New and Changed Information

This chapter contains the following sections:

New and Changed Information

The following table provides an overview of the significant changes to the organization and features in this guide up to this current release. The table does not provide an exhaustive list of all changes made to the guide or of the new features up to this release.

Table 1: New Features and Changed Behavior for Cisco APIC Release 6.0(2)

Feature or Change	Description	Where Documented
First Hop Security (FHS) support for VMM	FHS is supported on the VMware DVS VMM domain. Ensure to enable intra EPG isolation for implementing FHS within an EPG.	About First Hop Security

Table 2: New Features and Changed Behavior for Cisco APIC Release 6.0(1)

Feature or Change	Description	Where Documented
Support for user group map rule for SAML or OAuth2	You can create a user group map rule for SAML and OAuth 2 to support authentication by an external server.	Creating Login Domain Using the GUI
AAA GUI modifications	The APIC GUI for the path, **Admin** > **AAA** has been modified. The Work panes of **Authentication**, **Security**, and **Users** have been enhanced for better functionality, and ease of use.	Cisco APIC GUI Enhancements **Note** As a result of the GUI update, the navigation paths for many procedures have changed. The paths have been updated in the relevant procedures.
