# Welcome

This document contains release information for Version 7.0 of Cisco Firepower Threat Defense, Firepower Management Center, Firepower Device Manager, and Firepower Classic devices (NGIPSv, ASA with FirePOWER Services).

For Cisco Defense Orchestrator (CDO) deployments, see the Cisco Cloud-Delivered Firewall Management Center Release Notes or What's New for Cisco Defense Orchestrator.

- Release Highlights, on page 1
- Release Dates, on page 2
- Sharing Data with Cisco, on page 3
- For Assistance, on page 4

# **Release Highlights**

### Release Numbering: Why Version 7.0?

Release numbering skips from Version 6.7 to Version 7.0.

This emphasizes the superior value due to the key new features and functionality introduced over the last several releases, in addition to the multiple performance and security enhancements. There are no unexpected incompatibilities with or limitations to upgrading to Version 7.0. Read these release notes for specific details on compatibility, upgrade requirements, deprecated features and functionality, and so on.

Note that Version 7.0 is an *extra long-term release*, as described in the Cisco's Next Generation Firewall Product Line Software Release and Sustaining Bulletin.

#### **Snort 3 for FTD with FMC Deployments**

For new FTD deployments, Snort 3 is now the default inspection engine. Upgraded deployments continue to use Snort 2, but you can switch at any time.

Advantages to using Snort 3 include, but are not limited to:

- Improved performance.
- Improved SMBv2 inspection.
- New script detection capabilities.
- HTTP/2 inspection.

- Custom rule groups.
- Syntax that makes custom intrusion rules easier to write.
- Reasons for 'would have dropped' inline results in intrusion events.
- No Snort restarts when deploying changes to the VDB, SSL policies, custom application detectors, captive portal identity sources, and TLS server identity discovery.
- Improved serviceability, due to Snort 3-specific telemetry data sent to Cisco Success Network, and to better troubleshooting logs.

A Snort 3 intrusion rule update is called an *LSP* (Lightweight Security Package) rather than an SRU. The system still uses SRUs for Snort 2; downloads from Cisco contain both the latest LSP and SRU. The system automatically uses the appropriate rule set for your configurations.

The FMC can manage a deployment with both Snort 2 and Snort 3 devices, and will apply the correct policies to each device. However, unlike Snort 2, you cannot update Snort 3 on a device by upgrading the FMC only and then deploying. With Snort 3, new features and resolved bugs require you upgrade the software on the FMC *and* its managed devices. For information on the Snort included with each software version, see the *Bundled Components* section of the Cisco Firepower Compatibility Guide.

### **Important**

Before you switch to Snort 3, we *strongly* recommend you read and understand the Firepower Management Center Snort 3 Configuration Guide. Pay special attention to feature limitations and migration instructions. Although upgrading to Snort 3 is designed for minimal impact, features do not map exactly. Careful planning and preparation can help you make sure that traffic handled as expected.

You can also visit the Snort 3 website: https://snort.org/snort3.

# **Release Dates**

Table 1: Version 7.0 Dates

Version	Build	Date	Platforms
7.0.6.3	50	2024-09-10	All
7.0.6.2	65	2024-04-15	All
7.0.6.1	36	2023-11-13	All
7.0.6	236	2023-07-18	All
7.0.5.1	5	2023-04-26	NGIPSv For devices with security certifications compliance enabled (CC/UCAPL mode). Use with a Version 7.0.5 FMC.
7.0.5	72	2022-11-17	All
7.0.4	55	2022-08-10	All

Version	Build	Date	Platforms
7.0.3	37	2022-06-30	All
7.0.2.1	10	2022-06-27	All
7.0.2	88	2022-05-05	All
7.0.1.1	11	2022-02-17	All
7.0.1	84	2021-10-07	All
7.0.0.1	15	2021-07-15	All
7.0.0	94	2021-05-26	All

# **Sharing Data with Cisco**

The following features share data with Cisco.

#### Cisco Success Network

Cisco Success Network sends usage information and statistics to Cisco, which are essential to provide you with technical support.

During initial setup and upgrades, you may be asked to enroll. You can also change your enrollment at any time.

#### **Cisco Support Diagnostics**

Cisco Support Diagnostics (sometimes called *Cisco Proactive Support*) sends configuration and operational health data to Cisco, and processes that data through our automated problem detection system, allowing us to proactively notify you of issues. This feature also allows Cisco TAC to collect essential information from your devices during the course of a TAC case.

During initial setup and upgrades, you may be asked to enroll. You can also change your enrollment at any time. This feature is not supported with FDM.

#### **Web Analytics**

Web analytics provides non-personally-identifiable usage data to Cisco, including but not limited to page interactions, browser versions, product versions, user location, and management IP addresses or hostnames of your FMCs.

You are enrolled by default but you can change your enrollment at any time after you complete initial setup. Note that ad blockers can block web analytics, so if you choose to remain enrolled, please disable ad blocking for the hostnames/IP addresses of your Cisco appliances.

# **For Assistance**

### **Upgrade Guides**

In management center deployments, the management center must run the same or newer version as its managed devices. Upgrade the management center first, then devices. Note that you always want to use the upgrade guide for the version of management center or device manager that you are *currently* running—not your target version.

### Table 2: Upgrade Guides

Platform	Upgrade Guide	Link
Management center	Management center version you are <i>currently</i> running.	https://www.cisco.com/go/fmc-upgrade
Threat defense with management center	Management center version you are <i>currently</i> running.	https://www.cisco.com/go/ftd-fmc-upgrade
Threat defense with device manager	Threat defense version you are <i>currently</i> running.	https://www.cisco.com/go/ftd-fdm-upgrade
Threat defense with cloud-delivered Firewall Management Center	Cloud-delivered Firewall Management Center.	https://www.cisco.com/go/ftd-cdfmc-upgrade

#### **Install Guides**

If you cannot or do not want to upgrade, you can freshly install major and maintenance releases. This is also called *reimaging*. You cannot reimage to a patch. Install the appropriate major or maintenance release, then apply the patch. If you are reimaging to an earlier threat defense version on an FXOS device, perform a full reimage—even for devices where the operating system and software are bundled.

Table 3: Install Guides

Platform	Install Guide	Link
Management center hardware	Getting started guide for your management center hardware model.	https://www.cisco.com/go/fmc-install
Management center virtual	Getting started guide for the management center virtual.	https://www.cisco.com/go/fmcv-quick
Threat defense hardware	Getting started or reimage guide for your device model.	https://www.cisco.com/go/ftd-quick
Threat defense virtual	Getting started guide for your threat defense virtual version.	https://www.cisco.com/go/ ftdv-quick

Platform	Install Guide	Link
FXOS for the Firepower 4100/9300	Configuration guide for your FXOS version, in the <i>Image Management</i> chapter.	
FXOS for the Firepower 1000/2100 and Secure Firewall 3100	Troubleshooting guide, in the Reimage Procedures chapter.	Cisco FXOS Troubleshooting Guide for the Firepower 1000/2100 and Secure Firewall 3100/4200 with Firepower Threat Defense

#### **More Online Resources**

Cisco provides the following online resources to download documentation, software, and tools; to query bugs; and to open service requests. Use these resources to install and configure Cisco software and to troubleshoot and resolve technical issues.

- Documentation: http://www.cisco.com/go/threatdefense-70-docs
- Cisco Support & Download site: https://www.cisco.com/c/en/us/support/index.html
- Cisco Bug Search Tool: https://tools.cisco.com/bugsearch/
- Cisco Notification Service: https://www.cisco.com/cisco/support/notifications.html

Access to most tools on the Cisco Support & Download site requires a Cisco.com user ID and password.

#### **Contact Cisco**

If you cannot resolve an issue using the online resources listed above, contact Cisco TAC:

- Email Cisco TAC: tac@cisco.com
- Call Cisco TAC (North America): 1.408.526.7209 or 1.800.553.2447
- Call Cisco TAC (worldwide): Cisco Worldwide Support Contacts

For Assistance

# **System Requirements**

This document includes the system requirements for Version 7.0.

- FMC Platforms, on page 7
- Device Platforms, on page 8
- Device Management, on page 11

# **FMC Platforms**

The FMC provides a centralized firewall management console. For device compatibility with the FMC, see Device Management, on page 11. For general compatibility information, see the Cisco Secure Firewall Management Center Compatibility Guide.

#### **FMC Hardware**

Version 7.0 supports the following FMC hardware:

- Firepower Management Center 1600, 2600, 4600
- Firepower Management Center 1000, 2500, 4500

You should also keep the BIOS and RAID controller firmware up to date; see the Cisco Secure Firewall Threat Defense/Firepower Hotfix Release Notes.

#### **FMCv**

Version 7.0 supports FMCv deployments in both public and private clouds.

With the FMCv, you can purchase a license to manage 2, 10, or 25 devices. Some platforms support 300 devices. Note that two-device licenses do not support FMC high availability. For full details on supported instances, see the Cisco Secure Firewall Management Center Virtual Getting Started Guide.

Table 4: Version 7.0 FMCv Platforms

Platform	Devices Managed		High Availability
	2, 10, 25		
Public Cloud			

Platform	Devices Managed	High Availability			
	2, 10, 25	300			
Amazon Web Services (AWS)	YES	_	_		
Google Cloud Platform (GCP)	YES	_	_		
Microsoft Azure	YES	_	_		
Oracle Cloud Infrastructure (OCI)	YES	_	_		
Private Cloud					
Cisco HyperFlex	YES	_	YES		
Kernel-based virtual machine (KVM)	YES	_	_		
Nutanix Enterprise Cloud	YES	_	_		
OpenStack	YES	_	_		
VMware vSphere/VMware ESXi 6.5, 6.7, or 7.0	YES	YES	YES		

### **Cloud-delivered Firewall Management Center**

The Cisco cloud-delivered Firewall Management Center is delivered via the Cisco Defense Orchestrator (CDO) platform, which unites management across multiple Cisco security solutions. We take care of feature updates. Note that a customer-deployed management center is often referred to as *on-prem*, even for virtual platforms.

At the time this document was published, the cloud-delivered Firewall Management Center could manage devices running threat defense . For up-to-date compatibility information, see the Cisco Cloud-Delivered Firewall Management Center Release Notes.

# **Device Platforms**

Firepower devices monitor network traffic and decide whether to allow or block specific traffic based on a defined set of security rules. For details on device management methods, see Device Management, on page 11. For general compatibility information, see the Cisco Secure Firewall Threat Defense Compatibility Guide or the Cisco Firepower Classic Device Compatibility Guide.

### **FTD Hardware**

Version 7.0 FTD hardware comes in a range of throughputs, scalability capabilities, and form factors.

Table 5: Version 7.0 FTD Hardware

Platform	FMC Compatibility		FDM Compatibility		Notes
	Customer Deployed	Cloud Delivered	FDM Only	FDM + CDO	
Firepower 1010, 1120, 1140, 1150	YES	YES Requires Version 7.0.3+	YES	YES	_
Firepower 2110, 2120, 2130, 2140	YES	YES Requires Version 7.0.3+	YES	YES	_
Firepower 4110, 4120, 4140, 4150	YES	YES Requires	YES	YES	Requires FXOS 2.10.1.159 or later build.
Firepower 4112, 4115, 4125, 4145		Version 7.0.3+			We recommend the latest firmware. See the Cisco
Firepower 9300: SM-24, SM-36, SM-44 modules					Firepower 4100/9300 FXOS Firmware Upgrade Guide.
Firepower 9300: SM-40, SM-48, SM-56 modules					Sulav.
ASA 5508-X, 5516-X	YES	YES Requires Version 7.0.3+	YES	YES	ASA 5508-X and 5516-X devices may require a ROMMON update. See the Cisco Secure Firewall ASA and Secure Firewall Threat Defense Reimage Guide.
ISA 3000	YES	YES Requires Version 7.0.3+	YES	YES	May require a ROMMON update. See the Cisco Secure Firewall ASA and Secure Firewall Threat Defense Reimage Guide.

## FTDv

Version 7.0 FTDv implementations support performance-tiered Smart Software Licensing, based on throughput requirements and remote access VPN session limits. Options run from FTDv5 (100 Mbps/50 sessions) to FTDv100 (16 Gbps/10,000 sessions). For more information on supported instances, throughputs, and other hosting requirements, see the appropriate *Getting Started Guide*.

Table 6: Version 7.0 FTDv Platforms

Device Platform	FMC Compatibility		FDM Compatibility	
	Customer Deployed	Cloud Delivered	FDM Only	FDM + CDO
Public Cloud	<u> </u>	<u> </u>		
Amazon Web Services	YES	YES	YES	YES
(AWS)		Requires Version 7.0.3+		
Microsoft Azure	YES	YES	YES	YES
		Requires Version 7.0.3+		
Google Cloud Platform	YES	YES	_	_
(GCP)		Requires Version 7.0.3+		
Oracle Cloud	YES	YES	_	_
Infrastructure (OCI)		Requires Version 7.0.3+		
Private Cloud	J.	l		
Cisco Hyperflex	YES	YES	YES	YES
		Requires Version 7.0.3+		
Kernel-based virtual	YES	YES	YES	YES
machine (KVM)		Requires Version 7.0.3+		
Nutanix Enterprise Cloud	YES	YES	YES	YES
		Requires Version 7.0.3+		
OpenStack	YES	YES	_	_
		Requires Version 7.0.3+		
VMware	YES	YES	YES	YES
vSphere/VMware ESXi 6.5, 6.7, or 7.0		Requires Version 7.0.3+		

## Firepower Classic: ASA FirePOWER, NGIPSv

Firepower Classic devices run NGIPS software on the following platforms:

- ASA devices can run NGIPS software as a separate application (the ASA FirePOWER module). Traffic
  is sent to the module after ASA firewall policies are applied. Although there is wide compatibility between
  ASA and ASA FirePOWER versions, upgrading allows you to take advantage of new features and
  resolved issues.
- NGIPSv runs the software in virtualized environments.

Table 7: Version 7.0 NGIPS Platforms

Device Platform	FMC Compatibility (Customer Deployed)	ASDM Compatibility	Notes
ASA 5508-X, 5516-X	YES	Requires ASDM 7.16(1).	Requires ASA 9.5(2) to 9.16(x).  May require a ROMMON update. See the Cisco Secure Firewall ASA and Secure Firewall Threat Defense Reimage Guide.
ISA 3000	YES	Requires ASDM 7.16(1).	Requires ASA 9.5(2) to 9.16(x).  May require a ROMMON update. See the Cisco Secure Firewall ASA and Secure Firewall Threat Defense Reimage Guide.
NGIPSv	YES	_	Requires VMware vSphere/VMware ESXi 6.5, 6.7, or 7.0.  For supported instances, throughputs, and other hosting requirements, see the Cisco Firepower NGIPSv Quick Start Guide for VMware.

# **Device Management**

Depending on device model and version, we support the following management methods.

#### **On-Prem FMC**

All devices support remote management with an on-prem FMC, which must run the *same or newer* version as its managed devices. This means:

- You can manage older devices with a newer FMC, usually a few major versions back. However, we
  recommend you always update your entire deployment. New features and resolved issues often require
  the latest release on both the FMC and its managed devices.
- You *cannot* upgrade a device past the FMC. Even for maintenance (third-digit) releases, you must upgrade the FMC first.

Note that in most cases you can upgrade an older device directly to the FMC's major or maintenance version. However, sometimes you can manage an older device that you cannot directly upgrade, even though the target

version is supported on the device. For release-specific requirements, see Minimum Version to Upgrade, on page 42.

#### Table 8: On-Prem FMC-Device Compatibility

FMC Version	Oldest Device Version You Can Manage		
7.4	7.0		
7.3	6.7		
7.2	6.6		
7.1	6.5		
7.0	6.4		
6.7	6.3		
6.6	6.2.3		
6.5	6.2.3		
6.4	6.1		
6.3	6.1		
6.2.3	6.1		
6.2.2	6.1		
6.2.1	6.1		
6.2	6.1		
6.1	5.4.0.2/5.4.1.1		
6.0.1	5.4.0.2/5.4.1.1		
6.0	5.4.0.2/5.4.1.1		
5.4.1	5.4.1 for ASA FirePOWER on the ASA-5506-X series, ASA5508-X, and ASA5516-X. 5.3.1 for ASA FirePOWER on the ASA5512-X, ASA5515-X,		
	ASA5525-X, ASA5545-X, ASA5555-X, and ASA-5585-X series. 5.3.0 for Firepower 7000/8000 series and legacy devices.		

## **Cloud-delivered Firewall Management Center**

For threat defense compatibility with cloud-delivered Firewall Management Center, see the Cisco Secure Firewall Threat Defense Compatibility Guide.

### **FDM**

You can use FDM to locally manage a single FTD device.

Optionally, add Cisco Defense Orchestrator (CDO) to remotely manage multiple FTD devices, as an alternative to the FMC. Although some configurations still require FDM, CDO allows you to establish and maintain consistent security policies across your FTD deployment.

### **ASDM**

You can use ASDM to locally manage a single ASA FirePOWER module, which is a separate application on an ASA device. Traffic is sent to the module after ASA firewall policies are applied. Newer versions of ASDM can manage newer ASA FirePOWER modules.

Device Management

# **Features**

For features in earlier releases, see Cisco Secure Firewall Management Center New Features by Release and Cisco Secure Firewall Device Manager New Features by Release.

## **Upgrade Impact**

A feature has upgrade impact if upgrading and deploying can cause the system to process traffic or otherwise act differently without any other action on your part. This is especially common with new threat detection and application identification capabilities. A feature can also have upgrade impact if upgrading requires that you take action before or after upgrade to avoid an undesirable outcome; for example, if you must change a configuration. Having to enable a new setting or deploy a policy post-upgrade to take advantage of a new feature does not count as upgrade impact.

The feature descriptions below include upgrade impact where appropriate.

#### Snort

Snort 3 is the default inspection engine for FTD. Snort 3 features for FMC deployments also apply to FDM, even if they are not listed as new FDM features. However, keep in mind that the FMC may offer more configurable options than FDM.

**Important** 

If you are still using the Snort 2 inspection engine, switch to Snort 3 now for improved detection and performance. Snort 2 will be deprecated in a future release and will eventually prevent threat defense upgrade.

#### **Intrusion Rules and Keywords**

Upgrades can import and auto-enable new and updated intrusion rules and preprocessor rules, modified states for existing rules, and modified default intrusion policy settings. If a newer intrusion rule uses keywords that are not supported in your current version, that rule is not imported when you update the SRU/LSP. After you upgrade and those keywords become supported, the new intrusion rules are imported and, depending on your IPS configuration, can become auto-enabled and thus start generating events and affecting traffic flow.

For details on new keywords, see the Snort release notes: https://www.snort.org/downloads.

### **FlexConfig**

Upgrades can add web interface or Smart CLI support for features that previously required FlexConfig. The upgrade does not convert FlexConfigs. After upgrade, configure the newly supported features in the web interface or Smart CLI. When you are satisfied with the new configuration, delete the deprecated FlexConfigs.

The feature descriptions below include information on deprecated FlexConfigs when appropriate. For a full list of deprecated FlexConfigs, see your configuration guide.

#### Caution

Although you cannot newly assign or create FlexConfig objects using deprecated commands, in most cases existing FlexConfigs continue to work and you can still deploy. However, sometimes, using deprecated commands can cause deployment issues.

### **Language Preferences**

If you are using the web interface in a language other than English, features introduced in maintenance releases and patches may not be translated until the next major release.

- FMC Features in Version 7.0.6, on page 16
- FMC Features in Version 7.0.5, on page 17
- FMC Features in Version 7.0.4, on page 18
- FMC Features in Version 7.0.3, on page 19
- FMC Features in Version 7.0.2, on page 21
- FMC Features in Version 7.0.1, on page 23
- FMC Features in Version 7.0.0, on page 24
- FDM Features in Version 7.0.x, on page 36

# FMC Features in Version 7.0.6

#### Table 9:

Feature	Details
Administration	
Updated web analytics provider.	Upgrade impact. Your browser connects to new resources.
	While using the FMC, your browser now contacts Amplitude (amplitude.com) instead of Google (google.com) for web analytics.
	Version restrictions: Amplitude analytics are not supported in management center Version 7.0.0–7.0.5, 7.1.0–7.2.5, 7.3.x, or 7.4.0. Permanent support returns in Version 7.4.1 If you upgrade from a supported version to an unsupported version, your browser resumes contacting Google.

Feature	Details			
Smaller VDB for lower memory	Upgrade impact. Application identification on lower memory devices is affected.			
Snort 2 devices.	For VDB 363+, the system now installs a smaller VDB (also called <i>VDB lite</i> ) on lower memory devices running Snort 2. This smaller VDB contains the same applications, but fewer detection patterns. Devices using the smaller VDB can miss some application identification versus devices using the full VDB.			
	Lower memory devices: ASA 5506-X series, ASA-5508-X, 5512-X, 5515-X, 5516-X, 5525-X, 5545-X			
	Version restrictions: The ability to install a smaller VDB depends on the version of the management center, not managed devices. If you upgrade the management center from a supported version to an unsupported version, you cannot install VDB 363+ if your deployment includes even one lower memory device. For a list of affected releases, see CSCwd88641.			
	See: Update the Vulnerability Database			
<b>Deprecated Features</b>				
Deprecated: high unmanaged disk usage alerts.	The Disk Usage health module no longer alerts with high unmanaged disk usage. Afte FMC upgrade, you may continue to see these alerts until you either deploy health policies to managed devices (stops the display of alerts) or upgrade the devices (stops the sending of alerts)			
	Note Versions 7.0–7.0.5, 7.1.x, 7.2.0–7.2.3, and 7.3.x continue to support these alerts. If your FMC is running any of these versions, you may also continue to see alerts.			
	For information on the remaining Disk Usage alerts, see Disk Usage and Drain of Events Health Monitor Alerts.			

