extension function with body using dynamic")\npublic annotation class nativeSetter\n\n@Target(FUNCTION)\n@Deprecated("Use inline extension function with body using dynamic")\npublic annotation class nativeInvoke\n\n@Target(CLASS, FUNCTION, PROPERTY)\ninternal annotation class library(public

val name: String = "")\n\n@Target(CLASS)\ninternal annotation class marker\n\n**\n * Gives a declaration (a function, a property or a class) specific name in JavaScript.\n * This may be useful in the following cases:\n * * There are two functions for which the compiler gives same name in JavaScript, you can mark one with `@JsName(...)` to prevent the compiler from reporting error.\n * * You are writing a JavaScript library in Kotlin. The compiler produces mangled names for functions with parameters, which is unnatural for usual JavaScript developer.\n * You can put `@JsName(...)` on functions you want to be available from JavaScript.\n * * For some reason you want to rename declaration, e.g. there's common term in JavaScript for a concept provided by the declaration, which is uncommon in Kotlin.\n * Example:\n * ``` kotlin\n * class Person(val name: String) {\n * fun hello() {\n * println("Hello \$name!")\n * }\n * }\n * @JsName("helloWithGreeting")\n * fun hello(greeting: String) {\n * println("\$greeting \$name!")\n * }\n * }\n * ```\n * @property name the name which compiler uses both for declaration itself and for all references to the declaration.\n * It's required to denote a valid JavaScript identifier.\n *\n */\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS, FUNCTION, PROPERTY, CONSTRUCTOR, PROPERTY_GETTER, PROPERTY_SETTER)\npublic actual annotation class JsName(actual val name: String)\n\n**\n * Denotes an `external` declaration that must be imported from native JavaScript library.\n *\n * The compiler produces the code relevant for the target module system, for example, in case of CommonJS,\n * it will import the declaration via the `require(...)` function.\n *\n * The annotation can be used on top-level external declarations (classes, properties, functions) and files.\n * In case of file (which can't be `external`) the following rule applies:

all the declarations in the file must be `external`. By applying `@JsModule(...)` on a file you tell the compiler to import a JavaScript object that contain all the declarations from the file.\n *\n * Example:\n * ``` kotlin\n * @JsModule("jquery")\n * external abstract class JQuery() {\n * // some declarations here\n * }\n *\n * @JsModule("jquery")\n * external fun JQuery(element: Element): JQuery\n * ```\n * @property import name of a module to import declaration from.\n * It is not interpreted by the Kotlin compiler, it's passed as is directly to the target module system.\n *\n * @see JsNonModule\n *\n */\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS, PROPERTY, FUNCTION, FILE)\npublic annotation class JsModule(val import: String)\n\n**\n * Denotes an `external` declaration that can be used without module system.\n *\n * By default, an `external` declaration is available regardless your target module system.\n *\n * However, by applying [JsModule] annotation you can make a declaration unavailable to plain module system.\n * Some JavaScript libraries are distributed both as a standalone downloadable piece of JavaScript and as a module available as an npm package.\n * To tell the Kotlin compiler to accept both cases, you can augment [JsModule] with the `@JsNonModule` annotation.\n *\n * For example:\n * ``` kotlin\n * @JsModule("jquery")\n * @JsNonModule\n * @JsName("\$")\n * external abstract class JQuery() {\n * // some declarations here\n * }\n *\n * @JsModule("jquery")\n * @JsNonModule\n * @JsName("\$")\n * external fun JQuery(element: Element): JQuery\n * ```\n * @see JsModule\n *\n */\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS, PROPERTY, FUNCTION, FILE)\npublic annotation class JsNonModule\n\n**\n * Adds prefix to `external` declarations in a source file.\n *\n * JavaScript does not have concept of packages (namespaces). They are usually emulated by nested objects.\n * The compiler turns references to `external` declarations either to plain unprefix names (in case of plain modules)\n * or to plain imports.\n * However, if a JavaScript library provides its declarations in packages, you won't be satisfied with this.\n * You can tell the compiler to generate additional prefix before references to `external` declarations using the `@JsQualifier(...)` annotation.\n *\n * Note that a file marked with the `@JsQualifier(...)` annotation can't contain non-`external` declarations.\n *\n * Example:\n * ```\n * @file:JsQualifier("my.jsPackageName")\n * ```

```

package some.kotlinPackage\n * \n * external fun foo(x: Int)\n * \n * external fun bar(): String\n * ``\n * \n *
@property value the qualifier to add to the declarations in the generated code.\n *      It must be a sequence of
valid JavaScript identifiers separated by the `.` character.\n *      Examples of valid qualifiers are: `foo`,
`bar.Baz`, `_$0.f`.\n * \n * @see JsModule\n
*\n *@Retention(AnnotationRetention.BINARY)\n @Target(AnnotationTarget.FILE)\n public
annotation class JsQualifier(val value: String)\n /**\n * Exports top-level declaration on JS platform.\n * \n *
Compiled module exposes declarations that are marked with this annotation without name mangling.\n * \n * This
annotation can be applied to either files or top-level declarations.\n * \n * It is currently prohibited to export the
following kinds of declarations:\n * \n * * `expect` declarations\n * * inline functions with reified type
parameters\n * * suspend functions\n * * secondary constructors without `@JsName`\n * * extension
properties\n * * enum classes\n * * annotation classes\n * \n * Signatures of exported declarations must only
contain "exportable" types:\n * \n * * `dynamic`, `Any`, `String`, `Boolean`, `Byte`, `Short`, `Int`, `Float`,
`Double`\n * * `BooleanArray`, `ByteArray`, `ShortArray`, `IntArray`, `FloatArray`, `DoubleArray`\n * *
`Array<exportable-type>`\n * * Function types with exportable
parameters and return types\n * * `external` or `@JsExport` classes and interfaces\n * * Nullable counterparts of
types above\n * * Unit return type. Must not be nullable\n * \n * This annotation is experimental, meaning that
restrictions mentioned above are subject to change.\n

kotlin.collections\n\n/**\n * Represents a source of elements with a [keyOf] function, which can be applied to each

