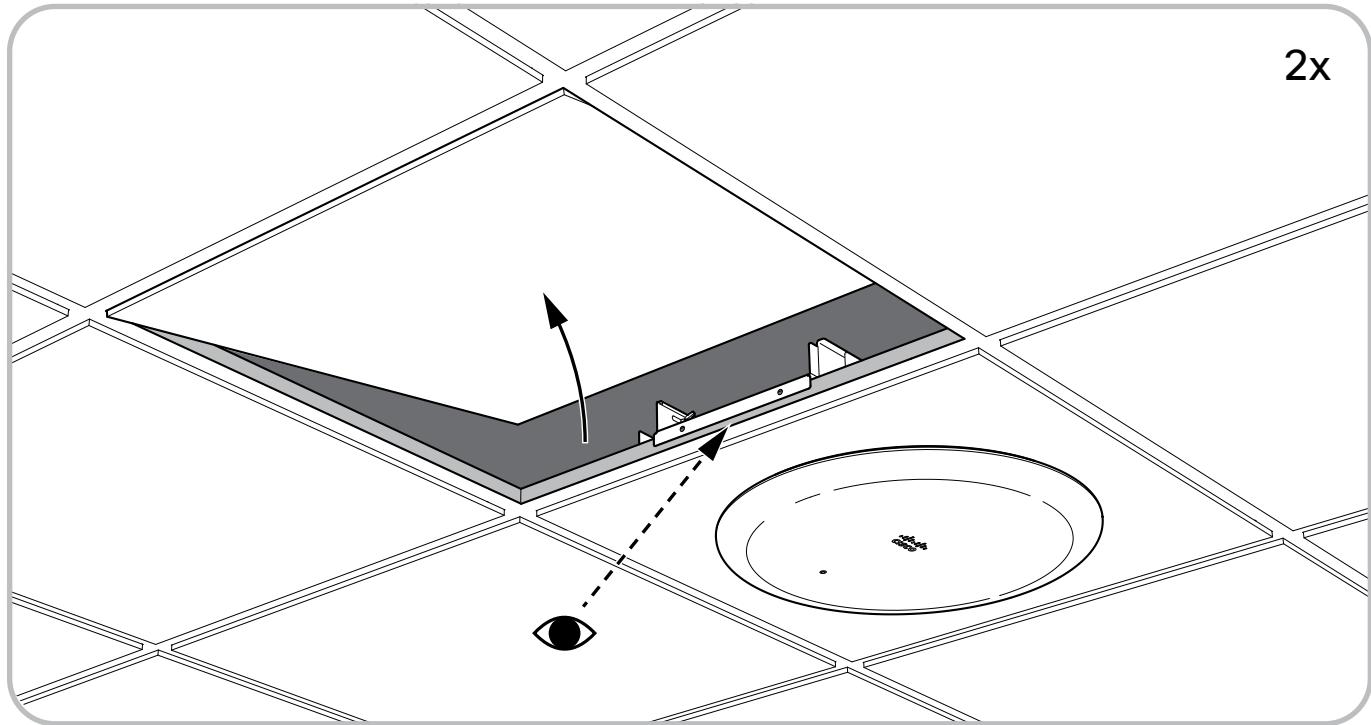

Place the microphone against the bowl so the interface discs enter the holes. Turn the microphone clockwise until it clicks into place. Try not to push the ceiling tile out of place.

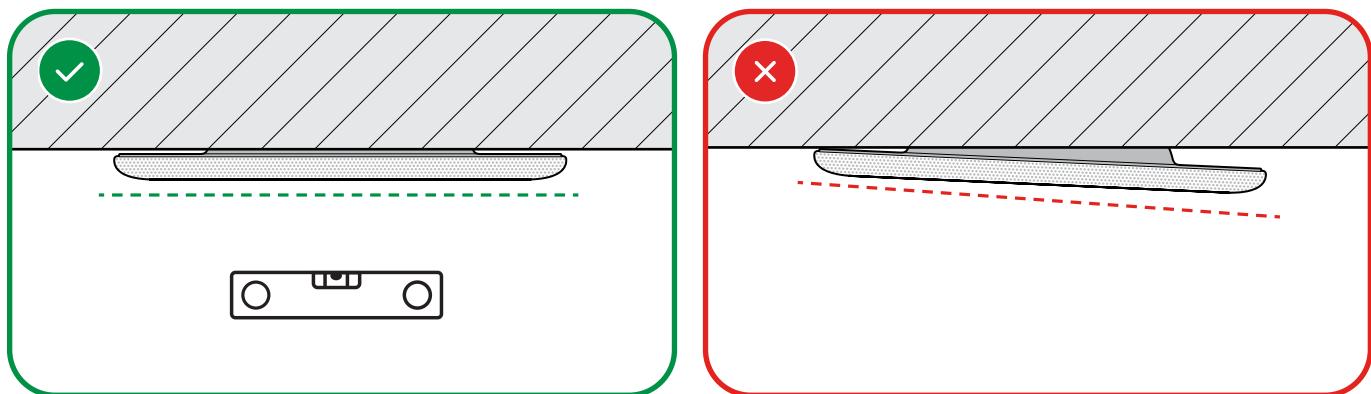

If you decide to remove the microphone, turn it counterclockwise until it disconnects from the bowl.