### Table 10:

Feature	Details
ISA 3000 System LED support for shutting down.	When you shut down the ISA 3000, the System LED turns off. Wait at least 10 seconds after that before you remove power from the device.
	Version restrictions: Version 7.1 temporarily deprecates support for this feature. Support returns in Version 7.3.

Feature	Details		
Automatically update CA bundles.	Upgrade impact. The system connects to Cisco for something new.  The local CA bundle contains certificates to access several Cisco services. The system now automatically queries Cisco for new CA certificates at a daily system-defined time. Previously, you had to upgrade the software to update CA certificates. You can use the CLI to disable this feature.  New/modified CLI commands: configure cert-update auto-update, configure cert-update		
	run-now, configure cert-update test, show cert-update  Version restrictions: This feature is included in Versions 7.0.5+, 7.1.0.3+, and 7.2.4+. It is not supported in earlier 7.0, 7.1, or 7.2 releases. If you upgrade from a supported version to an unsupported version, the feature is temporarily disabled and the system stops contacting Cisco.  See: Firepower Management Center Command Line Reference and Cisco Secure Firewall Threat Defense Command Reference		

This release introduces stability, hardening, and performance enhancements.

Table 11: FMC Features in Version 7.0.3

Feature	Minimum Management Center	Minimum Threat Defense	Details
FTD support for cloud-delivered Firewall Management Center.	7.2.0 for analytics-only support	7.0.3	

Feature	Minimum Management Center	Minimum Threat Defense	Details
			Version 7.0.3 FTD devices support management by the cloud-delivered Firewall Management Center, which we introduced in spring of 2022. The cloud-delivered Firewall Management Center uses the Cisco Defense Orchestrator (CDO) platform and unites management across multiple Cisco security solutions. We take care of feature updates.
			You should use Version 7.0.3 FTD with the cloud-delivered Firewall Management Center if:
			<ul> <li>You are currently using a customer-deployed ("on prem") hardware or virtual FMC.</li> </ul>
			• You want to migrate to the cloud-delivered Firewall Management Center right now.
			• You do not want to upgrade devices to Version 7.2+, which also supports management by the cloud-delivered Firewall Management Center.
			If this is your situation, you should:
			1. Upgrade the current FMC to Version 7.2+.
			Although you can technically use a Version 7.0.3 or 7.1 FMC to upgrade FTD to Version 7.0.3, you will not be able to easily migrate devices to the cloud-delivered management center, nor will you be able to leave the devices registered to the on-prem management center for event logging and analytics purposes only ("analytics only").
			<b>2.</b> Use the upgraded FMC to upgrade devices to Version 7.0.3.
			3. Enable cloud management on the devices.
			For Version 7.0.x devices only, you must enable cloud management from the device CLI: <b>configure manager-cdo enable</b> . The <b>show manager-cdo</b> command displays whether cloud management is enabled.
			<b>4.</b> Use CDO's Migrate FTD to Cloud wizard to migrate the devices to the cloud-delivered Firewall Management Center.
			Optionally, leave the devices registered to the on-prem management center as analytics-only devices. Or, you can send security events to the Cisco cloud with Security Analytics and Logging (SaaS).
			The cloud-delivered Firewall Management Center cannot manage FTD devices running Version 7.1, or Classic devices running any version. You cannot upgrade a cloud-managed device from Version 7.0.x to Version 7.1 unless you unregister and disable cloud management. We recommend you upgrade directly to Version 7.2+.
			New/modified CLI commands: configure manager add, configure manager delete, configure manager edit, show managers
			For more information, see Managing Firewall Threat Defense with

Feature	Minimum Management Center	Minimum Threat Defense	Details
			Cloud-Delivered Firewall Management Center in Cisco Defense Orchestrator.

### Table 12:

Feature	Details
ISA 3000 support for shutting down.	You can now shut down the ISA 3000; previously, you could only reboot the device.  Version restrictions: Version 7.1 temporarily deprecates support for this feature. Support returns in Version 7.2.
Dynamic object names now support the dash character.	Dynamic object names now support the dash character. This is especially useful if you are using the ACI endpoint update app (where the dash character is allowed), to create dynamic objects on the FMC that represent tenant endpoint groups.  Minimum threat defense: 7.0.2

Feature	Details		
Improved SecureX integration, SecureX orchestration.	Upgrade impact. Cannot upgrade Version $7.0.x \rightarrow 7.1$ with feature enabled.		
	We have streamlined the SecureX integration process. Now, as long as you already have a SecureX account, you just choose your cloud region on the new <b>Integration &gt; SecureX</b> page, click <b>Enable SecureX</b> , and authenticate to SecureX. The option to send events to the cloud, as well as to enable Cisco Success Network and Cisco Support Diagnostics, are also moved to this new page.		
	When you enable SecureX integration on this new page, licensing and management for the system's cloud connection switches from Cisco Smart Licensing to SecureX. If you already enabled SecureX the "old" way, you must disable and re-enable to get the benefits of this cloud connection management.		
	Note that this page also governs the cloud region for and event types sent to the Secure Network Analytics (Stealthwatch) cloud using Security Analytics and Logging (SaaS), even though the web		
	interface does not indicate this. Previously, these options were on <b>System</b> (*) > <b>Integration</b> > <b>Cloud Services</b> . Enabling SecureX does not affect communications with the Secure Network Analytics cloud; you can send events to both.		
	The FMC also now supports SecureX orchestration—a powerful drag-and-drop interface you can use to automate workflows across security tools. After you enable SecureX, you can enable orchestration.		
	As part of this feature, you can no longer use the REST API to configure SecureX integration. You must use the FMC web interface.		
	Version restrictions: This feature is included in Versions 7.0.2+ and 7.2+. It is not supported in Version 7.1. If you use the new method to enable SecureX integration in Version 7.0.x, you cannot upgrade to Version 7.1 unless you disable the feature. We recommend you upgrade to Version 7.2+.		
	See: Cisco Secure Firewall Management Center (7.0.2 and 7.2) and SecureX Integration Guide		

Feature	Details				
Web interface changes: SecureX, threat intelligence, and other integrations.	We changed these FMC menu options.  Note These changes are temporarily deprecated in Version 7.1, but come back in Version 7.2.				
	AMP > AMP Management	is now	$Integration > AMP > AMP\ Management$		
	AMP > Dynamic Analysis Connections	is now	Integration > AMP > Dynamic Analysis Connections		
	Intelligence > Sources	is now	Integration > Intelligence > Sources		
	Intelligence > Elements	is now	Integration > Intelligence > Elements		
	Intelligence > Settings	is now	Integration > Intelligence > Settings		
	Intelligence > Incidents	is now	Integration > Intelligence > Incidents		
	System (♣) > Integration	is now	<b>Integration &gt; Other Integrations</b>		
	System (♣) > Logging > Security Analytics & Logging	is now	Integration > Security Analytics & Logging		
	System (♣) > SecureX	is now	Integration > SecureX		

Table 13: FMC Features in Version 7.0.1

Feature	Details		
Snort 3 rate_filter inspector.	We introduced the Snort 3 rate_filter inspector.		
	This allows you to change the action of an intrusion rule in response to excessive matches on that rule. You can block rate-based attacks for a specific length of time, then return to allowing matching traffic while still generating events. For more information, see the Snort 3 Inspector Reference.		
	New/modified pages: Configure the inspector by editing the Snort 3 version of a custom network analysis policy.		
	Version restrictions: This feature requires Version 7.0.1+ on both the FMC and the device. Additionally, you must be running lsp-rel-20210816-1910 or later. You can check and update the LSP on <b>System</b> (*) > <b>Updates</b> > <b>Rule Updates</b> .		
New default password for ISA 3000 with ASA FirePOWER	For new devices, the default password for the admin account is now Adm!n123. Previously, the default admin password was Admin123.		
Services.	Upgrading or reimaging to Version 7.0.1+ does not change the password. However, we do recommend that all user accounts—especially those with Admin access—have strong passwords.		

Table 14: FMC Features in Version 7.0.0

Feature	Details	
Platform		
VMware vSphere/VMware ESXi 7.0 support.	You can now deploy FMCv, FTDv, and NGIPSv virtual appliances on VMware vSphere/VMware ESXi 7.0.	
	Note that Version 7.0 also discontinues support for VMware 6.0. Upgrade the hosting environment to a supported version before you upgrade the Firepower software.	
New virtual environments.	We introduced FMCv and FTDv for:	
	Cisco HyperFlex	
	Nutanix Enterprise Cloud	
	• OpenStack	
	For FMCv, all these implementations support FMCv2, v10, and v25.	
	FMCv for HyperFlex also supports high availability with FMCv10 and v25. In an FTD deployment, you need two identically licensed FMCs, as well as one FTD entitlement for each managed device. For example, to manage 10 devices with an FMCv10 high availability pair, you need two FMCv10 entitlements and 10 FTD entitlements. If you are managing Classic devices only (NGIPSv or ASA FirePOWER), you do not need FMCv entitlements.	
FTDv performance tiered Smart	Upgrade impact. Upgrading automatically assigns devices to the FTDv Variable tier.	
Licensing.	FTDv now supports performance-tiered Smart Software Licensing, based on throughput requirements and RA VPN session limits. Options run from FTDv5 (100 Mbps/50 sessions) to FTDv100 (16 Gbps/10,000 sessions).	
	Before you add a new device, make sure your account contains the licenses you need. To purchase additional licenses, contact your Cisco representative or partner contact. Upgrading FTDv to Version 7.0 automatically assigns the device to the FTDv Variable tier, although you can change this later.	
	For more information on changing performance tiers, supported instances, throughputs, and other hosting requirements, see the appropriate <i>Getting Started Guide</i> .	
	New/modified pages:	
	• You can now specify a performance tier when adding or editing an FTDv device on the <b>Device</b> > <b>Device Management</b> page.	
	• You can bulk-edit performance tiers on <b>System</b> (**) > <b>Licenses</b> > <b>Smart Licenses</b> > page.	

## **FTD Clustering**

Feature	Details
Improved PAT port block allocation for clustering	The improved PAT port block allocation ensures that the control unit keeps ports in reserve for joining nodes, and proactively reclaims unused ports. To best optimize the allocation, you can set the maximum nodes you plan to have in the cluster using the <b>cluster-member-limit</b> command using FlexConfig. The control unit can then allocate port blocks to the planned number of nodes, and it will not have to reserve ports for extra nodes you don't plan to use. The default is 16 nodes. You can also monitor syslog 747046 to ensure that there are enough ports available for a new node.
	New/modified commands: cluster-member-limit (FlexConfig), show nat pool cluster [summary], show nat pool ip detail
	Supported platforms: Firepower 4100/9300
FTD CLI show cluster history	New keywords allow you to customize the output of the <b>show cluster history</b> command.
improvements.	New/modified commands: show cluster history [brief] [latest] [reverse] [time]
	Supported platforms: Firepower 4100/9300
FTD CLI command to permanently leave a cluster.	You can now use the FTD CLI to permanently remove a unit from the cluster, converting its configuration to a standalone device.
	New/modified commands: cluster reset-interface-mode
	Supported platforms: Firepower 4100/9300
FTD NAT	
Prioritized system-defined NAT rules for FTD.	We added a new Section 0 to the NAT rule table. This section is exclusively for the use of the system. Any NAT rules that the system needs for normal functioning are added to this section, and these rules take priority over any rules you create. Previously, system-defined rules were added to Section 1, and user-defined rules could interfere with proper system functioning.
	You cannot add, edit, or delete Section 0 rules, but you will see them in <b>show nat detail</b> command output.
FTD Routing	
Virtual router support for the ISA 3000.	You can now configure up to 10 virtual routers on an ISA 3000 device.
FTD VPN: Site to Site	
Backup virtual tunnel interfaces (VTI) for route-based site-to-site VPN.	When you configure a site-to-site VPN that uses virtual tunnel interfaces, you can select a backup VTI for the tunnel.
	Specifying a backup VTI provides resiliency, so that if the primary connection goes down, the backup connection might still be functional. For example, you could point the primary VTI to the endpoint of one service provider, and the backup VTI to the endpoint of a different service provider.
	New/modified pages: We added the ability to add a backup VTI to the site-to-site VPN wizard when you select Route-Based as the VPN type for a point-to-point connection.
FTD VPN: Remote Access	

Feature	Details
Load balancing.	We now support RA VPN load balancing. The system distributes sessions among grouped devices by number of sessions; it does not consider traffic volume or other factors.
	New/modified screens: We added load balancing options to the Advanced settings in an RA VPN policy.
Local authentication.	We now support local authentication for RA VPN users. You can use this as the primary or secondary authentication method, or as a fallback in case the configured remote server cannot be reached.
	1. Create a local realm.
	Local usernames and passwords are stored in local realms. When you create a realm ( <b>System</b> ( > <b>Integration</b> > <b>Realms</b> ) and select the new <b>LOCAL</b> realm type, the system prompts you to add one or more local users.
	2. Configure RA VPN to use local authentication.
	Create or edit an RA VPN policy ( <b>Devices</b> > <b>VPN</b> > <b>Remote Access</b> ), create a connection profile within that policy, then specify <b>LOCAL</b> as the primary, secondary, or fallback authentication server in that connection profile.
	3. Associate the local realm you created with an RA VPN policy.
	In the RA VPN policy editor, use the new <b>Local Realm</b> setting. Every connection profile in the RA VPN policy that uses local authentication will use the local realm you specify here.
Dynamic access policies.	The new dynamic access policy allows you to configure remote access VPN authorization that automatically adapts to a changing environment:
	1. Configure HostScan by uploading the AnyConnect HostScan package as an AnyConnect file (Objects > Object Management > VPN > AnyConnect File). There is a new HostScan Package option in the File Type drop-down list.
	This module runs on endpoints and performs a posture assessment that the dynamic access policy will use.
	2. Create a dynamic access policy ( <b>Devices &gt; Dynamic Access Policy</b> ).
	Dynamic access policies specify session attributes (such as group membership and endpoint security) that you want to evaluate each time a user initiates a session. You can then deny or grant access based on that evaluation.
	3. Associate the dynamic access policy you created with an RA VPN policy.
	In the remote access VPN policy editor, use the new <b>Dynamic Access Policy</b> setting.
Multi-certificate authentication.	We now support multi-certificate authentication for remote access VPN users. You can validate the machine or device certificate, to ensure the device is a corporate-issued device, in addition to authenticating the user's identity certificate to allow VPN access using the AnyConnect client during SSL or IKEv2 EAP phase.
AnyConnect custom attributes.	We now support AnyConnect custom attributes, and provide an infrastructure to configure AnyConnect client features without adding explicit support for these features in the system.

Feature	Details
Access Control: Threat Detection and Application Identification	
Snort 3 for FTD.	For new FTD deployments, Snort 3 is now the default inspection engine. Upgraded deployments continue to use Snort 2, but you can switch at any time.
	Advantages to using Snort 3 include, but are not limited to:
	Improved performance.
	• Improved SMBv2 inspection.
	New script detection capabilities.
	• HTTP/2 inspection.
	Custom rule groups.
	Syntax that makes custom intrusion rules easier to write.
	Reasons for 'would have dropped' inline results in intrusion events.
	<ul> <li>No Snort restarts when deploying changes to the VDB, SSL policies, custom application detectors, captive portal identity sources, and TLS server identity discovery.</li> </ul>
	<ul> <li>Improved serviceability, due to Snort 3-specific telemetry data sent to Cisco Success Network and to better troubleshooting logs.</li> </ul>
	A Snort 3 intrusion rule update is called an <i>LSP</i> (Lightweight Security Package) rather than an SRU. The system still uses SRUs for Snort 2; downloads from Cisco contain both the latest LSP and SRU. The system automatically uses the appropriate rule set for your configurations.
	The FMC can manage a deployment with both Snort 2 and Snort 3 devices, and will apply the correct policies to each device. However, unlike Snort 2, you cannot update Snort 3 on a device by upgrading the FMC only and then deploying. With Snort 3, new features and resolved bugs require you upgrade the software on the FMC <i>and</i> its managed devices. For information on the Snort included with each software version, see the <i>Bundled Components</i> section of the Cisco Firepower Compatibility Guide.
	Important Before you switch to Snort 3, we <i>strongly</i> recommend you read and understand the Firepower Management Center Snort 3 Configuration Guide. Pay special attention to feature limitations and migration instructions. Although upgrading to Snort 3 is designed for minimal impact, features do not map exactly. Careful planning and preparation can help you make sure that traffic handled as expected.
	You can also visit the Snort 3 website: https://snort.org/snort3.
DNS filtering.	DNS filtering, which was introduced as a Beta feature in Version 6.7, is now fully supported and is enabled by default in new access control policies.

Feature	Details
Cross-domain trust for Active Directory domains.	You can now configure user identity rules with users from Microsoft Active Directory forests (groupings of AD domains that trust each other).
	New/modified pages:
	You now configure a realm and directories at the same time.
	• A new Sync Results page ( <b>System</b> (*) > <b>Integration</b> > <b>Sync Results</b> ) displays any errors related to downloading users and groups in a cross-domain trust relationship.
<b>Event Logging and Analysis</b>	
Improved process for storing events in a Secure Network	A new Cisco Security Analytics and Logging (On Premises) app and a new FMC wizard make it easier to configure remote data storage for on-prem Secure Network Analytics solutions:
Analytics on-prem deployment.	1. Deploy hardware or virtual Stealthwatch appliances.
	You can use a Stealthwatch Management Console alone, or you can configure Stealthwatch Management Console, flow collector, and data store.
	2. Install the new Cisco Security Analytics and Logging (On Premises) app on your Stealthwatch Management Console to configure Stealthwatch as a remote data store.
	3. On the FMC, use one of the new wizards on System ( > Logging > Security Analytics & Logging to connect to your Stealthwatch deployment.
	Note that the wizards replace the narrower-focus page where you used to configure Stealthwatch contextual cross-launch; that is now a step in the wizard.
	For upgraded deployments where you were using syslog to send Firepower events to Stealthwatch, disable those configurations before you use the wizard. Otherwise, you will get double events. To remove the syslog connection to Stealthwatch use FTD platform settings ( <b>Devices &gt; Platform Settings</b> ); to disable sending events to syslog, edit your access control rules.
	For more information, including Stealthwatch hardware and software requirements, see Cisco Security Analytics and Logging (On Premises): Firewall Event Integration Guide.

Feature	Details
Work with events stored remotely in a Secure Network Analytics on-prem deployment.	You can now use the FMC to work with connection events stored remotely in a Secure Network Analytics on-prem deployment.
	A new <b>Data Source</b> option on the connection events page ( <b>Analysis &gt; Connections &gt; Events</b> ) and in the unified event viewer ( <b>Analysis &gt; Unified Events</b> ) allows you to choose which connection events you want to work with. The default is to display locally stored connection events, unless there are none in the time range. In that case, the system displays remotely stored events
	We also added a data source option to report templates ( <b>Overview &gt; Reporting &gt; Report Templates</b> ), so that you can generate reports based on remotely stored connection events.
	<b>Note</b> This feature is supported for connection events only; cross-launch is still the only way to examine remotely stored Security Intelligence, intrusion, file and malware events. Even in the unified event viewer, the system only displays locally stored events of those types.
	However, note that for every Security Intelligence event, there is an identical connection event—these are the events with reasons such as 'IP Block' or 'DNS Block.' You can work with those duplicated events on the connection events page or in the unified event viewer, but not on the dedicated Security Intelligence events page.
Store all connection events in the Secure Network Analytics cloud.	You can now store all connection events in the Stealthwatch cloud using Cisco Security Analytics and Logging (SaaS). Previously, you were limited to security events: Security Intelligence, intrusion, file, and malware events, as well as their associated connection events.
	To change the events you send to the cloud, choose <b>System</b> (*) > <b>Integration</b> . On the <b>Cloud Services</b> tab, edit the <b>Cisco Cloud Event Configuration</b> . The old option to send high priority connection events to the cloud has been replaced with a choice of <b>All</b> , <b>None</b> , or <b>Security Events</b> .
	Note These settings also control which events you send to SecureX. However, even if you choose to send all connection events to the cloud, SecureX consumes only the security (higher priority) connection events. Also note that you now configure the SecureX connection itself on Analysis > SecureX.
Unified event viewer.	The unified event viewer ( <b>Analysis</b> > <b>Unified Events</b> ) displays connection, Security Intelligence, intrusion, file, and malware events in a single table. This can help you look relationships between events of different types.
	A single search field allows you to dynamically filter the view based on multiple criteria, and a <b>Go Live</b> option displays events received from managed devices in real time.
SecureX ribbon.	The SecureX ribbon on the FMC pivots into SecureX for instant visibility into the threat landscape across your Cisco security products.
	To connect with SecureX and enable the ribbon, use <b>System</b> (*) > <b>SecureX</b> . Note that you must still use <b>System</b> (*) > <b>Integration</b> > <b>Cloud Services</b> to choose your cloud region and to specify which events to send to SecureX.
	For more information, see the Cisco Secure Firewall Threat Defense and SecureX Integration Guide.

