CHAPTER

Installing Cisco Business Dashboard Lite

This chapter contains the following:

- Installation, on page 1
- Windows Firewall Rules, on page 3

Installation

To install the Cisco Business Dashboard Lite application perform the following steps:

Step 1 Download and install the latest version of Cisco Business Dashboard Lite setup file from Download page.

Note Only support installing on 64Bit OS: Windows10, Windows11, Windows Server 2019 and Windows Server 2022. If there is already a Cisco Business Dashboard Lite application running, please close it before installation. Java and MongoDB are automatically bundled with the download.

- **Step 2** Double click the executable file (cisco-business-dashboard-lite-<version>-windows-x86_64.exe) and follow the instructions to finish installation.
 - **Note** You can choose destination folder which is the location to put all the binary files while all user data reside under %LOCALAPPDATA%\CiscoBusiness\DashboardLite

Note Please refer to the Cisco Business Dashboard Lite Quick Start Guide for details of how to manage the application and perform initial setup.

Windows Firewall Rules

Cisco Business Dashboard Lite needs to be able to communicate with the devices on the network and allowed through the Windows Firewall. So Java programs need to be allowed through the Windows Firewall.

'Windows Security Alert' will show up the first time application is launched. Make sure to click 'Allow access'.

im Windows Security Alert						
Windows Defender Firewall has blocked some features of this app						
Windows Defender Firewall has blocked some features of Java(TM) Platform SE binary on all public and private networks.						
<u>«</u> ,	Name:	Java(TM) Platform SE binary				
E	Publisher:	Oracle Corporation				
	Path:	C:\program files\ciscobusiness\dashboardlite\jdk\bin \java.exe				
Allow Java(TM) Platform SE binary to communicate on these networks:						
Private networks, such as my home or work network						
Public networks, such as those in airports and coffee shops (not recommended because these networks often have little or no security)						
What are the risks of allowing an app through a firewall?						
		Allow access Cancel				

You can also do this configuration through **Control Panel > System and Security > Windows Defender Firewall > Allowed apps**:

→ ` ↑ 🔐 > Control Panel >	System and Security > Windows Defender Firewall > Allowed apps			~
	Allow apps to communicate through Windows Defender	r Firewall		
	To add, change, or remove allowed apps and ports, click Change settings.			
	What are the risks of allowing an app to communicate?	Cł	nange sett	ings
	Allowed apps and features:
