New and Changed Information for This Release

The following table provides an overview of the significant changes to this guide for this current release. The table does not provide an exhaustive list of all changes made to this guide or of all new features in this release.

Table 1: New Features and Changed Behavior in Cisco UCS Director, Release 6.6

Feature	Description	Where Documented
Write/Execute CloupiaScript	User must have permission to write and execute CloupiaScript to write and execute a custom task using CloupiaScript.	Prerequisites
Custom Input Validation	Provides an option to validate any input at runtime using a customer-provided script. The script can flag errors in the input and can require valid input before running a service request.	Custom Input Validation
