Overview

The Cisco IC3000 Industrial Compute Gateway is an edge computing platform which extends the cloud computing paradigm to the edge of the network. The Cisco IC3000 captures traffic in SPAN mode. It contains 2 RJ45 10/100/1000 BaseT connectors ports and 2 SFP fiber ports to connect switches in port mirroring.

To enroll the Cisco IC3000 in Cisco Cyber Vision, take a moment to look at the Cisco IC3000's parts, then start by connecting the hardware, and proceed with one of the installation methods available:

- Use the sensor management extension available on cisco.com (recommended).

- Perform a manual installation.

- Perform a manual installation without USB.

To upgrade the Cisco IC3000, refer to one of the methods available:

- Use the combined update file.

- If the sensor management was used to deploy the sensor, use the redeploy button from the sensor popup.

- Upgrade through the CLI.