Feature	Details
Exempt all connection events from rate limiting when you turn off local storage.	Event rate limiting applies to all events sent to the FMC, with the exception of security events: Security Intelligence, intrusion, file, and malware events, as well as their associated connection events.
	Now, disabling local connection event storage exempts <i>all</i> connection events from rate limiting, not just security events. To do this, set the <b>Maximum Connection Events</b> to zero on <b>System</b> (*) > <b>Configuration</b> > <b>Database</b> .
	Note Other than turning it off by setting it to zero, Maximum Connection Events does not govern connection event rate limiting. Any non-zero number in this field ensures that <i>all</i> lower-priority connection events are rate limited.
	Note that disabling local event storage does not affect remote event storage, nor does it affect connection summaries or correlation. The system still uses connection event information for features like traffic profiles, correlation policies, and dashboard displays.
Port and protocol displayed together in file and malware event tables.	In file and malware event tables, the port field now displays the protocol, and you can search port fields for protocol. For events that existed before upgrade, if the protocol is not known, the system uses "tcp."
	New/modified pages:
	• Analysis > Files > Malware Events
	• Analysis > Files > File Events
Health Monitoring	

Feature	Details
New health modules.	We added the following health modules:
	AMP Connection Status
	AMP Threat Grid Status
	• ASP Drop
	Advanced Snort Statistics
	• Chassis Status FTD
	• Event Stream Status
	• FMC Access Configuration Changes
	• FMC HA Status (replaces HA Status)
	• FTD HA Status
	• File System Integrity Check
	• Flow Offload
	• Hit Count
	MySQL Status
	• NTP Status FTD
	• Rabbit MQ Status
	Routing Statistics
	SSE Connection Status
	Sybase Status
	Unresolved Groups Monitor
	VPN Statistics
	• xTLS Counters
	Additionally, full support returns for the Configuration Memory Allocation module, which was introduced in Version 6.6.3 as the Appliance Configuration Resource Utilization module, but was not fully supported in Version 6.7.

#### **Deployment and Policy Management**

Feature	Details
Dynamic objects.	You can now use <i>dynamic objects</i> in access control rules.
	A dynamic object is just a list of IP addresses/subnets (no ranges, no FQDN). But unlike a network object, changes to dynamic objects take effect immediately, without having to redeploy. This is useful in virtual and cloud environments, where IP addresses often dynamically map to workload resources.
	To create and manage dynamic objects, we recommend the Cisco Secure Dynamic Attributes Connector. The connector is a separate, lightweight application that quickly and seamlessly updates firewall policies based on workload changes. To do this, it gets workload attributes from tagged resources in your environment, and compiles an IP list based on criteria you specify (a "dynamic attributes filter"). It then creates a dynamic object on the FMC and populates it with the IP list. When your workload changes, the connector updates the dynamic object and the system immediately starts handling traffic based on the new mappings. For more information, see the Cisco Secure Dynamic Attributes Connector Configuration Guide.
	After you create a dynamic object, you can add it to access control rules on the new <b>Dynamic Attributes</b> tab in the access control rule editor. This tab replaces the narrower-focus <b>SGT/ISE Attributes</b> tab; continue to configure rules with SGT attributes here.
	Note You can also create a dynamic object on the FMC: Objects > Object Management > External Attributes > Dynamic Objects. However, this creates the container only; you must then populate and manage it using the REST API. See the Firepower Management Center REST API Quick Start Guide, Version 7.0.
	Supported virtual/cloud workloads for Cisco Secure Dynamic Attributes Connector integration: Microsoft Azure, AWS, VMware
Global search for policies and objects.	You can now search for certain policies by name, and for certain objects by name and configured value. This feature is not available with the Classic theme.
	New/modified pages: We added capabilities to the <b>Search</b> icon and field on the FMC menu bar, to the left of the <b>Deploy</b> menu.
Selectively deploy RA and site-to-site VPN policies.	Selective policy deployment, which was introduced in Version 6.6, now supports remote access and site-to-site VPN policies for FTD.
	New/modified pages: We added VPN policy options on the <b>Deploy &gt; Deployment</b> page.
FTD Upgrade	
Improved FTD upgrade performance and status reporting.	FTD upgrades are now easier faster, more reliable, and take up less disk space. A new <b>Upgrades</b> tab in the Message Center provides further enhancements to upgrade status and error reporting.

**Administration and Troubleshooting** 

Feature	Details
Upgrade wizard for FTD.	A new device upgrade page ( <b>Devices &gt; Device Upgrade</b> ) on the FMC provides an easy-to-follow wizard for upgrading Version 6.4+ FTD devices. It walks you through important pre-upgrade stages, including selecting devices to upgrade, copying the upgrade package to the devices, and compatibility and readiness checks.
	To begin, use the new <b>Upgrade Firepower Software</b> action on the Device Management page ( <b>Devices &gt; Device Management &gt; Select Action</b> ).
	As you proceed, the system displays basic information about your selected devices, as well as the current upgrade-related status. This includes any reasons why you cannot upgrade. If a device does not "pass" a stage in the wizard, it does not appear in the next stage.
	If you navigate away from wizard, your progress is preserved, although other users with Administrator access can reset, modify, or continue the wizard.
	Note You must still use <b>System</b> (*) > <b>Updates</b> to upload or specify the location of FTD upgrade packages. You must also use the System Updates page to upgrade the FMC itself, as well as all non-FTD managed devices.
	Note In Version 7.0, the wizard does not correctly display devices in clusters or high availability pairs. Even though you must select and upgrade these devices as a unit, the wizard displays them as standalone devices. Device status and upgrade readiness are evaluated and reported on an individual basis. This means it is possible for one unit to appear to "pass" to the next stage while the other unit or units do not. However, these devices are still grouped. Running a readiness check on one, runs it on all. Starting the upgrade on one, starts it on all.
	To avoid possible time-consuming upgrade failures, <i>manually</i> ensure all group members are ready to move on to the next step of the wizard before you click <b>Next</b> .
Upgrade more FTD devices at	The FTD upgrade wizard lifts the following restrictions:
once.	Simultaneous device upgrades.
	The number of devices you can upgrade at once is now limited by your management network bandwidth—not the system's ability to manage simultaneous upgrades. Previously, we recommended against upgrading more than five devices at a time.
	Important Only upgrades to FTD Version 6.7+ see this improvement. If you are upgrading devices to an older FTD release—even if you are using the new upgrade wizard—we still recommend you limit to five devices at a time.
	Grouping upgrades by device model.
	You can now queue and invoke upgrades for all FTD models at the same time, as long as the system has access to the appropriate upgrade packages.
	Previously, you would choose an upgrade package, then choose the devices to upgrade using that package. That meant that you could upgrade multiple devices at the same time <i>only</i> if they shared an upgrade package. For example, you could upgrade two Firepower 2100 series devices at the same time, but not a Firepower 2100 series and a Firepower 1000 series.

Feature	Details
Zero-touch restore for the ISA 3000 using the SD card.	When you perform a local backup, the backup file is copied to the SD card if present. To restore the configuration on a replacement device, simply install the SD card in the new device, and depress the Reset button for 3 to 15 seconds during the device bootup.
Security and Hardening	
New default password for AWS deployments.	For FMCv/FTDv for AWS, the default password for the admin account is now the AWS Instance ID, unless you define a default password with user data ( <b>Advanced Details &gt; User Data</b> ) during the initial deployment.
	Previously, the default admin password was Admin123.
EST for certificate enrollment.	Support for Enrollment over Secure Transport for certificate enrollment was provided.
	New/modified pages: New enrollment options when configuring <b>Objects &gt; PKI &gt; Cert Enrollment</b> > <b>CA Information</b> tab.
Support for EdDSA certificate	A new certificate key type- EdDSA was added with key size 256.
type.	New/modified pages: New certificate key options when configuring <b>Objects &gt; PKI &gt; Cert Enrollment &gt; Key</b> tab.
AES-128 CMAC authentication	You can now use AES-128 CMAC keys to secure connections between the FMC and NTP servers.
for NTP servers.	New/modified pages: System ( ) > Configuration > Time Synchronization.
SNMPv3 users can authenticate	SNMPv3 users can now authenticate using a SHA-224 or SHA-384 algorithm.
using a SHA-224 or SHA-384 authorization algorithm.	New/modified pages: <b>Devices &gt; Platform Settings &gt; SNMP &gt; Users &gt; Auth Algorithm Type</b>
Usability	
Report appearance has changed.	To make reports appear cleaner and easier to read, we changed some things about their appearance:
	Changed red color accents to gray and blue.
	Removed background shading on table and chart titles.
	Removed alternating row colors in tables.
	New/modified pages: <b>Overview</b> > <b>Reporting</b>
How-to location has changed.	<b>Help</b> > <b>How-Tos</b> now invokes walkthroughs. Previously, you clicked <b>How-Tos</b> at the bottom of the browser window.
Performance	
Hardware crypto acceleration on FTDv using Intel QuickAssist Technology (QAT).	We now support hardware crypto acceleration (CBC cipher only) on FTDv for VMware and FTDv for KVM. This feature requires a Intel QAT 8970 PCI adapter/Version 1.7+ driver on the hosting platform. After you reboot, hardware crypto acceleration is automatically enabled.

Feature	Details
Improved CPU usage and performance for many-to-one and one-to-many connections.	The system no longer creates local host objects and locks them when creating connections, except for connections that involve dynamic NAT/PAT and scanning threat detection and host statistics. This improves FTD performance and CPU usage in situations where many connections are going to the same server (such as a load balancer or web server), or one endpoint is making connections to many remote hosts.
	We changed the following commands: clear local-host (deprecated), show local-host
FMC REST API	
FMC REST API.	For information on changes to the management center REST API, see the Firepower Management Center REST API Quick Start Guide, Version 7.0,
<b>Deprecated Features</b>	
End of support: VMware vSphere/VMware ESXi 6.0.	We discontinued support for virtual deployments on VMware vSphere/VMware ESXi 6.0. Upgrade the hosting environment to a supported version before you upgrade the Firepower software.
Deprecated: RSA certificates	Prevents post-upgrade VPN connections through FTD devices.
with keys smaller than 2048 bits, or that use SHA-1 in their signature algorithm.	We removed support for RSA certificates with keys smaller than 2048 bits, or that use SHA-1 in their signature algorithm.
	Before you upgrade, use the object manager to update your PKI certificate enrollments with stronger options: <b>Objects &gt; PKI &gt; Cert Enrollment</b> . Otherwise, although the upgrade preserves your current settings, VPN connections through the device will fail.
	To continue managing older FTD devices only (Version 6.4–6.7.x) with these weaker options, select the new <b>Enable Weak-Crypto</b> option for each device on the <b>Devices &gt; Certificates</b> page.
	Deletes Users. Prevents post-upgrade deploy.
algorithm and DES encryption for SNMPv3 users.	We removed support for the MD5 authentication algorithm and DES encryption for SNMPv3 users on FTD devices.
	Upgrading FTD to Version 7.0+ deletes these users from the device, regardless of the configurations on the FMC. If you are still using these options in your platform settings policy, change and verify your configurations before you upgrade FTD.
	These options are in the <b>Auth Algorithm Type</b> and <b>Encryption Type</b> drop-downs when creating or editing an SNMPv3 user in a Threat Defense platform settings policy: <b>Devices &gt; Platform Settings</b> .
Deprecated: Port 32137 comms	Prevents FMC upgrade.
with AMP clouds.	We deprecated the FMC option to use port 32137 to obtain file disposition data from public and private AMP clouds. Unless you configure a proxy, the FMC now uses port 443/HTTPS.
	Before you upgrade, disable the <b>Use Legacy Port 32137 for AMP for Networks</b> option on the <b>System</b> (*) > <b>Integration</b> > <b>Cloud Services</b> page. Do not proceed with upgrade until your AMP for Networks deployment is working as expected.
Deprecated: HA Status health module.	We renamed the HA Status health module to the <i>FMC</i> HA Status health module. This is to distinguish it from the new FTD HA Status module.

Feature	Details
Deprecated: Legacy API Explorer.	We removed support for the FMC REST API legacy API Explorer.
Deprecated: Geolocation details.	In May 2022 we split the GeoDB into two packages: a country code package mapping IP addresses to countries/continents, and an IP package containing additional contextual data associated with routable IP addresses. In January 2024, we stopped providing the IP package. This saves disk space and does not affect geolocation rules or traffic handling in any way. Any contextual data is now stale, and upgrading to most later versions deletes the IP package. Options to view contextual data have no effect, and are removed in later versions.

# **FDM Features in Version 7.0.x**

#### Table 15: FDM Features in Version 7.0.x

Feature	Description
Platform Features	
FTDv for HyperFlex and Nutanix.	We introduced FTDv for Cisco HyperFlex and Nutanix Enterprise Cloud.
FTDv for VMware vSphere/VMware ESXi 7.0.	You can now deploy FTDv on VMware vSphere/VMware ESXi 7.0.  Note that Version 7.0 also discontinues support for VMware 6.0. Upgrade the hosting environment to a supported version before you upgrade the FTD.
New default password for the FTDv on AWS.	On AWS, the default admin password for the FTDv is the AWS Instance ID, unless you define a default password with user data ( <b>Advanced Details</b> > <b>User Data</b> ) during the initial deployment.
ISA 3000 support for shutting down.	In Version 7.0.2+, you can shut down the ISA 3000; previously, you could only reboot the device.
	In Version 7.0.5+, when you shut down the ISA 3000, the System LED turns off. Wait at least 10 seconds after that before you remove power from the device.
	Version restrictions: Version 7.1 temporarily deprecates support for this feature. Support returns in Version 7.2.
Firewall and IPS Features	
New Section 0 for system-defined NAT rules.	A new Section 0 has been added to the NAT rule table. This section is exclusively for the use of the system. Any NAT rules that the system needs for normal functioning are added to this section, and these rules take priority over any rules you create. Previously, system-defined rules were added to Section 1, and user-defined rules could interfere with proper system functioning. You cannot add, edit, or delete Section 0 rules, but you will see them in <b>show nat detail</b> command output.

Feature	Description
Custom intrusion rules for Snort 3.	You can use offline tools to create custom intrusion rules for use with Snort 3, and upload them into an intrusion policy. You can organize custom rules in your own custom rule groups, to make it easy to update them as needed. You can also create the rules directly in FDM, but the rules have the same format as uploaded rules. FDM does not guide you in creating the rules. You can duplicate existing rules, including system-defined rules, as a basis for a new intrusion rule.  We added support for custom groups and rules to the <b>Policies</b> > <b>Intrusion</b> page, when
	you edit an intrusion policy.
Snort 3 new features for FDM-managed systems.	You can now configure the following additional features when using Snort 3 as the inspection engine on an FDM-managed system:
	Time-based access control rules. (FTD API only.)
	Multiple virtual routers.
	• The decryption of TLS 1.1 or lower connections using the SSL Decryption policy.
	• The decryption of the following protocols using the SSL Decryption policy: FTPS, SMTPS, IMAPS, POP3S.
DNS request filtering based on URL category and reputation.	You can apply your URL filtering category and reputation rules to DNS lookup requests. If the fully-qualified domain name (FQDN) in the lookup request has a category and reputation that you are blocking, the system blocks the DNS reply. Because the user does not receive a DNS resolution, the user cannot complete the connection. Use this option to apply URL category and reputation filtering to non-web traffic. You must have the URL filtering license to use this feature.
	We added the <b>Reputation Enforcement on DNS Traffic</b> option to the access control policy settings.
Smaller VDB for lower memory devices	Upgrade impact. Application identification on lower memory devices is affected.
with Snort 2.	For Version 7.0.6+ devices with Snort 2, for VDB 363+, the system now installs a smaller VDB (also called <i>VDB lite</i> ) on lower memory devices running Snort 2. This smaller VDB contains the same applications, but fewer detection patterns. Devices using the smaller VDB can miss some application identification versus devices using the full VDB.
	Lower memory devices: ASA-5508-X, ASA-5516-X
	Version restrictions: The smaller VDB is not supported in all versions. If you upgrade from a supported version to an unsupported version, you cannot install VDB 363+ on lower memory devices running Snort 2. For a list of affected releases, see CSCwd88641.
VPN Features	
FDM SSL cipher settings for remote access VPN.	You can define the TLS versions and encryption ciphers to use for remote access VPN connections in FDM. Previously, you needed to use the Firepower Threat Defense API to configure SSL settings.
	We added the following pages: <b>Objects</b> > <b>SSL Ciphers</b> ; <b>Device</b> > <b>System Settings</b> > <b>SSL Settings</b> .

Feature	Description
Support for Diffie-Hellman group 31.	You can now use Diffie-Hellman (DH) group 31 in IKEv2 proposals and policies.
The maximum number of Virtual Tunnel Interfaces on the device is 1024.	The maximum number of Virtual Tunnel Interfaces (VTI) that you can create is 1024. In previous versions, the maximum was 100 per source interface.
IPsec lifetime settings for site-to-site VPN security associations.	You can change the default settings for how long a security association is maintained before it must be re-negotiated.
	We added the <b>Lifetime Duration</b> and <b>Lifetime Size</b> options to the site-to-site VPN wizard.
<b>Routing Features</b>	
Virtual router support for the ISA 3000.	You can configure up to 10 virtual routers on an ISA 3000 device.
Equal-Cost Multi-Path (ECMP) routing.	You can configure ECMP traffic zones to contain multiple interfaces, which lets traffic from an existing connection exit or enter the Firepower Threat Defense device on any interface within the zone. This capability allows Equal-Cost Multi-Path (ECMP) routing on the Firepower Threat Defense device as well as external load balancing of traffic to the Firepower Threat Defense device across multiple interfaces.
	ECMP traffic zones are used for routing only. They are not the same as security zones.
	We added the <b>ECMP Traffic Zones</b> tab to the Routing pages. In the Firepower Threat Defense API, we added the ECMPZones resources.
Interface Features	
New default inside IP address.	The default IP address for the inside interface is being changed to <b>192.168.95.1</b> from 192.168.1.1 to avoid an IP address conflict when an address on 192.168.1.0/24 is assigned to the outside interface using DHCP.
Default outside IP address now has IPv6 autoconfiguration enabled; new default IPv6 DNS server for Management.	The default configuration on the outside interface now includes IPv6 autoconfiguration, in addition to the IPv4 DHCP client. The default Management DNS servers now also include an IPv6 server: 2620:119:35::35.
EtherChannel support for the ISA 3000.	You can now use FDM to configure EtherChannels on the ISA 3000.
	New/modified screens: <b>Devices</b> > <b>Interfaces</b> > <b>EtherChannels</b>
<b>Licensing Features</b>	
Performance-Tiered Licensing for FTDv.	The FTDv now supports performance-tiered Smart Licensing based on throughput requirements and RA VPN session limits. When the FTDv is licensed with one of the available performance licenses, two things occur. First, a rate limiter is installed that limits the device throughput to a specified level. Second, the number of VPN sessions is capped to the level specified by the license.

Feature	Description
DHCP relay configuration using the	Upgrade impact. Can prevent post-upgrade deploy.
Firepower Threat Defense API.	You can use the Firepower Threat Defense API to configure DHCP relay. Using DHCP relay on an interface, you can direct DHCP requests to a DHCP server that is accessible through the other interface. You can configure DHCP relay on physical interfaces, subinterfaces, EtherChannels, and VLAN interfaces. You cannot configure DHCP relay if you configure a DHCP server on any interface.
	Note that if you used FlexConfig in prior releases to configure DHCP relay (the <b>dhcprelay</b> command), you must re-do the configuration using the API, and delete the FlexConfig object, after you upgrade.
	We added the following model to the Firepower Threat Defense API: dhcprelayservices
Faster bootstrap processing and early login to FDM.	The process to initially bootstrap an FDM-managed system has been improved to make it faster. Thus, you do not need to wait as long after starting the device to log into FDM. In addition, you can now log in while the bootstrap is in progress. If the bootstrap is not complete, you will see status information on the process so you know what is happening on the device.
Improved CPU usage and performance for many-to-one and one-to-many connections.	The system no longer creates local host objects and locks them when creating connections, except for connections that involve dynamic NAT/PAT and scanning threat detection and host statistics. This improves performance and CPU usage in situations where many connections are going to the same server (such as a load balancer or web server), or one endpoint is making connections to many remote hosts.
	We changed the following commands: clear local-host (deprecated), show local-host
Upgrade readiness check for FDM-managed devices.	You can run an upgrade readiness check on an uploaded Firepower Threat Defense upgrade package before attempting to install it. The readiness check verifies that the upgrade is valid for the system, and that the system meets other requirements needed to install the package. Running an upgrade readiness check helps you avoid failed installations.
	A link to run the upgrade readiness check was added to the <b>System Upgrade</b> section of the <b>Device</b> > <b>Updates</b> page.
Automatically update CA bundles.	Upgrade impact. The system connects to Cisco for something new.
	The local CA bundle contains certificates to access several Cisco services. The system now automatically queries Cisco for new CA certificates at a daily system-defined time. Previously, you had to upgrade the software to update CA certificates. You can use the CLI to disable this feature.
	New/modified CLI commands: configure cert-update auto-update, configure cert-update run-now, configure cert-update test, show cert-update
	Version restrictions: This feature is included in Versions 7.0.5+, 7.1.0.3+, and 7.2.4+. It is not supported in earlier 7.0, 7.1, or 7.2 releases. If you upgrade from a supported version to an unsupported version, the feature is temporarily disabled and the system stops contacting Cisco.
	See: Cisco Secure Firewall Threat Defense Command Reference

Feature	Description
FTD REST API version 6.1 (v6).	The Firepower Threat Defense REST API for software version 7.0 is version 6.1 You can use v6 in the API URLs, or preferentially, use /latest/ to signify you are using the most recent API version that is supported on the device. Note that the URL version path element for 6.1 is the same as 6.0: v6.
	Please re-evaluate all existing calls, as changes might have been mode to the resource models you are using. To open the API Explorer, where you can view the resources, log into FDM, then click the more options button ( * ) and choose <b>API Explorer</b> .

# **Upgrade Guidelines**

This document provides critical and release-specific upgrade guidelines for Version 7.0.

- Planning Your Upgrade, on page 41
- Minimum Version to Upgrade, on page 42
- Upgrade Guidelines for Version 7.0, on page 43
- Upgrade Guidelines for Cloud-delivered Firewall Management Center, on page 53
- Upgrade Guidelines for the Firepower 4100/9300 Chassis, on page 53
- Unresponsive Upgrades, on page 53
- Revert or Uninstall the Upgrade, on page 54
- Traffic Flow and Inspection, on page 56
- Time and Disk Space, on page 61

# **Planning Your Upgrade**

Careful planning and preparation can help you avoid missteps. This table summarizes the upgrade planning process. For detailed checklists and procedures, see the appropriate upgrade or configuration guide: http://www.cisco.com/go/threatdefense-70-docs.

