

Release Notes for AsyncOS 14.5.1 Hot Patch 1 for Cisco Web Security Appliances

First Published: 2024-06-27

About Secure Web Appliance

The Cisco Secure Web Appliance intercepts and monitors internet traffic and applies policies to help keep your internal network secure from malware, sensitive data loss, productivity loss, and other internet-based threats. It acts as a proxy server, intercepting web requests from users and scanning the requested web content for potential threats such as malware, viruses, and phishing attempts. Cisco Secure Web Appliance uses various security technologies such as URL filtering, antivirus scanning, reputation-based filtering, and advanced malware protection to ensure the security of web traffic.

Build Number and Release Date

Build Number: 14.5.1-510

Release Date: June 27, 2024

Upgrade Paths

Note Before upgrading to this release, save a copy of the appliance configuration file to a location other than the appliance.

You can upgrade to the 14.5.1-510 HP release from the following versions:

- 14.5.1-016

Known and Fixed Issues

Log in to Cisco Bug Search Tool using your Cisco account credentials to view the list of fixed bugs.

Support

Cisco Support Community

Cisco Support Community is an online forum for Cisco customers, partners, and employees. It provides a place to discuss general web security issues as well as technical information about specific Cisco products. You can post topics to the forum to ask questions and share information with other Cisco users.

Access the Cisco Support Community for web security and associated management:

<https://supportforums.cisco.com/community/5786/web-security>

Customer Support

Note To get support for virtual appliances, call Cisco TAC. Have your Virtual License Number (VLN) number ready before you call TAC.

Cisco TAC:
