```

`nativeMath.sinh(x)` Computes the hyperbolic cosine of the value `[x]`.
 Special cases:
`sinh(NaN)` is `NaN`
`sinh(+Inf)` is `+Inf`
`sinh(-Inf)` is `-Inf`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun cosh(x: Double): Double =`
`nativeMath.cosh(x)` Computes the hyperbolic tangent of the value `[x]`.
 Special cases:
`tanh(NaN)` is `NaN`
`tanh(+Inf)` is `1.0`
`tanh(-Inf)` is `-1.0`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun tanh(x: Double): Double =`
`nativeMath.tanh(x)` Computes the inverse hyperbolic sine of the value `[x]`.
 The returned value is `y` such that `sinh(y) == x`.
 Special cases:
`asinh(NaN)` is `NaN`
`asinh(+Inf)` is `+Inf`
`asinh(-Inf)` is `-Inf`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun asinh(x: Double): Double =`
`nativeMath.asinh(x)` Computes the inverse hyperbolic cosine of the value `[x]`.
 The returned value is positive `y` such that `cosh(y) == x`.
 Special cases:
`acosh(NaN)` is `NaN`
`acosh(x)` is `NaN` when `x < 1`
`acosh(+Inf)` is `+Inf`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun acosh(x: Double): Double =`
`nativeMath.acosh(x)` Computes the inverse hyperbolic tangent of the value `[x]`.
 The returned value is `y` such that `tanh(y) == x`.
 Special cases:
`atanh(NaN)` is `NaN`
`atanh(x)` is `NaN` when `x > 1` or `x < -1`
`atanh(1.0)` is `+Inf`
`atanh(-1.0)` is `-Inf`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun atanh(x: Double): Double =`
`nativeMath.atanh(x)` Computes `sqrt(x^2 + y^2)` without intermediate overflow or underflow.
 Special cases:
 - returns `+Inf` if any of arguments is infinite
 - returns `NaN` if any of arguments is `NaN` and the other is not infinite
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun hypot(x: Double, y: Double): Double =`
`nativeMath.hypot(x, y)` Computes the positive square root of the value `[x]`.
 Special cases:
`sqrt(x)` is `NaN` when `x < 0` or `x` is `NaN`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun sqrt(x: Double): Double =`
`nativeMath.sqrt(x)` Computes Euler's number `e` raised to the power of the value `[x]`.
 Special cases:
`exp(NaN)` is `NaN`
`exp(+Inf)` is `+Inf`
`exp(-Inf)` is `0.0`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun exp(x: Double): Double =`
`nativeMath.exp(x)` Computes `exp(x) - 1`.
 This function can be implemented to produce more precise result for `[x]` near zero.
 Special cases:
`expm1(NaN)` is `NaN`
`expm1(+Inf)` is `+Inf`
`expm1(-Inf)` is `-1.0`
 @see `[exp]` function.
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun expm1(x: Double): Double =`
`nativeMath.expm1(x)` Computes the logarithm of the value `[x]` to the given `[base]`.
 Special cases:
`log(x, b)` is `NaN` if either `x` or `b` are `NaN`
`log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0`
`log(+Inf, +Inf)` is `NaN`
`log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`
`log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1`
 See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`.
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual fun log(x: Double, base: Double): Double {`
 if (base <= 0.0 || base == 1.0) return Double.NaN
 return
`nativeMath.log(x) / nativeMath.log(base)}`
`nativeMath.log(x)` Computes the natural logarithm (base `E`) of the value `[x]`.
 Special cases:
`ln(NaN)` is `NaN`
`ln(x)` is `NaN` when `x < 0.0`
`ln(+Inf)` is `+Inf`
`ln(0.0)` is `-Inf`
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun ln(x: Double): Double =`
`nativeMath.log(x)` Computes the common logarithm (base 10) of the value `[x]`.
 @see `[ln]` function for special cases.
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun log10(x: Double): Double =`
`nativeMath.log10(x)` Computes the binary logarithm (base 2) of the value `[x]`.
 @see `[ln]` function for special cases.
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun log2(x: Double): Double =`
`nativeMath.log2(x)` Computes `ln(x + 1)`.
 This function can be implemented to produce more precise result for `[x]` near zero.
