# **Installation of Cisco Business Dashboard Lite**

# Objective

The objective of this article is to show you how to install Cisco Business Dashboard (CBD) Lite application for Microsoft Windows. This article will also cover the steps to upgrade and uninstall CBD Lite.

# **Applicable Devices | Software Version**

• Cisco Business Dashboard Lite | 2.8.0

#### Introduction

Cisco Business Dashboard Lite (CBD Lite) is a simplified version of Cisco Business Dashboard (CBD) that is installed as a Windows application. It automatically discovers your network and allows you to configure and monitor all supported devices. It also notifies you about the availability of firmware updates, and about any devices that are no longer under warranty or covered by a support contract.

Check out the <u>Cisco Business Dashboard Lite Device Support List</u> to learn more about the level of support offered by CBD Lite for the Cisco Business devices. Unsupported devices may be discovered; however, you will not be able to manage these devices

# **Prerequisites and System Requirements**

- OS Microsoft Windows (Windows 10 x64, Windows 11)
- Windows Server (2019, 2022)
- Any CPU/RAM specifications required by Windows
- Disk Space Requirements 3GB
- Internet Access Required for full functionality such as firmware updates, reporting

# **Table of Contents**

- Installation of CBD Lite
- Upgrading CBD Lite
- <u>Uninstalling CBD Lite</u>

# **Installation of CBD Lite**

Download the latest version of CBD lite from the Cisco Software Download page.

#### Step 10

Use the default credentials of **cisco/cisco** to launch the wizard the first time you run it.

Enter the new credentials in the fields provided and click **Save**.

# Change Default User 🕕

User Name\*

Old Password\*

New Password\*

I)

Retype New Password\*

During the first run wizard you will see a prompt to configure the privacy settings. It is recommended to use the default settings.

#### Step 13

The device wizard will then prompt you to input the device credentials used by switches on the network. Enter the username/password in the provided fields. You can add additional credential pairs (up to a total of three) by using the plus button.

If you leave the default (cisco/cisco), you will need to input the device credentials later. Once the credentials have been set, click **Next**.

#### Step 14

By default, most networks for CBD Lite will be discovered using Bonjour if the instance is connected to the management VLAN. If CBD Lite instance is on a different subnet or if you have network devices on a separate subnet that you wish to manage, you can specify an IP range to manually scan for devices in the setup wizard. You can also scan a subnet after the first run wizard is complete.

In most cases, simply click Next to continue.

The final Summary screen of the first run wizard will confirm the previous two selections. Click Finish to complete the setup.

#### Note:

If you cancel this option, the CBD Lite application will retain the password and privacy settings configured at the beginning of the first run wizard.

=	Cisco Business	Dashboard Lite

		No IPv4 ranges specified		
			Previous	Finish

## Things to remember

I

• As CBD Lite is an application, it must be started manually. Unless the application is running, neither local nor remote users will be able to access the CBD Lite web page.

Cancel

• The application data is also stored in the profile of the user who installed the application. This means to keep passwords, settings, backups, and configurations the same user must launch the application every time.

• If a second user logs onto the system and launches the app, it will set up a new profile and run through the first run wizard again.

• If multiple users are accessing the CBD Lite web page, it is recommended to have a local server or a dedicated desktop system.

# **Upgrading CBD Lite**

#### Step 1

CBD Lite will show a notification on the screen when a new software version is available for download.

cisco

# **Cisco Business Dashboard Lite**

## 2.8.0.20240604

Download Cisco Business Dashboard Lite version 2.8.1

@ 2015-2024 Cisco Systems, Inc. All Rights Reserved.
Cisco, Cisco Systems, and the Cisco Systems logo are registered trademarks or trademarks of Cisco Systems, Inc. and/or its affiliates in the United States and certain other countries.

#### Step 2

Open the **About** screen on CBD Lite where you will see the download button for the new CBD Lite software.

The link will navigate you to the Cisco software download page where you can download the new version of the CBD Lite Installer.

# Software Download

	OK Cancel		

# **Uninstalling CBD Lite**

There are two ways you can uninstall CBD Lite.

## **Option 1**

In Windows 11, go to **Settings > Apps > Installed apps** menu and click on the three dots next

#### to Cisco Business Dashboard Lite and choose Uninstall.

Note:

Different versions of Windows may have a different path to the Installed Apps menu.

#### **Option 2**

You can also browse to the install directory under **Program Files > CiscoBusiness > DashboardLite** and simply double click the *Uninstall* application.

The uninstall process deletes the *CiscoBusiness* directory under *AppData* and the contents of the *CiscoBusiness* directory under program files.

This PC > Windows (C:) > Program Files > CiscoBusiness > DashboardLite >				
) 🖻 🗊 ঝ Sort - 📰 View -				
Name	Date modified	Туре	Size	
5 %TEMP%	7/16/2024 8:36 AM	File folder
