

Managing enterprises

A Security Cloud enterprise is a trust boundary for Cisco products, users, registered domains, identity providers, and other metadata.

- Create an enterprise, on page 1
- Rename an enterprise, on page 2
- Switch enterprises, on page 2
- Support access to an enterprise, on page 3

Create an enterprise

You can create multiple enterprise, each with their own set of users, products, and other enterprise data.

Procedure

Step 1 In Security Provisioning and Administration, hover over the **Enterprise** menu at the top of the browser and click **Create new enterprise**.

A dialog warns you that by creating a new enterprise will you leave the current page.

•>	Enterprise Example Corp	, Overview - Example Corp 🔗	Claim subscription
	Overview	Activation pending 3	
8≡	Users	🔺 Creating New Enterprise	6/27/2023 Activate
	Domains	By creating a new enterprise, you will leave this page. Proceed anyway?	
P }	Identity Providers		6/27/2023 Activate
		Cancel Proceed	
			6/27/2023 Activate
		Products	
		Cisco XDR	
		Instance ID	

Step 2 Click Proceed.

Security Provisioning and Administration reloads with the new created enterprise selected. The enterprise is given a default name, which you can Rename an enterprise.

Rename an enterprise

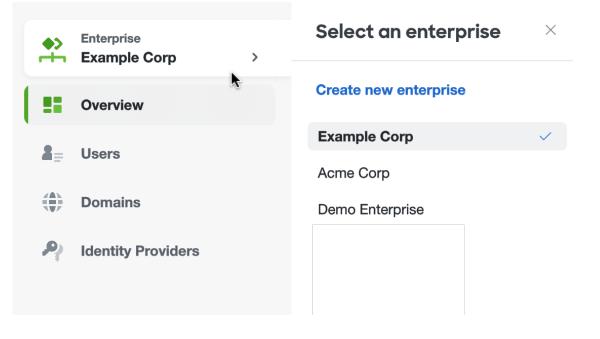

You can rename an enterprise that you've created. Enterprise names are limited to 50 characters.

Procedure

Step 1	Switch enterprises that you want to rename from the Enterprise menu.
Step 2	Click the pencil icon \checkmark next to the enterprise name at the top of Security Provisioning and Administration page.
Step 3	In the Edit Enterprise Name dialog box, enter the new enterprise name and click Save.

Switch enterprises

All operations you perform in Security Provisioning and Administration, such as creating domains or inviting users, are applied to the currently selected enterprise. The **Enterprise** menu at the top of Security Provisioning and Administration shows the currently selected enterprise. To switch to another enterprise, hover over the **Enterprise** menu and select an enterprise from the fly-out menu. You can also Switch enterprises from this menu.

Procedure

Step 1	Sign in to Security Provisioning and Administration.
Step 2	Hover over the Enterprise menu and select the desired enterprise from the fly-out menu.
	Security Provisioning and Administration reloads with the selected enterprise.

Support access to an enterprise

To help the support team diagnose and debug issues more effectively, you can grant the team temporary access to your enterprise. This access is automatically revoked after a specified duration, and can also be disabled anytime after it is no longer needed.

Enable support access

You can grant the support team access to your enterprise for better diagnosis and debugging.

Procedure

Step 1 In the Security Provisioning and Administration window, hover over the Enterprise menu and from the slide-in pane, select the enterprise .

Security Provisioning and Administration reloads with the selected enterprise.

Step 2 Click **Support Access** in the left navigation pane.