## 11 Ensure correct placement

 Lift the adjacent tile to check that the frame is correctly in position.

 Make sure the microphone is flush with the ceiling all the way around.

## 12 Continue the setup

**B**

## Wire Suspension

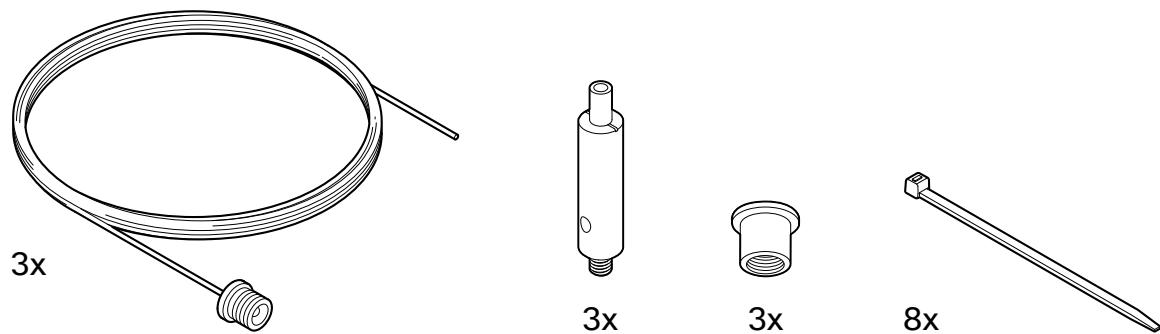

### Before you begin:

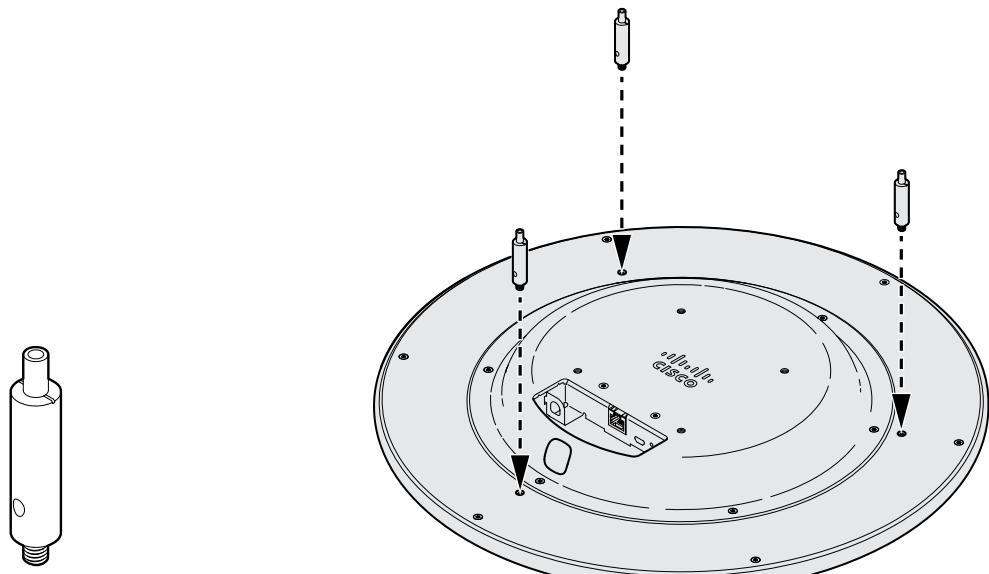

- Read the Room Preparation Guidelines.
- The microphone weighs 2.7 kg/5 lbs. Make sure the ceiling can safely support the product.
- Provide the appropriate screws and fasteners.
- Consider the positioning of the ethernet cable.
- Make sure you have the mounting kit shown here:

Wire Hanging Ceiling Mounting Kit  
(CS-MIC-CLGP-WHK)

