

Cisco Mobile Testing

Drive students toward certification with training and testing bundle

Cisco Mobile Testing puts you in the driver's seat to your students' timely certification. You can offer your students a bundled training and testing package. Then you can administer the course-related exam soon after the training program is complete.

This package will be invaluable as students train and prep for a timely exam, with content fresh in their memories.

The support you offer through Cisco Mobile Testing gives your students confidence as they train and test in a familiar environment. Then they can complete their certification earlier, which can drive them toward their IT career goals sooner.

Benefits

- Training and associated exam offered as a bundle
- Testing anywhere, anytime
- Your location, your schedule
- No special hardware required
- On-demand testing events
- Opportunity to proctor exams

How Cisco Mobile Testing Works

- **Your location, your schedule**

You determine the exam location and the schedule for exam day. Deliver exams at your training center or at a conference center. You choose the location.

- **No special hardware needed**

All administrative tools are web-based. Your students can test on their own computers.

- **Worldwide exam delivery**

You have the flexibility to administer the exam at your global training locations or conference centers.

- **Flexible Testing Opportunities**

Choose the option that's right for your program objective:

Hosted testing events—your students can pre-register for their exam to ensure they have an opportunity to test during your event.

On-demand testing—perfect for smaller venues or drop-in locations where flexibility is key.

- **Opportunity to proctor exams**

Be a proctor at your testing event by simply applying and getting trained using proctoring tools and best practices.

Mobile Testing Experience for Candidates

Cisco proctor creates testing event and privately invites candidates.

Candidates register and pay for event (pre-registration with private invitation code or in real time).

Cisco Proctor unlocks exam in testing room. Monitors candidates during exam.

Candidates take and complete exam. Upon completion, candidates can view test scores.

Candidates retrieve score report

pearsonvue.com/cisco

Test results are uploaded to CertTracker—certification and digital badge are awarded if exam is passed.

Cisco proctor runs delivery reports and reports event success.