Table 16: Upgrade Planning Phases

Planning Phase	Includes
Planning and Feasibility	Assess your deployment.
	Plan your upgrade path.
	Read all upgrade guidelines and plan configuration changes.
	Check appliance access.
	Check bandwidth.
	Schedule maintenance windows.
Backups	Back up configurations and events.
	Back up FXOS on the Firepower 4100/9300.
	Back up ASA for ASA FirePOWER.

Planning Phase	Includes
Upgrade Packages	Download upgrade packages from Cisco.
	Upload upgrade packages to the system.
Associated Upgrades	Upgrade virtual hosting in virtual deployments.
	Upgrade firmware on the Firepower 4100/9300.
	Upgrade FXOS on the Firepower 4100/9300.
	Upgrade ASA for ASA FirePOWER.
Final Checks	Check configurations.
	Check NTP synchronization.
	Deploy configurations.
	Run readiness checks.
	Check disk space.
	Check running tasks.
	Check deployment health and communications.

# **Minimum Version to Upgrade**

#### **Minimum Version to Upgrade**

You can upgrade directly to Version 7.0, including maintenance releases, as follows.

Table 17: Minimum Version to Upgrade to Version 7.0

Platform	Minimum Version
FMC	6.4
FTD	FXOS 2.10.1.159 is required for the Firepower 4100/9300. In most cases, we recommend you use the latest FXOS build in each major version. To help you decide, see the Cisco Firepower 4100/9300 FXOS Release Notes, 2.10(1).
ASA with FirePOWER Services	6.4 See Device Platforms, on page 8 for ASA requirements for your model. Although there is wide compatibility between ASA and ASA FirePOWER versions, upgrading allows you to take advantage of new features and resolved issues. To help you decide, see the Cisco Secure Firewall ASA Release Notes.
NGIPSv	6.4

#### **Minimum Version to Patch**

Patches change the fourth digit *only*. You cannot upgrade directly to a patch from a previous major or maintenance release.

# **Upgrade Guidelines for Version 7.0**

These checklists provide new and/or previously published upgrade guidelines that may apply to you.

Table 18: Upgrade Guidelines for FTD with FMC Version 7.0

	Firepower 1000 Series Devices Require Post-Upgrade Power Cycle, on page 46	Firepower 1000 series	6.4.0.x	6.5+
	Historical Data Removed During FTD Upgrade with FDM, on page 47	Any	6.2.3 through 6.4.0.x	6.5+
	New URL Categories and Reputations, on page 47	Any	6.2.3 through 6.4.0.x	6.5+

# **Upgrade Prohibited: Version 7.0.4+ to Version 7.1.0**

**Deployments:** Any

**Upgrading from:** Version 7.0.4 or later maintenance release

**Directly to:** Version 7.1.0 only

Due to datastore incompatibilities, you cannot upgrade from Version 7.0.4+ to Version 7.1.0. We recommend you upgrade directly to Version 7.2+.

### Reconnect with Cisco Threat Grid for High Availability FMCs

**Deployments:** High availability/AMP for Networks (malware detection) deployments where you submit files for dynamic analysis

**Upgrading from:** Version 6.4.0 through 6.7.x

**Directly to:** Version 7.0.0+ **Related bug:** CSCvu35704

Version 7.0.0 fixes an issue with high availability where, after failover, the system stopped submitting files for dynamic analysis. For the fix to take effect, you must reassociate with the Cisco Threat Grid public cloud.

After you upgrade the high availability pair, on the primary FMC:

- 1. Choose AMP > Dynamic Analysis Connections.
- 2. Click **Associate** in the table row corresponding to the public cloud.

A portal window opens. You do not have to sign in. The reassociation happens in the background, within a few minutes.

### **Upgrade Failure: Firepower 1010 Switch Ports with Invalid VLAN IDs**

**Deployments:** Firepower 1010

**Upgrading from:** Version 6.4 through 6.6

**Directly to:** Version 6.7+

For the Firepower 1010, FTD upgrades to Version 6.7+ will fail if you configured switch ports with a VLAN ID in the 3968–4047 range. These IDs are for internal use only.

### FMCv Requires 28 GB RAM for Upgrade

**Deployments:** FMCv

**Upgrading from:** Version 6.2.3 through 6.5

**Directly to:** Version 6.6+

All FMCv implementations now have the same RAM requirements: 32 GB recommended, 28 GB required (64 GB for FMCv 300). Upgrades to Version 6.6+ will fail if you allocate less than 28 GB to the virtual appliance. After upgrade, the health monitor will alert if you lower the memory allocation.

These new memory requirements enforce uniform requirements across all virtual environments, improve performance, and allow you to take advantage of new features and functionality. We recommend you do not decrease the default settings. To improve performance, you can increase a virtual appliance's memory and number of CPUs, depending on your available resources. For details, see the Cisco Secure Firewall Management Center Virtual Getting Started Guide.

Note

As of the Version 6.6.0 release, lower-memory instance types for cloud-based FMCv deployments (AWS, Azure) are fully deprecated. You cannot create new instances using them, even for earlier versions. You can continue running existing instances.

This table summarizes pre-upgrade requirements for lower-memory deployments.

Table 20: FMCv Memory Requirements for Version 6.6+ Upgrades

Platform	Pre-Upgrade Action	Details
VMware	Allocate 28 GB minimum/32 GB recommended.	Power off the virtual machine first.  For instructions, see the VMware documentation.
KVM	Allocate 28 GB minimum/32 GB recommended.	For instructions, see the documentation for your KVM environment.
AWS	Resize instances:  • From c3.xlarge to c3.4xlarge.  • From c3.2.xlarge to c3.4xlarge.  • From c4.xlarge to c4.4xlarge.  • From c4.2xlarge to c4.4xlarge.  We also offer a c5.4xlarge instance for new deployments.	Stop the instance before you resize. Note that when you do this, data on the instance store volume is lost, so migrate your instance store-backed instance first. Additionally, if your management interface does not have an Elastic IP address, its public IP address is released. For instructions, see the documentation on changing your instance type in the AWS user guide for Linux instances.
Azure	Resize instances:  • From Standard_D3_v2 to Standard_D4_v2.	Use the Azure portal or PowerShell. You do not need to stop the instance before you resize, but stopping may reveal additional sizes. Resizing restarts a running virtual machine.  For instructions, see the Azure documentation on resizing a Windows VM.

### Firepower 1000 Series Devices Require Post-Upgrade Power Cycle

**Deployments:** Firepower 1000 series

**Upgrading from:** Version 6.4.0.x

**Directly to:** Version 6.5.0+

Version 6.5.0 introduces an FXOS CLI 'secure erase' feature for Firepower 1000/2100 and Firepower 4100/9300

series devices.

For Firepower 1000 series devices, you must power cycle the device after you upgrade to Version 6.5.0+ for this feature to work properly. The automatic reboot is not sufficient. Other supported devices do not require the power cycle.

### **Historical Data Removed During FTD Upgrade with FDM**

**Deployments:** FTD with FDM

**Upgrading from:** Version 6.2.3 through 6.4.0.x

Directly to: 6.5.0+

All historical report data is removed during the upgrade due to a database schema change. After the upgrade, you cannot query historical data, nor view historical data in dashboards.

### **New URL Categories and Reputations**

**Deployments:** Any

**Upgrading from:** Version 6.2.3 through 6.4.0.x

**Directly to:** Version 6.5.0+

Talos Intelligence Group has introduced new categories and renamed reputations to classify and filter URLs. For detailed lists of category changes, see the Cisco Firepower Release Notes, Version 6.5.0. For descriptions of the new URL categories, see the Talos Intelligence Categories site.

Also new are the concepts of uncategorized and reputationless URLs, although rule configuration options stay the same:

• Uncategorized URLs can have a Questionable, Neutral, Favorable, or Trusted reputation.

You can filter **Uncategorized** URLs but you cannot further constrain by reputation. These rules will match all uncategorized URLs, regardless of reputation.

Note that there is no such thing as an Untrusted rule with no category. Otherwise uncategorized URLs with an Untrusted reputation are automatically assigned to the new Malicious Sites threat category.

• Reputationless URLs can belong to any category.

You cannot filter reputationless URLs. There is no option in the rule editor for 'no reputation.' However, you can filter URLs with **Any** reputation, which includes reputationless URLs. These URLs must also be constrained by category. There is no utility to an Any/Any rule.

The following table summarizes the changes on upgrade. Although they are designed for minimal impact and will not prevent post-upgrade deploy for most customers, we *strongly* recommend you review these release notes and your current URL filtering configuration. Careful planning and preparation can help you avoid missteps, as well as reduce the time you spend troubleshooting post-upgrade.

Table 21: Deployment Changes on Upgrade

Change	Details	
Modifies URL rule categories.	The upgrade modifies URL rules to use the nearest equivalents in the new category set, in the following policies:	
	Access control	
	• SSL	
	• QoS (FMC only)	
	Correlation (FMC only)	
	These changes may create redundant or preempted rules, which can slow performance. If your configuration includes merged categories, you may experience minor changes to the URLs that are allowed or blocked.	
Renames URL rule	The upgrade modifies URL rules to use the new reputation names:	
reputations.	1. Untrusted (was High Risk)	
	2. Questionable (was Suspicious sites)	
	3. Neutral (was Benign sites with security risks)	
	<b>4.</b> Favorable (was <i>Benign sites</i> )	
	5. Trusted (was Well Known)	
Clears the URL cache.	The upgrade clears the URL cache, which contains results that the system previously looked up in the cloud. Your users may temporarily experience slightly longer access times for URLs that are not in the local data set.	
Labels 'legacy' events.	For already-logged events, the upgrade labels any associated URL category and reputation information as Legacy. These legacy events will age out of the database over time.	

### **Pre-Upgrade Actions for URL Categories and Reputations**

Before upgrade, take the following actions.

Table 22: Pre-Upgrade Actions

Action	Details	
Make sure your appliances can reach	The system must be able to communicate with the following Cisco resources after the upgrade:	
Talos resources.	• https://regsvc.sco.cisco.com/ — Registration	
	• https://est.sco.cisco.com/ — Obtain certificates for secure communications	
	• https://updates-talos.sco.cisco.com/ — Obtain client/server manifests	
	• http://updates.ironport.com/ — Download database (note: uses port 80)	
	• https://v3.sds.cisco.com/ — Cloud queries	
	The cloud query service also uses the following IP address blocks:	
	• IPv4 cloud queries:	
	• 146.112.62.0/24	
	• 146.112.63.0/24	
	• 146.112.255.0/24	
	• 146.112.59.0/24	
	• IPv6 cloud queries:	
	• 2a04:e4c7:fffff::/48	
	• 2a04:e4c7:fffe::/48	
Identify potential rule issues.	Understand the upcoming changes. Examine your current URL filtering configuration and determine what post-upgrade actions you will need to take (see the next section).	
	Note You may want to modify URL rules that use deprecated categories now. Otherwise, rules that use them will prevent deploy after the upgrade.	
	In FMC deployments, we recommend you generate an <i>access control policy report</i> , which provides details on the policy's current saved configuration, including access control rules and rules in subordinate policies (such as SSL). For each URL rule, you can see the current categories, reputations, and associated rule actions. On the FMC, choose <b>Policies</b> > <b>Access Control</b> , then click the report icon ( next to the appropriate policy.	

### Post-Upgrade Actions for URL Categories and Reputations

After upgrade, you should reexamine your URL filtering configuration and take the following actions as soon as possible. Depending on deployment type and the changes made by the upgrade, some — but not all — issues may be marked in the GUI. For example, in access control policies on FMC/FDM, you can click **Show Warnings** (FMC) or **Show Problem Rules** (FDM).

Table 23: Post-Upgrade Actions

Action	Details	
Remove <b>deprecated categories</b> from rules. Required.	The upgrade does not modify URL rules that use deprecated categories. Rules that use them will prevent deploy.	
	On the FMC, these rules are marked.	
Create or modify rules to include the <b>new categories</b> .	Most of the new categories identify threats. We strongly recommend you use them.	
	On the FMC, these new categories are not marked after <i>this</i> upgrade, but Talos may add additional categories in the future. When that happens, new categories are marked.	
Evaluate rules changed as a result of <b>merged categories</b> .	Each rule that included any of the affected categories now include all of the affected categories. If the original categories were associated with different reputations, the new rule is associated with the broader, more inclusive reputation. To filter URLs as before, you may have to modify or delete some configurations; see Guidelines for Rules with Merged URL Categories, on page 50.	
	Depending on what changed and how your platform handles rule warnings, changes may be marked. For example, the FMC marks wholly redundant and wholly preempted rules, but not rules that have partial overlap.	
Evaluate rules changed as a result of <b>split categories</b> .	The upgrade replaces each old, single category in URL rules with <i>all</i> the new categories that map to the old one. This will not change the way you filter URLs, but you can modify affected rules to take advantage of the new granularity.	
	These changes are not marked.	
Understand which categories were <b>renamed</b> or are <b>unchanged</b> .	Although no action is required, you should be aware of these changes.  These changes are not marked.	
Evaluate how you handle uncategorized and reputationless URLs.	Even though it is now possible to have uncategorized and reputationless URLs, you cannot still cannot filter uncategorized URLs by reputation, nor can you filter reputationless URLs.	
	Make sure that rules that filter by the <b>Uncategorized</b> category, or by <b>Any</b> reputation, will behave as you expect.	

### **Guidelines for Rules with Merged URL Categories**

When you examine your URL filtering configuration before the upgrade, determine which of the following scenarios and guidelines apply to you. This will ensure that your post-upgrade configuration is as you expect, and that you can take quick action to resolve any issues.

Table 24: Guidelines for Rules with Merged URL Categories

Guideline	Details
Rule Order Determines Which Rule Matches Traffic	When considering rules that include the same category, remember that traffic matches the first rule in the list that includes the condition.
Categories in the Same Rule vs Categories in Different Rules	Merging categories in a single rule will merge into a single category in the rule. For example, if Category A and Category B are merging to become Category AB, and you have a rule with both Category A and Category B, then after merge the rule will have a single Category AB.
	Merging categories in different rules will result in separate rules with the same category in each rule after the merge. For example, if Category A and Category B are merging to become Category AB, and you have Rule 1 with Category A and Rule 2 with Category B, then after merge Rule 1 and Rule 2 will each include Category AB. How you choose to resolve this situation depends on the rule order, on the actions and reputation levels associated with the rules, on the other URL categories included in the rule, and on the non-URL conditions that are included in the rule.
Associated Action	If merged categories in different rules were associated with different actions, then after merge you may have two or more rules with different actions for the same category.
Associated Reputation Level	If a single rule includes categories that were associated with different reputation levels before merging, the merged category will be associated with the more inclusive reputation level. For example, if Category A was associated in a particular rule with <b>Any reputation</b> and Category B was associated in the same rule with reputation level <b>3 - Benign sites with security risks</b> , then after merge Category AB in that rule will be associated with <b>Any reputation</b> .
Duplicate and Redundant Categories and Rules	After merge, different rules may have the same category associated with different actions and reputation levels.
	Redundant rules may not be exact duplicates, but they may no longer match traffic if another rule earlier in the rule order matches instead. For example, if you have pre-merge Rule 1 with Category A that applies to Any Reputation, and Rule 2 with Category B that applies only to Reputation 1-3, then after merge, both Rule 1 and Rule 2 will have Category AB, but Rule 2 will never match if Rule 1 is higher in the rule order.
	On the FMC, rules with an identical category and reputation will show a warning. However, these warnings will not indicate rules that include the same category but a different reputation.
	Caution: Consider all conditions in the rule when determining how to resolve duplicate or redundant categories.
Other URL Categories in a Rule	Rules with merged URLs may also include other URL categories. Therefore, if a particular category is duplicated after merge, you may want to modify rather than delete these rules.

Guideline	Details
Non-URL Conditions in a Rule	Rules with merged URL categories may also include other rule conditions, such as application conditions. Therefore, if a particular category is duplicated after merge, you may want to modify rather than delete these rules.

The examples in the following table use Category A and Category B, now merged into Category AB. In two-rule examples, Rule 1 comes before Rule 2.

Table 25: Examples of Rules with Merged URL Categories

Scenario	Before Upgrade	After Upgrade
Merged categories in the same rule	Rule 1 has Category A and Category B.	Rule 1 has Category AB.
Merged categories	Rule 1 has Category A.	Rule 1 has Category AB.
in different rules	Rule 2 has Category B.	Rule 2 has Category AB.
		The specific result varies by the rules' order in the list, reputation levels, and associated actions. You should also consider all other conditions in the rule when determining how to resolve any redundancy.
Merged categories	Rule 1 has Category A set to Allow.	Rule 1 has Category AB set to Allow.
in different rules have different	Rule 2 has Category B set to Block.	Rule 2 has Category AB set to Block.
actions (Reputation is the	(Reputation is the same)	Rule 1 will match all traffic for this category.
same)		Rule 2 will never match traffic, and will display a warning indicator if you show warnings after merge, because both category and reputation are the same.
Merged categories	Rule 1 includes:	Rule 1 includes Category AB with
in the same rule have different	Category A with Reputation Any	Reputation Any.
reputation levels	Category B with Reputation 1-3	
Merged categories in different rules	Rule 1 includes Category A with Reputation Any.	Rule 1 includes Category AB with Reputation Any.
have different reputation levels	Rule 2 includes Category B with Reputation 1-3.	Rule 2 includes Category AB with Reputation 1-3.
		Rule 1 will match all traffic for this category.
		Rule 2 will never match traffic, but you will not see a warning indicator because the reputations are not identical.

# Upgrade Guidelines for Cloud-delivered Firewall Management Center

You do not upgrade the cloud-delivered Firewall Management Center. We take care of feature updates. To upgrade FTD with the cloud-delivered Firewall Management Center, see the Cisco Secure Firewall Threat Defense Upgrade Guide for Cloud-Delivered Firewall Management Center.

# **Upgrade Guidelines for the Firepower 4100/9300 Chassis**

For the Firepower 4100/9300, major FTD upgrades also require a chassis upgrade (FXOS and firmware). Maintenance release and patches rarely require this, but you may still want to upgrade to the latest build to take advantage of resolved issues.

Table 26: Upgrade Guidelines for the Firepower 4100/9300 Chassis

Guideline	Details
FXOS upgrades.	FXOS 2.10.1.159+ is required to run threat defense Version 7.0 on the Firepower $4100/9300$ .
	You can upgrade to any later FXOS version from as far back as FXOS 2.2.2. For critical and release-specific upgrade guidelines, new and deprecated features, and open and resolved bugs, see the Cisco Firepower 4100/9300 FXOS Release Notes.
Firmware upgrades.	FXOS 2.14.1+ upgrades include firmware. If you are upgrading to an earlier FXOS version, see the Cisco Firepower 4100/9300 FXOS Firmware Upgrade Guide.
Time to upgrade.	Chassis upgrade can take up to 45 minutes and can affect traffic flow and inspection. For more information, see Traffic Flow and Inspection for Chassis Upgrades, on page 57.

# **Unresponsive Upgrades**

Do not make or deploy configuration changes during upgrade. Even if the system appears inactive, do not manually reboot or shut down during upgrade. You could place the system in an unusable state and require a reimage.

#### Unresponsive FMC or Classic Device Upgrade

Do not restart an upgrade in progress. If you encounter issues with the upgrade, including a failed upgrade or unresponsive appliance, contact Cisco TAC.

#### **Unresponsive FTD Upgrade**

For major and maintenance upgrades, you can manually cancel failed or in-progress upgrades, and retry failed upgrades:

- FMC: Use the Upgrade Status pop-up, accessible from the Upgrade tab on the Device Management page, and from the Message Center.
- FDM: Use the System Upgrade panel.

You can also use the FTD CLI.

Note

By default, FTD automatically reverts to its pre-upgrade state upon upgrade failure ("auto-cancel"). To be able to manually cancel or retry a failed upgrade, disable the auto-cancel option when you initiate the upgrade. Auto-cancel is not supported for patches. In a high availability/scalability deployment, auto-cancel applies to each device individually. That is, if the upgrade fails on one device, only that device is reverted.

This feature is not supported for patches or for upgrades from Version 6.6 and earlier.

# **Revert or Uninstall the Upgrade**

If an upgrade succeeds but the system does not function to your expectations, you may be able to revert or uninstall:

- Revert is supported for major and maintenance upgrades to FTD with FDM.
- See System Management in the FDM configuration guide.
- Uninstall is supported for most patches in FMC and ASDM deployments.

See Uninstall a Patch in the FMC upgrade guide, or Uninstall ASA FirePOWER Patches with ASDM, on page 54 in these release notes.

If this will not work for you and you still need to return to an earlier version, you must reimage.

### **Uninstall ASA FirePOWER Patches with ASDM**

Use the Linux shell (*expert mode*) to uninstall device patches. You must have access to the device shell as the admin user for the device, or as another local user with CLI configuration access. If you disabled shell access, contact Cisco TAC to reverse the lockdown.

For ASA failover pairs and clusters, minimize disruption by uninstalling from one appliance at a time. Wait until the patch has fully uninstalled from one unit before you move on to the next.

Table 27: Uninstall Order for ASA with FirePOWER Services in ASA Failover Pairs/Clusters

Configuration	Uninstall Order
ASA active/standby failover pair, with ASA	Always uninstall from the standby.
FirePOWER	1. Uninstall from the ASA FirePOWER module on the standby ASA device.
	2. Fail over.
	3. Uninstall from the ASA FirePOWER module on the new standby ASA device.
	Make both failover groups active on the unit you are not uninstalling.
pair, with ASA FirePOWER	1. Make both failover groups active on the primary ASA device.
	2. Uninstall from the ASA FirePOWER module on the secondary ASA device.
	3. Make both failover groups active on the secondary ASA device.
	<b>4.</b> Uninstall from the ASA FirePOWER module on the primary ASA device.
ASA cluster, with ASA FirePOWER	Disable clustering on each unit before you uninstall. Uninstall from one unit at a time, leaving the control unit for last.
	1. On a data unit, disable clustering.
	2. Uninstall from the ASA FirePOWER module on that unit.
	3. Reenable clustering. Wait for the unit to rejoin the cluster.
	4. Repeat for each data unit.
	<b>5.</b> On the control unit, disable clustering. Wait for a new control unit to take over.
	<b>6.</b> Uninstall from the ASA FirePOWER module on the former control unit.
	7. Reenable clustering.