 Special cases:
`ln1p(NaN)` is `NaN`
`ln1p(x)` is `NaN` where `x < -1.0`
`ln1p(-1.0)` is `-Inf`
`ln1p(+Inf)` is `+Inf`
 @see `[ln]` function
 @see `[expm1]` function
`@SinceKotlin("1.2")`
`@InlineOnly`
`public actual inline fun ln1p(x: Double): Double =`
`nativeMath.log1p(x)` Rounds the given value `[x]` to an integer towards positive infinity.
 @return the

smallest double value that is greater

than or equal to the given value [x] and is a mathematical integer.
Special cases: $\text{ceil}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

    else -> nativeMath.round(this).toLong()
}

// endregion

===== Float Math =====
Computes the sine of the angle [x] given in radians.
Special cases:
    - `sin(NaN|+Inf|-Inf)` is `NaN`

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun sin(x: Float): Float = nativeMath.sin(x.toDouble()).toFloat()
Computes the cosine of the angle [x] given in radians.
Special cases:
    - `cos(NaN|+Inf|-Inf)` is `NaN`

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun cos(x: Float): Float = nativeMath.cos(x.toDouble()).toFloat()
Computes the tangent of the angle [x] given in radians.
Special cases:
    - `tan(NaN|+Inf|-Inf)` is `NaN`

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun tan(x: Float): Float = nativeMath.tan(x.toDouble()).toFloat()
Computes the arc sine of the value [x]; the returned value is an angle in the range from  $-\pi/2$  to  $\pi/2$  radians.
Special cases:
    - `asin(x)` is `NaN`, when  $abs(x) > 1$  or x is `NaN`

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun asin(x: Float): Float = nativeMath.asin(x.toDouble()).toFloat()
Computes the arc cosine of the value [x]; the returned value is an angle in the range from  $0.0$  to  $\pi$  radians.
Special cases:
    - `acos(x)` is `NaN`, when  $abs(x) > 1$  or x is `NaN`

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun acos(x: Float): Float = nativeMath.acos(x.toDouble()).toFloat()
Computes the arc tangent of the value [x]; the returned value is an angle in the range from  $-\pi/2$  to  $\pi/2$  radians.
Special cases:
    - `atan(NaN)` is `NaN`

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun atan(x: Float): Float = nativeMath.atan(x.toDouble()).toFloat()
Returns the angle `theta` of the polar coordinates `(r, theta)` that correspond to the rectangular coordinates `(x, y)` by computing the arc tangent of the value  $y / x$ ; the returned value is an angle in the range from  $-\pi$  to  $\pi$  radians.
Special cases:
    - `atan2(0.0, 0.0)` is  $0.0$ 
    - `atan2(0.0, x)` is  $0.0$  for  $x > 0$  and  $\pi$  for  $x < 0$ 
    - `atan2(-0.0, x)` is  $-0.0$  for  $x > 0$  and  $-\pi$  for  $x < 0$ 
    - `atan2(y, +Inf)` is  $0.0$  for  $0 < y < +Inf$  and  $-0.0$  for  $-Inf < y < 0$ 
    - `atan2(y, -Inf)` is  $\pi$  for  $0 < y < +Inf$  and  $-\pi$  for  $-Inf < y < 0$ 
    - `atan2(y, 0.0)` is  $\pi/2$  for  $y > 0$  and  $-\pi/2$  for  $y < 0$ 

```

`atan2(+Inf, x)` is $\text{PI}/2$ for finite `x` `atan2(-Inf, x)` is $-\text{PI}/2$ for finite `x` `atan2(NaN, x)` and `atan2(y, NaN)` is `NaN` `@SinceKotlin("1.2")@InlineOnly@npublic`

```

`StringBuilder.deleteRange(startIndex: Int, endIndex: Int): StringBuilder`
Copies characters from this string builder into the [destination] character array.
@param destination the array to copy to.
@param destinationOffset the position in the array to copy to, 0 by default.
@param startIndex the beginning (inclusive) of the range to copy, 0 by default.
@param endIndex the end (exclusive) of the range to copy, length of this string builder by default.
@throws IndexOutOfBoundsException or [IllegalArgumentException] when [startIndex] or [endIndex] is out of range of this string builder indices or when `startIndex > endIndex`.
@throws IndexOutOfBoundsException when the subrange doesn't fit into the [destination] array starting at the specified [destinationOffset], or when that index is out of the [destination] array indices range.

`StringBuilder.toCharArray(destination: CharArray, destinationOffset: Int = 0, startIndex: Int = 0, endIndex: Int = this.length)`
Appends characters in a subarray of the specified character array [value] to this string builder and returns this instance.
