

This document explains how to install Quick Pricing Tool (formerly known as Quick Quote).

- 1. Once you have received your login and password, download the installer from: https://www.quickpricingtool.com/downloads/setupQPT.exe
- 2. Make your language selection.

3. Save to a location where you have read, write and delete permissions. The installation will default to C:\ drive, but you must select another folder if you do not have these permissions on that folder.

4. When the Installation wizard is complete, click "Finish" to launch Quick Pricing Tool.

Additional notes:

Installation zip file:

If you do not have privileges to launch an installer on your computer or if you need to install the application on x terminal server sessions, you can download the complete folder at:

<u>https://www.quickpricingtool.com/downloads/QuickPricingTool.zip</u>. Then, unzip and place it in a folder with full access to the user. Open the QuickQuote500.exe file and install per the instructions above starting with Step #2. For terminal servers, the folder must be copied to each user session.

Creating a Shortcut:

If you want a shortcut to launch the application from your desktop, use the "QuickQuote500.exe" file located in the folder "Quick Pricing Tool" where you saved the installer.
