Cisco IEC6400 Edge Compute Appliance UCS Firmware Upgrade Guide, Release 4.2.31

Overview of the Cisco IEC6400 firmware upgrade

This guide describes how to upgrade the Cisco Integrated Management Controller (CIMC) and BIOS components of Cisco IEC6400 using the Host Upgrade Utility (HUU) software.

Note

The HUU software file does not update the IEC6400 gateway software.

HUU file details

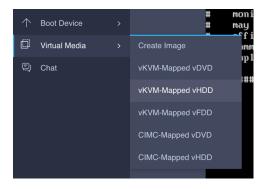

The IEC6400-HUU-4.2.31.img file contains the following modules:

Component	Version
CIMC	4.2(31)
BIOS	4.3.2f.0

Upgrade the CIMC and BIOS versions of IEC6400

Ensure that you power on the IEC6400 gateway before performing this firmware upgrade.

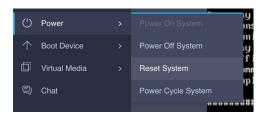

- **Step 1** Log into the **CIMC** web application using your credentials.
- **Step 2** On the CIMC web application home page, click **Launch vKVM** to open **Cisco vKVM** console.
- Step 3 Choose Virtual Media > vKVM-Mapped vHDD.

The Map Virtual Media - Removable Disk window appears.

- Step 4 Click Browse and choose the IEC6400-HUU-4.2.3l.img HUU image file to connect it.
- Step 5 Click Map Drive.

Step 6 Choose **Power > Reset System**, to reset the device.

- **Step 7** From the BIOS prompt, press **F6** to enter the boot menu.
- Step 8 In the boot device menu window, choose UEFI: Cisco vKVM-Mapped vHDD2.00, Partition 1, and press Enter to boot the image.

The HUU upgrade process checks the current versions of CIMC and BIOS. If the device prompts you to upgrade, enter **y** from the keyboard to begin the upgrade process.

Step 9 Once the upgrade is complete, press **Enter** to activate the new versions of CIMC and BIOS and to reset the device.

```
Discovering components...

This package will perform the following upgrades:

BIOS: C220M6.4.2.3a.0.1029220536 -> C220M6.4.3.2e.0.1130231048

CIMC: 4.2(3b) -> 4.2(3l)

Proceed with the update?

Response: y

Proceeding with the update...

Update started... DO NOT REBOOT OR POWER OFF THE HOST!

Update process completed. Status: ('ExtendedMessages': ('BIOS': ['Firmware copied successfully.', 'CIMC update is in progress.', 'Update triggered successfully.', 'Validating Image', 'Writing Image', 'Firmware updated successfully.', '(CIMC: ['Copying fill es is in-progress.', 'Firmware updated successfully.'), 'CIMC: ('Copying fill es is in-progress.', 'Firmware updated successfully.'), 'CIMC: ('Copying fill es is in-progress.', 'Firmware updated successfully.'), 'CIMC: 'Copying fill es is in-progress.', 'Firmware updated successfully.', 'Updating firmware - 45c', 'Firmware updated successfully.'), 'Validating Image', 'Pindate', 'Id': 'I', 'Nessages': ('BIOS': 'Firmware Update Successfull', 'CIMC: 'Firmware Update Successfull', 'StartTine': '2022-01-01 02:00:24.11825 9')

Press (Enter) to activate firmwares and reboot
```

You must remain connected until the process completes.

Note

Verify the CIMC and BIOS versions of IEC6400

- **Step 1** Log into the **CIMC** web application using your credentials.
- Step 2 Click on the left corner.
- **Step 3** Choose **Admin** > **Firmware management** to display the current versions of the CIMC and BIOS.
