

ReadMe for Cisco Unified Communications Manager Release 15SU2

First Published: 2024-10-01

Revision History

Date	Revision
October 01, 2024	Initial publication

Introduction

Note To view the release notes for previous versions of Cisco Unified Communications Manager, choose the Cisco Unified Communications Manager version from the following URL:

http://www.cisco.com/en/US/products/sw/voicesw/ps556/prod_release_notes_list.html

Note Please review all sections in this document pertaining to installation before you install this version. Failure to install this version as described may result in inconsistent Cisco Unified Communications Manager behavior.

This 15SU2 ReadMe file contains important information about installation procedures and resolved caveats for Cisco Unified Communications Manager release 15SU2. This version can be applied to Cisco Unified Communications Manager and Session Management Edition.

Note Before you install Cisco Unified Communications Manager, Cisco recommends that you review the [Important Notes, on page 2](#) for information about issues that may affect your system.

System Requirements

The following sections comprise the system requirements for this release.

Server Support

In this release, you cannot install or run Cisco Unified Communications Manager on server hardware; you must run these applications on virtual machines. Please refer to the “Hardware” section of the *Upgrade and*

Migration Guide for Cisco Unified Communications Manager and the IM and Presence Service, Release 15 for additional details:

<https://www.cisco.com/c/en/us/support/unified-communications/unified-communications-manager-callmanager/products-installation-guides-list.html>

Uninterruptible Power Supply

Ensure that you connect each node to an uninterruptible power supply (UPS) to provide backup power and protect your system.

Caution Failure to connect the Cisco Unified Communication Manager nodes to a UPS may result in damage to physical media and require a new installation of Cisco Unified CM.

Version and Description

This SU is a cumulative update that incorporates all of the fixes and changes from Cisco Unified Communications Manager 15 through 15SU1 along with additional changes that are specific to this SU.

Note You can only install this SU on Cisco Unified Communications Manager Release 12.5(1), 14, 15 through 15SU1, or any 15ES from 15.0.1.11001-3 to 15.0.1.12008-1. Upgrades from any earlier supported versions require a PCD migration. If you are upgrading from a version prior to 14, ensure you have the proper licensing prior to doing the upgrade.

For a list of all supported upgrade paths and the supported upgrade method, please see the Compatibility Matrix at:

<http://www.cisco.com/c/en/us/support/unified-communications/unified-communications-manager-callmanager/products-device-support-tables-list.html>

Caution Please note that if you install an SU it may contain fixes that are not included in the newer Unified CM releases. For example, a fix in an 12.5(1)SU, 12.5(1)SU5, may not be included in 14 because the fix was not available prior to the release of 14. In this example, an SU or ES on the 14 branch may be required to retain the same fixes.

New to this Release

For details about the features included in this release, refer to Release Notes for Cisco Unified Communications Manager and IM & Presence Service, Release 15 at:

<http://www.cisco.com/c/en/us/support/unified-communications/unified-communications-manager-callmanager/products-release-notes-list.html>

Important Notes

Compatibility between collaboration products is detailed at the following link. You must insure your versions are compatible before beginning your upgrade:

https://www.cisco.com/c/dam/en/us/td/docs/voice_ip_comm/uc_system/unified/communications/system/Compatibility/CSR-Compatibility-Matrix-InteractiveHTML.html

Cisco provides the following guidance to help you successfully upgrade Cisco Unified Communications Manager software:

- To minimize call-processing interruptions during the upgrade process, register all devices to servers that are running the same version of Cisco Unified Communications Manager software. Make sure that you register all devices to the backup Cisco Unified Communications Manager server or to the primary Cisco Unified Communications Manager server, but not to both the backup and primary servers.

End of Support Firmware Files Removed

Warning

Beginning with CUCM 15, phone firmware that is end of support will no longer be included in the CUCM ISO. These endpoints will still be allowed to register, unless they have been officially deprecated, but the firmware will not be present in the TFTP directory following a fresh install. The phones should still register even without the firmware present, but the `cmterm-eol_endpoint-15.0.1.10000-32.cop.sha512` can be used to install the firmware on the system if needed. See the COP file readme for the list of firmware that is no longer included by default.