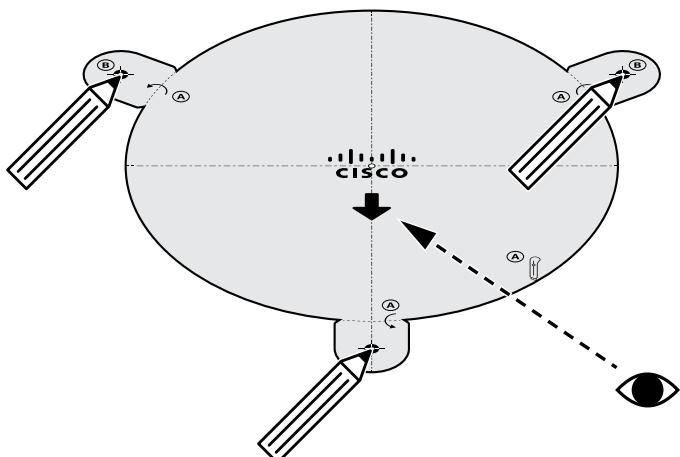

## 1 Attach the three wire grippers to the microphone

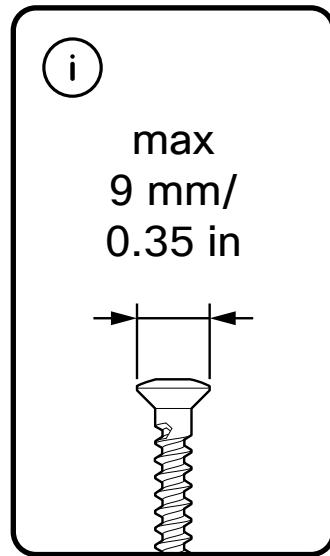

## 2 Mark where to fasten the three wires

Place the drilling template on the ceiling with the arrow pointing at the main screen.

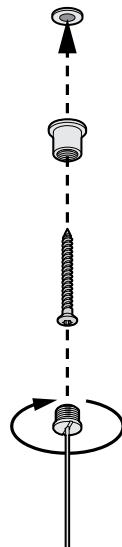

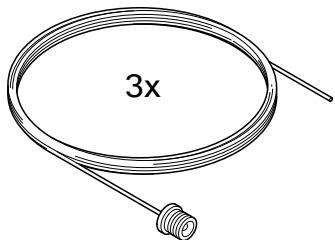

### 3 Drill the holes

Depending on the type of ceiling, you may need to use plugs.

