System Capacity Quick Reference Tables

This module contains the system capacity tables for the system.

Maximum System Capacity and Scalability for Each System Size

The following table lists the maximum capacity for each system size.

Maximum Number	50 Concurrent Users	250 Concurrent Users	800 Concurrent Users	2000 Concurrent Users
Audio and web users (combined)	50	250	800	2000
Concurrent video and video file sharing (users sharing or receiving video combined)	25	125	400	1000
Participants in a meeting	50	100	100	100
Playback recordings of meetings that have ended	12	63	200	500
Recordings of meetings in progress	3	13	40	100
Calls per second	1	3	8	20
Conferences (assuming 2 participants per meeting)	25	125	400	1000

Tip The maximum length of a meeting is 24 hours for all size user system deployments.

Note When considering an upgrade, plan for the increased size of the data stores, as the original system and the upgraded system share data stores until testing of the upgraded system is complete and the original system is removed.

For information about network bandwidth requirements for the various size user systems, see Network Bandwidth Requirements.