```

element to get its key.
 * A [Grouping] structure serves as an intermediate step in group-and-fold operations:
 * they group elements by their keys and then fold each group with some aggregating operation.
 * It is created by attaching `keySelector: (T) -> K` function to a source of elements.
 * To get an instance of [Grouping] use one of `groupingBy`

```
extension functions:
- [Iterable.groupingBy]
- [Sequence.groupingBy]
- [Array.groupingBy]
- [CharSequence.groupingBy]

For the list of group-and-fold operations available, see the [extension functions](#extension-functions) for `Grouping`.

@SinceKotlin("1.1")
public interface Grouping<T, out K> {
    /** Returns an [Iterator] over the elements of the source of this grouping. */
    fun sourceIterator(): Iterator<T>
    /** Extracts the key of an [element]. */
    fun keyOf(element: T): K
}

Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in a new map.

The key for each element is provided by the [Grouping.keyOf] function.

@param operation function is invoked on each element with the following parameters:
- `key`: the key of the group this element belongs to;
- `accumulator`: the current value of the accumulator of the group, can be `null` if it's the first `element` encountered in the group;
- `element`: the element from the source being aggregated;
- `first`: indicates whether it's the first `element` encountered in the group.

@return a [Map] associating the key of each group with the result of aggregation of the group elements.

@sample
samples.collections.Grouping.aggregateByRadix

@SinceKotlin("1.1")
public inline fun <T, K, R> Grouping<T, K>.aggregate(
    operation: (key: K, accumulator: R?, element: T, first: Boolean) -> R): Map<K, R> {
    return aggregateTo(mutableMapOf<K, R>(), operation)
}

Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in the given [destination] map.

The
```

```
key for each element is provided by the [Grouping.keyOf] function.

@param operation a function that is invoked on each element with the following parameters:
- `key`: the key of the group this element belongs to;
- `accumulator`: the current value of the accumulator of the group, can be `null` if it's the first `element` encountered in the group;
- `element`: the element from the source being aggregated;
- `first`: indicates whether it's the first `element` encountered in the group.

If the [destination] map already has a value corresponding to some key, then the elements being aggregated for that key are never considered as `first`.

@return the [destination] map associating the key of each group with the result of aggregation of the group elements.

@sample
samples.collections.Grouping.aggregateByRadixTo

@SinceKotlin("1.1")
public inline fun <T, K, R, M : MutableMap<in K, R>> Grouping<T, K>.aggregateTo(
    destination: M,
    operation: (key: K, accumulator: R?, element: T, first: Boolean) -> R): M {
    for (e in this.sourceIterator()) {
        val key = keyOf(e)
        val accumulator = destination[key]
        destination[key] = operation(key, accumulator, e, accumulator == null && !destination.containsKey(key))
    }
    return destination
}

Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in a new map.

An initial value of accumulator is provided by [initialValueSelector] function.

@param initialValueSelector a function that provides an initial value of accumulator for each group.

It's invoked with parameters:
- `key`: the key of the group;
- `element`: the first element being encountered in that group.

@param operation a function that is invoked on each element with the following parameters:
- `key`: the key of the group this element belongs to;
- `accumulator`: the current value of the accumulator of the group;
- `element`: the element from the source being accumulated.

@return a [Map] associating the key of each group with the result of accumulating the group elements.

@sample
samples.collections.Grouping.foldByEvenLengthWithComputedInitialValue

@SinceKotlin("1.1")
public inline fun <T, K, R> Grouping<T, K>.fold(
    initialValueSelector: (key: K, element: T) -> R,
    operation: (key: K, accumulator: R, element: T) -> R): Map<K, R> =
    @Suppress("UNCHECKED_CAST")
    aggregate { key, acc, e, first -> operation(key, if (first) initialValueSelector(key, e) else acc as R, e) }

Groups
```

elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in the given [destination] map. An initial value of accumulator is provided by [initialValueSelector] function.

