

Modernization Unleashed- Flexible Networking Hardware Managed your way

John Cervantes - Account Executive - Architecture
Patrick Born - Solutions Engineer

Integrate seamless,
consistent customer
experiences across
physical and digital
footprints.

IT challenges, compounded:

Scalability

is limited by silos and distributed sites

Evolving requirements

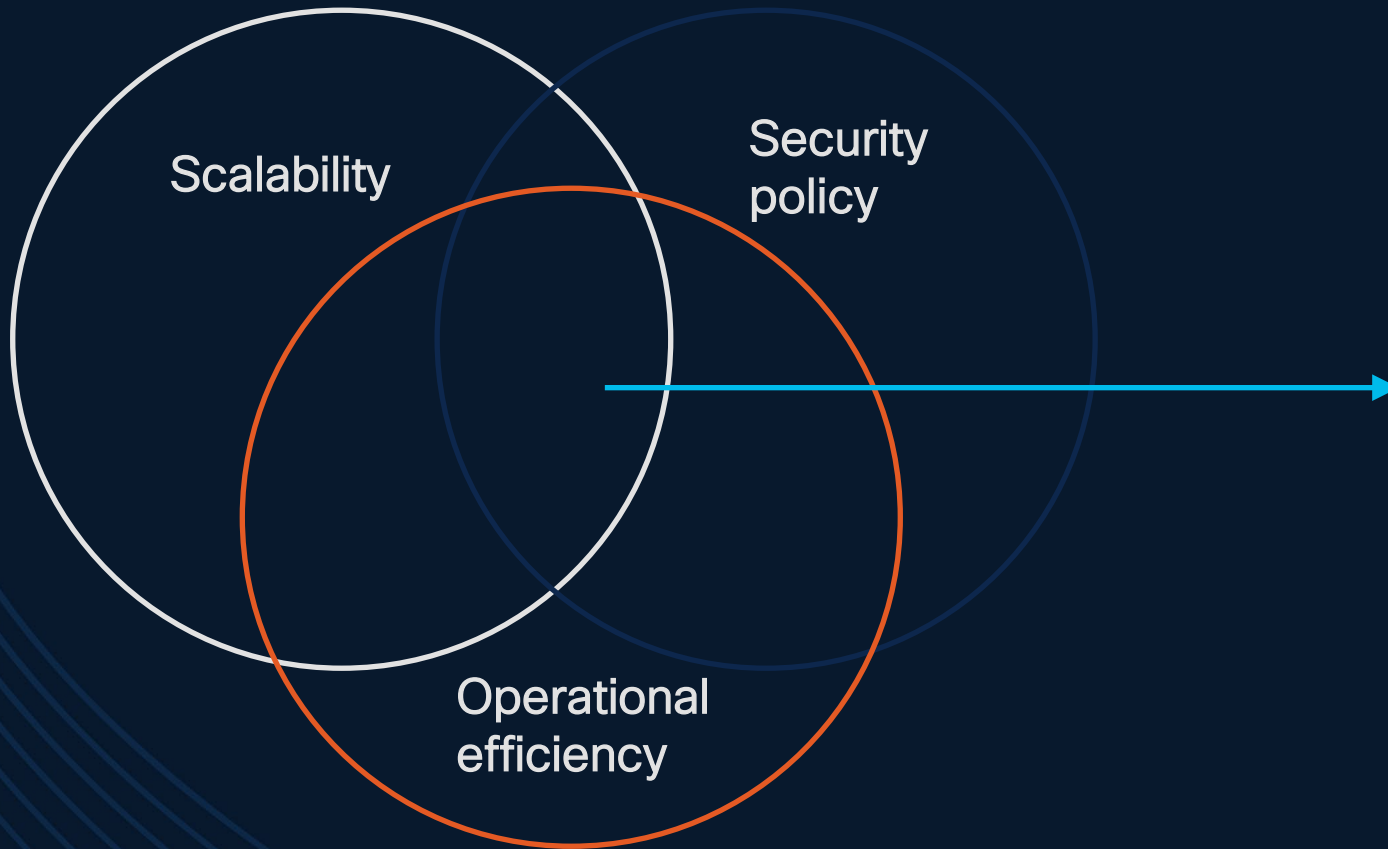

Pose challenges to maintaining security policies and increased skill gaps

Increased complexity

creates blind spots and hinders operational efficiency

Your user experience is only as good as your network.

