## New and Changed Information for this Release

The following table provides an overview of the significant changes to this guide for this current release. The table does not provide an exhaustive list of all changes made to this guide or of all new features in this release.

**Table 1: New Features and Changed Behavior in Cisco UCS Director, Release 6.7(4.0)**

Feature	Description	Where Documented
Deprecation of Support for VNC Console	Starting with this release, support for using VNC to launch a VM client is no longer available. You must launch the VM client using the VMware Remote Console (VMRC). To reconfigure existing VMs that have been configured with VNC to use VMRC, use the <b>Unconfigure VNC</b> option and <b>Disable VNC</b> task.	All references to VNC have been removed from this guide.