@param initialValueSelector a function that provides an initial value of accumulator for each group. It's invoked with parameters:

- key: the key of the group;
- element: the first element being encountered in that group.

If the [destination] map already has a value corresponding to some key, that value is used as an initial value of the accumulator for that group and the [initialValueSelector] function is not called for that group.

@param operation a function that is invoked on each element with the following parameters:

- key: the key of the group this element belongs to;
- accumulator: the current value of the accumulator of the group;
- element: the element from the source being accumulated.

@return the [destination] map associating the key of each group with the result of accumulating the group elements.

```

```

actual inline fun ln1p(x: Double): Double = nativeMath.log1p(x)

* Rounds the given value [x] to an integer towards positive infinity.
 @return the smallest double value that is greater than or equal to the given value [x] and is a mathematical integer.
 Special cases: - `ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun ceil(x: Double): Double = nativeMath.ceil(x)

* Rounds the given value [x] to an integer towards negative infinity.
 @return the largest double value that is smaller than or equal to the given value [x] and is a mathematical integer.
 Special cases: - `floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun floor(x: Double): Double = nativeMath.floor(x)

* Rounds the given value [x] to an integer towards zero.
 @return the value [x] having its fractional part truncated.

* Special cases: - `truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun truncate(x: Double): Double = nativeMath.trunc(x)

* Rounds the given value [x] towards the closest integer with ties rounded towards even integer.
 Special cases: - `round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

@SinceKotlin("1.2")\npublic actual fun round(x: Double): Double {
 if (x % 0.5 != 0.0) {
 return nativeMath.round(x)
 }
 val floor = floor(x)
 return if (floor % 2 == 0.0) floor else ceil(x)
}

* Returns the absolute value of the given value [x].
 Special cases: - `abs(NaN)` is `NaN`
 @see absoluteValue extension property for [Double]

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun abs(x: Double): Double = nativeMath.abs(x)

* Returns the sign of the given value [x]:
 - `1.0` if the value is positive
 - `0.0` if the value is zero
 - `-1.0` if the value is negative
 Special case: - `sign(NaN)` is `NaN`

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun sign(x: Double): Double = nativeMath.sign(x)

* Returns the smaller of two values.
 If either value is `NaN`, then the result is `NaN`.

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun min(a: Double, b: Double): Double = nativeMath.min(a, b)

* Returns the greater of two values.
 If either value is `NaN`, then the result is `NaN`.

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun max(a: Double, b: Double): Double = nativeMath.max(a, b)

// extensions

* Raises this value to the power [x].
 Special cases: - `b.pow(0.0)` is `1.0`
 - `b.pow(1.0) == b`
 - `b.pow(NaN)` is `NaN`
 - `NaN.pow(x)` is `NaN` for `x != 0.0`
 - `b.pow(Inf)` is `NaN` for `abs(b) == 1.0`
 - `b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer

@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun Double.pow(x: Double): Double = nativeMath.pow(this, x)

 Special cases:
 $\text{floor}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

* @see [ln] function
`fun floor(x: Float): Float = nativeMath.floor(x.toDouble()).toFloat()`
 Rounds the given value [x] to an integer towards zero.
 @return the value [x] having its fractional part truncated.
 Special cases:
 $\text{truncate}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

* @see [ln] function
`fun truncate(x: Float): Float = truncate(x.toDouble()).toFloat()`
 Rounds the given value [x] towards the closest integer with ties rounded towards even integer.
 Special cases:
 $\text{round}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

* @see [ln] function
`fun round(x: Float): Float = round(x.toDouble()).toFloat()`
 Returns the absolute value of the given value [x].
 Special cases:
 $\text{abs}(\text{NaN})$ is NaN
 @see absoluteValue extension property for [Float]

* @see [ln] function
`fun abs(x: Float): Float = nativeMath.abs(x.toDouble()).toFloat()`
 Returns the sign of the given value [x]:
 -1.0 if the value is negative,
 zero if the value is zero,
 1.0 if the value is positive
 Special case:
 $\text{sign}(\text{NaN})$ is NaN

* @see [ln] function
`fun sign(x: Float): Float = nativeMath.sign(x.toDouble()).toFloat()`
 Returns the smaller of two values.
 If either value is NaN , then the result is NaN .

* @see [ln] function
`fun min(a: Float, b: Float): Float = nativeMath.min(a, b).toFloat()`
 Returns the greater of two values.
 If either value is NaN , then the result is NaN .