Build a network that evolves with your needs, not the other way around.

Take a platform approach to enable:

Agility

Deliver new applications and services and respond to evolving changes rapidly.

Security

Protect users and privacy with context and stay ahead of evolving security policy and threats.

Efficiency

Boost employee productivity and deploy new sites without extra operational complexity and costs.

Cisco's comprehensive networking portfolio

monitoring

Catalyst
Center

Intuitive and efficient

Powerful and customizable

Meraki

Catalyst

When simplification and functionality meet

Catalyst 9300 Series

Catalyst 9160 Series

Same powerful hardware with flexible operations

NEW  Intuitive and efficient Meraki cloud platform

Orderable with

or

Powerful and customizable Cisco Catalyst Center

Cisco Wireless Wi-Fi 7

Meet the CW9176 and CW9178

Global Use Access Points for efficient, smart, scalable operations

Complete connectivity:
Bluetooth, IoT and location

Sustainably built and
power-savvy

Agility

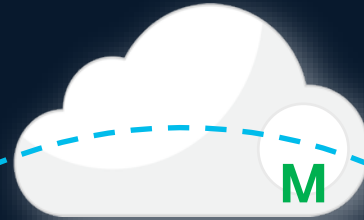

Deliver new applications and services and respond to evolving changes rapidly.

Scalable, flexible networks for more agility

ZERO DELAY

Scalable branch operations

- Zero-touch provisioning for fast branch deployment
- Instant, centralized visibility and remote troubleshooting
- Secure, reliable network connection and PoE power

INCREDIBLE VISIBILITY & ANALYTICS

ZERO DOWNTIME

Advanced core networks

- Powerful secure networking use cases
- Deep observability and insights
- Full control and visibility