@param value the array from which characters are appended.
@param startIndex the beginning (inclusive) of the subarray to append.
@param endIndex the end (exclusive) of the subarray to append.
@throws IndexOutOfBoundsException or [IllegalArgumentException] when [startIndex] or [endIndex] is out of range of the [value] array indices or when `startIndex > endIndex`.

`StringBuilder.appendRange(value: CharArray, startIndex: Int, endIndex: Int): StringBuilder`
Appends a subsequence of the specified character sequence [value] to this string builder and returns this instance.
@param value the character sequence from which a subsequence is appended.
@param startIndex the beginning (inclusive) of the subsequence to append.
@param endIndex the end (exclusive) of the subsequence to append.
@throws IndexOutOfBoundsException or [IllegalArgumentException] when [startIndex] or [endIndex] is out of range of the [value] character sequence indices or when `startIndex > endIndex`.

`StringBuilder.appendRange(value: CharSequence, startIndex: Int, endIndex: Int): StringBuilder`
Inserts characters in a subarray of the specified character array [value] into this string builder at the specified [index] and returns this instance.
The inserted characters go in same order as in the [value] array, starting at [index].
@param index the position in this string builder to insert at.
@param value the array from which characters are inserted.
@param startIndex the beginning (inclusive) of the subarray to insert.
@param endIndex the end (exclusive) of the subarray to insert.
@throws IndexOutOfBoundsException or [IllegalArgumentException] when [startIndex] or [endIndex] is out of range of the [value] array indices or when `startIndex > endIndex`.
@throws IndexOutOfBoundsException if [index] is less than zero or greater than the length of this string builder.

`StringBuilder.insertRange(index: Int, value: CharArray, startIndex: Int, endIndex: Int): StringBuilder`
Inserts characters in a subsequence of the specified character sequence [value] into this string builder at the specified [index] and returns this instance.
The inserted characters go in the same order as in the [value] character sequence, starting at [index].
@param index the position in this string builder to insert at.
@param value the character sequence from which a subsequence is inserted.
@param startIndex the beginning (inclusive) of the subsequence to insert.
@param endIndex the end (exclusive) of the subsequence to insert.
@throws IndexOutOfBoundsException or [IllegalArgumentException] when [startIndex] or [endIndex] is out of range of the [value] character sequence indices or when `startIndex > endIndex`.
@throws IndexOutOfBoundsException if [index] is less than zero or greater than the length of this string builder.

d
public annotation class ExperimentalContracts
 * Provides a scope, where the functions of the contract
DSL, such as [returns], [callsInPlace], etc.,
 * can be used to describe the contract of a function.
 * This type is
used as a receiver type of the lambda function passed to the [contract] function.
 * @see contract
 *
@ContractsDsl
@ExperimentalContracts
@SinceKotlin("1.3")
public interface ContractBuilder {
 *
 * Describes a situation
when a function returns normally, without any exceptions thrown.
 *
 * Use [SimpleEffect.implies] function
to describe a conditional effect that happens in such case.
 *
 *
 * // @sample
samples.contracts.returnsContract
 @ContractsDsl public fun returns(): Returns
 *
 * Describes a
situation when a function returns normally with the specified return [value].
 *
 * The possible values of
[value] are limited to `true`, `false` or `null`.
 *
 * Use [SimpleEffect.implies] function to describe a
conditional effect that happens in such case.
 *
 *
 * // @sample samples.contracts.returnsTrueContract
// @sample samples.contracts.returnsFalseContract
// @sample samples.contracts.returnsNullContract
@ContractsDsl public fun returns(value: Any?): Returns
 *
 * Describes a situation when a function
returns normally with any value that is not `null`.
 *
 * Use [SimpleEffect.implies] function
to describe a conditional effect that happens in such case.
 *
 *
 * // @sample
samples.contracts.returnsNotNullContract
 @ContractsDsl public fun returnsNotNull(): ReturnsNotNull
 *
 * Specifies that the function parameter [lambda] is invoked in place.
 *
 * This contract specifies
that:
 * 1. the function [lambda] can only be invoked during the call of the owner function,
 * and it won't be
invoked after that owner function call is completed;
 * 2. (optionally) the function [lambda] is invoked the
amount of times specified by the [kind] parameter,
 * see the [InvocationKind] enum for possible values.
 *
 * A function declaring the `callsInPlace` effect must be _inline_.
