

Removing All Data with the Wipe Appliance Boot Option

This appendix describes how to use the Wipe Appliance boot option to remove all data from the Threat Grid Appliance. It includes the following topics:

- About Wipe Appliance, on page 1
- Wipe Appliance Procedure, on page 1
- Wipe Appliance and Clusters, on page 3

About Wipe Appliance

The Wipe Appliance boot option enables you to wipe the disks on a Threat Grid Appliance to remove all data prior to decommissioning or returning it to the Cisco Demo Loan Program.

Note

The Wipe Appliance boot option should not be confused with Data Reset, which prepares an appliance to restore a backup by clearing operating system logs and other state with the destroy-data command.

After performing the wipe appliance procedure, the Threat Grid Appliance will no longer operate without being returned to Cisco for reimaging.

Wipe Appliance Procedure

Perform the following steps to wipe the appliance:

Step 1 Reboot your appliance and immediately select Wipe Appliance during the 4-second bootup window.

Step 2 Enter the following information:

• Username - wipe

• Password - I ACCEPT ALL RESPONSIBILITY FOR THIS ACTION

Step 3 Select a Wipe option:

Step 4 Press **Enter** to exit.

Wipe Appliance and Clusters

After performing a wipe operation, the Threat Grid Appliance will no longer operate unless it is returned to Cisco for reimaging. Wipe should only be used on a cluster node after that node has been flagged in the Admin UI as permanently removed.