Secure, flexible infrastructure

Catalyst

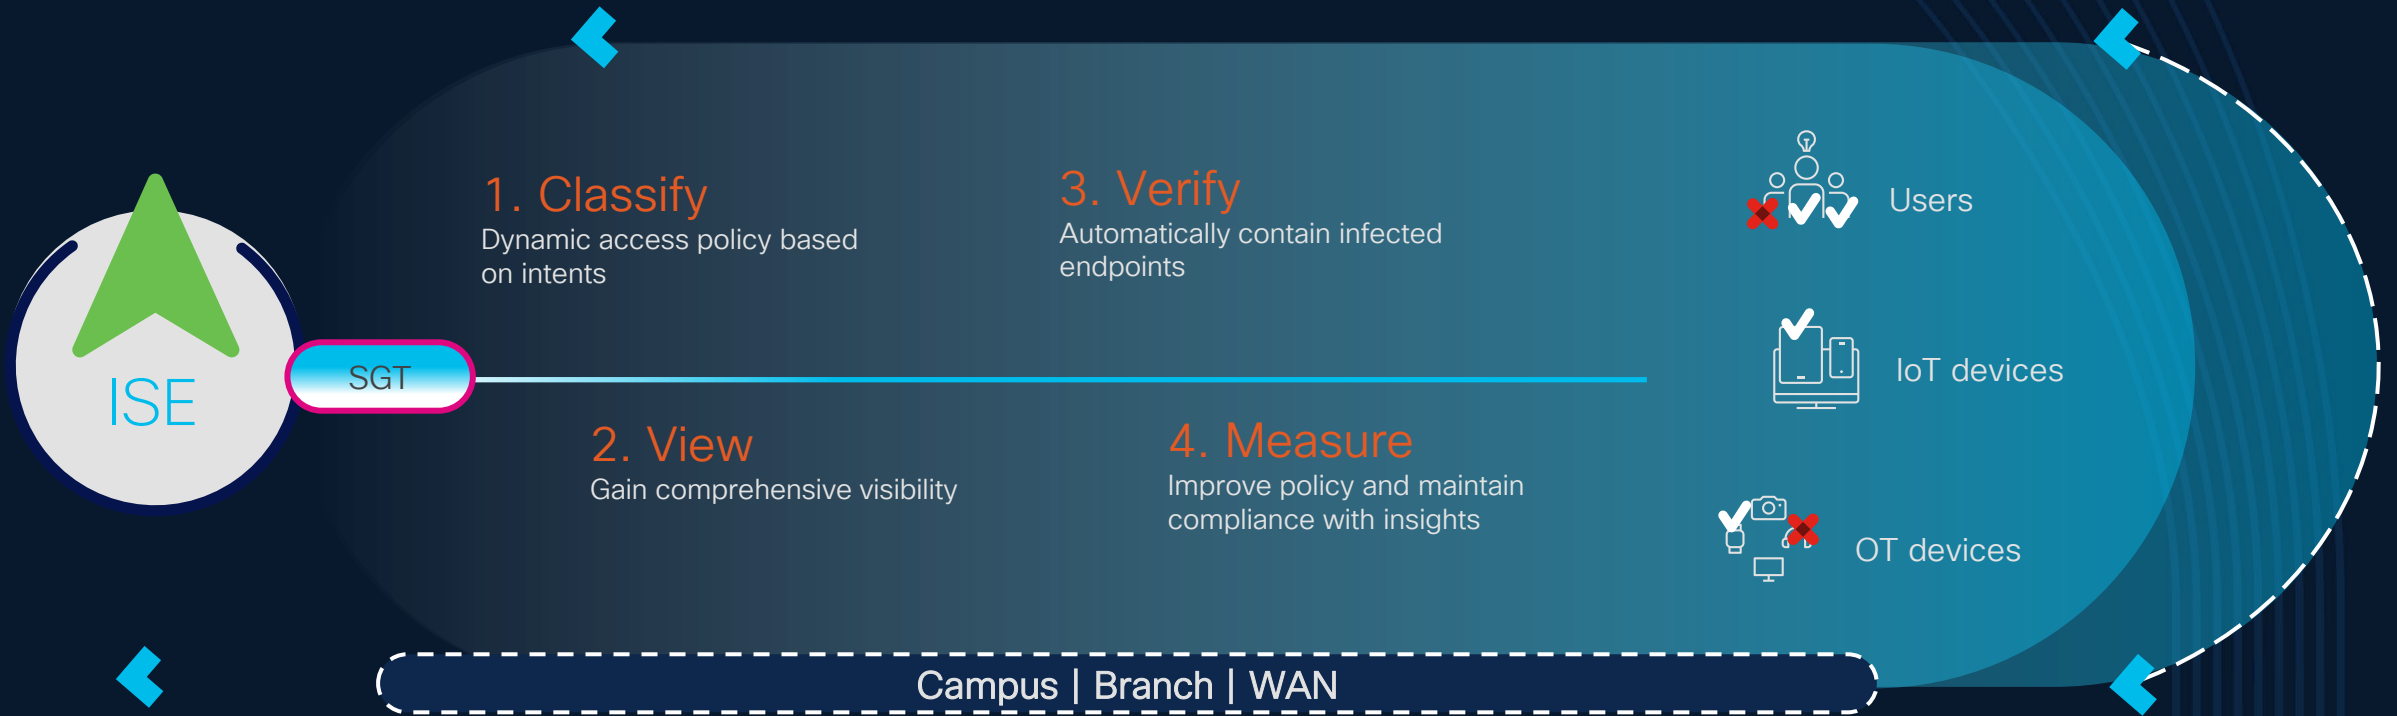

Security

Protect users and privacy with context and stay ahead of evolving security policy and threats.

Safeguard networks

With common policy across platforms

CISCO Meraki + **CISCO** Catalyst

Restrict malware propagation (with warning triangle icon)

Reduce risk (with network diagram icon)