 *
 *
 * // @sample

[CoroutineContext.Key] associated with polymorphic [CoroutineContext.Element] implementation.\n *
Polymorphic element implementation implies delegating its [get][Element.get] and
[minusKey][Element.minusKey]\n * to [getPolymorphicElement]
and [minusPolymorphicKey] respectively.\n * Polymorphic elements can be extracted from the coroutine
context using both element key and its supertype key.\n * Example of polymorphic elements:\n * ```\n * open class
BaseElement : CoroutineContext.Element {\n *     companion object Key : CoroutineContext.Key<BaseElement>\n *
override val key: CoroutineContext.Key<*> get() = Key\n *     // It is important to use getPolymorphicKey and
minusPolymorphicKey\n *     override fun <E : CoroutineContext.Element> get(key: CoroutineContext.Key<E>):
E? = getPolymorphicElement(key)\n *     override fun minusKey(key: CoroutineContext.Key<*>):
CoroutineContext = minusPolymorphicKey(key)\n * }\n * class DerivedElement : BaseElement() {\n *

```

```

companion object Key : AbstractCoroutineContextKey<BaseElement, DerivedElement>(BaseElement, { it as?
DerivedElement })\n * }\n * // Now it is possible to query both `BaseElement` and `DerivedElement`\n *
someContext[BaseElement] // Returns BaseElement?,
non-null both for BaseElement and DerivedElement instances\n * someContext[DerivedElement] // Returns
DerivedElement?, non-null only for DerivedElement instance\n * ```\n * @param B base class of a polymorphic
element\n * @param baseKey an instance of base key\n * @param E element type associated with the current key\n
* @param safeCast a function that can safely cast abstract [CoroutineContext.Element] to the concrete [E] type\n *
and return the element if it is a subtype of [E] or `null` otherwise.\n
*\n@SinceKotlin("1.3")\n@ExperimentalStdlibApi\npublic abstract class AbstractCoroutineContextKey<B :
Element, E : B>(\n baseKey: Key<B>,\n private val safeCast: (element: Element) -> E?)\n) : Key<E> {\n

/**
 * Obtains the current continuation instance inside suspend functions and either
 * suspends currently running coroutine or returns result immediately without suspension.
 * If the [block] returns the special [COROUTINE_SUSPENDED] value, it means that suspend function did suspend the execution
 * and will not return any result immediately. In this case, the [Continuation] provided to the [block] shall
 * be resumed by invoking [Continuation.resumeWith] at some moment in the future when the result becomes
 * available to resume the computation. Otherwise, the return value of the [block] must have a type assignable
 * to [T] and represents the result of this suspend function. It means that the execution was not suspended and the
 * [Continuation] provided to the [block] shall not be invoked. As the result type of the [block] is declared as
 * `Any?` and cannot be correctly type-checked, its proper return type remains on the conscience of the suspend
 * function's author. Invocation of [Continuation.resumeWith] resumes coroutine directly in the invoker's
 * thread without going through the [ContinuationInterceptor] that might be present in the coroutine's
 * [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established.
 * [Continuation.intercepted] can be used to acquire the intercepted continuation. Note
 * that it is not recommended to call either [Continuation.resume] nor [Continuation.resumeWithException] functions
 * synchronously in the same stackframe where suspension function is run. Use [suspendCoroutine] as a safer way
 * to obtain current continuation instance.

Returns a repeatable random number generator seeded with the given [seed] `Int` value.
Two generators with the same seed produce the same sequence of values within the same version of Kotlin runtime.
Note: Future versions of Kotlin may change the algorithm of this seeded number generator so that it will return a sequence of values different from the current one for a given seed.
On JVM the returned generator is NOT thread-safe. Do not invoke it from multiple threads without proper synchronization.
@sample samples.random.Randoms.seededRandom
@SinceKotlin("1.3")
public fun Random(seed: Int): Random = XorWowRandom(seed, seed.shr(31))
Returns a repeatable random number generator seeded with the given [seed] `Long` value.
Two generators with the same seed produce the same sequence of values within the same version of Kotlin runtime.
Note: Future versions of Kotlin may change the algorithm of this seeded number generator so that it will return a sequence of values different from the current one for a given seed.
On JVM the returned generator is NOT thread-safe. Do not invoke it from multiple threads without proper synchronization.