#### Caution

Do not make or deploy configuration changes during uninstall. Even if the system appears inactive, do not manually reboot, shut down, or restart an uninstall in progress. You could place the system in an unusable state and require a reimage. If you encounter issues with the uninstall, including a failed uninstall or unresponsive appliance, contact Cisco TAC.

#### Before you begin

- In ASA failover/cluster deployments, make sure you are uninstalling from the correct device.
- Make sure your deployment is healthy and successfully communicating.
- **Step 1** If the device's configurations are out of date, deploy now from ASDM.

Deploying before you uninstall reduces the chance of failure. Make sure the deployment and other essential tasks are completed. Tasks running when the uninstall begins are stopped, become failed tasks, and cannot be resumed. You can manually delete failed status messages later.

Step 2 Access the Firepower CLI on the ASA FirePOWER module. Log in as admin or another Firepower CLI user with configuration access.

You can either SSH to the module's management interface (hostname or IP address) or use the console. Note that the console port defaults to the ASA CLI and you must use the session sfr command to access the Firepower CLI.

- **Step 3** Use the expert command to access the Linux shell.
- **Step 4** Verify the uninstall package is in the upgrade directory.

ls /var/sf/updates

Patch uninstallers are named like upgrade packages, but have Patch\_Uninstaller instead of Patch in the file name. When you patch a device, the uninstaller for that patch is automatically created in the upgrade directory. If the uninstaller is not there, contact Cisco TAC.

**Step 5** Run the uninstall command, entering your password when prompted.

sudo install update.pl --detach /var/sf/updates/uninstaller name

**Caution** The system does *not* ask you to confirm. Entering this command starts the uninstall, which includes a device reboot. Interruptions in traffic flow and inspection during an uninstall are the same as the interruptions that occur during an upgrade. Make sure you are ready. Note that using the --detach option ensures the uninstall process is not killed if your SSH session times out, which can leave the device in an unstable state.

**Step 6** Monitor the uninstall until you are logged out.

For a detached uninstall, use tail or tailf to display logs:

tail /ngfw/var/log/sf/update.status

Otherwise, monitor progress in the console or terminal.

**Step 7** Verify uninstall success.

After the uninstall completes, confirm that the module has the correct software version. Choose **Configuration > ASA FirePOWER Configurations > Device Management > Device**.

**Step 8** Redeploy configurations.

#### What to do next

In ASA failover/cluster deployments, repeat this procedure for each unit in your planned sequence.

# **Traffic Flow and Inspection**

Device upgrades (software and operating system) affect traffic flow and inspection. Schedule maintenance windows when this will have the least impact.

# **Traffic Flow and Inspection for Chassis Upgrades**

Upgrading FXOS reboots the chassis. For FXOS upgrades to Version 2.14.1+ that include firmware upgrades, the device reboots twice—once for FXOS and once for the firmware.

Even in high availability/clustered deployments, you upgrade FXOS on each chassis independently. To minimize disruption, upgrade one chassis at a time.

Table 28: Traffic Flow and Inspection: FXOS Upgrades

FTD Deployment	Traffic Behavior	Method
Standalone	Dropped.	_
High availability	Unaffected.	<b>Best Practice:</b> Update FXOS on the standby, switch active peers, upgrade the new standby.
	Dropped until one peer is online.	Upgrade FXOS on the active peer before the standby is finished upgrading.
Inter-chassis cluster	Unaffected.	<b>Best Practice:</b> Upgrade one chassis at a time so at least one module is always online.
	Dropped until at least one module is online.	Upgrade chassis at the same time, so all modules are down at some point.
Intra-chassis cluster (Firepower 9300	Passed without inspection.	Hardware bypass enabled: Bypass: Standby or Bypass-Force.
only)	Dropped until at least one module is online.	Hardware bypass disabled: <b>Bypass: Disabled</b> .
	Dropped until at least one module is online.	No hardware bypass module.

# Traffic Flow and Inspection for FTD Upgrades with FMC

#### **Software Upgrades for Standalone Devices**

Devices operate in maintenance mode while they upgrade. Entering maintenance mode at the beginning of the upgrade causes a 2-3 second interruption in traffic inspection. Interface configurations determine how a standalone device handles traffic both then and during the upgrade.

Table 29: Traffic Flow and Inspection: Software Upgrades for Standalone Devices

Interface Configuration		Traffic Behavior
Firewall interfaces	Routed or switched including EtherChannel, redundant, subinterfaces. Switched interfaces are also known as bridge group or transparent interfaces.	Dropped.  For bridge group interfaces on the ISA 3000 only, you can use a FlexConfig policy to configure hardware bypass for power failure. This causes traffic to drop during software upgrades but pass without inspection while the device completes its post-upgrade reboot.
IPS-only interfaces	Inline set, hardware bypass force-enabled: <b>Bypass: Force</b>	Passed without inspection until you either disable hardware bypass, or set it back to standby mode.
	Inline set, hardware bypass standby mode: <b>Bypass: Standby</b>	Dropped during the upgrade, while the device is in maintenance mode. Then, passed without inspection while the device completes its post-upgrade reboot.
	Inline set, hardware bypass disabled:  Bypass: Disabled	Dropped.
	Inline set, no hardware bypass module.	Dropped.
	Inline set, tap mode.	Egress packet immediately, copy not inspected.
	Passive, ERSPAN passive.	Uninterrupted, not inspected.

#### Software Upgrades for High Availability/Scalability

You should not experience interruptions in traffic flow or inspection while upgrading high availability or clustered devices. For high availability pairs, the standby device upgrades first. The devices switch roles, then the new standby upgrades.

For clusters, the data security module or modules upgrade first, then the control module. During the control security module upgrade, although traffic inspection and handling continues normally, the system stops logging events. Events for traffic processed during the logging downtime appear with out-of-sync timestamps after the upgrade is completed. However, if the logging downtime is significant, the system may prune the oldest events before they can be logged.

#### **Software Uninstall (Patches)**

For standalone devices, interruptions to traffic flow and inspection during patch uninstall are the same as for upgrade. In high availability/scalability deployments, you must explicitly plan an uninstall order that minimizes disruption. This is because you uninstall patches from devices individually, even those that you upgraded as a unit.

#### **Deploying Configuration Changes**

Restarting the Snort process briefly interrupts traffic flow and inspection on all devices, including those configured for high availability/scalability. Interface configurations determine whether traffic drops or passes without inspection during the interruption. When you deploy without restarting Snort, resource demands may result in a small number of packets dropping without inspection.

Snort typically restarts during the first deployment immediately after the upgrade. It does not restart during other deployments unless, before deploying, you modify specific policy or device configurations.

Table 30: Traffic Flow and Inspection: Deploying Configuration Changes

Interface Configuration		Traffic Behavior
Firewall interfaces	Routed or switched including EtherChannel, redundant, subinterfaces. Switched interfaces are also known as bridge group or transparent interfaces.	Dropped.
IPS-only interfaces	Inline set, <b>Failsafe</b> enabled or disabled.	Passed without inspection.  A few packets might drop if <b>Failsafe</b> is disabled and Snort is busy but not down.
	Inline set, Snort Fail Open: Down: disabled.	Dropped.
	Inline set, Snort Fail Open: Down: enabled.	Passed without inspection.
	Inline set, tap mode.	Egress packet immediately, copy not inspected.
	Passive, ERSPAN passive.	Uninterrupted, not inspected.

### Traffic Flow and Inspection for FTD Upgrades with FDM

#### **Software Upgrades**

Traffic is dropped while you upgrade. In a high availability deployment, you can minimize disruption by upgrading devices one at a time.

For the ISA 3000 only, if you configured hardware bypass for power failure, traffic is dropped during the upgrade but is passed without inspection while the device completes its post-upgrade reboot.

#### Software Revert (Major/Maintenance Releases)

Traffic is dropped while you revert. In a high availability deployment, revert is more successful when you revert both units simultaneously. Traffic flow and inspection resume when the first unit comes back online.

#### **Deploying Configuration Changes**

Restarting the Snort process briefly interrupts traffic flow and inspection on all devices, including those configured for high availability. When you deploy without restarting Snort, resource demands may result in a small number of packets dropping without inspection.

Snort typically restarts during the first deployment immediately after the upgrade. It does not restart during other deployments unless, before deploying, you modify specific policy or device configurations.

# Traffic Flow and Inspection for ASA FirePOWER Upgrades

#### **Software Upgrades**

Your ASA service policies for redirecting traffic to the ASA FirePOWER module determine how the module handles traffic during software upgrade.

Table 31: Traffic Flow and Inspection: ASA FirePOWER Upgrades

Traffic Redirection Policy	Traffic Behavior
Fail open (sfr fail-open)	Passed without inspection
Fail closed (sfr fail-close)	Dropped
Monitor only (sfr {fail-close} {fail-open} monitor-only)	Egress packet immediately, copy not inspected

#### **Software Uninstall (Patches)**

Interruptions to traffic flow and inspection during patch uninstall are the same as for upgrade. In ASA failover/cluster deployments, you must explicitly plan an uninstall order that minimizes disruption. This is because you uninstall patches from devices individually, even those that you upgraded as a unit.

#### **Deploying Configuration Changes**

Restarting the Snort process briefly interrupts traffic flow and inspection. Traffic behavior while the Snort process restarts is the same as when you upgrade ASA FirePOWER. When you deploy without restarting Snort, resource demands may result in a small number of packets dropping without inspection.

Snort typically restarts during the first deployment immediately after the upgrade. It does not restart during other deployments unless, before deploying, you modify specific policy or device configurations.

### Traffic Flow and Inspection for NGIPSv Upgrades with FMC

#### **Software Upgrades**

Interface configurations determine how NGIPSv handles traffic during the upgrade.

Table 32: Traffic Flow and Inspection: NGIPSv Upgrades

Interface Configuration	Traffic Behavior
Inline	Dropped.
Inline, tap mode	Egress packet immediately, copy not inspected.
Passive	Uninterrupted, not inspected.

#### **Software Uninstall (Patches)**

Interruptions to traffic flow and inspection during patch uninstall are the same as for upgrade.

#### **Deploying Configuration Changes**

Restarting the Snort process briefly interrupts traffic flow and inspection. Interface configurations determine whether traffic drops or passes without inspection during the interruption. When you deploy without restarting Snort, resource demands may result in a small number of packets dropping without inspection.

Snort typically restarts during the first deployment immediately after the upgrade. It does not restart during other deployments unless, before deploying, you modify specific policy or device configurations.

Table 33: Traffic Flow and Inspection: Deploying Configuration Changes

Interface Configuration	Traffic Behavior
Inline, Failsafe enabled or disabled	Passed without inspection.
	A few packets might drop if <b>Failsafe</b> is disabled and Snort is busy but not down.
Inline, tap mode	Egress packet immediately, copy bypasses Snort
Passive	Uninterrupted, not inspected.

# **Time and Disk Space**

#### Time to Upgrade

We recommend you track and record your own upgrade times so you can use them as future benchmarks. The following table lists some things that can affect upgrade time.

#### Caution

Do not make or deploy configuration changes during upgrade. Even if the system appears inactive, do not manually reboot or shut down. In most cases, do not restart an upgrade in progress. You could place the system in an unusable state and require a reimage. If you encounter issues with the upgrade, including a failed upgrade or unresponsive appliance, you can find troubleshooting information in the upgrade guide: <a href="https://www.cisco.com/go/ftd-upgrade">https://www.cisco.com/go/ftd-upgrade</a>. If you continue to have issues, contact Cisco TAC.

**Table 34: Upgrade Time Considerations** 

Consideration	Details
Versions	Upgrade time usually increases if your upgrade skips versions.
Models	Upgrade time usually increases with lower-end models.
Virtual appliances	Upgrade time in virtual deployments is highly hardware dependent.
High availability and clustering	In a high availability or clustered configuration, devices upgrade one at a time to preserve continuity of operations, with each device operating in maintenance mode while it upgrades. Upgrading a device pair or entire cluster, therefore, takes longer than upgrading a standalone device.
Configurations	Upgrade time can increase with the complexity of your configurations, size of event databases, and whether/how they are affected by the upgrade. For example, if you use a lot of access control rules and the upgrade needs to make a backend change to how those rules are stored, the upgrade can take longer.
Components	You may need additional time to perform operating system or virtual hosting upgrades, upgrade package transfers, readiness checks, VDB and intrusion rule (SRU/LSP) updates, configuration deployment, and other related tasks.

#### **Disk Space to Upgrade**

To upgrade, the upgrade package must be on the appliance. For device upgrades with management center, you must also have enough space on the management center (in either /Volume or /var) for the device upgrade package. Or, you can use an internal server to store them. Readiness checks should indicate whether you have enough disk space to perform the upgrade. Without enough free disk space, the upgrade fails.

Table 35: Checking Disk Space

Platform	Command
Management center	Choose <b>System</b> (*) > <b>Monitoring</b> > <b>Statistics</b> and select the FMC.  Under Disk Usage, expand the By Partition details.
Threat defense with management center	Choose <b>System</b> (*) > <b>Monitoring</b> > <b>Statistics</b> and select the device you want to check.  Under Disk Usage, expand the By Partition details.
Threat defense with device manager	Use the <b>show disk</b> CLI command.

# **Install the Software**

If you cannot or do not want to upgrade to Version 7.0, you can freshly install major and maintenance releases. This is also called *reimaging*. We do not provide installation packages for patches. To run a particular patch, install the appropriate major or maintenance release, then apply the patch.

- Installation Guidelines, on page 63
- Installation Guides, on page 65

# **Installation Guidelines**

These guidelines can prevent common reimage issues, but are not comprehensive. For detailed checklists and procedures, see the appropriate installation guide.

#### **Backups**

Before you reimage, we *strongly* recommend you back up to a secure remote location and verify transfer success. Reimaging returns most settings to factory defaults, including the system password. It deletes any backups left on the appliance.

Note

If you want to reimage so that you don't have to upgrade, due to version restrictions you cannot use a backup to import your old configurations. You must recreate your configurations manually.

#### **Appliance Access**

If you do not have physical access to an appliance, reimaging to the current major or maintenance release lets you keep management network settings. This allows you to connect to the appliance after you reimage to perform the initial configuration. Note that if you delete network settings or if you reimage to an earlier release, you must have physical access to the appliance. You cannot use Lights-Out Management (LOM).

For devices, make sure traffic from your location does not have to traverse the device itself to access the device's management interface. In FMC deployments, you should also able to access the FMC's management interface without traversing the device.

#### **Unregistering from Smart Software Manager**

Before you reimage any appliance or switch device management, you may need to unregister from the Cisco Smart Software Manager (CSSM). This is to avoid accruing orphan entitlements, which can prevent you from reregistering.

Unregistering removes an appliance from your virtual account, unregisters it from the cloud and cloud services, and releases associated licenses so they can be can be reassigned. When you unregister an appliance, it enters Enforcement mode. Its current configuration and policies continue to work as-is, but you cannot make or deploy any changes.

If you plan to restore from backup, do not unregister before you reimage and do not remove devices from the FMC. Instead, manually revert any licensing changes made since you took the backup. After the restore completes, reconfigure licensing. If you notice licensing conflicts or orphan entitlements, contact Cisco TAC.

Table 36: Scenarios for Unregistering from CSSM (Not Restoring from Backup)

Scenario	Action
Reimage the FMC.	Unregister manually.
Model migration for the FMC.	Unregister manually, before you shut down the source FMC.
Reimage FTD with FMC.	Unregister automatically, by removing the device from the FMC.
Reimage FTD with FDM.	Unregister manually.
Switch FTD from FMC to FDM.	Unregister automatically, by removing the device from the FMC.
Switch FTD from device manager to FMC.	Unregister manually.

#### **Removing Devices from the FMC**

In FMC deployments, if you plan to manually configure the reimaged appliance, remove devices from the FMC before you reimage either. If you plan to restore from backup, you do not need to do this.

Table 37: Scenarios for Removing Devices from the FMC (Not Restoring from Backup)

Scenario	Action
Reimage the FMC.	Remove all devices from management.
Reimage FTD.	Remove the one device from management.
Switch FTD from FMC to FDM.	Remove the one device from management.

#### Fully Reimaging FTD Hardware to Downgrade FXOS

For FTD hardware models that use the FXOS operating system, reimaging to an earlier software version may require a full reimage, regardless of whether FXOS is bundled with the software or upgraded separately.

**Table 38: Scenarios for Full Reimages** 

Model	Details
Firepower 1000 series Firepower 2100 series	If you use the <b>erase configuration</b> method to reimage, FXOS may not downgrade along with the software. This can cause failures, especially in high availability deployments. We recommend that you perform full reimages of these devices.
Firepower 4100/9300	Reverting FTD does not downgrade FXOS.  For the Firepower 4100/9300, major FTD versions have a specially qualified and
	recommended companion FXOS version. After you return to the earlier version of FTD, you may be running a non-recommended version of FXOS (too new).
	Although newer versions of FXOS are backwards compatible with older FTD versions, we do perform enhanced testing for the recommended combinations. You cannot manually downgrade FXOS, so if you find yourself in this situation and you want to run a recommended combination, you will need a full reimage.

### **Bugs**

For bugs in earlier releases, see the release notes for those versions. For cloud deployments, see the Cisco Cloud-Delivered Firewall Management Center Release Notes.

**Important** 

We do not list open bugs for maintenance releases or patches.

Bug lists are auto-generated once and may not be subsequently updated. If updated, the 'table last updated' date does not mean that the list was fully accurate on that date—only that some change was made. Depending on how and when a bug was categorized or updated in our system, it may not appear in the release notes. If you have a support contract, you can obtain up-to-date bug lists with the Cisco Bug Search Tool.

- Open Bugs, on page 67
- Resolved Bugs, on page 69

### **Open Bugs**

#### **Open Bugs in Version 7.0.0**

Table last updated: 2022-11-02

Table 40: Open Bugs in Version 7.0.0

Bug ID	Headline
CSCvr74863	CIP-Multiservice shows wrong service Attributes
CSCvx21050	Snort3 UDP performance down up to 50% relative to snort2
CSCvx25425	snort3 ssl - tickets from undecrypted sessions are not cached for subsequent policy decisions
CSCvx30175	Snort3 - SMTP closing TCP flags are not propagated correctly
CSCvx63788	Edit policy in new window for AC Policy default action IPS policy shows error pop-up
CSCvx64252	Event Search errors out when using FQDN object search for initiator

Bug ID	Headline
CSCvx67856	FTD7.0: Promethues process doesnt come up when system ungracefully rebooted
CSCvx89720	User-based access control rules for RA VPN users may not apply as expected after 7.0.0 upgrade
CSCvx96452	Some HTTP2 TLS traffic ends with TCP RST, not TCP FIN, after complete payload transmission
CSCvx96452	Snort3 - Connection events sporadically show Allow action for traffic hitting SSL Block with Reset
CSCvx99179	FDM-VMWARE: nikita-incremen core during upgrade from 6.5 or higher to 7.0/7.1
CSCvy02879	FDM ISA 3000 HA goes into active-active state
CSCvy07113	7.0.0-1459 :FTPs traffic(malware file) is not blocked with file policy config,specifi to QP platform
CSCvy13572	7.0 - Downgrade to LSP version used in 6.7 causes deployment failure
CSCvy19415	After switching FTD HA, (secondary,active) sends primary device name in syslog message
CSCvy26742	Deployment failure when 1k rules are uploaded on 7.0.0-62 KVM vFTD
CSCvy27261	Snort2 and Snort3 Events view need enhancements to provide more clarity
CSCvy31096	Host rediscovery in case of snort configuration reload
CSCvy32550	Correlation fiiltering on snort3 custom rule message fails because rule is not built with GID 2000
CSCvy35352	Error handling for Suppression settings needed in certain conditions
CSCvy38070	File/Malware Event Report fails when date is x-axis and count y-axis for table chart
CSCvy39840	SI TALOS feed updates are not synced to rule file
CSCvy43483	Snort Toggle sometimes takes longer time to toggle to Snort 2
CSCvy43740	vFDM ISA HA Security Intelligence feed update throws java.lang.NullPoin
CSCvy44701	Version 7.0 FMC online help for the Snort 3 HTTP/2 inspector contains incorrect content.
CSCvy48764	SSH access with public key authentication requires user password
CSCwa16654	Firepower release 7.0.x does not support ssl_state or ssl_version keywords for Snort 3

# **Resolved Bugs**

### **Resolved Bugs in Version 7.0.6.3**

Table last updated: 2024-09-10

#### Table 41: Resolved Bugs in Version

Bug ID	Headline
CSCvy51481	FTD should show error/warning when attaching a not valid certificate to the interface for VPN
CSCwb03293	IKEv2 debugs: Received Policies and Expected Policies are empty
CSCwe11754	Nodes randomly fail to join cluster due to internal clustering error
CSCwe12645	Secondary state flips between Ready & Failed when node is rebooted and mgmt interface is shutdown
CSCwe18462	ASA/FTD: Improve GTP Inspection Logging
CSCwe18467	ASA/FTD: GTP Inspection engine serviceability
CSCwe37132	TLS Server Identity may cause certain clients to produce mangled Client Hello
CSCwe86923	In Apache MINA, a specifically crafted, malformed HTTP request may cause
CSCwf49254	cannot unregister FTD from Cisco Cloud in FDM if already unregistered/unenrolled from cloud side
CSCwf70275	FTD: TLS Server Identity does not work if size of client hello more than TCP MSS bytes
CSCwf75694	ASA - The GTP inspection dropped the message 'Delete PDP Context Response' due to an invalid TEID=0
CSCwf84318	ASA/FTD traceback and reload on thread DATAPATH
CSCwh10931	ASA/FTD traceback and reload when invoking "show webvpn saml idp" CLI command
CSCwh29276	ASA: Traceback and reload when switching from single to multiple mode
CSCwh43945	FTD/ASA traceback and reload may occur when ssl packet debugs are enabled
CSCwh48776	An issue was discovered in Python before 3.8.18, 3.9.x before 3.9.18,
CSCwh49085	Avoid unnecessary DB operations when processing derived fingerprints
CSCwh59222	SNORT3 - FTD - TSID high cpu, daq polling when ssl enabled is not pulling enough packets
CSCwh60971	NAT pool is not working properly despite is not reaching the 32k object ID limit.