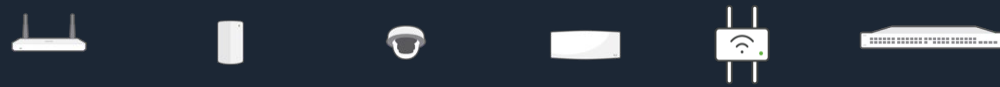

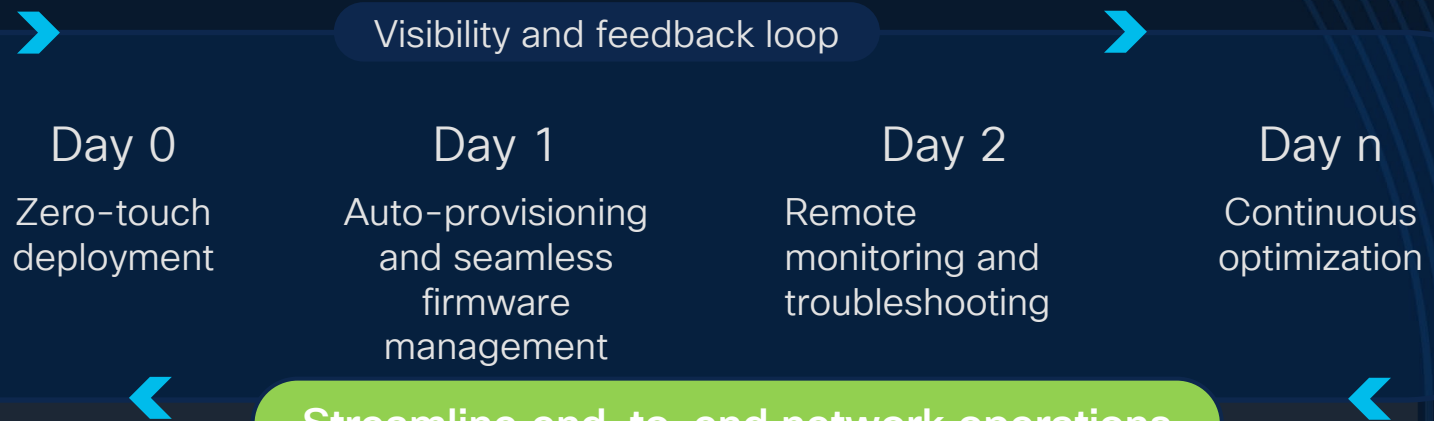

Meet compliance goals quickly (with network diagram icon)

Reduce SecOps effort (with stopwatch icon)