@sample samples.random.Randoms.seededRandom
@SinceKotlin("1.3")
public fun Random(seed: Long): Random = XorWowRandom(seed.toInt(), seed.shr(32).toInt())
Gets the next random `Int` from the random number generator in the specified [range].
Generates an `Int` random value uniformly distributed in the specified [range]: from `range.start` inclusive to `range.endInclusive` inclusive.
@throws IllegalArgumentException if [range] is empty.
@SinceKotlin("1.3")

kotlin.coroutines.intrinsics.*\nimport kotlin.native.concurrent.SharedImmutable\n\n/**\n * Defines deep recursive
function that keeps its stack on the heap,\n * which allows very deep recursive computations that do not use the
actual call stack.\n * To initiate a call to this deep recursive function use its [invoke] function.\n * As a rule of
thumb, it should be used if recursion goes deeper than a thousand calls.\n *\n * The [DeepRecursiveFunction] takes
one parameter of type [T] and returns a result of type [R].\n * The [block] of code defines the body of a recursive
function.
\n * In this block\n * [callRecursive][DeepRecursiveScope.callRecursive] function can be used to make a recursive
call\n * to the declared function. Other instances of [DeepRecursiveFunction] can be called\n * in this scope with
`callRecursive` extension, too.\n *\n * For example, take a look at the following recursive tree class and a deeply\n *
recursive instance of this tree with 100K nodes:\n *\n * ``\n * class Tree(val left: Tree? = null, val right: Tree? =
null)\n * val deepTree = generateSequence(Tree()) { Tree(it) }.take(100_000).last()\n * ``\n *\n * A regular
recursive function can be defined to compute a depth of a tree:\n *\n * ``\n * fun depth(t: Tree?): Int =\n * if (t ==
null) 0 else max(depth(t.left), depth(t.right)) + 1\n * println(depth(deepTree)) // StackOverflowError\n * ``\n *\n *
If this `depth` function is called for a `deepTree` it produces [StackOverflowError] because of deep recursion.\n *
However, the `depth` function can be rewritten using `DeepRecursiveFunction`
\n * in the following way, and then\n * it successfully computes [depth(deepTree)][DeepRecursiveFunction.invoke]
expression:\n *\n * ``\n * val depth = DeepRecursiveFunction<Tree?, Int> { t ->\n * if (t == null) 0 else
max(callRecursive(t.left), callRecursive(t.right)) + 1\n * }\n * println(depth(deepTree)) // Ok\n * ``\n *\n * Deep
recursive functions can also mutually call each other using a heap for the stack via\n *
[callRecursive][DeepRecursiveScope.callRecursive] extension. For example, the\n * following pair of mutually
recursive functions computes the number of tree nodes at even depth in the tree.\n *\n * ``\n * val mutualRecursion
= object {\n * val even: DeepRecursiveFunction<Tree?, Int> = DeepRecursiveFunction { t ->\n * if (t ==
null) 0 else odd.callRecursive(t.left) + odd.callRecursive(t.right) + 1\n * }\n * val odd:\n *
DeepRecursiveFunction<Tree?, Int> = DeepRecursiveFunction { t ->\n * if (t == null) 0 else
even.callRecursive(t.left)
\n * + even.callRecursive(t.right)\n * }\n * }\n * ``\n *\n * @param [T] the function parameter type.\n * @param [R]
the function result type.\n * @param block the function body.\n

`Double.roundToLong(): Long` endregion region ===== Float Math
===== Computes the sine of the angle [x] given in radians. Special cases: `sin(NaN|+Inf|-Inf)` is `NaN`

`sin(x: Float): Float` Computes the cosine of the angle [x] given in radians. Special cases: `cos(NaN|+Inf|-Inf)` is `NaN`

`cos(x: Float): Float` Computes the tangent of the angle [x] given in radians. Special cases: `tan(NaN|+Inf|-Inf)` is `NaN`

`tan(x: Float): Float` Computes the arc sine of the value [x]; the returned value is an angle in the range from `-PI/2` to `PI/2` radians. Special cases: `asin(x)` is `NaN`, when `abs(x) > 1` or x is `NaN`

