

Cisco TelePresence

Cisco on Cisco Technology Seminar

Suresha Bhat, Manager—Emerging Technology IT

Julie Nordquist, Program Manager—Cisco on Cisco (Host)

Agenda

Program Approach to TelePresence: Overview, Business Case and Technology Overview

Design Solution for Cisco

Architecture
Network

Deploy Solution

Readiness
Deployment
Experience (RRA, CTX)

Support and Management

Support Engineering
Metrics
Entitlement

TelePresence Technology Overview

Designing the Solution for Cisco

- Standards based TelePresence applications accommodate converged voice and video transmissions, such as:

IP telephony: Works with IP-based phones and call-processing systems from the major networking and telecommunications vendors.

Simplifies call launching using a Telephone instead of myriads of remote controls

TelePresence Technology Overview

Designing the Solution for Cisco

Groupware: Integration with enterprise groupware solutions (such as Microsoft Outlook and Lotus Notes) accommodates easy scheduling of meetings and access to corporate information

Services: They should enable easy scheduling, management, reporting, billing, and metrics applications to ensure proper tracking and bill-back of activity on the system, as well as real-time support services

TelePresence Technology Overview

Program Approach to Solution Architecture for Cisco

- Cisco is a first customer to TelePresence
- Target for an enterprise customer like Cisco
- Take a program approach with business case, deployment timeline and metrics and ROI targets
- Cisco-on-Cisco success story generation is key to adoption

Cisco TelePresence High Level Architecture

Cisco TelePresence High Level Architecture

Cisco QoS Strategy Overview

CBWFQ Is Applied on WAN Edge with 7 Classes of Service by Percentage
Traffic Classification Occurs at the LAN Access Edge with Voice VLAN
DSCP Been Trusted Like IP Phone (IPP5) and TelePresence (IPP4) and
VACL Is Utilized to Classify the Traffics in Data VLAN Like VTA (IPP2),
IP Communicator (IPP5), PC Back Up (IPP1), Etc.

