New and Changed Information

The following table provides an overview of the significant changes to the organization and features in this guide up to this current release. The table does not provide an exhaustive list of all changes made to the guide or of the new features up to this release.

Table 1: New Features and Changed Behavior in Cisco Cloud APIC Release 5.2(1)

Feature or Change	Description	Where Documented
Support for private IP address to access a Cisco Cloud Services Router (CSR) and Cisco Cloud APIC	Beginning with release 5.2(1), you can assign a private IP address to a Cisco Cloud Services Router (CSR) and Cisco Cloud APIC.	
Support for triggering CSR upgrade independent of Cisco Cloud APIC upgrade	Prior to release 5.2(1), the CSRs were upgraded automatically whenever you trigger an upgrade for the Cisco Cloud APIC. Beginning with release 5.2(1), you can manually trigger an upgrade of the CSRs, independent of the Cisco Cloud APIC upgrades.	Triggering an Upgrade of the Cloud Service Routers