* @see [ln] function
`fun max(a: Float, b: Float): Float = nativeMath.max(a, b).toFloat()`
 Raises this value to the power [x].
 Special cases:
 $b.\text{pow}(0.0)$ is 1.0
 $b.\text{pow}(1.0) == b$
 $b.\text{pow}(\text{NaN})$ is NaN
 $\text{NaN}.\text{pow}(x)$ is NaN for $x != 0.0$
 $b.\text{pow}(\text{Inf})$ is NaN for $\text{abs}(b) == 1.0$
 $b.\text{pow}(x)$ is NaN for $b < 0$ and x is finite and not an integer

* @see [ln] function
`fun Float.pow(x: Float): Float = nativeMath.pow(this.toDouble(), x.toDouble()).toFloat()`
 Raises this value to the integer power [n].
 See the other overload of [pow] for details.

* @see [ln] function
`fun Float.pow(n: Int): Float = nativeMath.pow(this.toDouble(), n.toDouble()).toFloat()`
 Returns the absolute value of this value.
 Special cases:
 $\text{NaN}.\text{absoluteValue}$ is NaN
 @see abs function

* @see [ln] function
`val Float.absoluteValue: Float get() = nativeMath.abs(this.toDouble()).toFloat()`
 Returns the sign of this value:
 -1.0 if the value is negative,
 zero if the value is zero,
 1.0 if the value is positive
 Special case:
 $\text{NaN}.\text{sign}$ is NaN

* @see [ln] function
`val Float.sign: Float get() = nativeMath.sign(this.toDouble()).toFloat()`

`nativeMath.sign(this.toDouble()).toFloat()`
 Returns this value with the sign bit same as of the [sign] value.
 If [sign] is `NaN` the sign of the result is undefined.

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline fun Float.withSign(sign: Float): Float = this.toDouble().withSign(sign.toDouble()).toFloat()

Returns this value with the sign bit same as of the [sign] value.

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline fun Float.withSign(sign: Int): Float = this.toDouble().withSign(sign.toDouble()).toFloat()

Rounds this [Float] value to the nearest integer and converts the result to [Int].
 Ties are rounded towards positive infinity.
 Special cases:
 - `x.roundToInt() == Int.MAX_VALUE` when `x > Int.MAX_VALUE`
 - `x.roundToInt() == Int.MIN_VALUE` when `x < Int.MIN_VALUE`
 @throws `IllegalArgumentException` when this value is `NaN`

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline fun Float.roundToInt(): Int = toDouble().roundToInt()

Rounds this [Float] value to the nearest integer and converts the result to [Long].
 Ties are rounded towards positive infinity.
 Special cases:
 - `x.roundToLong() == Long.MAX_VALUE` when `x > Long.MAX_VALUE`
 - `x.roundToLong() == Long.MIN_VALUE` when `x < Long.MIN_VALUE`
 @throws `IllegalArgumentException` when this value is `NaN`

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline fun Float.roundToLong(): Long = toDouble().roundToLong()

`endregion`
`region`

=====
`abs`
 Returns the absolute value of the given value [n].
 Special cases:
 - `abs(Int.MIN_VALUE)` is `Int.MIN_VALUE` due to an overflow
 @see `absoluteValue` extension property for [Int]

`@SinceKotlin("1.2")`
`public`
 actual fun abs(n: Int): Int = if (n < 0) (-n or 0) else n

Returns the smaller of two values.

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline fun min(a: Int, b: Int): Int = nativeMath.min(a, b)

Returns the greater of two values.

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline fun max(a: Int, b: Int): Int = nativeMath.max(a, b)

Returns the absolute value of this value.
 Special cases:
 - `Int.MIN_VALUE.absoluteValue` is `Int.MIN_VALUE` due to an overflow
 @see `abs` function

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline val Int.absoluteValue: Int get() = abs(this)

Returns the sign of this value:
 - `-1` if the value is negative,
 - `0` if the value is zero,
 - `1` if the value is positive

`@SinceKotlin("1.2")`
`public`
 actual val Int.sign: Int get() = when {
 this < 0 -> -1
 this > 0 -> 1
 else -> 0
 }

Returns the absolute value of the given value [n].
 Special cases:
 - `abs(Long.MIN_VALUE)` is `Long.MIN_VALUE` due to an overflow
 @see `absoluteValue` extension property for [Long]

`@SinceKotlin("1.2")`
`public`
 actual fun abs(n: Long): Long = if (n < 0) -n else n

Returns the smaller of two values.

`@SinceKotlin("1.2")`
`Suppress("NOTHING_TO_INLINE")`
`public`
 actual inline fun min(a: Long, b: Long): Long = if (a <= b) a else b

Returns the greater of two values.