Class of Service

Control (IPP 6/7): Routing Protocols, Telnet, SSH

Voice Bearer (LLQ IPP 5): Voice RTP

High Bandwidth Video (IPP 4): TelePresence RTP

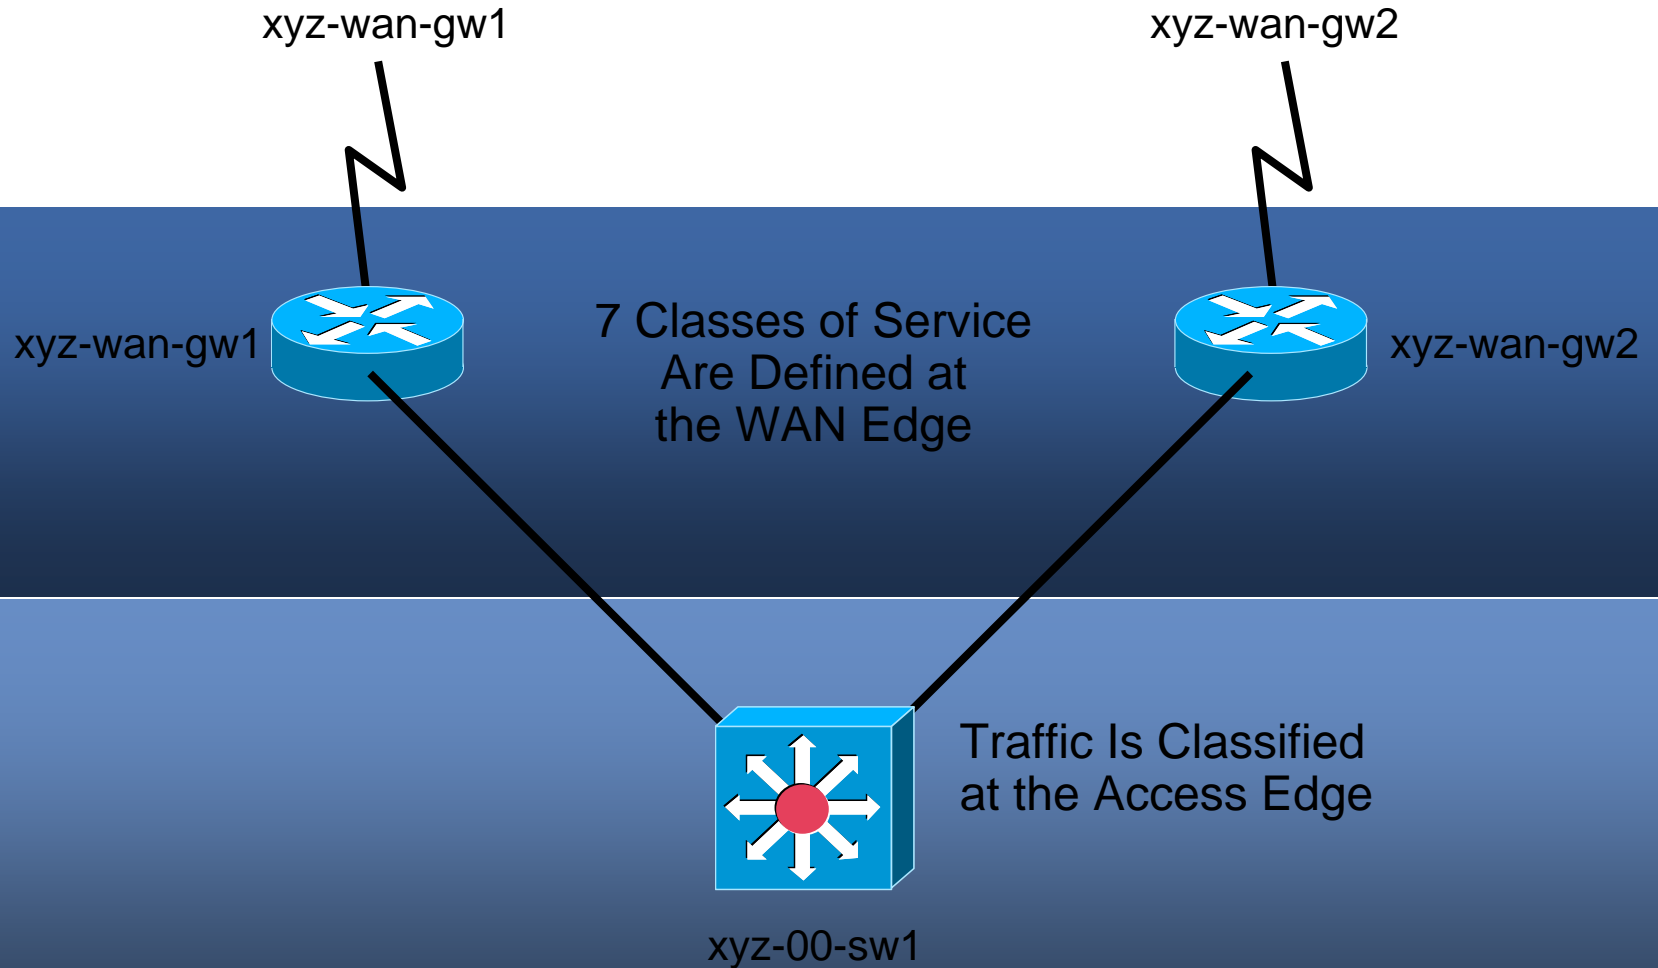

Signaling (IPP 3): Skinny, SIP, MGCP, H.323, Radius

Low Bandwidth Video (IPP 2): IPVC, VTA

Scavenger (IPP 1): PC Backups, CDN, Lab Traffic

Default (IPP 0): All Other Traffics

Generic Field Sales Office Topology

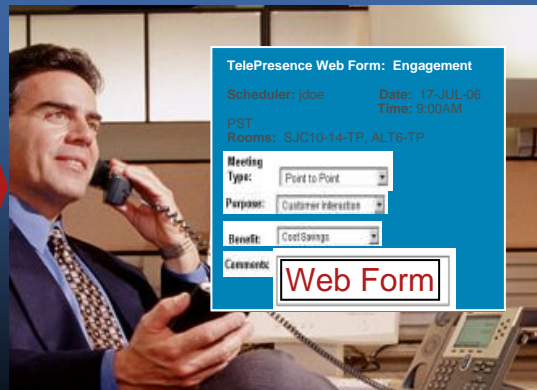

Cisco TelePresence Global Process Flow

Schedule TP Room w/Outlook

TP Justification

TP Coordinators Validate

Priority Due to Availability

1. Customers with Execs.
2. Customers demo
3. Partners/Customers demo
4. Executive Meetings
5. Internal Meetings
