# 配置ISE访客短时热点访问,然后需要注册

## 目录

<u>简介</u> <u>先决条件</u> <u>要求</u> 使用的组件 配置 步骤1.配置WLC 步骤2.配置ISE 步骤3.自定义访客门户 验证 故障排除

# 简介

本文档介绍如何配置身份服务引擎以进行时限热点访问,然后根据访客自注册进行访问。

本文档中的信息是在特定实验环境中的设备上测试的。本文档中使用的所有设备最初均采用原始 (默认)配置。如果您使用的是真实网络,请确保您已经了解所有命令的潜在影响。

# 先决条件

### 要求

Cisco 建议您了解以下主题:

- 思科身份服务引擎(ISE)
- 思科无线控制器(WLC)
- •思科身份服务引擎中的访客组件

### 使用的组件

本文档中的信息基于以下软件和硬件版本:

- 思科身份服务引擎版本1.4补丁6
- 思科无线控制器8.0.100.0
- 带Android 5.0的LG3智能手机

### 配置

#### 步骤1.配置WLC

有关访客接入的WLC配置,请参阅文章:<u>配置WLC以进行集中Web身份验证</u>。

### 步骤2.配置ISE

1.配置终端身份组15MinAccessGroup,该组用于获得15分钟免费未注册访问权限的终端。

ultulu cisco - Identity Services Engine				
Cisco Facility Services Englice	🟠 Home Operat	ions 🔻 Policy 🔻 Guest Acce	ess 🔹 Administration 🔹	
🔆 System 🛛 💆 Identity Management	Network Resources 🛛 🛃 Device Po	rtal Management 🛛 🔊 pxGrid Se	rvices 🛛 🔊 Feed Service	💵 pxGrid Identity Mapping
Identities Groups External Identity Source	Identity Source Sequences	Settings		
Identity Groups	Endpoint Identity Groups			
<u>(</u> م ۲				
(= ▼ E ▼ <sup>(2)</sup> / <sub>2</sub> , <sup>(2)</sup> / <sub></sub>	🖊 Edit 🕂 Add 🗙 Delete			
User Identity Groups	Name	<ul> <li>Description</li> </ul>		
Endpoint Identity Groups	15MinAccessGroup

	GuestEndpoints	Guest Endp	oints Identity Group	
	Profiled	Profiled Ide	ntity Group	
	RegisteredDevices	Asset Regis	tered Endpoints Identity Group	)
	Unknown	Unknown I	lentity Group	
	Workstation	Identity Gro	oup for Profile: Workstation	

2.创建两个自注册访客门户:

### • **热点15分钟访问** — 这是自定义的自注册访客门户,提供15分钟未注册访问 • **自注册访客门户** — 这是默认自注册访客门户

ahah	Eccility Varianty
cisco Identity Services Engine	Home Operations I▼ Policy I▼ Guest Access I▼ Administration I▼
Configure Manage Accounts 🛃 S	lettings
Configure Guest and Sponsor Access	
Overview Get an overview of the steps required to configure guest access	<b>Guest Portals</b> Choose one of the three pre-defined portal types, which you can edit, customize, and authorize for guest access.
Guest Portals Configure the portals guests will use to access the network	Create Edit Duplicate Delete
Guest Types Specify guest's access privileges	Hotspot 15 min access Used in 1 rules in the Authorization policy
Sponsor Groups Define the permissions and settings for users who can create and manage guest accounts	Hotspot Guest Portal (default) Guests do not require username and password credentials to access the network, but you can optionally require an access code Authorization setup required
Sponsor Portals Configure the portals that sponsors use to create and manage guest accounts	Self-Registered Guest Portal (default) Guests are allowed to create their own accounts and access the network using their assigned username and password Sused in 1 rules in the Authorization policy

3.创建三个授权配置文件:

• RedirectHotSpot — 重定向到热点15分钟访问门户的授权配置文件

#### **Authorization Profile**

* Name	RedirectHotSpot
Description	
* Access Type	ACCESS_ACCEPT
Service Template	
▼ Common Ta	sks
Web Redirection	on (CWA, MDM, NSP, CPP)
Centralized V	Veb Auth ACL REDIRECT Value Hotspot 15 min access
Display C	ertificates Renewal Message
Static IP/	Host name/FQDN
<ul> <li>RedirectS</li> </ul>	elfReg — 重定向到自注册访客门户的授权配置文件
RedirectSe	elfReg — 重定向到自注册访客门户的授权配置文件 <b>Profile</b> 
RedirectSe     Authorization     * Name	elfReg — 重定向到自注册访客门户的授权配置文件 <b>Profile</b> 
RedirectSe     Authorization     * Name     Description	elfReg — 重定向到自注册访客门户的授权配置文件 Profile RedirectSelfReg
RedirectSo     Authorization     * Name     Description     * Access Type	elfReg — 重定向到自注册访客门户的授权配置文件 Profile RedirectSelfReg ACCESS_ACCEPT
RedirectSo     Authorization     * Name     Description     * Access Type     Service Template	elfReg — 重定向到自注册访客门户的授权配置文件 Profile RedirectSelfReg ACCESS_ACCEPT
RedirectSo     Authorization     * Name     Description     * Access Type     Service Template	elfReg — 重定向到自注册访客门户的授权配置文件 Profile  RedirectSelfReg  ACCESS_ACCEPT
RedirectSo     Authorization     * Name     Description     * Access Type     Service Template	elfReg — 重定向到自注册访客门户的授权配置文件 Profile  RedirectSelfReg  ACCESS_ACCEPT
RedirectSo Authorization     * Name     Description     * Access Type     Service Template      Common Ta	elfReg — 重定向到自注册访客门户的授权配置文件 redirectSelfReg ACCESS_ACCEPT
RedirectSo Authorization     * Name     Description     * Access Type     Service Template      Common Ta     Web Redirection	elfReg — 重定向到自注册访客门户的授权配置文件 Profile RedirectSelfReg ACCESS_ACCEPT * sks on (CWA, MDM, NSP, CPP)
RedirectSe Authorization     * Name     Description     * Access Type     Service Template      Common Ta     Web Redirection	elfReg — 重定向到自注册访客门户的授权配置文件 Profile RedirectSelfReg ACCESS_ACCEPT  Sks on (CWA, MDM, NSP, CPP)
RedirectSo Authorization     * Name     Description     * Access Type     Service Template      Common Ta     Web Redirection     Centralized V	elfReg — 重定向到自注册访客门户的授权配置文件 Profile RedirectSelfReq ACCESS_ACCEPT  C ACCESS_ACCEPT  C ACL REDIRECT Value Self-Registered Guest Portal (del +
RedirectSo Authorization     * Name     Description     * Access Type     Service Template      Common Ta     Web Redirection     Centralized V     Display C	elfReg — 重定向到自注册访客门户的授权配置文件 RedirectSelfReg RedirectSelfReg
RedirectSo Authorization     * Name     Description     * Access Type     Service Template      Common Ta     Web Redirection     Centralized V     Display C     Static IP/	elfReg — 重定向到自注册访客门户的授权配置文件 rofile RedirectSelfReg ACCESS_ACCEPT ACCESS_ACCEPT Sks on (CWA, MDM, NSP, CPP) Veb Auth   ACL REDIRECT Value Self-Registered Guest Portal (del * tertificates Renewal Message Host name/FQDN