`asin(x: Float): Float` Computes the arc cosine of the value [x]; the returned value is an angle in the range from `0.0` to `PI` radians. Special cases: `acos(x)` is `NaN`, when `abs(x) > 1` or x is `NaN`

`acos(x: Float): Float` Computes the arc tangent of the value [x]; the returned value is an angle in the range from `-PI/2` to `PI/2` radians. Special cases: `atan(NaN)` is `NaN`

`atan(x: Float): Float` Returns the angle `theta` of the polar coordinates `(r, theta)` that correspond to the rectangular coordinates `(x, y)` by computing the arc tangent of the value `[y] / [x]`; the returned value is an angle in the range from `-PI` to `PI` radians. Special cases:

- `atan2(0.0, 0.0)` is `0.0`
- `atan2(0.0, x)` is `0.0` for `x > 0` and `PI` for `x < 0`
- `atan2(-0.0, x)` is `0.0` for `x > 0` and `-PI` for `x < 0`
- `atan2(y, +Inf)` is `0.0` for `0 < y < +Inf` and `-0.0` for `-Inf < y < 0`
- `atan2(y, -Inf)` is `PI` for `0 < y < +Inf` and `-PI` for `-Inf < y < 0`
- `atan2(y, 0.0)` is `PI/2` for `y > 0` and `-PI/2` for `y < 0`
- `atan2(+Inf, x)` is `PI/2` for finite `x`
- `atan2(-Inf, x)` is `-PI/2` for finite `x`
- `atan2(NaN, x)` and `atan2(y, NaN)` is `NaN`

`atan2(y: Float, x: Float): Float` Computes the hyperbolic sine of the value [x]. Special cases: `sinh(NaN)` is `NaN`

`sinh(+Inf)` is `+Inf`

`sinh(-Inf)` is `-Inf`

`sinh(x: Float): Float` Computes the hyperbolic cosine of the value [x]. Special cases: `cosh(NaN)` is `NaN`

`cosh(+Inf|-Inf)` is `+Inf`

`cosh(x: Float): Float` Computes the hyperbolic tangent of the value [x]. Special cases: `tanh(NaN)` is `NaN`

`tanh(+Inf)` is `1.0`

`tanh(-Inf)` is `-1.0`

`tanh(x: Float): Float` Computes the inverse hyperbolic sine of the value [x]. The returned value is `y` such that `sinh(y) == x`. Special cases: `asinh(NaN)` is `NaN`

`asinh(+Inf)` is `+Inf`

`asinh(-Inf)` is `-Inf`

`asinh(x: Float): Float` Computes the inverse hyperbolic cosine of the value [x]. The returned value is positive `y` such that `cosh(y) == x`. Special cases: `acosh(NaN)` is `NaN`

`acosh(x)` is `NaN` when `x < 1`

`acosh(+Inf)` is `+Inf`

`acosh(x: Float): Float` Computes the inverse hyperbolic tangent of the value [x]. The returned value is `y` such that `tanh(y) == x`. Special cases: `atanh(NaN)` is `NaN`

`atanh(x)` is `NaN` when `x > 1` or `x < -1`

`atanh(1.0)` is `+Inf`

`atanh(-1.0)` is `-Inf`

`atanh(x: Float): Float` Computes `sqrt(x^2 + y^2)` without intermediate overflow or underflow. Special cases:

- returns `+Inf` if any of arguments is infinite
- returns `NaN` if any of arguments is `NaN` and the other is not infinite

`hypot(x: Float, y: Float): Float` Computes the

positive square root of the value [x].
Special cases:
`sqrt(x)` is `NaN` when `x < 0` or `x` is `NaN`

public expect fun `sqrt(x: Float): Float`
Computes Euler's number `e` raised to the power of the value [x].
Special cases:
`exp(NaN)` is `NaN`
`exp(+Inf)` is `+Inf`
`exp(-Inf)` is `0.0`

public expect fun `exp(x: Float): Float`
Computes `exp(x) - 1`.
This function can be implemented to produce more precise result for [x] near zero.
Special cases:
`expm1(NaN)` is `NaN`
`expm1(+Inf)` is `+Inf`
`expm1(-Inf)` is `-1.0`
@see [exp] function.

public expect fun `expm1(x: Float): Float`
Computes the logarithm of the value [x] to the given [base].
Special cases:
`log(x, b)` is `NaN` if either `x` or `b` are `NaN`
`log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0`
`log(+Inf, +Inf)` is `NaN`
`log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`
`log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b < 1`
See also logarithm functions for common fixed bases: [ln], [log10] and [log2].

public expect fun `log(x: Float, base: Float): Float`
Computes the natural logarithm (base `E`) of the value [x].