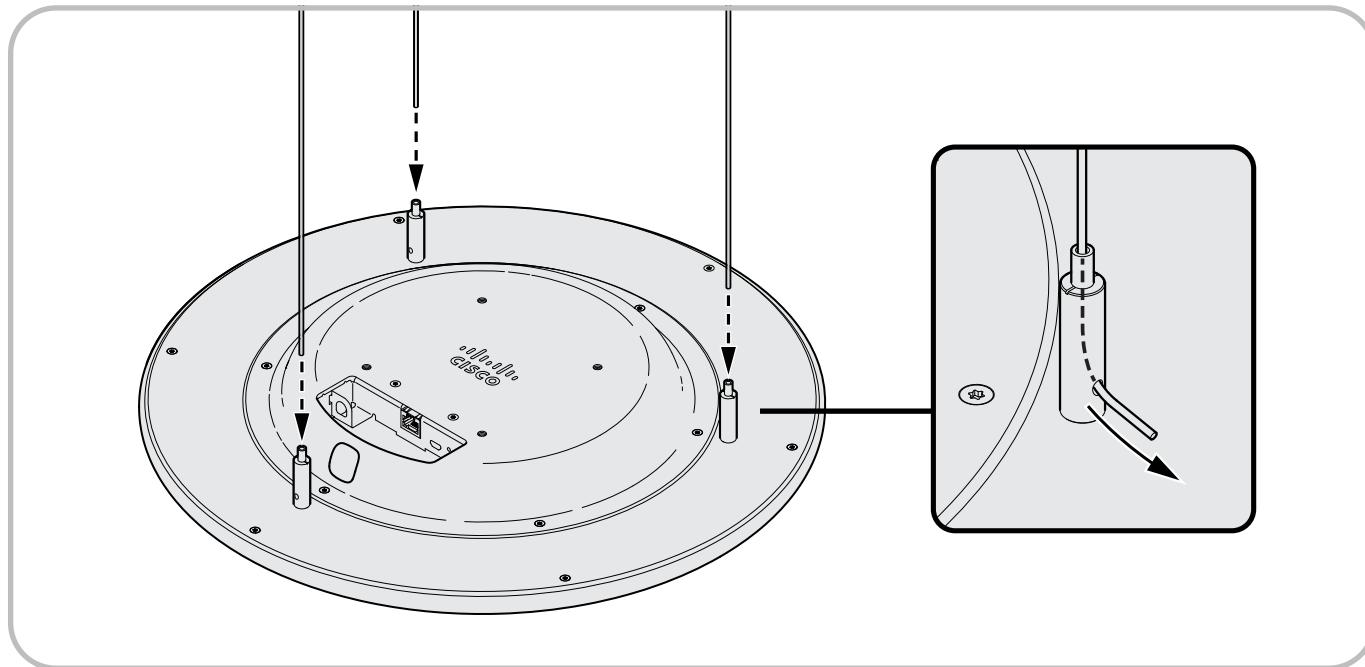

### 4 Attach the wires to the ceiling

Screw the ceiling mounts to the ceiling. Uncoil and attach the wires to the ceiling mounts.

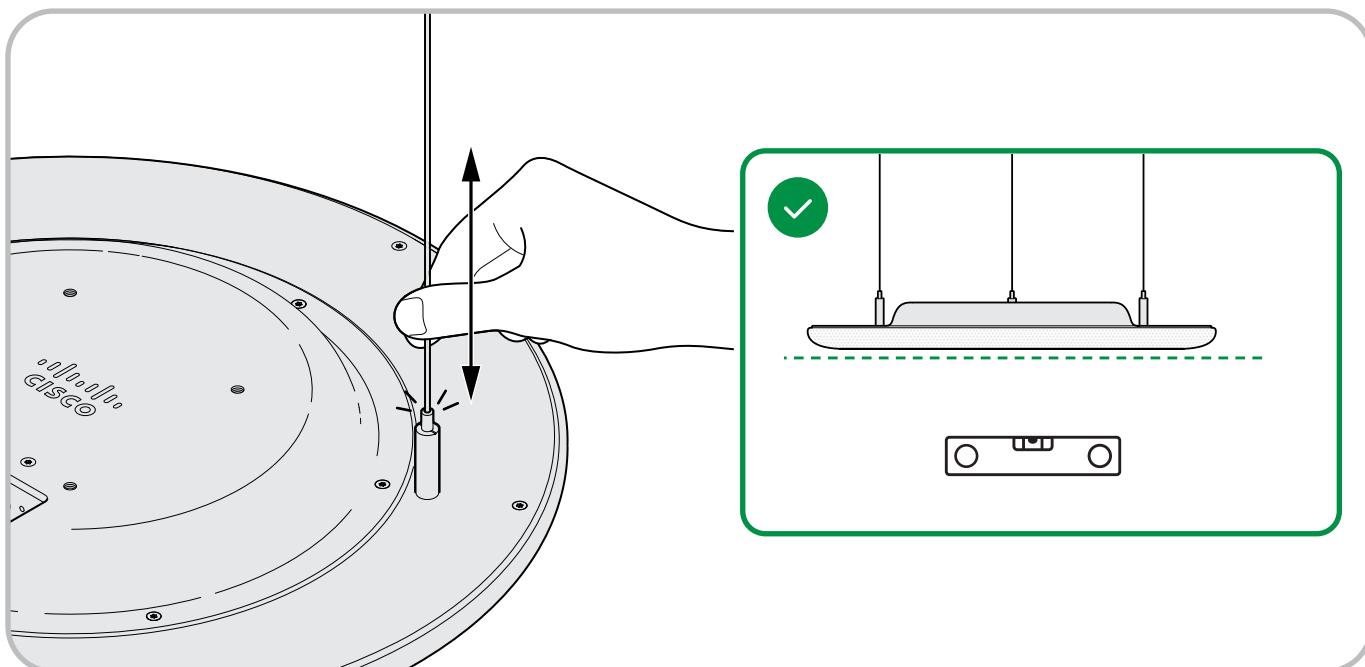

## 5 Attach the wires to the microphone

Set the