Bug ID	Headline
CSCwh68068	Firepower WCCP router-id changes randomly when VRFs are configured
CSCwh71262	A flaw was found in glibc. In an uncommon situation, the gaih_inet fun
CSCwh83021	ASA/FTD HA pair EIGRP routes getting flushed after failover
CSCwh87058	FTD: Internal certificate generation results to certificate and private key mismatch
CSCwh94029	A flaw was found in the Netfilter subsystem in the Linux kernel. The n
CSCwh94116	A flaw was found in the Netfilter subsystem in the Linux kernel. The x
CSCwh94193	urllib3 is a user-friendly HTTP client library for Python. urllib3 doe
CSCwh95443	Datapath hogs causing clustering units to get kicked out of the cluster
CSCwi00713	A memory leak flaw was found in Libtiff's tiffcrop utility. This issue
CSCwi05240	ASA - Traceback the standby device while HA sync ACL-DAP
CSCwi06797	ASA/FTD traceback and reload on thread DATAPATH
CSCwi23964	Python 3.x through 3.10 has an open redirection vulnerability in lib/h
CSCwi24007	An issue was discovered in the Linux kernel before 6.3.3. There is an
CSCwi24116	Twisted is an event-based framework for internet applications. Prior t
CSCwi36244	In buc Traceroute 2.0.12 through 2.1.2 before 2.1.3, the wrapper scrip
CSCwi38662	FTD HA should not be created partially on FMC
CSCwi43492	ASA traceback and reload on Thread Name: DATAPATH
CSCwi44912	ISA3000 Traceback and reload boot loop
CSCwi49770	ASA FTD Traceback & reload in thread name Datapath
CSCwi52008	Snort3 traceback and restarts with race conditions
CSCwi56499	Cut-Through Proxy feature spikes CP CPU with a flood of un-authenticated traffic
CSCwi60430	CVE-2023-51385 (Medium Sev) In ssh in OpenSSH before 9.6, OS command injection might occur if a us
CSCwi68625	Continuous snmpd restarts observed if SNMP host is configured before the IP is configured
CSCwi78191	An issue was discovered in drivers/input/input.c in the Linux kernel b
CSCwi78193	An issue was discovered in the Linux kernel before 6.6.8. do_vcc_ioctl
CSCwi78200	A vulnerability was found in GnuTLS. The response times to malformed c
CSCwi78206	A vulnerability was found in GnuTLS, where a cockpit (which uses gnuTL

Bug ID	Headline
CSCwi78941	FDM deployment fails with error "Some interfaces have been added to or removed from the device"
CSCwi79037	IKEv2 client services is not getting enabled - XML profile is not downloaded
CSCwi84314	ASA CLI hangs with 'show run' on multiple SSH
CSCwi85951	A use-after-free flaw was found in theext4_remount in fs/ext4/super
CSCwi85953	In rds_recv_track_latency in net/rds/af_rds.c in the Linux kernel thro
CSCwi90751	FTD/ASA - SNMP queries using snmpwalk are not displaying all "nameif" interfaces
CSCwi92924	A memory leak problem was found in ctnetlink_create_conntrack in net/n
CSCwi92927	A use-after-free vulnerability in the Linux kernel's netfilter: nf_tab
CSCwi92930	linux-pam (aka Linux PAM) before 1.6.0 allows attackers to cause a den
CSCwi92932	copy_params in drivers/md/dm-ioctl.c in the Linux kernel through 6.7.1
CSCwi95796	FTD SNMP OID 1.3.6.1.4.1.9.9.109.1.1.1.1.7 always returns 0% for SysProc Average
CSCwi97836	ASA traceback and reload after configuring capture on nlp_int_tap and deleting context
CSCwi97948	EIGRP bandwidth is changing after upgrade or after "shutdown"/"no shutdown" commands
CSCwi98147	Tomcat restarts in the middle of the LTP flow due to certificate update
CSCwi99429	Policy deployment failure rollback didnt reconfigure the FTD devices
CSCwj00956	Snort process spamming syslog-ng messages so our on KP platform syslog-ng is being killed
CSCwj03112	pmtool restart of monetdb fails to bring up monetdb, too many files in monetdb Volume directory
CSCwj05151	ASA/FTD may traceback and reload in Thread Name DATAPATH due to GTP Spin Lock Assertion
CSCwj08021	The DNS message parsing code in 'named' includes a section whose compu
CSCwj08023	Certain DNSSEC aspects of the DNS protocol (in RFC 4033, 4034, 4035, 6
CSCwj08066	A denial of service vulnerability due to a deadlock was found in sctp_
CSCwj08083	An issue was discovered in libxml2 before 2.11.7 and 2.12.x before 2.1
CSCwj08153	An out-of-memory flaw was found in libtiff that could be triggered by
CSCwj10451	The secondary device reloaded while rebooting the primary device.
CSCwj12924	A flaw was found in the Netfilter subsystem in the Linux kernel. The i

Bug ID	Headline
CSCwj14624	Backup exits with memory allocation error on 4115
CSCwj14798	TSS_Daemon process is exiting every minute
CSCwj17447	ASA/FTD may traceback and reload in Thread Name 'DATAPATH-6-26174'
CSCwj17969	rna_ip_os_map can grow very large that causes SFDataCorrelator to stop processing events
CSCwj22235	Lina traceback and reload due to mps_hash_memory pointing to null hash table
CSCwj22990	After upgrading the ASA, "Slot 1: ATA Compact Flash memory" shows a ditterent value
CSCwj24828	Issue when two FQDN objects with same IP are added in source or destination (FTD/ASA)
CSCwj25975	FTD/ASA: CSR generation with comma between "Company Name" attribute does not work expected
CSCwj28153	Lina contains outdated libexpat source code
CSCwj30980	Addition of debugs & a show command to capture the ID usage in the CTS SXP flow.
CSCwj32035	Clientless VPN users are unable to reach pages with HTTP Basic Authentication
CSCwj33487	ASA/FTD may traceback and reload while handling DTLS traffic
CSCwj33580	IKEv2 tunnels flap due to fragmentation and throttling caused by multiple ciphers/proposal
CSCwj40597	Backups fail on multi-instance (or standalone) with error "Backup died unexpectedly"
CSCwj43345	SNMP poll for some OIDs may cause CPU hogs and high latency can be observed for ICMP packets
CSCwj43355	A bug in QEMU could cause a guest I/O operation otherwise addressed to
CSCwj43466	A heap-buffer-overflow vulnerability was found in LibTIFF, in extractI
CSCwj44398	when set the route-map in route RIP on FTD, routes update is not working after FTD reload
CSCwj45822	Cisco Secure Client Unable to complete connection. Cisco Secure Desktop not installed on the client.
CSCwj48704	ASA traceback and reload when accessing file system from ASDM
CSCwj49958	Crypto IPSEC Negotiation Failing At "Failed to compute a hash value"
CSCwj51115	FMC backup remote server copy to Solar Winds remote server failing after upgrading to 7.x versions.

Bug ID	Headline
CSCwj55036	ASA/FTD: A delay in an async crypto command induces a traceback and subsequently a reload.
CSCwj59861	ASA/FTD may traceback and reload in Thread Name 'lina' due to SCP/SSH process
CSCwj60265	ASA/FTD may traceback and reload in Thread Name 'DATAPATH-1-16803'
CSCwj61885	File descriptor leak when validating upgrade images
CSCwj68783	FTD/ASA-HA configs not in sync as the command sync process is sending configs with special chars
CSCwj72683	ASA - Bookmarks on the WebVPN portal are unreachable after successful login.
CSCwj72721	Deployment failure and rollback when BGP communities added or removed in route-map match clause
CSCwj73061	SNMP OID for CPUTotal1min omits snort cpu cores entries when polled
CSCwj74323	ASAv Memory leak involving PKI/Crypto for VPN
CSCwj76503	Syslogs continue to be sent after disabling logging class on ASA
CSCwj82285	ASA/FTD may traceback and reload in Thread Name 'sdi_work'
CSCwj82736	TLS Handshake Fails if Fragmented Client Hello Packet is Received Out of Order
CSCwj83185	FTD/ASA: Standby FTD traceback and reload after enabling memory tracking
CSCwj83634	Seeing message "reg_fover_nlp_sessions: failover ioctl C_FOREG failed"
CSCwj86116	High LINA CPU observed due to NetFlow configuration
CSCwj87501	ASA/FTD may traceback and reload in Thread Name 'fover_FSM_thread'
CSCwj88400	FTD may traceback and reload in process name lina while processing appAgent msg reply
CSCwj88414	CVE-2023-48795 is not addressed on FMC 7.0.6.2 version
CSCwj89050	Faulty input validation in the core of Apache allows malicious or expl
CSCwj89051	In GNU tar before 1.35, mishandled extension attributes in a PAX archi
CSCwj89054	An attacker may cause an HTTP/2 endpoint to read arbitrary amounts of
CSCwj89264	FTD HA: Traceback and reload in netsnmp_oid_compare_ll
CSCwj89315	HTTP Response splitting in multiple modules in Apache HTTP Server allo
CSCwj89402	In the Linux kernel, the following vulnerability has been resolved: n
CSCwj89404	In the Linux kernel, the following vulnerability has been resolved: b

Bug ID	Headline
CSCwj89406	In the Linux kernel, the following vulnerability has been resolved: b
CSCwj89417	In the Linux kernel, the following vulnerability has been resolved: d
CSCwj89425	In the Linux kernel, the following vulnerability has been resolved: B
CSCwj89434	wall in util-linux through 2.40, often installed with setgid tty permi
CSCwj89445	The iconv() function in the GNU C Library versions 2.39 and older may
CSCwj89447	less through 653 allows OS command execution via a newline character i
CSCwj95590	Browser redirects to logon page when the user clicks the WebVPN bookmark
CSCwk02804	WebVPN connections stuck in CLOSEWAIT state
CSCwk02928	ASA/FTD may traceback and reload in Thread Name PTHREAD
CSCwk04492	ASA CLI hangs with 'show run' with multiple ssh sessions
CSCwk05826	nscd: Stack-based buffer overflow in netgroup cache If the Name Servi
CSCwk05828	nscd: netgroup cache may terminate daemon on memory allocation failure
CSCwk05851	"set ip next-hop" line deleted from config at reload if IP address is matched to a NAME
CSCwk06564	Add New Syslog for Routes for NP add/delete
CSCwk07934	Clock skew between FXOS and Lina causes SAML assertion processing failure
CSCwk08576	command to print the debug menu setting of service worker
CSCwk12497	Traceback and reload on active unit due to HA break operation.
CSCwk12698	SNMP polling of admin context mgmt interface fails to show all interfaces across all contexts
CSCwk13812	ASA/FTD incorrectly forwards extended community attribute after upgrade.
CSCwk14909	Traffic drop with 'rule-transaction-in-progress' after failover with TCM cfgd in multi-ctx mode
CSCwk17637	State Link Stops Sending Hello Messages Post-Failover Triggered by Snort Crash in FTD HA
CSCwk17854	FTD doesn't send Type A query after receiving a refuse error from one DNS server in AAAA query.
CSCwk21561	Add warning message when configuring CCL MTU
CSCwk22034	Snmpwalk displays incorrect interface speeds for values greater or equal than 10G
CSCwk22759	Issue with Setting Certain Timezones (e.g. GMT+1) on Cisco ASA Firepower in Appliance Mode

Bug ID	Headline
CSCwk22993	In the Linux kernel, the following vulnerability has been resolved: t
CSCwk24176	FTD/ASA - VPN traffic flowing through the device may trigger tracebacks and reloads.
CSCwk25117	ENH: Add application support for blocking consecutive AAA failures on LINA
CSCwk25506	Multiple snort binaries are present (Patch or HF) at /var/sf/bin/ making tar command to fail
CSCwk25755	In the Linux kernel, the following vulnerability has been resolved: n
CSCwk25756	Requests is a HTTP library. Prior to 2.32.0, when making requests thro
CSCwk25759	In the Linux kernel, the following vulnerability has been resolved: B
CSCwk25761	In the Linux kernel, the following vulnerability has been resolved: b
CSCwk25762	In the Linux kernel, the following vulnerability has been resolved: i
CSCwk25764	In the Linux kernel, the following vulnerability has been resolved: H
CSCwk26968	Backup feature does not save/restore DAP configuration in multiple context mode.
CSCwk27830	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwk32501	256/1550 block depletion process fover_thread
CSCwk36312	High cpu on "update block depletion" causing BGP flap terminated on FTD
CSCwk40726	FMC REST API calls to get AC policy data times out, AC policy GUI slowness with larger rule query
CSCwk41806	Need to Protect LINA from getting killed by OOM
CSCwk44245	In the Linux kernel, the following vulnerability has been resolved: i
CSCwk44246	In the Linux kernel, the following vulnerability has been resolved: i
CSCwk48975	Packet-tracer output incorrectly appends 'control-plane' to drops for data-plane access-group
CSCwk50044	The various Is methods (IsPrivate, IsLoopback, etc) did not work as ex
CSCwk50055	url.c in GNU Wget through 1.24.5 mishandles semicolons in the userinfo
CSCwk56443	Network address API calls taking long time to complete.
CSCwk57933	Vulnerabilities in linux-kernel CVE-2023-52439
CSCwk57949	Vulnerabilities in linux-kernel CVE-2023-52435
CSCwk62296	Address SSP OpenSSH regreSSHion vulnerability

Bug ID	Headline
CSCwk62381	ASA might traceback and reload due to ssh/client hitting a null pointer while using SCP.
CSCwk75030	The IPv6 implementation in the Linux kernel before 6.3 has a net/ipv6/

# **Resolved Bugs in Version 7.0.6.2**

Table last updated: 2024-05-17

#### Table 42: Resolved Bugs in Version 7.0.6.2

Bug ID	Headline
CSCvu22491	FMC fails to connect to SSM with error "Failed to send the message to the server"
CSCvx37329	Remove Syslog Messages 852001 and 852002 in Firewall Threat Defense
CSCvx94744	FMC UI inaccessible due to flood of TSA (version 1.3) REST-API calls to FMC
CSCvy47786	Deployment preview will show unchanged/unadded comments to ACP rules
CSCvy90949	import of iips sfo with some overriden rules across sibling domains
CSCvz03407	IPTables.conf file is disappearing resulting in backup and restore failure.
CSCvz10481	sfo import fails when "import as new" option is selected
CSCvz70310	ASA may fail to create NAT rule for SNMP with: "error NAT unable to reserve ports."
CSCvz77254	Hotfix patch upgrade doesn't clean old snort3 binaries
CSCwa08084	FMC hardware appliance restore ends with an error "Unknown Failure Condition"
CSCwa22766	FMC4500/4600 shows virtual license
CSCwb41189	LINA time-sync correction
CSCwb55243	snort3 crashinfo sometimes fails to collect all frames
CSCwb95850	Snort down due to missing lua files because of disabled application detectors (PM side)
CSCwc31953	Prevention of RSA private key leaks regardless of root cause.
CSCwc40352	Lina Netflow sending permited events to Stealthwatch but they are block by snort afterwards

Bug ID	Headline
CSCwc44367	LSP not installed after HA failover. No LSP package found in the active LSP directory
CSCwd04135	Snort3 unexpectedly dropping packets after 4MB when using file inspection with detection mode NAP
CSCwd16850	More information is required on Syslog 202010 messages for troubleshooting
CSCwd31806	ASAv show crashinfo printing in loop continuously
CSCwd34079	FTD: Traceback & reload in process name lina
CSCwd58665	Intel Microcode Update required for FPR1000 products
CSCwd67100	ASA traceback and reload on Datapath process
CSCwd87438	Enhance logging mechanism for syslogs
CSCwe02012	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwe03631	Need to provide rate-limit on "logging history <mode>"</mode>
CSCwe06562	FPR1K/FPR2K: Increase in failover time in Transparent Mode with high number of Sub-Interfaces
CSCwe11902	FTD: HA crash and interfaces down on FPR4200
CSCwe18472	[FTD Multi-Instance][SNMP] - CPU OIDs return incomplete list of associated CPUs
CSCwe21831	add warning to FTD platform settings when VPN Logging Settings logging level is informational
CSCwe21884	Write wrapper around "kill" command to log who is calling it
CSCwe30359	Traffic drops with huge rule evaluation on snort
CSCwe33282	FTD: The upgrade was unsuccessful because the httpd process was not running
CSCwe34269	DBCheck error is unclear when monetdb is in a 'crashed' state
CSCwe47485	FTD: CLISH slowness due to command execution locking LINA prompt
CSCwe47671	High memory usage on monetDB, FMC does not show connection events
CSCwe48997	FDM: Cannot create multiple RA-VPN profiles with different SAML servers that have the same SAML IDP
CSCwe56452	BGP IPv6 configuration : route-map association with neighbour not getting deployed
CSCwe58207	Memory leak observed on ASA/FTD when logging history is enabled
CSCwe60267	FXOS fault F0853 and F0855 seen despite keyring certificates reporting renewed
CSCwe65516	show xlate does not display xlate entries for internal interfaces (nlp_int_tap) after enabling ssh.

Bug ID	Headline
CSCwe72330	FTD LINA traceback and reload in Datapath thread after adding Static Routing
CSCwe79990	Cisco-Intelligence-Feed - Failed to download due to timeout
CSCwe87134	ASA/FTD: Traceback and reload due to high rate of SCTP traffic
CSCwe90334	Missing Instance ID in unified_events-2.log
CSCwe93137	KP - multimode: ASA traceback observed during HA node break and rejoin.
CSCwe93176	Snort2 rule assignments missing from ngfw.rules (assignment_data table ) after FMC upgrade.
CSCwe93736	ASA not updating Timezone despite taking commands
CSCwe97939	ASA/FTD Cluster: Change "cluster replication delay" with max value increase from 15 to 50 sec
CSCwf00736	CSM backup failed within FMC backup due to modification of file while tar was reading it
CSCwf08387	LSP version not updated to latest in LINA Prompt in SSP_CLUSTER with 7.2.4 build.
CSCwf08790	FMC Restore of remote backup fails due to no space left on the device
CSCwf14031	Snort down due to missing lua files because of disabled application detectors (VDB side)
CSCwf17389	ASA accepts replayed SAML assertions for RA VPN authentication
CSCwf20215	admin user should be excluded from CLI shell access filter
CSCwf22045	MYSQL, or any TCP high traffic, getting blocked by snort3, with snort-block as Drop-reason
CSCwf25563	Device list takes longer to load while creating new AC policy
CSCwf36419	ASA/FTD: Traceback and reload with Thread Name 'PTHREAD'
CSCwf39108	Firewall rings may get stuck and cause packet loss when asp load-balance per-packet auto is used
CSCwf44621	Traceback and reload on Thread DATAPATH-6-21369 and linked to generation of syslog message ID 202010
CSCwf49486	store_*list_history.pl task is created every 5min without getting closed causing FMC slowness.
CSCwf59571	FTD/Lina - ZMQ issue OUT OF MEMORY. due to less Msglyr pool memory on certain platforms
CSCwf63589	FTD snmpd process traceback and restart
CSCwf64590	Units get kicked out of the cluster randomly due to HB miss   ASA 9.16.3.220

Bug ID	Headline
CSCwf67337	FMC taking long times to save override objects even if not modified
CSCwf69880	Firewall Traceback and reload due to SNMP thread
CSCwf75695	Duplicate FTD cluster has been created when multiple cluster events comes at same time
CSCwf82447	Editing identity nat rule disables "perform route lookup" silently
CSCwf82970	Snort2 engine is crashing after enabling TLS Server Identity Discovery feature
CSCwf86557	Decrypting engine/ssl connections hang with PKI Interface Error seen
CSCwf89959	ASA: ISA3000 does not respond to entPhySensorValue OID SNMP polls
CSCwf91282	import of .SFO to FMC failed due to included local/custom rules having a blank rule message field
CSCwf92661	ASA FTD: Traceback & reload due to a free buffer corruption
CSCwf92726	LDAP missing files after upgrade when the Vault token is corrupted
CSCwf94450	FTD Lina traceback Thread Name: DATAPATH due to memory corruption
CSCwf99303	Management UI presents self-signed cert rather than custom CA signed one after upgrade
CSCwh00123	In Multi-manager scenario,cdFMC&Analytics FMC,FTD should only receive identity feeds from Config FMC
CSCwh01673	FTD /ngfw disk space full from Snort3 url db files
CSCwh04231	FMC needs to properly maintain Redis data directory to prevent unbounded disk usage
CSCwh09113	FPR1010 in HA failed to send or receive to GARP/ARP with error "edsa_rcv: out_drop"
CSCwh11411	Snort blacklisting traffic during deployment
CSCwh14352	Lina CiscoSSL upgrade to 1.1.1v and FOM 7.3a
CSCwh14584	Traceback seen on FTD running on Firepower 2100 series
CSCwh14863	FTD 7.0.4 cluster drops Oracle's sqlnet packets due to tcp-not-syn
CSCwh16759	SNMP is not working on the primary active ASA unit in multi-context environment
CSCwh19475	Intermittently flow is getting white-listed by the snort for the unknow app-id traffic.
CSCwh19613	ASA crashed with Saml scenarios
CSCwh19897	ASA/FTD Cluster: Reuse of TCP Randomized Sequence number on two different conns with same 5 tuple
CSCwh21474	ASA traceback when re-configuring access-list