This change only impacts fresh installs and migrations. If you are direct upgrading from a previous version, the firmware will carry over to the new version.

Related Documentation

To view documentation that supports Cisco Unified CM Release 15, go to:

<https://www.cisco.com/c/en/us/support/unified-communications/unified-communications-manager-callmanager/products-documentation-roadmaps-list.html>

Before You Begin

Before upgrading, review the [Upgrade and Migration Guide](#) > Upgrade Planning for details on:

1. Supported Upgrade Paths
2. Upgrade options - There are multiple upgrade options available: Direct Upgrade, Cluster Upgrade, Fresh Install with Data Import, PCD. Detailed instructions for each may be found in the [Installation Guide](#)
3. Hardware, Software, Network, and VM requirements. Open VMWare Tools now default for new installations of version 12.5 and higher, and is recommended for upgrades from earlier versions.
4. Deprecated Phone Models

Compatibility information can be found in the [Compatibility Matrix](#)

Installation Instructions

Note

Apply this SU to all of your Cisco Unified Communications Manager servers, beginning with the publisher server and TFTP server

Refer to the *Upgrade and Migration Guide for Cisco Unified Communications Manager and IM and Presence Service, Release 14* for detailed information about doing this upgrade:

<https://www.cisco.com/c/en/us/support/unified-communications/unified-communications-manager-callmanager/products-installation-guides-list.html>

Note Because the 15.0.1.12900-234 build is a non-bootable ISO, it proves useful only for upgrades. You cannot use it for new installations. You may however install with the base version 15.0.1.10000-32 and apply 15.0.1.12900-234 as a patch during the installation.

Release 15SU2 is available in both restricted (which is the release type that has always been available from Cisco) and unrestricted versions of software to comply with import / export restrictions to various countries. The unrestricted version is available in limited markets. Please refer to the “Export Restricted and Export Unrestricted Software” section in the **Understanding Upgrades and Migrations** chapter, of the *Upgrade and Migration Guide for Cisco Unified Communications Manager and the IM and Presence Service, Release 14* referenced above, for a more detailed description.

Note Once installed, UNRST releases can never be converted or upgraded to releases which support full encryption capabilities

The file names and hash values you will use for this upgrade are:

Table 1: Restricted ISO Names and Checksum Values

ISO Name:	UCSInstall_UCOS_15.0.1.12900-234.sha512.iso
MD5:	b0879dd991b6db1cf023c7191b0cac6e
SHA512:	191faa31079fbc72e97f791339fab1e7d5a09ba445879bc916527ee136c98e5fd881dfa650f7b4ab76c95e073d251a1b99be1477117f8cfa517a476c11c65eb5

Table 2: UnRestricted ISO Names and Checksum Values

ISO Name:	UCSInstall_UCOS_UNRST_15.0.1.12900-234.sha512.iso
MD5:	e7f0fda4112cad5c0b80f9257d31b686
SHA512:	ee3c9b52d5219527c825ccc3b3af44e90751e7e61f0d258286ec87b29a9b1e62b7c0882907bd5ca91776d17cccf58c762b27668d4d3f02b905af6a4056f3fe85

Reverting to a Previous Version

Note Revert to the previous version on all servers in the cluster in the same order in which you performed the upgrade.

Refer to the “Switch to Previous Version” section in the **Upgrade Procedures** chapter at *Upgrade and Migration Guide for Cisco Unified Communications Manager and IM and Presence Service, Release 15* for detailed instructions on “Reverting to a Previous Version.”

<https://www.cisco.com/c/en/us/support/unified-communications/unified-communications-manager-callmanager/products-installation-guides-list.html>

Caveats

Caveats describe unexpected behavior on a Cisco Unified Communications server. The following sections contain lists and descriptions of resolved and open caveats in this release.

