

# Digital Network Architecture (DNA) for Education

Today's campuses are connected, educators collaborate, administrators are informed, and students are empowered to learn. So, how will you enable transformation on your campus?

With Cisco Digital Network Architecture (DNA), network management is simpler, faster, and more flexible than ever. Our approach simplifies IT, utilizes analytics for facilities optimization and reduces risks with security everywhere, laying the foundation for digital transformation on your campus.

Lower complexity and costs with automation

Fast innovation with enhanced insights

[Learn why](#)

What are you waiting for? Deliver faster innovation, lower total cost of ownership and reduced risk on your campus.