Efficiency

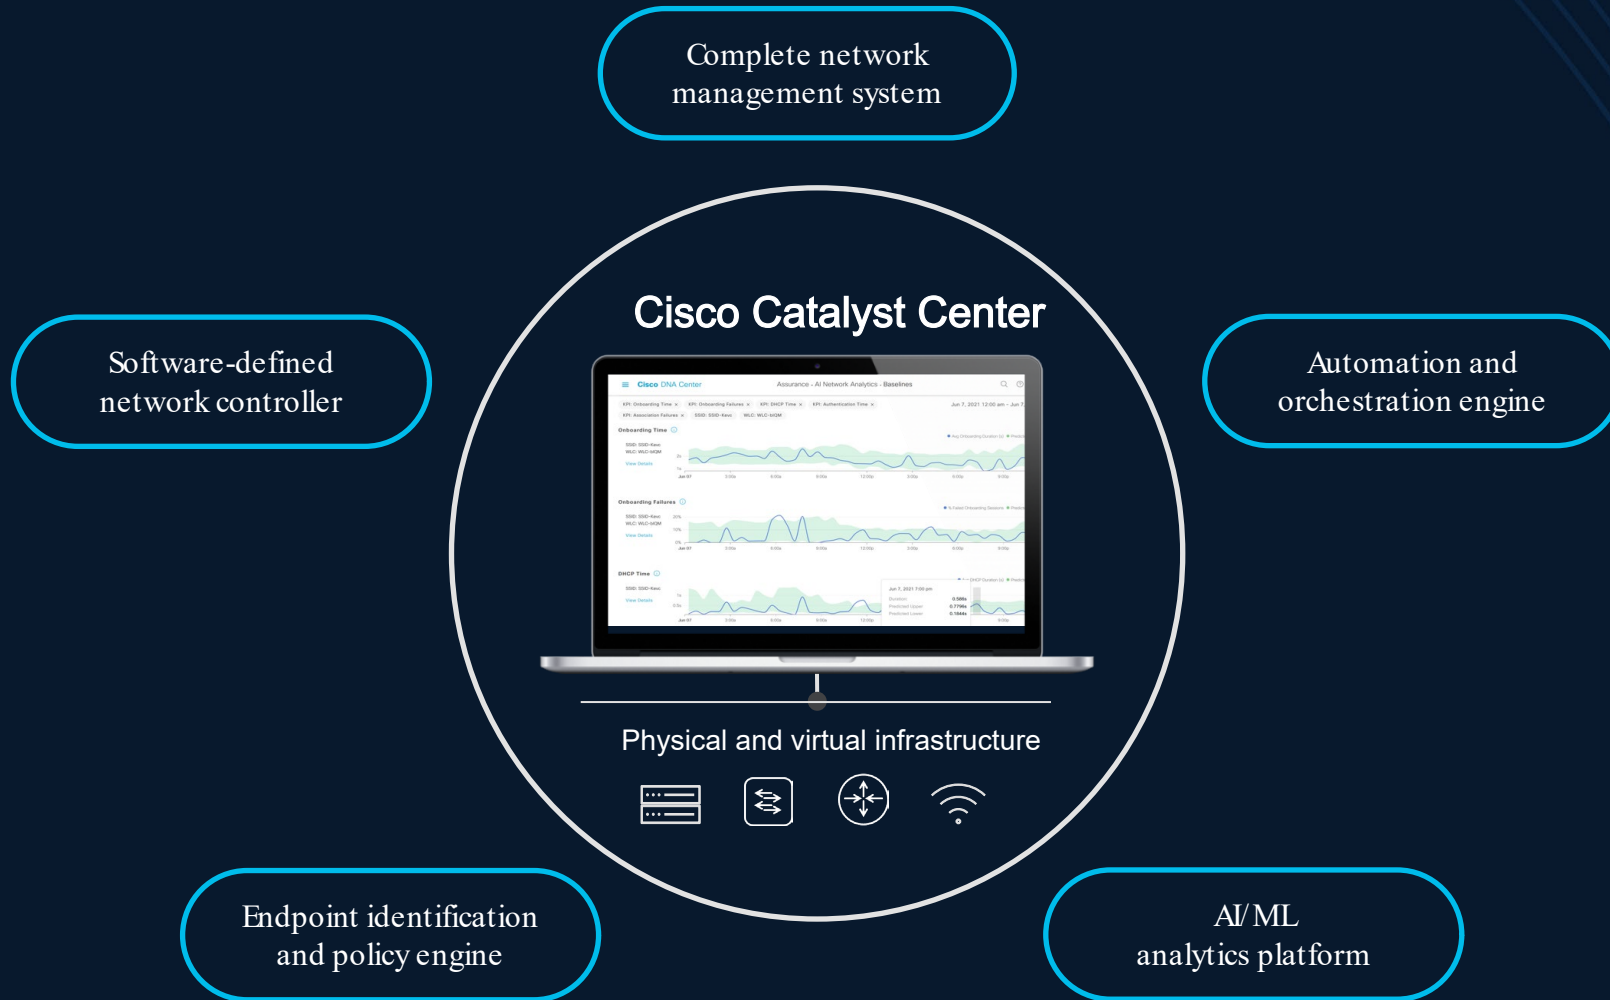

Boost employee productivity and deploy new sites without extra operational complexity and costs.

