SPANIRF2QNONTRUNK	2-Critical	Received 802.1Q BPDU on non 802.1Q trunk [chars] [chars].	The listed interface on which a SSTP BPDU was received was in trunk mode but not using 802.1Q encapsulation.	pvst	"Verify that the configuration and operational state of the listed " "interface and that of the interface to which it is connected have " "the same mode access vs trunk. If mode is trunk verify the same "
SPANIRF2RCV_BAD_TLV	2-Critical	Received SSTP BPDU with bad TLV on [chars] [chars].	The list interface received a SSTP BPDU that was missing the VLAN id tag. The BPDU is discarded.	pvst	LOG_SID_RECUR_ACTION
SPANIRF2RCV_PVID_ERR	2-Critical	Received BPDU with inconsistent peer vlan id [dec] on [chars] [chars].	The listed interface received a SSTP BPDU that is tagged with a VLAN id that does not match the VLAN id on which the BPDU was received. This occurs when the native VLAN is not consistently configured on both ends of a 802.1Q trunk.	pvst	"Verify that the configuration of the native VLAN id is consistent " "on the interfaces on each end of the 802.1Q trunk connection. " "Once corrected spanning tree will automatically unblock the interfaces " "as appropriate."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
<del>SNTR</del> ROOTGUARD_BLOCK	2-Critical	Received a superior STP BPDU from bridge [enet]. Root guard blocking port [chars] on [chars].	A BPDU was received on the listed interface which advertizes a superior spanning tree root bridge to that currently in use. The interface is put into blocking state and marked as root guard inconsistent in order to prevent a suboptimal spanning tree topology to form.	rootguard	"Issue the <code>&lt;CmdBold&gt;show spanning-tree inconsistent-ports&lt;/CmdBold&gt;</code> " "command to review the list of interfaces with root guard inconsistencies." "Determine why devices connected to the listed ports are sending " "BPDUs with a superior root bridge and take action to prevent further " "occurrences. Once the bogus BPDUs have been stopped the interfaces will " "automatically recover and resume normal operation." "Make sure that it is appropriate to have root guard enabled on the " "interface."
<del>SNTR</del> ROOTGUARD_ERR	2-Critical	Root guard [chars] on port [chars].	The spanning tree root guard configuration for the listed interface has been changed. If enabled any BPDU received on this interface which advertizes a superior spanning tree root bridge to that already in use will cause the interface to be put into blocking state and marked as root guard inconsistent.	rootguard	"Verify that this is the desired configuration for the listed interface." "Correct it if this is not the desired configuration otherwise no further " "action is required."

<b>Facility-Severity-Mnemonic</b>	<b>Severity-Meaning</b>	<b>Message</b>	<b>Message-Explanation</b>	<b>Component</b>	<b>Recommended-Action</b>
<del>SPANREPROG</del> <u>ADUNBK</u>	2-Critical	Root guard unblocking port [chars] on [chars].	The listed interface is no longer receiving BPDUs advertizing a superior root bridge. The root guard inconsistency is cleared for the interface and then it is taken out of the blocking state if appropriate.	rootguard	LOG_SID_NO_ACTION
<del>SPANREPROG</del> <u>CONSIP</u>	2-Critical	Unblocking [chars] on [chars]. Port consistency restored.	The Port VLAN ID and/or Port Type inconsistencies have been resolved and spanning tree will now unblock the listed interface of the listed spanning tree instance as appropriate.	pvst	LOG_SID_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
<del>SPANREB</del> ADPORN_MSE	3-Error	Rejected an attempt to set the port number field size to [dec] bits valid range is [dec] to [dec] bits.	The spanning tree port identifier is a 16 bit wide field that is by default divided evenly between port priority and port number each sub field being 8 bits wide. This allows the port number field to represent port numbers between 1 and 255. However on systems with greater than 255 ports the size of port number portion of the port id must be increased to support the greater number of ports. This is done by the STP subsystem at system init time since the maximum number of ports on a particular platform will not change. This error would only occur due to an error in the platform specific code which caused it to request more or less	stp	"show version"
<del>SPANREB</del> ERRNOUNRIDE	3-Error	[chars]: Portfast disabled reverting to bidirectional mode	Because UCP is for edge ports only portfast must be configured. This message is typically seen when spanning-tree portfast is enabled on a port then authentication control-direction is set to inbound unidirectional and then	stp	"Re-enable portfast on the edge port. This will re-enable unidirectional authentication control."

Determine the component from the stack trace and process name\n\ displayed in the error message. \n\ Use Topic to search for a similar DDTS. If you find none write\n\ a DDTS for this problem. If the stack trace indicates that the\n\ buffer code was called from an interrupt handler use the interrupt\n\ handler to determine the DDTS component. Otherwise use the process\n\ name to determine the DDTS component.	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