Bug ID	Headline
CSCwh21772	Upgrade FxOS CiscoSSL to version 1.1.1v and FOM 7.3a
CSCwh24901	'Frequent drain of events (not unprocessed events) to be removed from FMC
CSCwh26526	SQL packets involved in large query is drop by SNORT3 with reason snort-block
CSCwh28206	Firewall Blocking packets after failover due to IP <-> SGT mappings
CSCwh30346	ASA/FTD: 1 Second failover delay for each NLP NAT rule
CSCwh36005	Policy deployment failed due to "1 errors seen during populateGlobalSnapshot"
CSCwh40106	FTD hosted on KP incorrectly dropping decoded ESP packets if pre-filter action is analyze
CSCwh40294	ASA traceback due to panic event during SNMP configuration
CSCwh41126	FMC ACP report does not shows all the access control rules
CSCwh42077	Cisco_Firepower_GEODB_FMC_Update* are not included in diskmanager
CSCwh42412	FTD Block 9344 leak due to fragmented GRE traffic over inline-set interface inner-flow processing
CSCwh45450	2100: Interfaces missing from FTD after removing interfaces as members of a port-channel
CSCwh45935	Lina core observed in 6.4.0.17-22 in Kp with scaled traffic
CSCwh47053	ASA/FTD may traceback and reload in Thread Name 'dns_cache_timer'
CSCwh47701	ASA allows same BGP Dynamic routing process for Physical Data and management-only interfaces
CSCwh49244	"show aaa-server" command always shows the Average round trip time 0ms.
CSCwh53745	ASA: unexpected logs for initiating inbound connection for DNS query response
CSCwh57976	Improve CPU utilization in ssl inspection for supported signature algorithm handling
CSCwh58467	ASA does not sent 'warmstart' snmp trap
CSCwh59199	ASA/FTD traceback and reload with IPSec VPN, possibly involving upgrade
CSCwh60504	LINA would randomly generate a traceback and reload on FPR-1K
CSCwh60604	ASA/FTD may traceback and reload in Thread Name 'lina' while processing DAP data
CSCwh60631	Fragmented UDP packet via MPLS tunnel reassemble fail
CSCwh60783	FTD - Captive portal enabled is still running despite the feature is off
CSCwh62080	additional command outputs needed in FTD troubleshoot for blocks and ssl cache

Bug ID	Headline
CSCwh65128	LINA show tech-support fails to generate as part of sf_troubleshoot.pl (Troubleshoot file)
CSCwh66359	ASDM can not see log timestamp after enable logging timestamp on cli
CSCwh68482	FTD: Traceback and Reload in Process Name: lina
CSCwh68878	Diskmanager process terminated unexpectedly
CSCwh69156	FTD-HA does not fail over sometimes when snort3 crashes
CSCwh69346	ASA: Traceback and reload when restore configuration using CLI
CSCwh70323	Timestamp entry missing for some syslog messages sent to syslog server
CSCwh70481	Community string sent from router is not matching ASA
CSCwh71161	ASA FTD: Traceback & reload in thread Name: update_mem_reference
CSCwh71665	ASA traceback under match_partial_keyword during CPU profiling
CSCwh73727	Snort3 dropping IP protocol 51
CSCwh74586	XTLS: With TSID AC-Policy configured plugin is not disengaging immediately at CH
CSCwh75829	FMC Primary disk degraded error
CSCwh77348	ASA: Traceback and reload when executing the command "show nat pool detail" on a cluster setup
CSCwh79095	Snort generating an excessive number of snort-unified log files with zero bytes
CSCwh83254	ASA/FTD: Traceback and reload on thread name CP Crypto Result Processing
CSCwh84376	In FPR4200/FPR3100-cluster observed core file ?core.lina? observed on device reboot.
CSCwh91065	Lina Traceback : Thread Name: DATAPATH during session terminate
CSCwh91574	FTD: Traceback in threadname cli_xml_request_process
CSCwh92345	crypto_archive file generated after the software upgrade.
CSCwh92541	Random FTD snort3 traceback
CSCwh93710	Last Rule hit shows a hex value ahead of current time in ASA and ASDM
CSCwh95010	Unexpected traceback on thread name Lina and device experienced reboot
CSCwh95025	GTP connections, under certain circumstances do not get cleared on issuing clear conn.
CSCwh95175	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwh95277	FTD VMWARE 7.0.5 trackbacks due to system memory exhaustion

Bug ID	Headline
CSCwh96055	Management DNS Servers may be unreacheable if data interface is used as the gateway
CSCwh99331	syslog not generated "ASA-3-202010: NAT pool exhausted" while passing traffic from iLinux to oLinux

Bug ID	Headline
CSCvt25221	FTD traceback in Thread Name cli_xml_server when deploying QoS policy
CSCvx04003	Lack of throttling of ARP miss indications to CP leads to oversubscription
CSCvx54562	High System Overhead memory on FTD
CSCvy81493	traceback and reload with 'CHECKHEAPS HAS DETECTED A MEMORY CORRUPTION'
CSCvz07439	Smart Lic Agent stuck in waiting state after failover and continuously switches from lock and unlock
CSCwa70323	Unable to push extra domains >1024 Character, as part of Custom Attribute under Anyconnect VPN

Bug ID	Headline
CSCwc78781	ASA/FTD may traceback and reload during ACL changes linked to PBR config
CSCwc82205	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwd10822	Failover trigger due to Inspection engine in other unit has failed due to disk failure
CSCwd28037	TPK: No nameif during traffic causes the device traceback, lina core is generated.
CSCwd38583	ASA/FTD: Command "no snmp-server enable oid mempool" enabled by default or enforced during upgrades
CSCwd66820	Cisco Firepower Management Center Object Group Access Control List Bypass Vulnerability
CSCwd83141	CCL/CLU filters are not working correctly
CSCwd89095	Stratix5950 and ISA3000 LACP channel member SFP port suspended after reload
CSCwe04043	FTD-HA upgrade failed
CSCwe12705	multimode-tmatch_df_hijack_walk traceback observed during shut/unshut on FO connected switch interfa
CSCwe28407	LINA traceback with icmp_thread
CSCwe28912	FPR 4115- primary unit lost all HA config after ftd HA upgrade
CSCwe42061	Deleting a BVI in FTD interfaces is causing packet drops in other BVIs
CSCwe51443	ASA Evaluation of OpenSSL vulnerability CVE-2022-4450
CSCwe67816	ASA / FTD Traceback and reload when removing isakmp capture
CSCwe74089	ASA/FTD may traceback and reload in Thread Name DATAPATH-1-1656
CSCwe79051	Deployment for eigrp / bgp change may cause temporary outage during policy apply
CSCwe82704	PortChannel sub-interfaces configured as data/data-sharing, in multi-instance HA go into "waiting"
CSCwe83255	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwe86225	ASA/FTD traceback and reload due citing thread name: cli_xml_server in tm_job_add
CSCwf04460	The fxos directory disappears after cancel show tech fprm detail command with Ctr+c is executed .
CSCwf05295	FTD running on FP1000 series might drop packets on TLS flows after the "Client Hello" message.
CSCwf10910	FTD : Traceback in ZMQ running 7.3.0
CSCwf14126	ASA Traceback and reload citing process name 'lina'

Bug ID	Headline
CSCwf15902	ASAv in Hyper-V drops packets on management interface
CSCwf16559	getReadinessStatusTaskList pjb request is very frequent when user in Upgrade sensor list page
CSCwf17042	ASDM replaces custom policy-map with default map on class inspect options at backup restore.
CSCwf22005	ASA Packet-tracer displays the first ACL rule always, though matches the right ACL
CSCwf22637	Network Object Group overrides not visible or be edited from FMC GUI
CSCwf25144	FMC backup management page showing "Verifying Backup" for FTD sensors.
CSCwf26407	FP2130- Unable to disassociate member from port channel, deployment fails, member is lost on FTD/FMC
CSCwf26534	ASA/FTD: Connection information in SIP-SDP header remains untranslated with destination static Any
CSCwf33904	[IMS_7_4_0] - Virtual FDM Upgrade fails: HA configStatus='OUT_OF_SYNC after UpgradeOnStandby
CSCwf34500	FTD: GRE traffic is load balanced between CPU cores
CSCwf35207	ASA: Traceback and reload while updating ACLs on ASA
CSCwf35233	Cisco Adaptive Security Appliance Software and Firepower Threat Defense DoS
CSCwf35573	Traffic may be impacted if TLS Server Identity probe timeout is too long
CSCwf39163	ASAv - High latency is experienced on Azure environment for ICMP ping packets while running snmpwalk
CSCwf43537	Lina crash in thread name: cli_xml_request_process during FTD cluster upgrade
CSCwf44537	99.20.1.16 lina crash on nat_remove_policy_from_np
CSCwf47227	Priority-queue command causes silent egress packet drops on all port-channel interfaces
CSCwf48599	VPN load-balancing cluster encryption using deprecated ciphers
CSCwf49573	ASA/FTD: Traceback and reload when issuing 'show memory webvpn all objects'
CSCwf50497	DNS cache entry exhaustion leads to traceback
CSCwf52810	ASA SNMP polling not working and showing "Unable to honour this request now" on show commands
CSCwf54418	Reduce time taken to clear stale IKEv2 SAs formed after Duplicate Detection
CSCwf54510	ASA traceback and reload on Thread Name: DHCPRA Monitor
CSCwf56811	ASA Traceback & reload on process name lina due to memory header validation

Bug ID	Headline
CSCwf59176	FXOS raises a fault for administratively disabled management interface
CSCwf60311	ASA generating traceback with thread-name: DATAPATH-53-18309 after upgrade to 9.16.4.19
CSCwf60590	"show route all summary" executed on transparent mode FTD is causing CLISH to become Sluggish.
CSCwf62729	7.0.6 - Lina Crash in RAVPN interface with anomaly traffic in both non-FIPS and FIPS mode
CSCwf63872	FTD taking longer than expected to form OSPF adjacencies after a failover switchover
CSCwf69901	FTD: Traceback and reload during OSPF redistribution process execution
CSCwf72434	Add meaningful logs when the maximums system limit rules are hit
CSCwf73773	Dumping of last 20 rmu request response packets failed
CSCwf77191	ASA appliance mode - 'connect fxos [admin]' will get ERROR: failed to open connection.
CSCwf78321	ASA: Checkheaps traceback and reload due to Clientless WebVPN
CSCwf81058	FTD: Firepower 3100 Dynamic Flow Offload showing as Enabled
CSCwf82247	Policy deployment fails when a route same prefix/metric is configured in a separate VRF.
CSCwf92135	ASA: Traceback and reload on Tread name "fover_FSM_thread" and ha_ntfy_prog_process_timer
CSCwf92182	Cisco Firepower Management Center Software SQL Injection Vulnerability
CSCwf92646	ECDSA Self-signed certificate using SHA384 for EC521
CSCwf94677	"failover standby config-lock" config is lost after both HA units are reloaded simultaneously
CSCwf95147	OSPFv3 Traffic is Centralized in Transparent Mode
CSCwf95288	FPR1k Switchport passing CDP traffic
CSCwh04365	ASA Traceback & reload on process name lina due to memory header validation - webvpn side fix
CSCwh04395	ASDM application randomly exits/terminates with an alert message on multi-context setup
CSCwh04730	ASA/FTD HA checkheaps crash where memory buffers are corrupted
CSCwh06452	Interface speed mismatch in SNMP response using OID .1.3.6.1.2.1.2.2
CSCwh08403	FMC HA - Health Policy - Applied count shows "0" appliance

Bug ID	Headline
CSCwh08481	ASA traceback on Lina process with FREEB and VPN functions
CSCwh11764	ASA/FTD may traceback and reload in Thread Name "RAND_DRBG_bytes" and CTM function on n5 platforms
CSCwh12987	Large SMB servers result in timeouts returning verdicts between FMC and FTD devices
CSCwh13821	ASA/FTD may traceback and reload in when changing capture buffer size
CSCwh14467	File sizes bigger than 100MB for AnyConnect/Secure Client images cannot be uploaded on FMC
CSCwh14597	ASA/FTD residual free
CSCwh16301	Incorrect Hit count statistics on ASA Cluster only for Cluster-wide output
CSCwh20002	Standby FMC is not getting updated with latest GEO DB package
CSCwh21141	The FMC preview deployment shows a wrong information.
CSCwh23100	Cisco ASA and FTD Software Remote Access VPN Unauthorized Access Vulnerability
CSCwh23567	PAC Key file missing on standby on reload
CSCwh25668	ASA 55xx devices running 7.0.6 show up as 100% usage on CPU01 [LINA]
CSCwh27230	Connections are not cleared after idle timeout when the interfaces are in inline mode.
CSCwh28144	Specific OID 1.3.6.1.2.1.25 should not be responding
CSCwh30891	ASA/FTD may traceback and reload in Thread Name 'ssh' when adding SNMPV3 config
CSCwh31495	FTD - Traceback and reload due to nat rule removed by CPU core
CSCwh32118	ASDM management-sessions quota reached due to HTTP sessions stuck in CLOSE_WAIT
CSCwh37475	Removal of msie-proxy commands during flexconfig rollback
CSCwh41127	ASA/FTD: NAT64 error "overlaps with inside standby interface address" for Standalone ASA
CSCwh45108	Cisco ASA and FTD Software Remote Access VPN Unauthorized Access Vulnerability
CSCwh49483	ASA/FTD may traceback and reload while running show inventory all
CSCwh50060	Some TLS1.3 probes test site cases fail due to rst+ack not sent out of FTD during timeout
CSCwh52420	AMP Cloud look up timeout frequently.
CSCwh56945	SFDataCorrelator crashing repeatedly in RNA_DB_InsertServiceInfo

Bug ID	Headline
CSCwh64508	Fixing the regression caused while handling web UI is not getting FTDv Variable
CSCwh69209	Prefilter cannot add Tunnel Endpoints in Tunnel Rule on FMC
CSCwh69815	FTDvs through put got changed to 100Kbps after upgrade

Table 44: Resolved Bugs in Version 7.0.6

Bug ID	Headline
CSCvo58100	Incorrect validation msg - Invalid value supplied for input parameter : "?"
CSCvq20057	Improve logging of Secure Firewall (Firepower)backups and retry for gzip when using remote storage
CSCvq25866	Flex config Preview of \$SYS_FW_ENABLED_INSPECT_PROTOCOL_LIST throws error
CSCvr45136	Adding details and logs when gzip fails and results in backup failure
CSCvs27336	Traceback on ASA by Smart Call Home process
CSCvt35116	Cisco Firepower Management Center Software Information Disclosure Vulnerability
CSCvu24703	FTD - Flow-Offload should be able to coexist with Rate-limiting Feature (QoS)
CSCvu96436	Traceback of master and one slave when a particular lock is contended for long
CSCvv59757	FMC event report generation fails if one is already running
CSCvw82067	ASA/FTD 9344 blocks depleted due to high volume of fragmented traffic
CSCvx04436	Forbidden to run multiple SFDaCo processes, but pidfile not successful at blocking second instance
CSCvx21458	FMC shows error when editing prefix-list attached to active route-map within BGP protocol
CSCvx24207	FQDN Object Containing IPv4 and IPv6 Addresses Only Install IPv6 Entries
CSCvx27744	Policy deployment may fail on FTD after 6.6.1 due to failure to get version upgrade information
CSCvx36885	ASA Traceback & reload in thread Name: DATAPATH
CSCvx52042	Upgrade to 6.6.1 got failed at 800_post/1025_vrf_policy_upgrade.pl
CSCvx55978	Performance Degradation in GetGroupDependency API

Bug ID	Headline
CSCvx56021	FTD: CTS SGT propagation gets enabled after reload
CSCvx59181	Email/SNMP/Syslog Health Alerts are not sent out of fmc for cpu and mem
CSCvx65032	FMC ACL Search Move arrows do not work
CSCvx67856	Prometheus process doesnt come up when system ungracefully rebooted
CSCvx71936	FXOS: Fault "The password encryption key has not been set." displayed on FPR1000 and FPR2100 devices
CSCvx97723	hmdaemon process restart during automation test
CSCvy12991	Chassis local date and time may drift back to midnight Jan 1 2015 after reboot
CSCvy16537	Some externalization columns do not match any data when used in where clause
CSCvy24435	FMC GUI can be accessed by an expired password when using .cgi with https://FMCIP/login.cgi
CSCvy26511	Tune unmanaged disk alert thresholds for low end platforms
CSCvy26676	"Warning:Update failed/in-progress." Cosmetic after successful update
CSCvy33879	FTD: repair_users.pl creates rogue .firstboot file that causes FTD reboot failure
CSCvy35737	FTD traceback and reload during anyconnect package verification
CSCvy40493	Selective policy deployment of AC Policy does not export to ngfw.rules
CSCvy50598	BGP table not removing connected route when interface goes down
CSCvy50797	Policy deployment may fail if platform settings contain DH group1 for SSL
CSCvy52617	FMC6.7 changes IPSec Profiles on VTI with each deployment resulting in tunnel flap
CSCvy55676	FMC Deployment failed due to internal errors
CSCvy57905	VTI tunnel interface stays down post reload on KP/WM platform in HA
CSCvy63414	Deploy Preview & Rollback not working when config archival is corrupted
CSCvy65178	Need dedicated Rx rings for to the box BGP traffic on Firepower platform
CSCvy65770	ASA/FTD: Traceback and reload during BGP route update
CSCvy67765	FTD VTI reports TUNNEL_SRC_IS_UP false despite source interface is up/up and working
CSCvy73130	FP4100 platform: Active-Standby changed to dual Active after running "show conn" command
CSCvy84336	Add a warning when member interfaces of the port-channel are different between active and standby

Bug ID	Headline
CSCvy86817	Cruz ASIC CLU filter has the incorrect src/dst IP subnet when a custom CCL IP subnet is set
CSCvy88023	FP2100 coredumps do not display the original crashing thread
CSCvy90836	ASA Traceback and reload in Thread Name: SNMP ContextThread
CSCvy91668	PAT pool exhaustion with stickiness traffic could lead to new connection drop.
CSCvy98458	FP21xx -traceback "Panic:DATAPATH-10-xxxx -remove_mem_from_head: Error - found a bad header"
CSCvz07712	Deployment fails with internal_errors - Cannot get fresh id
CSCvz09106	Cisco ASA and FTD Software SSL VPN Denial of Service Vulnerability
CSCvz10428	FMC Health monitoring standby FMC unit does not have data displayed for CPU
CSCvz20679	FTDv - Lina Traceback and reload
CSCvz22668	FMC backup restoration may fail due to VMS database restoration failure
CSCvz24765	device rebooted with snmpd core
CSCvz28145	Error "Another operation by another user prevented this operation. Please retry after sometime."
CSCvz29656	FMC connection event search causing high memory utilization for index.cgi
CSCvz29976	Malware event processing may misbehave with "already part of another table" error
CSCvz34289	In some cases transition to lightweight proxy doesn't work for Do Not Decrypt flows
CSCvz36903	ASA traceback and reload while allocating a new block for cluster keepalive packet
CSCvz37306	ASDM session is not served for new user after doing multiple context switches in existing user
CSCvz38332	FTD/ASA - Stuck in boot loop after upgrade from 9.14.2.15 to 9.14.3
CSCvz38692	ASAv traceback in snmp_master_callback_thread and reload
CSCvz39646	ASA/AnyConnect - Stale RADIUS sessions
CSCvz40098	FTD HA: Health Monitor page shows "Error in fetching device details Error: validation failed"
CSCvz40245	Firepower bandwidth_analyzer tool calculates results in MBps instead of Mbps
CSCvz41551	FP2100: ASA/FTD with threat-detection statistics may traceback and reload in Thread Name 'lina'
CSCvz42065	IPS policy should be imported when its referred in Access Control policy

Bug ID	Headline
CSCvz42553	Alarm: Health Alert Smart Licensing Agent not running
CSCvz43414	Internal Idap attribute mappings fail after HA failover
CSCvz43455	ASAv observed traceback while upgrading hostscan
CSCvz44339	FTD - Deployment will fail if you try to delete an SNMP host with ngfw-interface and host-group
CSCvz48407	Traceback and reload in Thread Name: DATAPATH-15-18621
CSCvz49163	Observed some time drift in seconds in the output when we execute show rule hits multiple times
CSCvz50712	TLS server discovery uses incorrect source IP address for probes in AnyConnect deployment
CSCvz51175	FTD HA not forming when SNMP adminState is disabled
CSCvz53142	ASA does not use the interface specified in the name-server command to reach IPv6 DNS servers
CSCvz53372	Snort goes into D state after executing "config log-events-to-ramdisk disable"
CSCvz54318	Policy deployment failure: "No LSP package found in the active lsp directory"
CSCvz55302	FTD/ASA Traceback and reload due to SSL null checks under low memory conditions
CSCvz55395	TCP connections are cleared after configured idle-timeout even though traffic is present
CSCvz57710	conf t is converted to disk0:/t under context-config mode
CSCvz58710	ASA traceback due to SCTP traffic.
CSCvz60142	ASA/FTD stops serving SSL connections
CSCvz61160	ASA traceback on DATAPATH when handling ICMP error message
CSCvz61477	RAVPN Authorization fails if same RADIUS server is used as authentication and authorization server
CSCvz62653	ASA memory leak resulting in error messages and causing tracebacks
CSCvz64470	ASA/FTD Traceback and reload due to memory corruption when generating ICMP unreachable message
CSCvz66236	Threshold mis-behavior of "-1" after configuring Type:Both for specific rule
CSCvz67003	ASDM session count and quota management's count mismatch. 'Lost connection firewall' msg in ASDM
CSCvz68713	PLR license reservation for ASAv5 is requesting ASAv10

