CCNA Certification and Training Program

One training course, one exam

Maybe you're looking to break into a technology career. Or maybe you want to climb higher. But software, networking, and infrastructure are growing more and more interconnected every day. To move forward with a technology career in this changing landscape, you need to know the latest networking technologies plus security, automation, and programmability—and hiring managers need to know that you know. Cisco® Certified Network Associate (CCNA) certification can take you where you want to go.

We designed the CCNA program to help you prove your skills in the ever-changing landscape of IT. The program has one certification that validates a broad range of fundamentals for all IT careers, with one exam and one training course to help you prepare. The CCNA exam covers a breadth of topics including network fundamentals, network access, IP connectivity, IP services, security fundamentals, and automation and programmability. Newly retooled for the latest technologies and job roles, the CCNA training course and exam give you the foundation you need to take your career in any direction.

The industry's most widely recognized and respected associate-level certification, CCNA is our way of saying we believe in you. And the process couldn't be simpler: pass one exam and you're done.

Actually, you're just getting started.

Benefits

· **Launch your career** with the CCNA certification

· **Master the essentials** including security, automation, and programmability, for rewarding work in a broad range of roles

· **Rev up your resume** with the most highly respected associate-level certification in the industry

· **Boost your confidence** by gaining real-world know-how

· **Link that digital certification badge** to all your social media profiles to tell the world what you've achieved

Industry recognition and real-world know-how

CCNA certification can launch your career. So go ahead. Earn that CCNA certification badge and post it on your social profiles.

Earning your CCNA certification

The CCNA program offers comprehensive associate-level training and certification focused on the technologies you need to implement and administer networking and IT infrastructure.

CCNA certification requires one exam, **200-301 Cisco Certified Network Associate** (CCNA). This exam covers a broad range of fundamentals you need for any direction you want to go. The **Implementing and Administering Cisco Solutions** (CCNA) course can help you prepare to pass the exam, with hands-on lab practice for real-world job skills.

Completing the training course not only prepares you for the exam; it also earns you:

- A Level 200 training badge. Training badges broadcast specific skills and learning outcomes that employers care about.
- 30 Continuing Education (CE) credits, which you can use to recertify your CCNA. You can also recertify by retaking the exam.
