## CHAPTER

# 1

## What's New in Cisco cnBR 20.4

---

**Note** Explore the [Content Hub](#), the all new portal that offers an enhanced product documentation experience.

- Use faceted search to locate content that is most relevant to you.
- Create customized PDFs for ready reference.
- Benefit from context-based recommendations.

Get started with the Content Hub at [content.cisco.com](https://content.cisco.com) to craft a personalized documentation experience.

Do provide feedback about your experience with the Content Hub.

---

Cisco is continuously enhancing the product with every release and this section covers a brief description of key features and enhancements that were added. It also includes links to detailed documentation, where available.

- [New Software Features in Cisco cnBR 20.4, on page 1](#)

## New Software Features in Cisco cnBR 20.4

Cisco cnBR 20.4 supports a range of intuitive menu options, virtualized network management microservices, diagnostic utilities, maintenance tools, and operational improvements as well. The new changes are:

- **Updated GUI:** The Cisco cnBR 20.4 provides an updated GUI. The updates are:
  - **Updated Interface and Applications:** The Cisco cnBR 20.4 introduces an updated Cisco Operations Hub Web User Interface and the Cisco cnBR Manager application.
  - **Cisco cnBR Manager:** The cnBR 20.3 Configurator tool has been replaced with the Cisco cnBR Manager application.
  - **Cisco Operations Hub Main Menu:** The Main Menu serves as the primary mechanism for navigating between the various components of Cisco Operations Hub and the Cisco cnBR Manager. The Main Menu icon, represented by three stacked rectangles, is located in the top-left corner of the Cisco Operations Hub WebUI.
  - **Cisco Operations Hub Help Menu:** The Help Menu enables you to quickly reach the Cisco cnBR Documentation Library page, API Documentation, Customer Support, and also provides information

on the Cisco Operations Hub version. The Help Menu, represented by the life preserver icon, is located in the top-right of the Cisco Operations Hub Web UI.

- **Updated Grafana Dashboard:** From Cisco cnBR 20.4 onwards, Cisco Operations Hub supports Grafana 7.2.1.
- **IPv6 CIN Support:** From Cisco cnBR 20.4 onwards, Converged Interconnect Network (CIN) is supported over IPv6. CIN enables you to build a robust, flexible, and scalable network to interconnect the CCAP-Core and RPDs in a solution topology. You can provision RPD with IPv6 to communicate with cnBR ccap-core through IPv6.
- **Cisco cnBR SP Router Redundancy:** Enables the Cisco cnBR to set up redundant connections to different SP routers. This redundancy ensures that a single link or SP router failure does not disrupt traffic flow for the CIN and WAN networks.
- **KPI Alert Management:** From Cisco cnBR 20.4 onwards, now provides improved alerts in Subscriber, RF Plant, and Infra KPI alert categories.
- **Policy-based Load Balancing:** Cisco cnBR now enables each service group (SG) to manage traffic-based on the weight that is assigned to the SG.

## CHAPTER 2

### Caveats

- [Open Caveats for Cisco cnBR 20.4, on page 3](#)
- [Resolved Caveats for Cisco cnBR 20.4, on page 4](#)
- [Cisco Bug Search, on page 4](#)

### Open Caveats for Cisco cnBR 20.4

Caveat ID Number	Description
<a href="#">CSCvw15180</a>	[PC1.5] Found stale gates and dynamic service flows after DP crash, after stopping the calls.
<a href="#">CSCvw75718</a>	PTP announce-interval and sync-interval graphs are not showing units.
<a href="#">CSCvu83104</a>	After power outage, the Cisco cnBR is having issues with PTP pods sync and RPDs with late maps or no maps.
<a href="#">CSCvw75778</a>	BPI+ net_access_disable state is incorrect.
<a href="#">CSCvw71067</a>	Operations Hub UI should warn user when login fails due to PW expired.
<a href="#">CSCvw13916</a>	RPHYMGR REST API not responsive for 1 min after certain infra VM reload.
<a href="#">CSCvw27051</a>	Incorrect DS traffic rate displayed in Cisco Operations Hub after DP crashes/restarts.
<a href="#">CSCvw09638</a>	Cisco cnBR summary dashboard: Navigation from Service Group Table Pops up <b>Leave site</b> dialog.
<a href="#">CSCvw67194</a>	D3.1 modems become offline due to OFDM unable to get DB table (after infra node shutdown and CM reset).
<a href="#">CSCvw75675</a>	Pod cmts-rt-ranging crashed during restart and recovers by itself.
<a href="#">CSCvw15185</a>	Timescaledb fails to start after UCS server shutdown/restart.
<a href="#">CSCvw75271</a>	No DHCP offer on modems after reboot UCS due to DP unable to ping dhcprelay.
<a href="#">CSCvw71036</a>	RPD state incorrect for RPDs requiring default password change.
<a href="#">CSCvw71065</a>	Cisco Operations Hub Dashboard does not load when one UCS is down.