microphone on a flat surface with the ethernet port pointing at the main screen. Push the wires into the wire grippers.

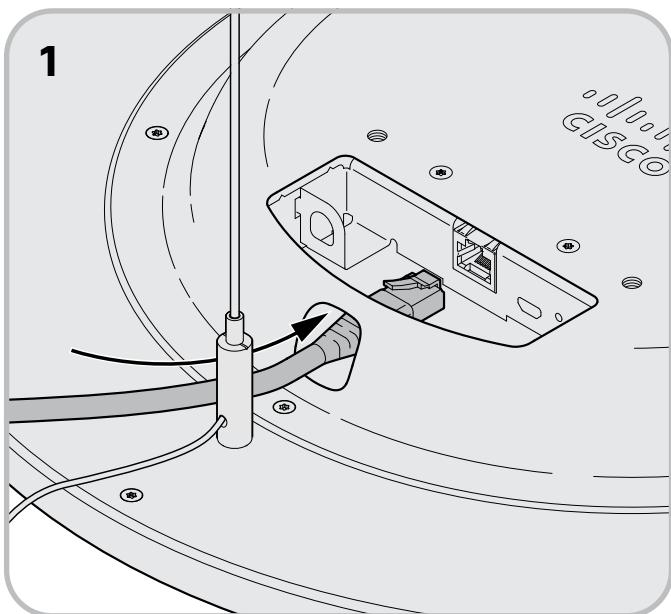

## 6 Adjust the microphone height

Pinch the top of the wire gripper and slide the wire up or down.

