What's New in Cisco NFVIS

Note To achieve simplification and consistency, the Cisco SD-WAN solution has been rebranded as Cisco Catalyst SD-WAN. In addition, from Cisco IOS XE SD-WAN Release 17.12.1a and Cisco Catalyst SD-WAN Release 20.12.1, the following component changes are applicable: **Cisco vManage** to **Cisco Catalyst SD-WAN Manager**, **Cisco vAnalytics** to **Cisco Catalyst SD-WAN Analytics**, **Cisco vBond** to **Cisco Catalyst SD-WAN Validator**, **Cisco vSmart** to **Cisco Catalyst SD-WAN Controller**, and **Cisco Controllers** to **Cisco Catalyst SD-WAN Control Components**. See the latest Release Notes for a comprehensive list of all the component brand name changes. While we transition to the new names, some inconsistencies might be present in the documentation set because of a phased approach to the user interface updates of the software product.

Table 1: Cisco SD-Branch Release 20.12.x

Feature	Release Information	Description
Manage Cisco NFVIS Devices Using Cisco SD-WAN Manager Via NFV Configuration Group.	Cisco NFVIS Release 4.12.1 Cisco SD-WAN Manager Release 20.12.1	You can manage the lifecycle of Cisco NFVIS devices using Cisco SD-WAN Manager. **Note** The hardware that supports this feature will be updated in the furture releases. You can view only the software changes.

Table 2: Cisco SD-Branch Release 20.9.x

Feature	Release Information	Description
