

## **Common Commands**

This chapter describes the common commands available in each CLI configuration mode.

- do show, on page 1
- end, on page 1
- exit, on page 2

## do show

Executes all **show** commands while in Configuration mode.

**Product** 

All

**Privilege** 

Security Administrator, Administrator

**Syntax Description** 

do show

**Usage Guidelines** 

Use this command to run all Exec mode **show** commands while in Configuration mode. It is not necessary to exit the Config mode to run a **show** command.

The pipe character | is only available if the command is valid in the Exec mode.

Caution

There are some Exec mode **show** commands which are too resource intensive to run from Config mode. These include: **do show support collection**, **do show support details**, **do show support record** and **do show support summary**. If there is a restriction on a specific **show** command, the following error message is displayed:

Failure: Cannot execute 'do show support' command from Config mode.

## end

Exits the current configuration mode and returns to the Exec mode.

Product

All

Security Administrator, Administrator Privilege

Syntax Description

end

**Usage Guidelines** 

Use this command to return to the Exec mode.

## exit

Exits the current mode and returns to the parent configuration mode.

All **Product** 

Security Administrator, Administrator Privilege

exit **Syntax Description** 

Use this command to return to the parent configuration mode. **Usage Guidelines**