Special cases:
`ln(NaN)` is `NaN`
`ln(x)` is `NaN` when `x < 0.0`
`ln(+Inf)` is `+Inf`
`ln(0.0)` is `-Inf`

public expect fun `ln(x: Float): Float`
Computes the common logarithm (base 10) of the value [x].
@see [ln] function for special cases.

public expect fun `log10(x: Float): Float`
Computes the binary logarithm (base 2) of the value [x].
@see [ln] function for special cases.

public expect fun `log2(x: Float): Float`
Computes `ln(a + 1)`.
This function can be implemented to produce more precise result for [x] near zero.
Special cases:
`ln1p(NaN)` is `NaN`
`ln1p(x)` is `NaN` where `x < -1.0`
`ln1p(-1.0)` is `-Inf`
`ln1p(+Inf)` is `+Inf`
@see [ln] function
@see [expm1] function

public expect fun `ln1p(x: Float): Float`
Rounds the given value [x] to an integer towards positive infinity.
@return the smallest Float value that is greater than or equal to the given value [x] and is a mathematical integer.
Special cases:
`ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

public expect fun `ceil(x: Float): Float`
Rounds the given value [x] to an integer towards negative infinity.
@return the largest Float value that is smaller than or equal to the given value [x] and is a mathematical integer.
Special cases:
`floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

public expect fun `floor(x: Float): Float`
Rounds the given value [x] to an integer towards zero.
@return the value [x] having its fractional part truncated.
Special cases:
`truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

public expect fun `truncate(x: Float): Float`
Rounds the given value [x] towards the closest integer with ties rounded towards even integer.
Special cases:
`round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

public expect fun `round(x: Float): Float`
Returns the absolute value of the given value [x].
Special cases:
`abs(NaN)` is `NaN`
@see absoluteValue extension property for [Float]

public expect fun `abs(x: Float): Float`
Returns the sign of the given value [x]:
`-1.0` if the value is negative,
`0.0` if the value is zero,
`1.0` if the value is positive
Special case:
`sign(NaN)` is `NaN`

public expect fun `sign(x: Float): Float`
Returns the smaller of two values.
If either value is `NaN`, then the result is `NaN`.

public expect fun `min(a: Float, b: Float): Float`
Returns the greater of two values.
If either value is `NaN`, then the result is `NaN`.

public expect fun `max(a: Float, b: Float): Float`
Raises this value to the power [x].
Special cases:
`b.pow(0.0)` is `1.0`
`b.pow(1.0) == b`
`b.pow(NaN)` is `NaN`
`NaN.pow(x)` is `NaN` for `x != 0.0`
`b.pow(Inf)` is `NaN` for `abs(b) == 1.0`
`b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer

public expect fun `Float.pow(x: Float): Float`
Raises this value to the integer power [n].
See the other overload of [pow] for details.

public expect fun `Float.pow(n: Int): Float`

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial

revisions, annotations, elaborations, or other modifications

represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made,

use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,

and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to

communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and

attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Jackson JSON processor

Jackson is a high-performance, Free/Open Source JSON processing library. It was originally written by Tatu Saloranta (tatu.saloranta@iki.fi), and has been in development since 2007.

It is currently developed by a community of developers, as well as supported commercially by FasterXML.com.

Licensing

Jackson core and extension components may be licensed under different licenses. To find the details that apply to this artifact see the accompanying LICENSE file. For more information, including possible other licensing options, contact FasterXML.com (<http://fasterxml.com>).

Credits

A list of contributors may be found from CREDITS file, which is included in some artifacts (usually source distributions); but is always available

from the source code management (SCM) system project uses.

FasterXML, LLC

Software Grant and Corporate Contributor License Agreement ("Agreement")

<https://github.com/FasterXML/jackson/blob/master/contributor-agreement-corporate.txt>

(v1)

Thank you for your interest in FasterXML, LLC ("FasterXML"). In order to clarify the intellectual property license granted with Contributions from any person or entity, FasterXML must have a Contributor License Agreement (CLA) on file that has been signed by each Contributor, indicating agreement to the license terms below. This license is for your protection as a Contributor as well as the protection of FasterXML and its users; it does not change your rights to use your own Contributions for any other purpose.

This version of the Agreement allows an entity (the "Corporation") to submit Contributions to the FasterXML, to authorize Contributions submitted by its designated employees to FasterXML, and to grant copyright and patent licenses thereto.