Caveat ID Number	Description
<a href="#">CSCvw27020</a>	DS Traffic graph displayed wrongly in the Cisco Operations Hub, after delete and add RPD via Rest API.
<a href="#">CSCvw03898</a>	D3.1 modem flaps after delete OFDM pod.
<a href="#">CSCvw75682</a>	SGs not moved to other nodes after shutdown DOCSIS node due to RM fails to set node commission.
<a href="#">CSCvw75780</a>	SNMP traps sent from the Cisco Operations Hub does not have virtual IP as source address.
<a href="#">CSCvw83313</a>	No UGS US throughput if EMTA has PHS enabled.

## Resolved Caveats for Cisco cnBR 20.4

Caveat ID Number	Description
<a href="#">CSCvw16917</a>	cnBR Error Logs not available on OpsHub Dashboard
<a href="#">CSCvw16909</a>	Grafana Metrics > Modem List Dashboards showing no content when breadcrumb is used for back navigati
<a href="#">CSCvw16907</a>	cmts_topology record is not generated while running IPDR collector
<a href="#">CSCvw16880</a>	No Data in DS Channel Rate Dashboard Tables
<a href="#">CSCvw16908</a>	Not Returning Data for few panels while doing login to Operations Hub as api-viewer
<a href="#">CSCvw17987</a>	Active telemetry in cnbr flooded with telemetry data drop messages
<a href="#">CSCvw11040</a>	kafka keeps crash after nodes powered off/powered on
<a href="#">CSCvw11367</a>	pq: password authentication failed for user "grafanauser" after delete then re-add cnBR to OpsHub
<a href="#">CSCvw18567</a>	Telemetry pod stops sending data to OpsHub after reboot cnBR infra node or UCS
<a href="#">CSCvw15187</a>	autodeploy: day1 fails to apply 40 SGs due to NewConnectionError exceptions
<a href="#">CSCvw20081</a>	Scheduler failed to add the SG after UCS reboot
<a href="#">CSCvw83315</a>	CMs dropped during ranging restart

## Cisco Bug Search

Use the [Cisco Bug Search Tool](#) to access open and resolved bugs for a release.

The tool allows you to search for a specific bug ID, or for all bugs specific to a product and a release.

The screenshot shows the top section of the Cisco Bug Search interface. At the top, there are buttons for 'Save Search', 'Load Saved Search', 'Clear Search', and 'Email Current Search'. Below these is a 'Search For:' text input field with a blue search icon. A tooltip points to this field with the text 'If you have a specific bug ID, enter it here'. Below the search field are examples: 'Examples: CSCId10124, router crash, etc...'. The 'Product:' section has a dropdown menu set to 'Series/Model' and a text input field. A tooltip points to the text input field with the text 'Start typing product name to view suggestions or expand list to choose your product'. Below the product field is a 'Select from list' link. The 'Releases:' section has a dropdown menu set to 'Affecting or Fixed in these Release' and a text input field. A tooltip points to this field with the text 'Enter release number'. On the right side of the interface, the number '368025' is displayed vertically.

You can filter the search results by last modified date, bug status (open, resolved), severity, rating, and support cases.

The screenshot shows the bottom section of the Cisco Bug Search interface. It features a 'Filter' section with several dropdown menus: 'Modified Date:', 'Status:', 'Severity:', 'Rating:', 'Support Cases:', and 'Bug Type:'. The 'Bug Type:' dropdown is currently set to 'Customer Visible'. Below the filter section, it says 'Viewing 1 - 25 of 132 results'. To the right of this, there is a 'Sort by' dropdown menu and an 'Export Results to Excel' button. On the right side of the interface, the number '368026' is displayed vertically.

# CHAPTER 3

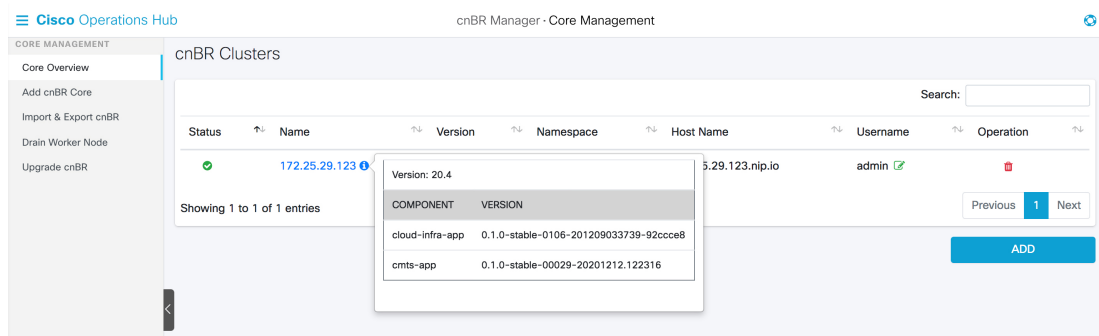

## Supported Packages and System Requirements

- [Determining the Software Version for Cisco cnBR 20.4, on page 7](#)