`@SinceKotlin("1.2")`
`Suppress("NOTHING_TO_INLINE")`
`public`
 actual inline fun max(a: Long, b: Long): Long = if (a >= b) a else b

Returns the absolute value of this value.
 Special cases:
 - `Long.MIN_VALUE.absoluteValue` is `Long.MIN_VALUE` due to an overflow
 @see `abs` function

`@SinceKotlin("1.2")`
`InlineOnly`
`public`
 actual inline val Long.absoluteValue: Long get() = abs(this)

Returns the sign of this value:
 - `-1` if the value is negative,
 - `0` if the value is zero,
 - `1` if the value is positive

`@SinceKotlin("1.2")`
`public`
 actual val Long.sign: Int get() = when {
 this < 0 -> -1
 this > 0 -> 1
 else -> 0

from the calls in the annotated function parameter of that function.\n *\n * When this annotation is placed on a
generic function parameter of a function,\n * it enables to infer the type arguments of that generic function from the
lambda body passed to that parameter.\n *\n * The calls that affect
inference are either members of the receiver type of an annotated function parameter or\n * extensions for that type.
The extensions must be themselves annotated with `@BuilderInference`. \n *\n * Example: we declare\n * ```\n * fun
<T> sequence(@BuilderInference block: suspend SequenceScope<T>().) -> Unit): Sequence<T>\n * ```\n * and use
it like\n * ```\n * val result = sequence { yield("result") }\n * ```\n * Here the type argument of the resulting
sequence is inferred to `String` from\n * the argument of the [SequenceScope.yield] function, that is called inside
the lambda passed to [sequence].\n *\n * Note: this annotation is experimental, see [ExperimentalTypeInference] on
how to opt-in for it.\n *\n @Target(VALUE_PARAMETER, FUNCTION,
PROPERTY)\n @Retention(AnnotationRetention.BINARY)\n @SinceKotlin("1.3")\n @ExperimentalTypeInferenc
e\n public annotation class BuilderInference\n\n\n/**\n * Enables overload selection based on the type of the value
returned from lambda argument.\n
*\n * When two or more function overloads have otherwise the same parameter lists that differ only in the return
type\n * of a functional parameter, this annotation enables overload selection by the type of the value returned
from\n * the lambda function passed to this functional parameter.\n *\n * Example:\n * ```\n *
@OverloadResolutionByLambdaReturnType\n * fun create(intProducer: () -> Int): Int\n * fun
create(doubleProducer: () -> Double): Double\n * val newValue = create { 3.14 }\n * ```\n *\n * The annotation
being applied to one of overloads allows to resolve this ambiguity by analyzing what value is returned\n * from the
lambda function.\n *\n * This annotation is also used to discriminate the annotated overloads in case if overload
selection still cannot\n * choose one of them even taking in account the result of lambda parameter analysis. In that
case a warning is reported.\n *\n * Note: this annotation is experimental, see [ExperimentalTypeInference] on how
to opt-in
for it.\n

kotlin.internal.InlineOnly\n\n/**\n * Obtains the current continuation instance inside suspend functions and either
suspends\n * currently running coroutine or returns result immediately without suspension.\n * If the [block]
returns the special [COROUTINE_SUSPENDED] value, it means that suspend function did suspend the execution
and will\n * not return any result immediately. In this case, the [Continuation] provided to the [block] shall be\n
* resumed by invoking [Continuation.resumeWith] at some moment in the\n * future when the result becomes
available to resume the computation.\n * Otherwise, the return value of the [block] must have a type assignable
to [T] and represents the result of this suspend function.\n * It means that the execution was not suspended and the
[Continuation] provided to the [block] shall not be invoked.\n * As the result type of the [block] is declared as
`Any?` and cannot be correctly type-checked,\n * its proper return type remains on the conscience of the suspend
function's author.\n * Invocation of [Continuation.resumeWith] resumes coroutine directly in the invoker's
thread without going through the\n * [ContinuationInterceptor] that might be present in the coroutine's
[CoroutineContext].\n * It is the invoker's responsibility to ensure that a proper invocation context is established.\n
* [Continuation.intercepted] can be used to acquire the intercepted continuation.\n * Note that

```

it is not recommended to call either [Continuation.resume] nor [Continuation.resumeWithException] functions synchronously in the same stackframe where suspension function is run. Use [suspendCoroutine] as a safer way to obtain current continuation instance.

thumb, it should be used if recursion goes deeper than a thousand calls.\n * The [DeepRecursiveFunction] takes
one
parameter of type [T] and returns a result of type [R].\n * The [block] of code defines the body of a recursive
function. In this block\n * [callRecursive][DeepRecursiveScope.callRecursive] function can be used to make a
recursive call\n * to the declared function. Other instances of [DeepRecursiveFunction] can be called\n * in this

```

scope with `callRecursive` extension, too. For example, take a look at the following recursive tree class and a deeply recursive instance of this tree with 100K nodes:

```

class Tree(val left: Tree? = null, val right: Tree? = null) {
    val deepTree = generateSequence(Tree()) { Tree(it) }.take(100_000).last()
}

```

A regular recursive function can be defined to compute a depth of a tree:

```

fun depth(t: Tree?): Int =
    if (t == null) 0 else max(depth(t.left), depth(t.right)) + 1

```

If this `depth` function is called for a `deepTree` it produces

[StackOverflowError] because of deep recursion. However, the `depth` function can be rewritten using `DeepRecursiveFunction` in the following way, and then it successfully computes

```

depth(deepTree)