Resolved Caveats

Resolved Caveats for Cisco Unified Communications Manager Release 15SU2 describes possible unexpected behaviors in Cisco Unified Communications Manager 15 releases.

Resolved CUCM Caveats in 15SU2 (everything fixed in SU3 since SU2)
[Click Here for the list](#)

Cumulative Resolved CUCM Caveats (everything fixed in all SU's since base 15)
[Click Here for the list](#)

Open Caveats

Open Caveats for Cisco Unified Communications Manager Release 15SU2 describes a few of the possible unexpected behaviors still remaining in Cisco Unified Communications Manager Release 15SU2.

Open CUCM Caveats in all 15 releases:

CSCwi52160: Direct Migration fails from pre-15 to 15 with upgrade history from pre-10.0

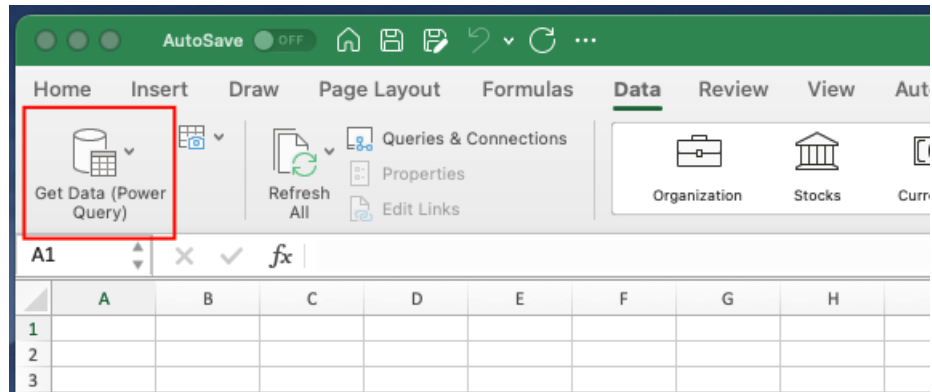

CUCM Caveats 15 Complete List

For a complete list of caveats applicable to 15, use the following Bug Search Tool link:

