

Verify High Availability

Perform the following verification procedure by checking the log files. You can write a verbose log file to the directory `~/cloud/HA/events`. Examine this log file to verify whether the operation is successful.

```
[guestshell@guestshell events]$ node_event.py -i node_index -e verify
[guestshell@guestshell events]$ cd /home/guestshell/cloud/HA/events
[guestshell@guestshell events]$ ls event.2018-06-13 20:10:21.093942
```