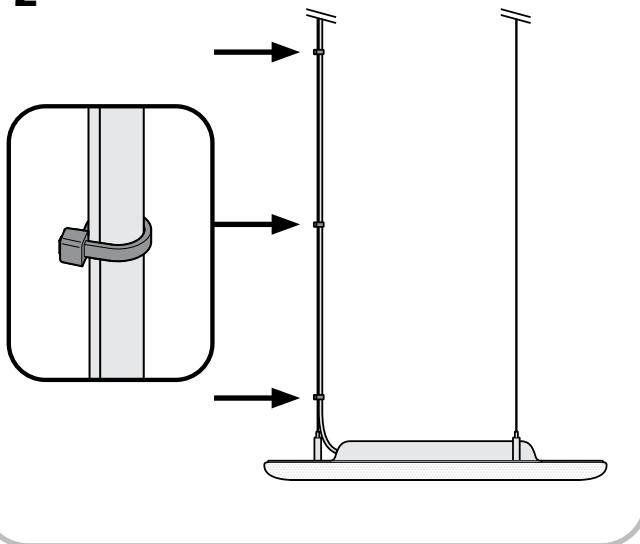

## 7 Connect the ethernet cable to the microphone

Use cable ties to fasten the cable to the closest wire.

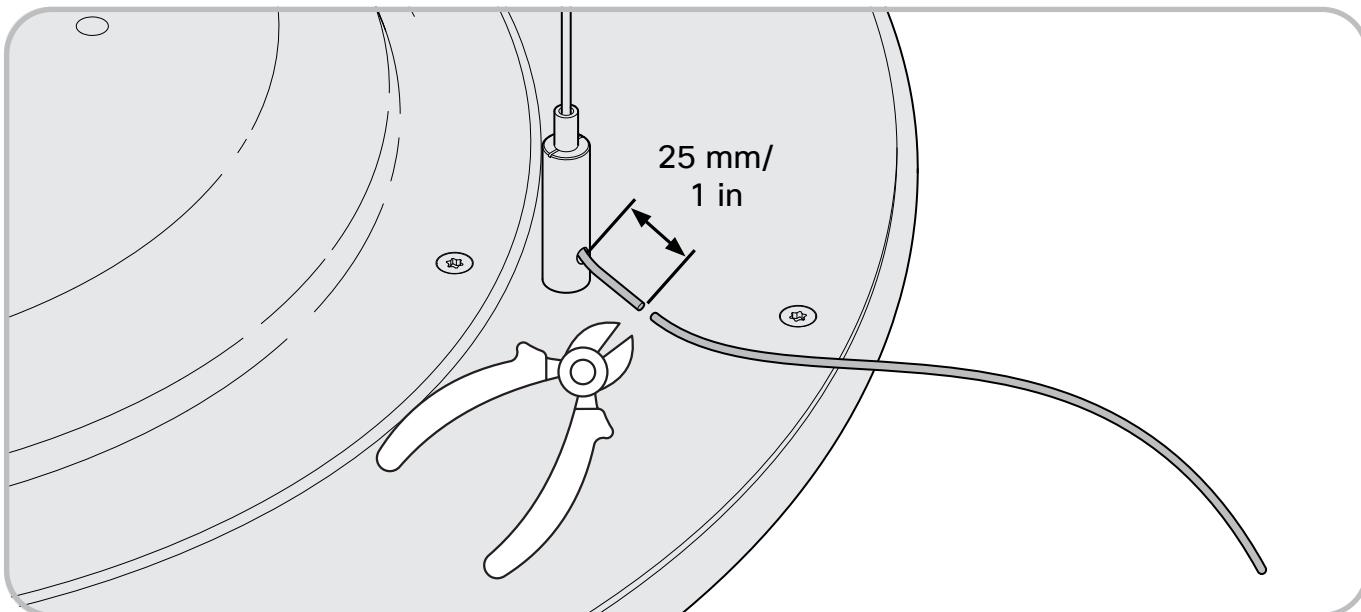

2

## 8 Trim the wires

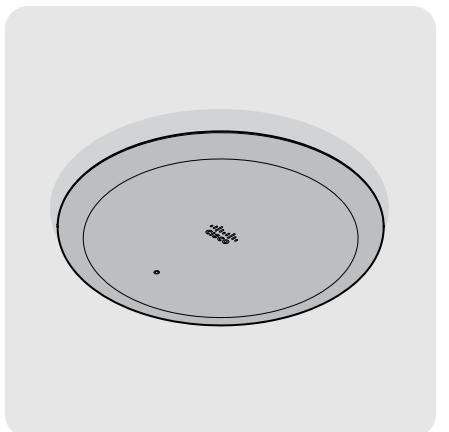

When you're satisfied with the microphone's height, cut the ends of the wires 25 mm/1 in from the wire grippers.

## 9 Continue the setup

# C

## Hard Ceiling

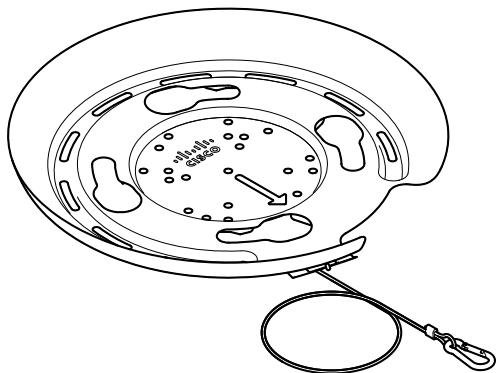

### Before you begin:

- Read the Room Preparation Guidelines.
- The microphone with bowl and interface disks weighs 2.8 kg/6 lbs. Make sure the ceiling can safely support the product.
- Provide the appropriate screws and fasteners.
- Consider the positioning of the ethernet cable.
- Make sure you have the mounting kit shown here:

Ceiling Bracket Mounting Kit

4x

## 1 Mark where the screws will go

Hold the bowl against the ceiling with the arrow pointing at the main screen.