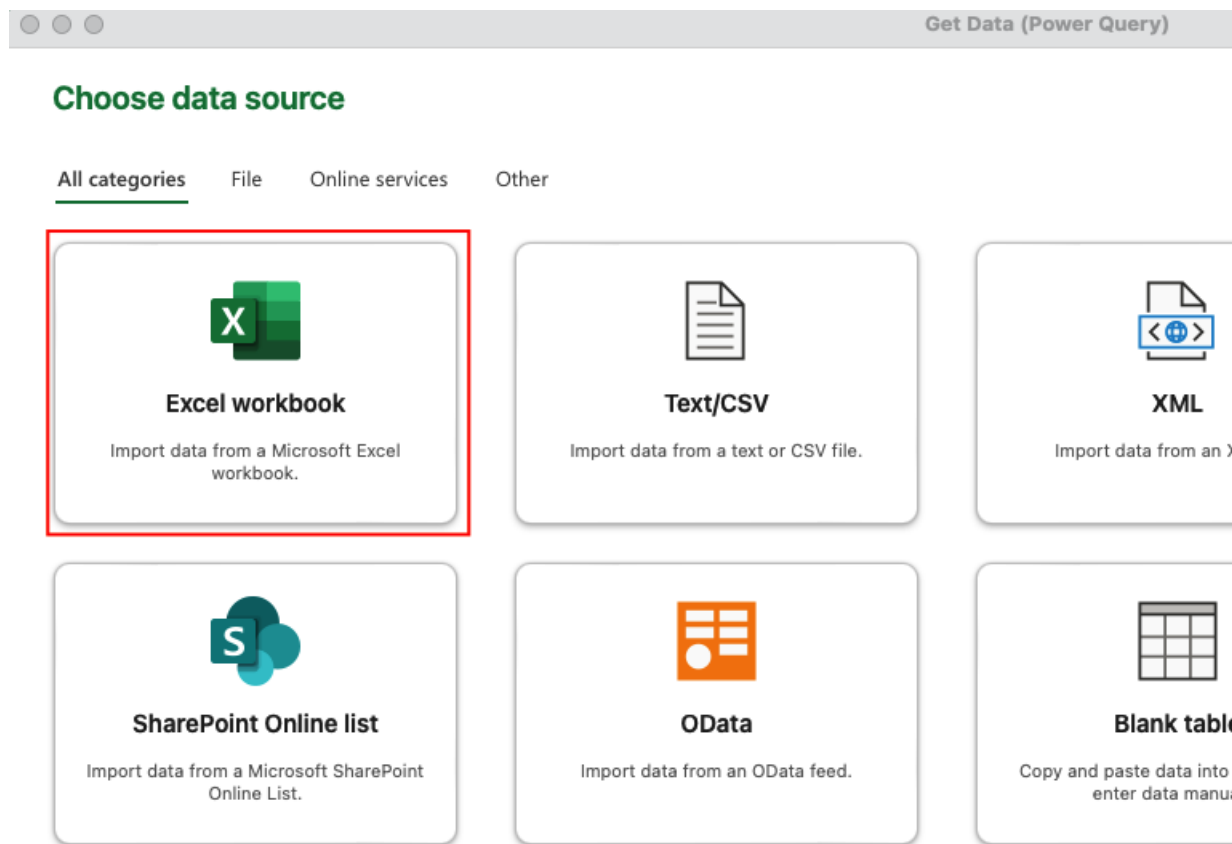

[https://bst.cloudapps.cisco.com/bugsearch?pf=prdNm&sb=af&kw=*&bt=usV&prdNm=Cisco%20Unified%20Communications%20Manager%20\(CallManager\)&rs=150\(1.1](https://bst.cloudapps.cisco.com/bugsearch?pf=prdNm&sb=af&kw=*&bt=usV&prdNm=Cisco%20Unified%20Communications%20Manager%20(CallManager)&rs=150(1.1)

To determine the caveats that were open for a specific release, use the following steps (the screenshots below are from Excel for Mac, the Excel for Windows options are a little different but follow the same basic flow):

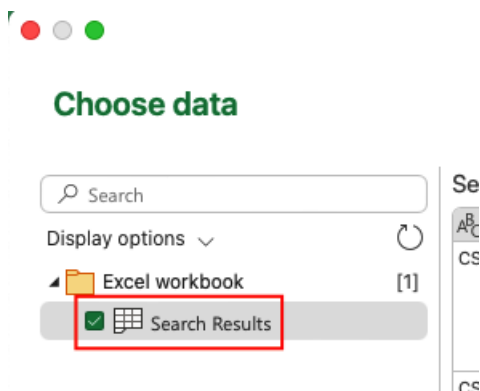

1. Click on the "Export Results to Excel" link
2. Open the downloaded file in Excel and Save As a .xlsx file
3. Open a blank Excel workbook
4. Click on Data --> Get Data (Power Query)

5. Choose "Excel workbook" as the source.

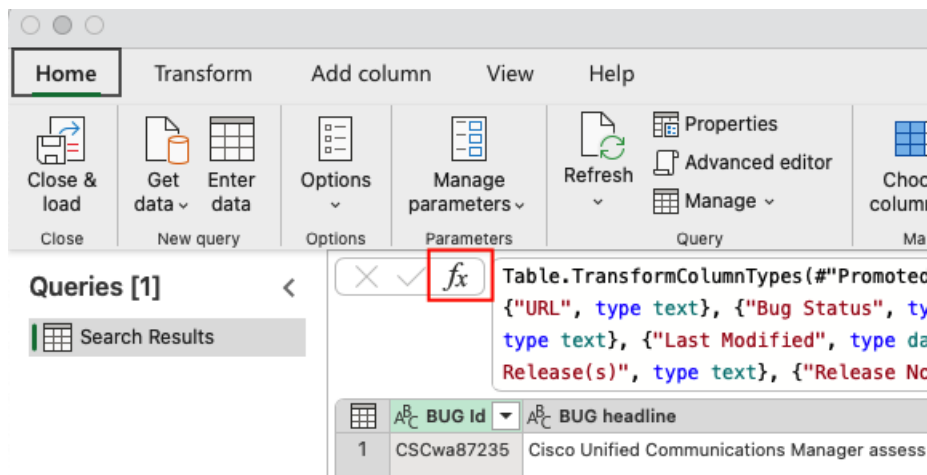

6. Click "Browse", select the .xlsx file saved previously, and click Next
7. Click the checkbox next to the Tab name (by default it will be Search Results)