```

```

DeepRecursiveFunction<Tree?, Int> { t ->
    if (t == null) 0 else max(callRecursive(t.left),

```

```

callRecursive(t.right)) + 1
}

```

Deep recursive functions can also mutually call each other using a heap for the stack via

```

[callRecursive][DeepRecursiveScope.callRecursive]

```

extension. For example, the following pair of mutually recursive functions computes the number of tree nodes at even depth in the tree.

```

val mutualRecursion = object {
    val even:

```

```

DeepRecursiveFunction<Tree?, Int> = DeepRecursiveFunction { t ->
    if (t == null) 0 else

```

```

odd.callRecursive(t.left) + odd.callRecursive(t.right) + 1
    val odd: DeepRecursiveFunction<Tree?,

```

```

Int> = DeepRecursiveFunction { t ->
    if (t == null) 0 else even.callRecursive(t.left) +

```

```

even.callRecursive(t.right)
}

```

@param [T] the function parameter type. @param [R] the function result type. @param block the function body.

```

@SinceKotlin("1.4")@ExperimentalStdlibApi
public class DeepRecursiveFunction<T, R> {
    internal val

```

```

block: suspend DeepRecursiveScope<T, R>.(T) -> R
}

```

Initiates a call to this deep recursive function, forming a root of the call tree. This operator should not be used from inside of [DeepRecursiveScope] as it

uses the call stack slot for initial recursive invocation. From inside of [DeepRecursiveScope] use

```

[callRecursive][DeepRecursiveScope.callRecursive].

```

```

@SinceKotlin("1.4")@ExperimentalStdlibApi
public operator fun <T, R> DeepRecursiveFunction<T,

```

```

R>.invoke(value: T): R =
    DeepRecursiveScopeImpl<T, R>(block, value).runCallLoop()
}

```

A scope class for [DeepRecursiveFunction] function declaration that defines [callRecursive] methods to

recursively call this function or another [DeepRecursiveFunction] putting the call activation frame on the heap.

@param [T] function parameter type. @param [R] function result type.

```

@RestrictsSuspension
@SinceKotlin("1.4")@ExperimentalStdlibApi
public sealed class

```

```

DeepRecursiveScope<T, R> {
    /**
     * Makes recursive call to this [DeepRecursiveFunction] function putting
     the call activation frame on the heap,
     * as opposed to the actual call stack that is used by a regular recursive

```

```

call.
    public abstract suspend fun callRecursive(value: T): R
    /**
     * Makes call to the specified

```

```

[DeepRecursiveFunction] function putting the call activation frame on the heap,
     * as opposed to the actual call

