

Configuring DNS Servers

This chapter includes the following sections:

- DNS Servers in Cisco UCS, page 1
- Adding a DNS Server, page 1
- Deleting a DNS Server, page 2

DNS Servers in Cisco UCS

You need to specify an external DNS server for each Cisco UCS instance to use if the system requires name resolution of hostnames. For example, you cannot use a name such as www.cisco.com when you are configuring a setting on a fabric interconnect if you do not configure a DNS server. You would need to use the IP address of the server.

Adding a DNS Server

Procedure

- **Step 1** In the Navigation pane, click the Admin tab.
- **Step 2** In the Admin tab, expand All > Communication Services.
- Step 3 Click DNS Management.
- **Step 4** In the Work pane, click the General tab.
- **Step 5** In the **DNS Server** area, click +.
- **Step 6** In the **Specify DNS Server** dialog box, enter the IP address of the DNS server.
- Step 7 Click OK.

Deleting a DNS Server

Procedure

| Step 1 | In the Navigation pane, click the Admin tab. |
|--------|--|
| Step 2 | In the Admin tab, expand All > Communication Services. |
| Step 3 | Click DNS Management. |
| Step 4 | In the Work pane, click the General tab. |
| Step 5 | In the DNS Server area, right-click the DNS server you want to delete and choose Delete. |
| Step 6 | If Cisco UCS Manager GUI displays a confirmation dialog box, click Yes. |
| | |

Step 7 Click Save Changes.