### Determining the Software Version for Cisco cnBR 20.4

You can view the version of the Cisco cnBR components by using the following methods:

- To view the version of the Cisco cnBR cluster component, do the following:
  1. On the Cisco Operations Hub menu, click **cnBR Manager** > **Core Management** > **Core Overview**. The cnBR Clusters pane displays all the available cnBR clusters.
  2. On the Cisco cnBR clusters that are listed, click the **i** icon next to the cluster name. Information regarding the cnBR cluster component and the version are displayed.

- To view the version of the Cisco cnBR Cisco Operations Hub, do the following:
  1. Click the **Help Menu**. This is represented by the lifebuoy icon on the top-right of the Cisco Operations Hub.
  2. Click **About**. Information on the Cisco Operations Hub version is displayed.

The screenshot shows the Cisco Operations Hub interface. A modal window titled "Cisco Operations Hub" is open, displaying a table of packages for "Operations Hub 20.4". The table has two columns: "COMPONENT" and "VERSION".

COMPONENT	VERSION
opshub-data-opshub-infra-app	0.1.0-stable-0080-201211110704-2033184
opshub-data-opshub-app	0.1.0-stable-00032-20201212.123954

Below the table, the copyright notice "© 2020 Cisco Systems Inc. All Rights Reserved" is visible. In the background, a "Summary Per Cluster" table is partially visible, showing metrics for "offline", "ranging", and "bpl.o..." states.

	CUR	PERC
offline	10	0.74%
ranging	4	0.30%
bpl.o...	1.341 K	98.97%

521377

## CHAPTER 4

# Other Important Information

---

- [Cisco cnBR and Cisco Remote PHY Devices Version Compatibility](#), on page 9
- [Browser Support](#), on page 9
- [Third-Party Tools Integration](#), on page 9
- [Cisco cnBR Router Documentation References](#), on page 10
- [Contact Cisco Support](#), on page 10

## Cisco cnBR and Cisco Remote PHY Devices Version Compatibility

The versions of Cisco cnBR and RPD must be compatible. The following list provides information on the compatible Cisco cnBR and Cisco RPD versions:

- For Cisco cnBR 20.4, the supported RPD version is 8.3. You can download it from this [page](#).

## Browser Support

For the Cisco cnBR, the Cisco Operations Hub functionality is supported for the following browser versions:

- Mozilla Firefox 78 and later
- Google Chrome 83 and later
- Microsoft Edge 44 and later

## Third-Party Tools Integration

Cisco cnBR provides integration with the following third-party tools:

- **Viavi XPERTrak**: For upstream spectrum capture.

Validated Versions:

- Viavi XPERTrak: 3.1, Build:91

- Viavi RCI: 1.5.13

Following steps are required in Viavi XPERTrak for successful modeling of cnBR in XPERTrak:

1. Locate `cmts_class_factory.csv` file in `/cfg` folder XPERTrak installation directory.
2. Add the following lines to the end of file `cmts_class_factory.csv`.

```
3.0,Cisco,Cloud +CMTS,true,Cisco_31_Cmts,CiscoCBR8,ciscoRciNodeInfo
3.1,Cisco,Cloud +CMTS,true,Cisco_31_Cmts,CiscoCBR8,ciscoRciNodeInfo
```

3. Restart XPERTrak.
4. Re-sync the CMTS.

- **Incognito MAP:** For channel and service (MAC Domain) utilization reports using the IPDR interface.

Validated Versions:

- MAP: 6.5.1

## Cisco cnBR Router Documentation References

For information on Cisco cnBR, go through the following:

- [Cisco Cloud Native Broadband Router User's Guide, Release 20.4](#)
- [Cisco Cloud Native Broadband Router Operations Hub REST API Guide, Release 20.4](#)

## Contact Cisco Support

You can choose to open a ticket for any Cisco cnBR that you might encounter.

Complete the following steps to contact Cisco Support:

1. On the Cisco cnBR Cisco Operations Hub, click the **Help Menu** icon > **Contact Support**.
2. Follow the Support Case Manager wizard to open a new case for your problem.
