

Preface

This section explains the objectives and intended audience of this publication and describes the conventions that convey instructions and other information.

Objectives

This guide provides instructions for installing, migrating, and uninstalling Cisco Hosted Collaboration Mediation (HCM) Release 1.1 on a Linux system.

Audience

The primary audience for this guide includes network operations personnel and system administrators. This guide assumes that you are familiar with the following products and topics:

- Basic internetworking terminology and concepts
- Red Hat Enterprise Linux
- Cisco Secure Access Control System (ACS) Server
- JBoss Application Server
- MySQL Administration
- Oracle database administration

Conventions

This document uses the following conventions:

| Item | Convention |
|--|--|
| Commands and keywords | boldface font |
| Displayed session and system information | screen font |
| Information that the user must enter | boldface screen font |
| Variables that the user must supply | <i>italic screen</i> font |
| Menu items and button names | boldface font |
| Selecting a menu item | Option > Network Preferences |

Caution

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

Note

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the manual.

Timesaver

Means *the described action saves time*. You can save time by performing the action described in the paragraph.

Tip

Means *the following information will help you solve a problem*.

Product Documentation

Table 1 lists the HCM documentation set.

We sometimes update the documentation after original publication. Therefore, you should also review the documentation on Cisco.com for any updates. You must access the links in Table 1 for the most current HCM 1.1 documentation.