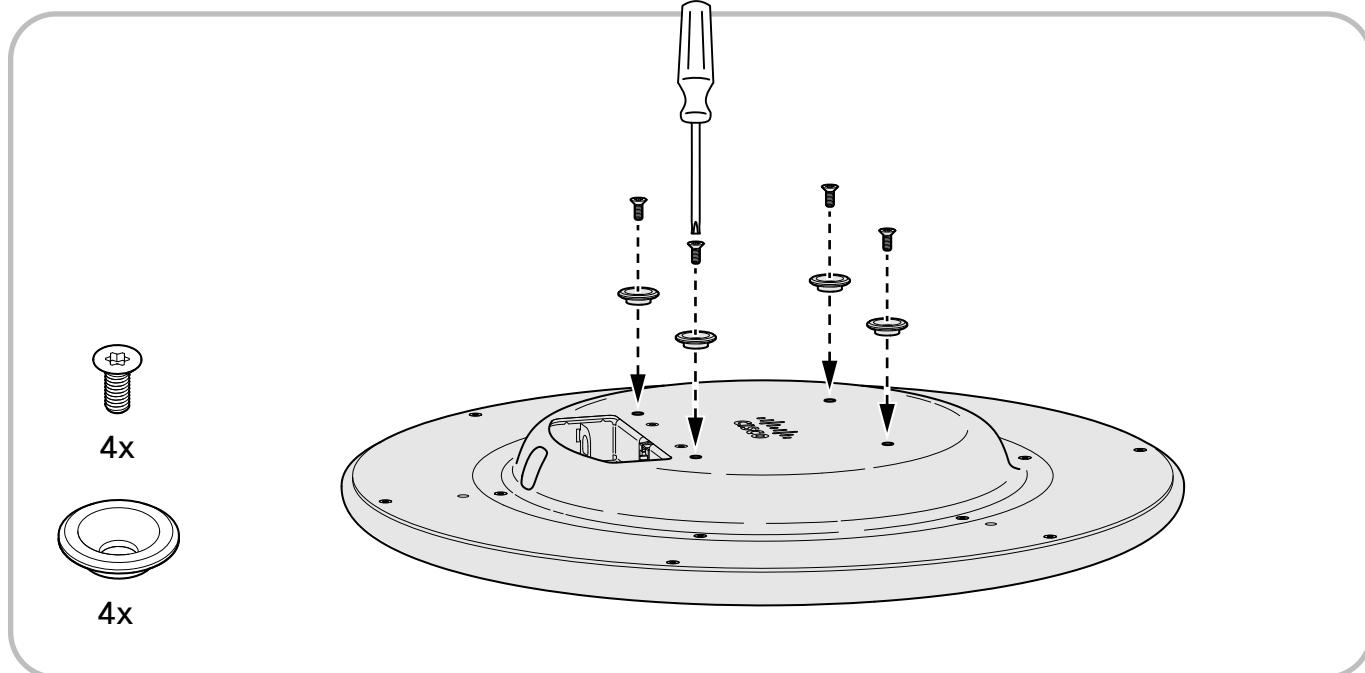

## 2 Drill the holes and mount the bowl

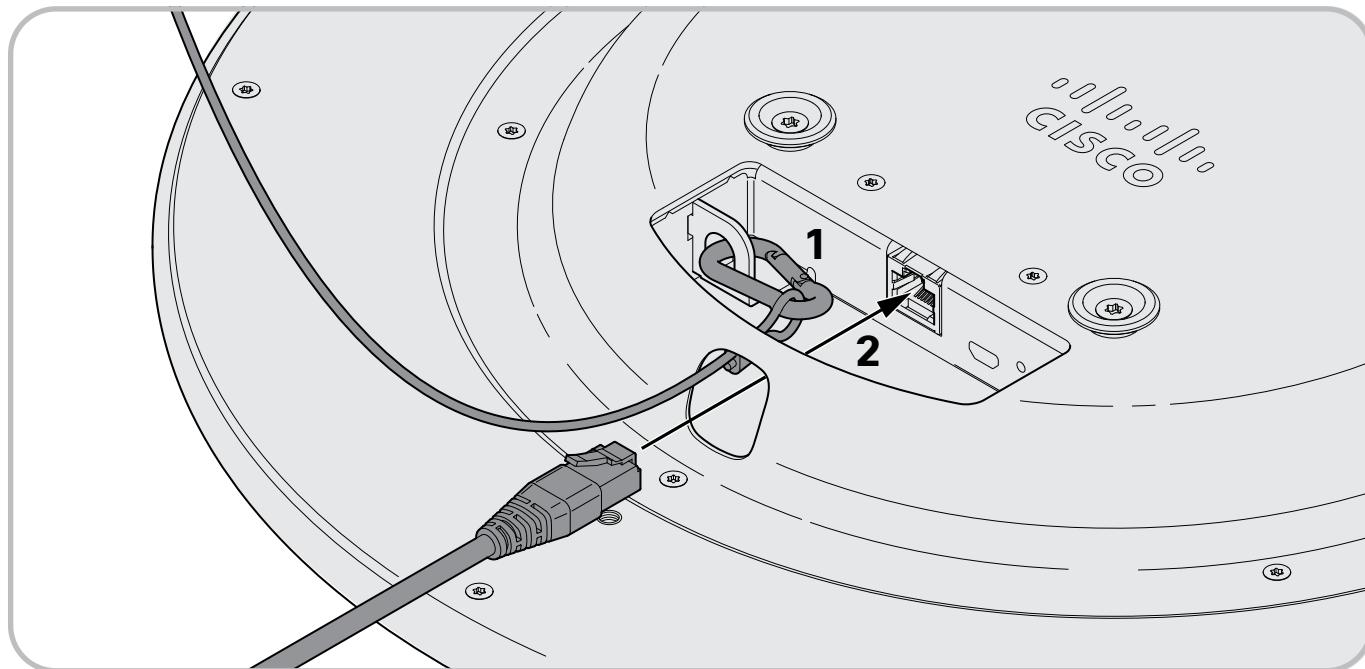

Depending on the type of ceiling, you may need to insert plugs.