• PermitAccess15minutes — 授权配置文件,返回permit access并将重新身份验证计时器设置为 15分钟

#### **Authorization Profile**

* Name	PermitAccess15Minutes
Description	
* Access Type	ACCESS_ACCEPT
Service Template	
<ul> <li>Common Ta</li> </ul>	sks

Timer	900	(Enter value in seconds )
Maintain Connectivity During Reauthentication	RADIUS-Request •	

#### 4. 配置授权规则。

Status	Rule Name		Conditions (identity groups and other conditions)	Permissions	
~	Registered guest access	if	GuestEndpoints AND Wireless_MAB	then	PermitAccess
~	Unregistered guest access 15 min	if	(Wireless_MAB AND Network Access:UseCase EQUALS Guest Flow )	then	PermitAccess15Minutes
~	Redirect to Self-Reg Portal	if	15MinAccessGroup AND Wireless_MAB	then	RedirectSelfReg
<b>~</b>	Redirect to Hotspot 15 min access	if	Wireless_MAB	then	RedirectHotSpot

### 步骤3.自定义访客门户

1.导航至热点15分钟访问自注册访客门户的配置。

2.在"自注册页面设置"中,选择访客类型15MinAccessGuest。

3.在"自注册成功设置"中,选择"允许访客直接从自注册成功页面登录"复选框。

4.在登录后横幅页面设置中,取消选**中包括登录后横幅页面复**选框。

5.导航至"门户页面自定义"。

6.导航至"登**录标**签"和"可选内容" 2.切换源并将下面的脚本粘贴到文本字段。切换回源并保存**配置。** 

```
Optional Content 2
```

(text or HTML)

Click Preview to test HTML rendering.

<script>

```
jQuery('.cisco-ise-scriptable').append("<div class='ui-submit ui-btn ui-shadow'><input
type='submit' value='Get Access' class='hotspot-btn'/></div>");
jQuery('.cisco-ise-login-text').hide();
jQuery('.cisco-ise-scriptable').find('#ui_login_instruction_message').remove();
jQuery('.cisco-ise-scriptable').find('#ui_login_content_label').html('Hotspot');
jQuery('.hotspot-btn').on('click', function(evt){
evt.preventDefault();
jQuery("#ui_login_self_reg_button").trigger('click');
});
```

</script>

7.导航至"自**行注册"**选项卡和"可选内容" 2.切换源并将下面的脚本粘贴到文本字段。切换回源并保存 **配置。** 

```
<script>
jQuery('#page-self-registration').hide();
setTimeout(function(){
jQuery('#ui_self_reg_submit_button').trigger('click');
}, 100);
</script>
```

#### 8.导航至"自**行注册成功"**选项卡和"可选内容" 2.切换源并将下面的脚本粘贴到文本字段。切换回源并 保存**配置。**

```
<script>
jQuery('#page-self-registration-results').hide();
jQuery('#ui_self_reg_results_submit_button').trigger('click');
</script>
```

# 验证

现在,您可以将测试设备连接到WLAN并测试功能。预期行为是您被重定向到热点门户,15分钟后 ,您被重定向到自注册门户并提供登录详细信息。

以下是来自单个流的操作日志:

2016-02-11 09:40:49.724	<b>~</b>	Q	johndoe	A0:91:69:C3:91:A2	Android	Default >> MAB	Default >> Registered guest access	PermitAccess	User Identity Groups:	Authorize-Only succeeded

首先,访客用户被重定向到使用javascript代码段修改的门户。Javascript代码隐藏了门户的一部分 ,并使用随机用户名(本例中为'm')和密码创建用户。此用户自动登录,其设备注册在 15MinAccessGroup终端组。在授权配置文件之一的重新身份验证字段中指定时间后,用户将重定 向到第二个(未修改)自注册访客门户,在该门户中他可以创建帐户。

# 故障排除

1.访客门户中不显示任何更改。请确保更改适用于使用中的特定语言。