```

```

stack that is used by a regular call.

- $\text{sinh}(+\text{Inf})$ is $+\text{Inf}$
- $\text{sinh}(-\text{Inf})$ is $-\text{Inf}$

`SinceKotlin("1.2")\npublic expect fun sinh(x: Float): Float`

Computes the hyperbolic cosine of the value x .

Special cases:

- $\text{cosh}(\text{NaN})$ is NaN
- $\text{cosh}(+\text{Inf})$ is $+\text{Inf}$
- $\text{cosh}(-\text{Inf})$ is $+\text{Inf}$

`SinceKotlin("1.2")\npublic expect fun cosh(x: Float): Float`

Computes the hyperbolic tangent of the value x .

Special cases:

- $\text{tanh}(\text{NaN})$ is NaN
- $\text{tanh}(+\text{Inf})$ is 1.0
- $\text{tanh}(-\text{Inf})$ is -1.0

`SinceKotlin("1.2")\npublic expect fun tanh(x: Float): Float`

Computes the inverse hyperbolic sine of the value x . The returned value is y such that $\text{sinh}(y) == x$.

Special cases:

- $\text{asinh}(\text{NaN})$ is NaN
- $\text{asinh}(+\text{Inf})$ is $+\text{Inf}$
- $\text{asinh}(-\text{Inf})$ is $-\text{Inf}$

`SinceKotlin("1.2")\npublic expect fun asinh(x: Float): Float`

Computes the inverse hyperbolic cosine of the value x . The returned value is positive y such that $\text{cosh}(y) == x$.

Special cases:

- $\text{acosh}(\text{NaN})$ is NaN
- $\text{acosh}(x)$ is NaN when $x < 1$
- $\text{acosh}(+\text{Inf})$ is $+\text{Inf}$

`SinceKotlin("1.2")\npublic expect fun acosh(x: Float): Float`

Computes the inverse hyperbolic tangent of the value x . The returned value is y such that $\text{tanh}(y) == x$.

Special cases:

- $\text{atanh}(\text{NaN})$ is NaN
- $\text{atanh}(x)$ is NaN when $x > 1$ or $x < -1$
- $\text{atanh}(1.0)$ is $+\text{Inf}$
- $\text{atanh}(-1.0)$ is $-\text{Inf}$

`SinceKotlin("1.2")\npublic expect fun atanh(x: Float): Float`

Computes $\sqrt{x^2 + y^2}$ without intermediate overflow or underflow.

Special cases:

- returns $+\text{Inf}$ if any of arguments is infinite
- returns NaN if any of arguments is NaN and the other is not infinite

`SinceKotlin("1.2")\npublic expect fun hypot(x: Float, y: Float): Float`

Computes the positive square root of the value x .

Special cases:

- $\text{sqrt}(x)$ is NaN when $x < 0$ or x is NaN

`SinceKotlin("1.2")\npublic expect fun sqrt(x: Float): Float`

Computes Euler's number e raised to the power of the value x .

Special cases:

- $\text{exp}(\text{NaN})$ is NaN
- $\text{exp}(+\text{Inf})$ is $+\text{Inf}$
- $\text{exp}(-\text{Inf})$ is 0.0

`SinceKotlin("1.2")\npublic expect fun exp(x: Float): Float`

Computes $\text{exp}(x) - 1$.

This function can be implemented to produce more precise result for x near zero.

Special cases:

- $\text{expm1}(\text{NaN})$ is NaN
- $\text{expm1}(+\text{Inf})$ is $+\text{Inf}$
- $\text{expm1}(-\text{Inf})$ is -1.0

@see [exp] function.

`SinceKotlin("1.2")\npublic expect fun expm1(x: Float): Float`

Computes the logarithm of the value x to the given [base].

Special cases:

- $\log(x, b)$ is NaN if either x or b are NaN
- $\log(x, b)$ is NaN when $x < 0$ or $b \leq 0$ or $b == 1.0$
- $\log(+\text{Inf}, +\text{Inf})$ is NaN
- $\log(+\text{Inf}, b)$ is $+\text{Inf}$ for $b > 1$ and $-\text{Inf}$ for $b < 1$
- $\log(0.0, b)$ is $-\text{Inf}$ for $b > 1$ and $+\text{Inf}$ for $b > 1$

See also logarithm functions for common fixed bases: [ln], [log10] and [log2].

`SinceKotlin("1.2")\npublic expect fun log(x: Float, base: Float): Float`

Computes the natural logarithm (base E) of the value x .

Special cases:

- $\ln(\text{NaN})$ is NaN
- $\ln(x)$ is NaN when $x < 0.0$
- $\ln(+\text{Inf})$ is $+\text{Inf}$
- $\ln(0.0)$ is $-\text{Inf}$

`SinceKotlin("1.2")\npublic expect fun ln(x: Float): Float`

Computes the common logarithm (base 10) of the value x .

@see [ln] function for special cases.

`SinceKotlin("1.2")\npublic expect fun log10(x: Float): Float`

Computes the binary logarithm (base 2) of the value x .

@see [ln] function for special cases.

`SinceKotlin("1.2")\npublic expect fun log2(x: Float): Float`

Computes $\ln(a + 1)$.

This function can be implemented to produce more precise result for x near zero.

Special cases:

- $\ln1p(\text{NaN})$ is NaN
- $\ln1p(x)$ is NaN where $x < -1.0$
- $\ln1p(-1.0)$ is $-\text{Inf}$
- $\ln1p(+\text{Inf})$ is $+\text{Inf}$

@see [ln] function

@see [expm1] function

`SinceKotlin("1.2")\npublic expect fun ln1p(x: Float): Float`

Rounds the given value x to an

integer towards positive infinity.
`@return the smallest Float value that is greater than or equal to the given value [x] and is a mathematical integer.`
`Special cases:`
`-`ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`
`@SinceKotlin("1.2")\npublic expect fun ceil(x: Float): Float\n\n**\n * Rounds the given value [x] to an integer towards negative infinity.`
`@return the largest Float value that is smaller than or equal to the given value [x] and is a mathematical integer.`
`Special cases:`
`-`floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`
`@SinceKotlin("1.2")\npublic expect fun floor(x: Float): Float\n\n**\n * Rounds the given value [x] to an integer towards zero.`
`@return the value [x] having its fractional part truncated.`
`Special cases:`
`-`truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`
`@SinceKotlin("1.2")\npublic expect fun truncate(x: Float): Float\n\n**\n * Rounds the given value [x] towards the closest integer with ties rounded towards even integer.`
`Special cases:`
`-`round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`
`@SinceKotlin("1.2")\npublic expect fun round(x: Float): Float\n\n**\n * Returns the absolute value of the given value [x].`