8. Click on the "Transform Data" button

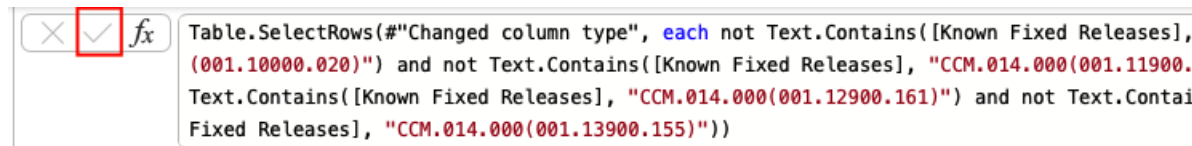

9. Click on the fx button to insert a new step

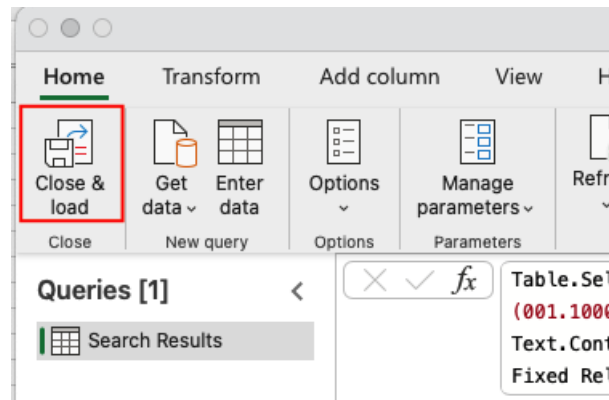

10. In the text box next to the fx button, paste the desired filter string (see below)

11. Click the check mark to apply the changes

12. Click the "Close and load" button

- The results that are loaded into the Excel workbook will be all of the Open Caveats for that specific release

Security Advisory Caveats: To get a list of caveats that are applicable to Security Advisories or other security related issues, after filtering for a specific release using the examples above, an additional filter for the keyword PSIRT can be applied to the Release Note Enclosure column.

Firmware Versions

SUs contain firmware loads, however, Cisco recommends that you always download the latest firmware load from the Software Download Center.

End of Support Firmware Files Removed

Warning Beginning with CUCM 15, phone firmware that is end of support will no longer be included in the CUCM ISO. These endpoints will still be allowed to register, unless they have been officially deprecated, but the firmware will not be present in the TFTP directory following a fresh install. The phones should still register even without the firmware present, but the `cmterm-eol_endpoint-15.0.1.10000-32 .cop.sha512` can be used to install the firmware on the system if needed. See the COP file readme for the list of firmware that is no longer included by default.

This change only impacts fresh installs and migrations. If you are direct upgrading from a previous version, the firmware will carry over to the new version.

Phone Firmware

To download phone firmware, follow this procedure:

- Go to <https://software.cisco.com/download/home>
- Click on Browse All
- Click on Collaboration Endpoints
- Choose the desired Endpoint Type
- Choose the desired Endpoint Model

Device Packages

To download phone firmware, follow this procedure:

1. Go to <https://software.cisco.com/download/home>
2. Click on Browse All
3. Click on Unified Communications
4. Click on Call Control
5. Click on Unified Communications Manager (CallManager)
6. Choose the desired UCM version
7. Click on the Device Packages link

Firmware Versions in this Release

Device type	Load name	Version
3905	3905.9-4-1SR4-2	9.4 (1SR4.2)
