

License

- [License, on page 1](#)

License

You can install a license in Cisco Cyber Vision in the License administration panel.

Licensing is based on device count. For device count to be more accurate, it is advised to setup the subnetworks of the monitored industrial network through the [Network organization](#) page. By doing so, you will declare which subnetworks are internal, and which are external. Devices from external subnetworks will be excluded from the license count and related costs would be reduced.

To register Cisco Cyber Vision with Cisco Smart Software Licensing:

- Ensure this product is set with the right Software Subscription Licensing (Essentials or Advantage). This might require you to [edit the Software Subscription Licensing](#).
- Ensure this product has access to the internet. This might require you to [edit the Smart Call Home Transport Settings](#).
- Log in to your Smart Account in [Smart Software Manager](#).
- Navigate to the Virtual Account containing the licenses to be used by this Product Instance.
- Generate a Product Instance Registration Token (this identifies your Smart Account) and copy or save it.