`Special cases:`
`-`abs(NaN)` is `NaN`\n\n**\n * @see absoluteValue extension property for [Float]`
`@SinceKotlin("1.2")\npublic expect fun abs(x: Float): Float\n\n**\n * Returns the sign of the given value [x]:`
`-`-1.0` if the value is negative,`
`- zero if the value is zero,`
`- `1.0` if the value is positive\n\n**\n * Special case:`
`-`sign(NaN)` is `NaN`\n\n**\n * @SinceKotlin("1.2")\npublic expect fun sign(x: Float): Float\n\n**\n * Returns the smaller of two values.`
`If either value is `NaN`, then the result is `NaN`.\n\n**\n * @SinceKotlin("1.2")\npublic expect fun min(a: Float, b: Float): Float\n\n**\n * Returns the greater of two values.`
`If either value is `NaN`, then the result is `NaN`.\n\n**\n * @SinceKotlin("1.2")\npublic expect fun max(a: Float, b: Float): Float\n\n// extensions\n\n**\n * Raises this value to the power [x].`
`Special cases:`
`-`b.pow(0.0)` is `1.0`\n\n**\n * -`b.pow(1.0) == b`\n\n**\n * -`b.pow(NaN)` is `NaN`\n\n**\n * -`NaN.pow(x)` is `NaN` for `x != 0.0`\n\n**\n * -`b.pow(Inf)` is `NaN` for `abs(b) == 1.0`\n\n**\n * -`b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer\n\n**\n * @SinceKotlin("1.2")\npublic expect fun Float.pow(x: Float): Float\n\n**\n * Raises this value to the integer power [n].`
`See the other overload of [pow] for details.`
`@SinceKotlin("1.2")\npublic expect fun Float.pow(n: Int): Float\n\n**\n * Returns the absolute value of this value.`
`Special cases:`
`-`NaN.absoluteValue` is `NaN`\n\n**\n * @see abs function\n\n**\n * @SinceKotlin("1.2")\npublic expect val Float.absoluteValue: Float\n\n**\n * Returns the sign of this value:`
`-`-1.0` if the value is negative,`
`- zero if the value is zero,`
`- `1.0` if the value is positive\n\n**\n * Special case:`
`-`NaN.sign` is `NaN`\n\n**\n * @SinceKotlin("1.2")\npublic expect val Float.sign: Float\n\n**\n * Returns this value with the sign bit same as of the [sign] value.`
`If [sign] is `NaN` the sign of the result is undefined.`
`@SinceKotlin("1.2")\npublic expect fun Float.withSign(sign: Float): Float\n\n**\n * Returns this value with the sign bit same as of the [sign] value.`
`@SinceKotlin("1.2")\npublic expect fun Float.withSign(sign: Int): Float\n\n**\n * Rounds this [Float] value to the nearest integer and converts the result to [Int].`
`Ties are rounded towards positive infinity.`
`Special cases:`
`-`x.roundToInt() == Int.MAX_VALUE` when `x > Int.MAX_VALUE`\n\n**\n * -`x.roundToInt() == Int.MIN_VALUE` when `x < Int.MIN_VALUE`\n\n**\n * @throws IllegalArgumentException when this value is `NaN`\n\n**\n * @SinceKotlin("1.2")\npublic expect fun Float.roundToInt(): Int\n\n**\n * Rounds this [Float] value to the nearest integer and converts the result to [Long].`
`Ties are rounded towards positive infinity.`
`Special cases:`
`-`x.roundToLong() == Long.MAX_VALUE` when `x > Long.MAX_VALUE`\n\n**\n * -`x.roundToLong() == Long.MIN_VALUE` when `x < Long.MIN_VALUE`\n\n**\n * @throws IllegalArgumentException when this value is `NaN`\n\n**\n * @SinceKotlin("1.2")\npublic expect fun Float.roundToLong(): Long\n\n**\n // endregion\n\n**\n * Returns the absolute value of the given value [n].`
`Special cases:`
`-`abs(Int.MIN_VALUE)` is `Int.MIN_VALUE` due to an overflow\n\n**\n * @see absoluteValue extension property for [Int]`
`@SinceKotlin("1.2")\npublic expect fun abs(n: Int): Int\n\n**\n * Returns the smaller of two values.`
`@SinceKotlin("1.2")\npublic expect fun min(a: Int, b: Int): Int\n\n**\n * Returns the greater of two values.`

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication

on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant

of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as

of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and

attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must

include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Version 2.0, January 2004

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including

the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication

on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant

of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as

of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must

include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names

of the Licensor,

except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law

(such as deliberate and grossly

negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole

responsibility, not on behalf

of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a

file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Jackson JSON processor

Jackson is a high-performance, Free/Open Source JSON processing library. It was originally written by Tatu Saloranta (tatu.saloranta@iki.fi), and has been in development since 2007.

It is currently developed by a community of developers, as well as supported commercially by FasterXML.com.

Licensing

Jackson core and extension components (as well their dependencies) may be licensed under different licenses.

To find the details that apply to this artifact see the accompanying LICENSE file.

For more information, including possible other licensing options, contact FasterXML.com (<http://fasterxml.com>).

Credits

A list of contributors may be found from CREDITS file, which is included in some artifacts (usually source distributions); but is always available from the source code management (SCM) system project uses.