Meraki cloud-managed network

Cisco Catalyst Center

Command and control center for Cisco Catalyst

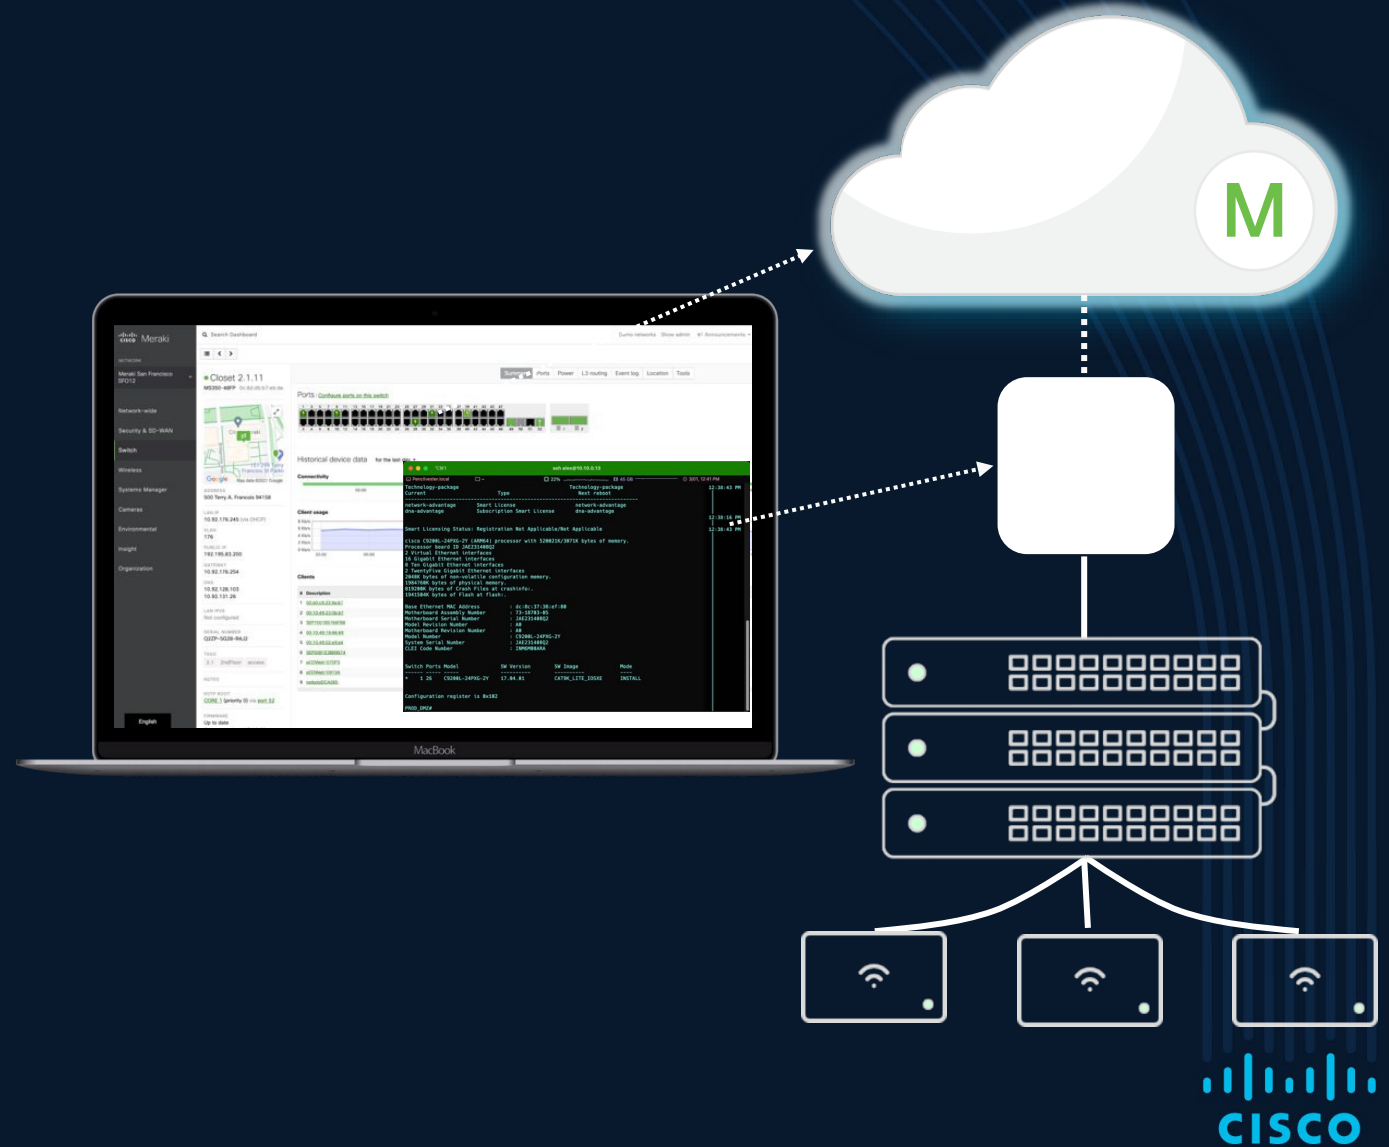

Catalyst cloud operations

Network client and traffic information

Unified view of Catalyst and Meraki devices

Network health, troubleshooting and maintenance from anywhere

Cloud monitoring for **Catalyst Wireless**

Get full visibility and telemetry across your entire wireless network

Support for C9800 controllers

Visibility into Wi-Fi Wave 2,
Wi-Fi 6, and 6E access points

Streamlined packet capture
and download in the dashboard