VINES-2-BADPARAM	2-Critical	[chars] called with [chars] parameter set to [chars]	One of the VINES lookup functions was called with an illegal\n\ argument.	vines	"Copy the message exactly as it appears do a memory dump up to\n\ 128 bytes and the location specified in the error message and report\n\ this information to your technical support representative."
VINES-2-BADTIMER	2-Critical	RTP timer for [chars] was found disabled and was reset	An internal interface timer is not running. This condition usually\n\ occurs after an interface is reset.	vines	"No action is required. The system automatically restarts the timer."
VINES2-CACHEFAILED	2-Critical	Cannot build cache entry [dec] bytes for [v-name] on [chars]	VINES fast switching detected that the packet destined to a given\n\ address did not have proper encapsulation information or its\n\ encapsulation size was too large to fit into the cache.	vines	"Verify that the VINES encapsulation and interface-specific mappings\n\ for the interface concerned are properly configured. Copy the\n\ message exactly as it appears and report it your technical\n\ support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
VINES2CACHEUNSUPP	2-Critical	Caching of [chars] not supported on [chars]	The cache population routing for VINES fast switching was called for\n\n an interface that does not support VINES fast switching.	vines	"Copy the message exactly as it appears and report it your technical\n\n support representative. If other encapsulation types are available\n\n on the interface try using them. If this problem is not limited to \n\n one or two destinations but rather occurs with all traffic\n\n using the interface disable VINES fast switching for the\n\n interface until you have identified the real cause of the problem."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
VINES2-CONSISTENCY	2-Critical	Error [chars]	<p>The VINES code ran into a situation that should not happen. For example an IPC port number needs to be allocated but all 65535 port numbers are currently in use. Another possible cause is that VINES attempted to add a cache entry but had no path associated with the destination address. This may cause temporary slow performance to only those stations that have experienced this inconsistency until complete cache entries are added. However connectivity should not be lost because all data traffic can still be routed via process-level switching.</p>	vines	<p>"Copy the message exactly as it appears and report it your technical support representative. If the warning message is about IPC port number depletion use the show vines ipc command to check how many IPC ports are currently in use by which services and determine whether the IPC connections are all legitimate. To release IPC ports issue the clear vines ipc command. If the warning message is about vines cache entries provide the contents of the vines route cache neighbor and route tables immediately after the error messages appeared. If the problem persists issue the clear vines cache command and monitor the router if the situation improves."</p>

<b>Facility-Severity-Mnemonic</b>	<b>Severity-Meaning</b>	<b>Message</b>	<b>Message-Explanation</b>	<b>Component</b>	<b>Recommended-Action</b>
VINES2CORRUPTENRY	2-Critical	Detected a corrupted entry in the [chars] table	The VINES code detected that an internal table entry was corrupted.	vines	"Copy the message exactly as it appears and report it your technical support representative. If possible clear the VINES routing table or neighbor table depending on the table in which the corrupted entry was observed. This will result in a temporary loss of connectivity until the routing or neighbor table is rebuilt."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
VINES-2-DUPADDR	2-Critical	Duplicate address detected on interface [chars]	The router detected that its VINES address is being used by another\n\n router.	vines	"To identify the other router that is using this address manually\n\n inspect each router's configuration. When you have identified\n\n the router with the duplicate address issue the vines routing\n\n recompute command on both routers or issue the enable vines routing \n\n command specifying specify a unique address. If one of the routers \n\n does not support the recompute keyword disable VINES on that router \n\n issue the write terminal command to save the configuration to memory \n\n reboot the router and then enter the vines routing command with\n\n a unique vines address on the offending routers until each router has\n\n a unique address."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
VINES2-ENCAPFAILED	2-Critical	Encapsulation failed for [v-name] via [v-name] on [chars]	VINES fast switching encountered an encapsulation failure when building a cache entry for a neighbor.	vines	<p>"Examine your configuration for causes of the encapsulation failure. Look for missing map statements interfaces that have gone down and so on. If this error results in lost connectivity disable vines fast switching by issuing the no vines route-cache command. Because disabling fast switching will slow network perform you should issue the vines route-cache command to re-enable fast switching as soon as you have identified the cause of the problem. If you cannot identify the cause contact your technical support representative. Provide the output of the show vines cache show vines neighbor and show vines route commands for the destination address and neighboring routers you are using. Also provide the output of the show interface and show vines interface commands for the incoming and outgoing interfaces."</p>

<b>Facility-Severity-Mnemonic</b>	<b>Severity-Meaning</b>	<b>Message</b>	<b>Message-Explanation</b>	<b>Component</b>	<b>Recommended-Action</b>
VINES2-INVALIDPATH	2-Critical	Bad [chars] in path for neighbor entry %z	While searching the neighbor table the code determined that a pointer\n that should point to a VINES path structure actually points to some\n other structure.	vines	"Copy the message exactly as it appears and report it your technical\n support representative. If possible clear the VINES\n neighbor table. This will result in a temporary loss of connectivity\n until all neighbors and routes are relearned."
VINES2-INVALIDROUTE	2-Critical	Bad [chars] in route for server entry %Z	While searching the routing table the code determined that a pointer\n that should point to a VINES route structure actually points to some\n other structure.	vines	"Copy the message exactly as it appears and report it your technical\n support representative. If possible clear the VINES\n routing table. This will result in a temporary loss of connectivity\n until all routes are relearned."

<b>Facility-Severity-Mnemonic</b>	<b>Severity-Meaning</b>	<b>Message</b>	<b>Message-Explanation</b>	<b>Component</b>	<b>Recommended-Action</b>
VINES-2-NOBUFFERS	2-Critical	No buffers available for [chars]	There were no buffers available to send a VINES service query\n\n or reply.	vines	"Examine your system's memory and buffer capacity and compare\n\n it with current usage. If you notice a substantial discrepancy\n\n monitor your system for possible memory leaks or buffer drainage\n\n and report the problem to your technical support representative\n\n along with the output of the show memory show memory processor\n\n show buffers show buffers assigned and show buffers old commands."
VINES-2-NOVENCAP	2-Critical	Encapsulation failed on [chars] for address [v-name]	The VINES code tried to send a packet on an interface that does not\n\n have a new encapsulation routine for outbound packets.	vines	"Toggle the problematic interface by issuing the interface shut and\n\n no shut commands and then issue the no vines metric and vines metric\n\n command see if the problem goes away. If the problem persists copy\n\n the message exactly as it appears and report it your technical\n\n support representative.