### 3 Attach the four interface discs to the microphone

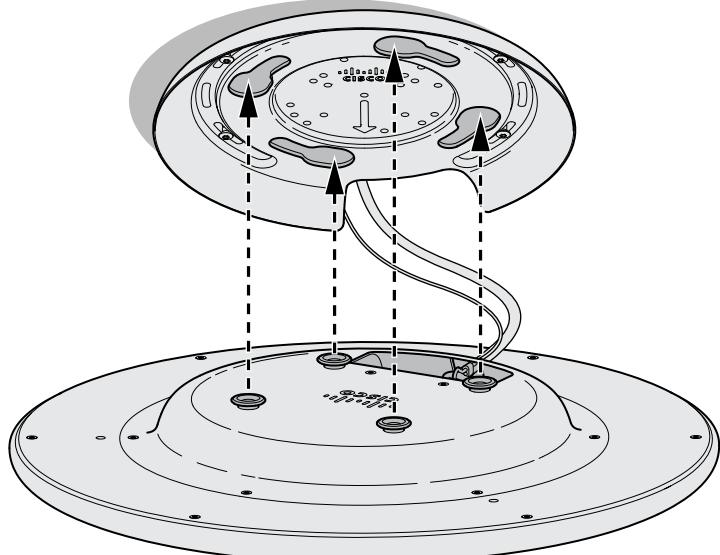

### 4 Connect the safety tether and ethernet cable to the microphone

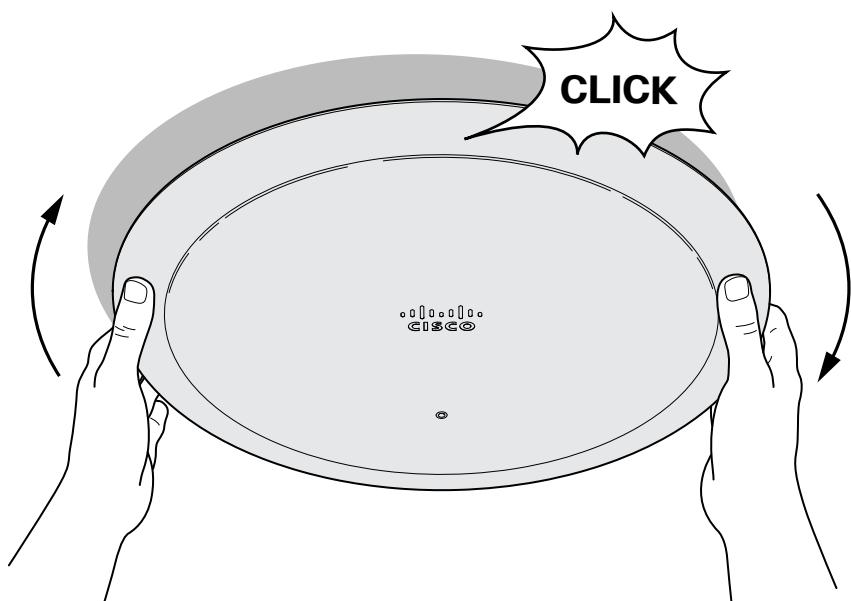

## 5 Attach the microphone

Place the microphone against the bowl so that the interface discs enter the holes. Turn the microphone clockwise until it clicks into place.

1

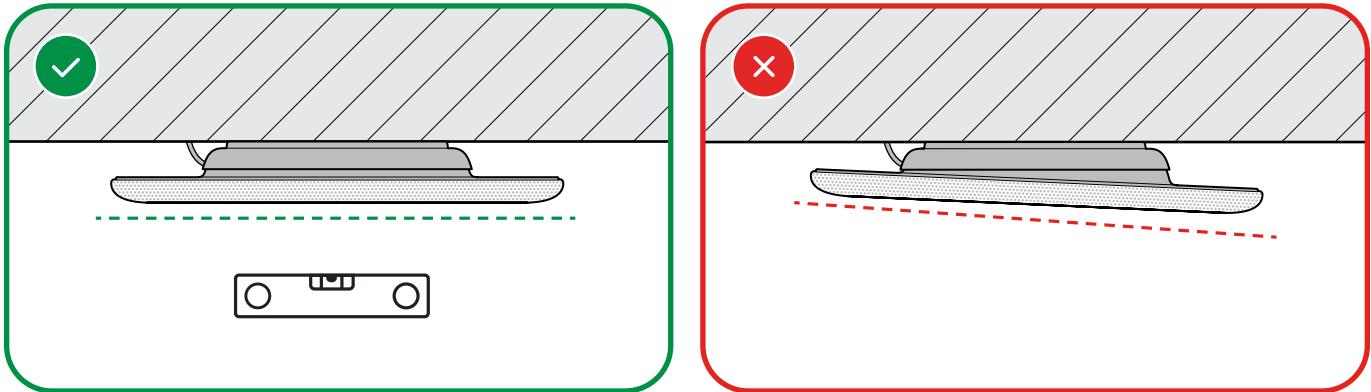

2

If you decide to remove the microphone, turn it counterclockwise until it disconnects from the bowl.

## 6 Ensure correct placement

 Make sure the microphone is flush with the ceiling all the way around.

## 7 Continue the setup

# Microphone setup

Connect the microphone to the PoE switch or the port on the video system. When the power is on, run the ‘External microphone voice tracking’ setup from the Device settings menu on the touch controller:

1. Open the Control panel on the touch controller.
2. Tap Device settings. Scroll to and tap Microphone.
3. Select ‘External microphone voice tracking’. Tap Setup.

When booting the microphone, the user facing LED on the front will show a steady white light. During setup, the LED will blink white when connecting or running updates. When those operations are complete the LED goes off.