Bug ID	Headline
CSCvz69571	ASA log shows wrong value of the transferred data after the anyconnect session terminated.
CSCvz69729	Unstable client processes may cause LINA zmqio traceback on FTD
CSCvz70316	LINA may generate traceback and reload
CSCvz70595	Cisco ASA Software and FTD Software Web Services Interface Denial of Service Vulnerability
CSCvz71340	observed snort3 core on xTLSServerKeyExchangeProcessor
CSCvz71542	No messages displayed on the console for any inserted SFP cable after removal.
CSCvz71596	"Number of interfaces on Active and Standby are not consistent" should trigger warning syslog
CSCvz73709	ASA/FTD Standby unit fails to join HA
CSCvz75988	Inconsistent logging timestamp with RFC5424 enabled
CSCvz76652	Proxy URI URL for URL Filtering (beaker service) includes encoded user/password strings
CSCvz77213	FTD: show ntp shows managing DC even though NTP sync is done via FXOS
CSCvz77662	Crash at data-path from Scaled AC-SSL TVM Profile test.
CSCvz77744	OSPFv3: FTD Wrong "Forwarding address" added in ospfv3 database
CSCvz78548	Unable to load Devices> Certificates page
CSCvz81480	Cisco ASA Software and FTD Software IPsec IKEv2 VPN Information Disclosure Vulnerability
CSCvz81513	FMC - Backup failing due to "CSM backup failed"
CSCvz84850	ASA/FTD traceback and reload caused by "timer services" function
CSCvz85493	FTD backup.log increased size out of control to 50GB or more causing /ngfw to 100% full
CSCvz88020	ASAv: coredumpfsys is formatted during bootup

CSCwc76195	Fail-To-Wire interfaces flaps intermittently due to watchdog timeout in KP platform
CSCwc78296	Database may fail to shut down and/or start up properly during upgrade
CSCwc83037	WR6, WR8, LTS18 and LTS21 commit id update in CCM layer (Seq 36)
CSCwc88425	FMC can download only the first 10000 cross-domain user groups

Bug ID	Headline
CSCwc88583	Deployment fails with error Invalid Snort3IntrusionPolicy mode. Supports only inline and inline-test
CSCwc96136	CCM layer (Seq 38) WR8, LTS18, LTS21
CSCwd07558	Access Control Policy Deployments failing after upgrading to 7.0.4 on SFR Managed by ASDM
CSCwd09093	Access rule policy page takes longer time to load
CSCwd09341	Multiple log files have zero bytes on the FMC
CSCwd24072	rsc_5_min.log store location should move to a different partition

## **Resolved Bugs in Version 7.0.4**

Table last updated: 2022-08-10

Table 47: Resolved Bugs in Version 7.0.4

Bug ID	Headline
CSCvj08826	FMC ibdata1 file might grow large in size
CSCvw82067	ASA/FTD 9344 blocks depleted due to high volume of fragmented traffic
CSCvx59252	FXOS is not rotating log files for management interface
CSCvy16004	Delay in DIFF calculations can cause deployment issues and HA App sync timeout in FTDs
CSCvy50598	BGP table not removing connected route when interface goes down
CSCvy67765	FTD VTI reports TUNNEL_SRC_IS_UP false despite source interface is up/up and working
CSCvy73130	FP4100 platform: Active-Standby changed to dual Active after running "show conn" command
CSCvy99348	Shutdown command reboots instead of shutting the FP1k device down.
CSCvz36903	ASA traceback and reload while allocating a new block for cluster keepalive packet
CSCvz60142	ASA/FTD stops serving SSL connections
CSCvz68713	PLR license reservation for ASAv5 is requesting ASAv10
CSCvz69729	Unstable client processes may cause LINA zmqio traceback on FTD
CSCvz70539	Loggerd process is getting killed due to OOM under high logging rate
CSCwa00038	Disk corruption occurs when /mnt/disk0 partition is full and blade is rebooted

Bug ID	Headline
CSCwa03732	Deployment gets hung at snapshot generation phase during deploy or causes deploy slowness
CSCwa08640	MonetDB crashing due to file size error
CSCwa21061	FTD upgrade fails on 800_post/100_ftd_onbox_data_import.sh
CSCwa32628	SFDataCorrelator crash at AddFileToPendingHash() due to race condition
CSCwa42350	ASA installation/upgrade fails due to internal error "Available resources not updated by module"
CSCwa43311	Snort blocking and dropping packet, with bigger size(1G) file download
CSCwa43475	ASA SNMPd traceback in netsnmp_subtree_split
CSCwa45656	SLR license application failes on manged devices
CSCwa48169	ASA/FTD traceback and reload on netsnmp_handler_check_cache function
CSCwa59907	LINA observed traceback on thread name "snmp_client_callback_thread"
CSCwa61361	ASAv traceback when SD_WAN ACL enabled, then disabled (or vice-versa) in PBR
CSCwa62025	IPv6: Some of egress interfaces of global and user vrf routes are missing in asp table
CSCwa68552	All type-8 passwords are lost upon upgrade from ASA 9.12-9.15 to 9.16, failover gets disabled
CSCwa72530	FTD: Time gap/mismatch seen when new node joins a Cluster Control node under history
CSCwa73172	ASA reload and traceback in Thread Name: PIX Garbage Collector
CSCwa76621	Memory Usage Warnings - System memory leak caused by run_hm.pl
CSCwa85340	Unable to generate the PDF with access policy having large nested objects
CSCwa86210	When PM disables mysqld, sometimes it is taking longer than expected to fully shutdown.
CSCwa90615	WR8 and LTS18 commit id update in CCM layer (seq 24)
CSCwa95079	ASA/FTD Traceback and reload due to NAT configuration
CSCwa95694	Snort cores generated intermittently when SSL policy is enabled on the ASA-SFR module
CSCwa97910	Connection event report displays the same device twice
CSCwa97917	ISA3000 in boot loop after powercycle
CSCwa99931	ASA/FTD: Tuning of update_mem_reference process

Bug ID	Headline
CSCwb01633	FXOS misses logs to diagnose root cause of module show-tech file generation failure
CSCwb02060	snmp-group host with Invalid host range and subnet causing traceback and reload
CSCwb02316	"Non stop forwarding not supported on '1" error while configuring MAC address
CSCwb05291	Cisco ASDM and ASA Software Client-side Arbitrary Code Execution Vulnerability
CSCwb06543	Increase logging level to diagnose LACP process unexpected restart events
CSCwb06847	ASA/FTD may traceback and reload in Thread Name 'DATAPATH-9-11543'
CSCwb07319	Entitlement tags contain invalid character.
CSCwb07908	Standby FTD/ASA sends DNS queries with source IP of 0.0.0.0
CSCwb07981	Traceback: Standby FTD reboots and generates crashinfo and lina core on thread name cli_xml_server
CSCwb08393	SSL policy deploy failing from FMC: Timeout waiting for snort detection engines to process traffic
CSCwb08644	ASA/FTD traceback and reload at IKEv2 from Scaled S2S+AC-DTLS+SNMP long duration test
CSCwb12465	FIPS self-tests must be run when CC mode is enabled - files are missing
CSCwb13294	WR8, LTS18 and LTS21 commit id update in CCM layer (Seq 25)
CSCwb16920	CPU profile cannot be reactivated even if previously active memory tracking is disabled
CSCwb17187	SNMP cores are generated every minute while running snmpwalk on HA
CSCwb17963	Unable to identify dynamic rate liming mechanism & not following msg limit per/sec at syslog server.
CSCwb19648	SNMP queries for crasLocalAddress are not returning the assigned IPs for SSL/DTLS tunnels.
CSCwb19664	Malware Block false positives triggered after upgrade to version 7.0.1
CSCwb22359	Portmanager/LACP improvement to avoid false restarts and increase of logging events
CSCwb24039	ASA traceback and reload on routing
CSCwb24101	Loggerd syslog has stray incorrect timestamps, e.g. well before FirstPacketSecond
CSCwb25809	Single Pass - Traceback due to stale ifc
CSCwb28047	FMC - "Receiving thread exited with an exception: stoi" causing pxGrid to flap
CSCwb31699	Primary takes active role after reload

Bug ID	Headline
CSCwb32841	NAT (any,any) statements in-states the failover interface and resulting on Split Brain events
CSCwb40001	Long delays when executing SNMP commands
CSCwb41361	WR8, LTS18 and LTS21 commit id update in CCM layer (seq 26)
CSCwb43018	Implement SNP API to check ifc and ip belongs to HA LU or CMD interface
CSCwb46949	LTS18 commit id update in CCM layer (seq 27)
CSCwb49416	ASA snmpd Traceback & cores on an active unit
CSCwb50405	ASA/FTD Traceback in crypto hash function
CSCwb51707	ASA Traceback and reload in process name: lina
CSCwb53172	FTD: IKEv2 tunnels flaps every 24 hours and crypto archives are generated
CSCwb53191	Certificate validation fails post upgrade to 9.17.1
CSCwb53328	ASA/FTD Traceback and reload caused by Smart Call Home process sch_dispatch_to_url
CSCwb54791	ASA DHCP server fails to bind reserved address to Linux devices
CSCwb57615	Configuring pbr access-list with line number failed.
CSCwb59465	ASA/FTD may traceback (watchdog) and reload when generating a syslog from the VPN Failover subsystem
CSCwb59488	ASA/FTD Traceback in memory allocation failed
CSCwb67040	FP4112 4115 Traceback & reload on Thread Name: netfs_thread_init
CSCwb68642	ASA traceback in Thread Name: SXP CORE
CSCwb71460	ASA traceback in Thread Name: fover_parse and triggered by snmp related functions
CSCwb73248	FW traceback in timer infra / netflow timer
CSCwb74357	FXOS is not rotating log files for partition opt_cisco_platform_logs
CSCwb74571	PBR not working on ASA routed mode with zone-members
CSCwb79812	RIP is advertising all connected Anyconnect users and not matching route-map for redistribution
CSCwb80559	FTD offloads SGT tagged packets although it should not
CSCwb80862	ASA/FTD proxy arps any traffic when using the built-in 'any' object in translated destination
CSCwb82796	ASA/FTD firewall may traceback and reload when tearing down IKE tunnels
	•

Bug ID	Headline
CSCwb83388	ASA HA Active/standby tracebacks seen approximately every two months.
CSCwb83691	ASA/FTD traceback and reload due to the initiated capture from FMC
CSCwb84638	Portmanager/LACP improvement to capture logging events on external event restarts
CSCwb85633	Snmpwalk output of memory does not match show memory/show memory detail
CSCwb86118	TPK ASA: Device might get stuck on ftp copy to disk
CSCwb87498	Lina traceback and reload during EIGRP route update processing.
CSCwb88651	Cisco ASA and FTD Software RSA Private Key Leak Vulnerability
CSCwb89004	FMC DBcheck.pl hungs at "Checking mysql.rna_flow_stats_template against the current schema"
CSCwb90074	ASA: Multiple Context Mixed Mode SFR Redirection Validation
CSCwb90532	ASA/FTD traceback and reload on NAT related function nat_policy_find_location
CSCwb92583	upgrade with a large amount of unmonitored disk space used can cause failed upgrade and hung device
CSCwb92709	We can't monitor the interface via "snmpwalk" once interface is removed from context.
CSCwb93932	ASA/FTD traceback and reload with timer services assertion
CSCwb94190	ASA graceful shut down when applying ACL's with forward reference feature and FIPS enabled.
CSCwb94312	Unable to apply SSH settings to ASA version 9.16 or later
CSCwb97251	ASA/FTD may traceback and reload in Thread Name 'ssh'
CSCwc02416	Not re-subscribing to ISE topics after certain ISE connectivity issues.
CSCwc02488	ASA/FTD may traceback and reload in Thread Name 'None'
CSCwc02700	Fragmented packets are dropped when unit leaves cluster
CSCwc03069	Interface internal data0/0 is up/up from cli but up/down from SNMP polling
CSCwc08676	WR6, WR8, LTS18 and LTS21 commit id update in CCM layer (Seq 32)
CSCwc09414	ASA/FTD may traceback and reload in Thread Name 'ci/console'
CSCwc10483	ASA/FTD - Traceback in Thread Name: appAgent_subscribe_nd_thread
CSCwc10792	ASA/FTD IPSEC debugs missing reason for change of peer address and timer delete
CSCwc11597	ASA tracebacks after SFR was upgraded to 6.7.0.3
CSCwc11663	ASA traceback and reload when modifying DNS inspection policy via CSM or CLI

Bug ID	Headline
CSCwc13017	FTD/ASA traceback and reload at at/inspect/proxy.h:439
CSCwc13382	DCERPC traffic is dropped after upgrade to snort3 due to Parent flow is closed
CSCwc13994	ASA - Restore not remove the new configuration for an interface setup after backup
CSCwc18218	Database files on disk grow larger than expected for some frequently updated tables
CSCwc18312	"show nat pool cluster" commands run within EEM scripts lead to traceback and reload
CSCwc23695	ASA/FTD can not parse UPN from SAN field of user's certificate
CSCwc24906	ASA/FTD traceback and reload on Thread id: 1637
CSCwc27797	ASA mgmt ip cannot be released
CSCwc28334	Cisco ASA and FTD Software RSA Private Key Leak Vulnerability
CSCwc28532	9344 Block leak due to fragmented GRE traffic over inline-set interface inner-flow processing
CSCwc32246	NAT64 translates all IPv6 Address to 0.0.0.0/0 when object subnet 0.0.0.0 0.0.0 is used
CSCwc41590	Upgrade fail & App Instance fail to start with err "CSP_OP_ERROR. CSP signature verification error."
CSCwc53680	MonetDB crashing due to file size error (7.2.0-7.4.0)

## **Resolved Bugs in Version 7.0.3**

Table last updated: 2022-06-30

Table 48: Resolved Bugs in Version 7.0.3

Bug ID	Headline
CSCwa65014	Cloud-managed 7.0.3 device support for 7.2 FMC eventing
CSCwa75204	SNORT3 Certsize 16k traffic failing on 2100 with all SSL rules
CSCwa98690	AWS FTDv AutoScale_layer.zip file is using vulnerable pycrypto 2.x toolkit
CSCwb93932	ASA/FTD traceback and reload with timer services assertion

### **Resolved Bugs in Version 7.0.2.1**

Table 49: Resolved Bugs in Version 7.0.2.1

Bug ID	Headline
CSCwb93932	ASA/FTD traceback and reload with timer services assertion

#### **Resolved Bugs in Version 7.0.2**

Table last updated: 2022-05-05

Table 50: Resolved Bugs in Version 7.0.2

Bug ID	Headline
CSCvt68055	snmpd is respawning frequently on fxos for FP21xx device
CSCvy82668	SSH session not being released
CSCvy64145	WR6 and WR8 commit id update in CCM layer(sprint 113, seq 12)
CSCvt15348	ASA show processes cpu-usage output is misleading on multi-core platforms
CSCvy72841	Firepower 1K FTD sends LLDP packets with internal MAC address of eth2 interface
CSCvz80981	SNMPv3 doesn't work for SFR modules running version 7.0
CSCvy08351	Intrusion and Correlation Email Alerts stop being sent to mail server
CSCvz66474	Snmpd core files generated on FTD
CSCvx75683	The 'show cluster info trace' output is overwhelmed by 'tag does not exist' messages
CSCvz25434	ASA/FTD blackholes traffic due to 1550 block depletion when BVI is configured as DHCP client
CSCwa45799	High CPU on FXOS due to bcm_usd process
CSCwa18889	Clock drift observed between Lina and FXOS on multi-instance
CSCvy99217	IKEv2: SA Error code should be translated to human friendly reason
CSCvz00961	AnyConnect connection failure related to ASA truncated/corrupt config
CSCvz36905	If we add v6 route same as V route, duplicate entry is getting created.
CSCwa58060	LSP download fails if no ICMP reply is received from updates-talos.sco.cisco.com
CSCvz03524	PKI "OCSP revocation check" failing due to sha256 request instead of sha1
CSCwa74900	Traceback and reload after enabling debug webvpn cifs 255

Bug ID	Headline
CSCvz29233	ASA: ARP entries from custom context not removed when an interface flap occurs on system context
CSCvy35416	Deploy failure from global domain when parallel deploy triggered to different child domains
CSCvy99218	VDB Version shouldn't be update if fails
CSCvz81888	NTP will not change to *(synced) status after upgrade to asa-9.15.1/9.16.1.28 from asa-9.14.3
CSCvx66329	FTD Hotfix Cisco_FTD_SSP_FP2K_Hotfix_O installation fails on script 000_start/125_verify_bundle.sh
CSCvz75988	Inconsistent logging timestamp with RFC5424 enabled
CSCvz52199	Increase precision of ASA VPN load-balancing algorithm
CSCvz48407	Traceback and reload in Thread Name: DATAPATH-15-18621
CSCvz05687	Fragmented Certificate request failed for DND flow
CSCwa96759	Lina may traceback and reload on tcpmod_proxy_handle_mixed_mode
CSCvz90722	With object-group in crypto ACL sum of hitent mismatches with the individual elements
CSCvz59950	IKEv2 Crash from scaled long duration test on KP-FPR2130
CSCvz38332	FTD/ASA - Stuck in boot loop after upgrade from 9.14.2.15 to 9.14.3
CSCvz55140	WR6, WR8 and LTS18 commit id update in CCM layer(sprint 117, seq 17)
CSCwa58686	ASA/FTD Change in OGS compilation behavior causing boot loop
CSCvz43455	ASAv observed traceback while upgrading hostscan
CSCvz20679	FTDv - Lina Traceback and reload
CSCvz60578	Cluster unit in MASTER_POST_CONFIG state should transition to Disabled state after an interva
CSCvz59464	IPReputation Feed Error Message-Method Not Allowed
CSCvy31424	QP FTD application fails to start due to outdated affinity.conf following FXOS/FTD upgrade
CSCvz79930	Snort3 .dmp and crashinfo files are not managed by diskmanager
CSCvy89144	Cisco ASA and FTD Web Services Denial of Service Vulnerability
CSCwa19713	Traffic dropped by ASA configured with BVI interfaces due to asp drop type "no-adjacency"
CSCvz70958	High Control Plane CPU on StandBy due to dhcpp_add_ipl_stby

Bug ID	Headline
CSCvz61689	Port-channel member interfaces are lost and status is down after software upgrade
CSCvz92016	Cisco ASA and FTD Software Web Services Interface Privilege Escalation Vulnerability
CSCvz34831	If ASA fails to download DACL it will never stop trying
CSCvz90375	Low available DMA memory on ASA 9.14 at boot reduces AnyConnect sessions supported
CSCvy40401	L2L VPN session bringup fails when using NULL encryption in ipsec configuration
CSCwa76822	Tune throttling flow control on syslog-ng destinations
CSCvz33468	ASA/FTD - NAT stops translating source addresses after changes to object-groups in manual NAT Rule
CSCwa11186	Mask sensitive information in aaa ldap debugs
CSCvz00383	FTD lina traceback and reload in thread Name Checkheaps
CSCvy17030	FMC Connection Events page "Error: Unable to process this query. Please contact support."
CSCvx97053	Unable to configure ipv6 address/prefix to same interface and network in different context
CSCvx24470	FTD/FDM: RA VPN sessions disconnected after every deployment if custom port for RA VPN is configured
CSCwa05385	WR6, WR8 and LTS18 commit id update in CCM layer(sprint 124, seq 19)
CSCvz96440	FMC should not create archival for NGIPS devices
CSCwa68660	FTP inspection stops working properly after upgrading the ASA to 9.12.4.x
CSCvy98027	Application interface down whereas physical interface Up on FXOS
CSCvx95652	ASAv Azure: Some or all interfaces might stop passing traffic after a certain period of run time
CSCvz73146	FTD - Traceback in Thread Name: DATAPATH
CSCwa87597	ASA/FTD Failover: Joining Standby reboots when receiving configuration replication from Active mate
CSCwb01919	FP2140 ASA 9.16.2 HA units traceback and reload at lua_getinfo (getfuncname)
CSCvy96895	ASA disconnects the VTY session using of Active IP address and Standby MAC address after failed over
CSCwa55878	FTD Service Module Failure: False alarm of "ND may have gone down"
CSCwa14725	ASA/FTD traceback and reload on IKE Daemon Thread

CSCvz91218 Statelink hello messages dropped on Standby unit due to interface ring drops of rate traffic  CSCvz91218 WR6, WR8 and LTS18 commit id update in CCM layer(sprint 124, seq 20)  CSCwa67882 Offloaded GRE tunnels may be silently un-offloaded and punted back to CPU  CSCwa67884 Conditional flow-offload debugging produces no output  CSCwa97784 ASA: Jumbo sized packets are not fragmented over the L2TP tunnel  CSCwa29956 "Interface configuration has changed on device" message may be shown after I upgrade  CSCwa60574 ASA traceback and reload on snp_ha_trans_alloc_msg_muxbuf_space function  CSCwa89243 SNMP no longer responds to polls after upgrade to 9.15.1.17  CSCvz30582 Cisco Firepower Management Center Cross-site Scripting Vulnerability  CSCwa04461 Cisco ASA Software and FTD Software Remote Access SSL VPN Denial of S  CSCwa30114 "Error:NAT unable to reserve ports" when using a range of ports in an object soft cases and selection of "show coredump filesystem" to "show tech" output  CSCwa39680 Snort stops processing packets when SSL decryption debug enabled - Snort2  CSCvy96803 ASA/FTD traceback and reload in Process Name "lina" or "snmp_alarm_thread CSCvz34149 Update the new location of /opt/cisco/platfom/logs/var/log/messages  CSCvo77184 VMware ASAv should default to vmxnet3, not e1000  CSCvx92932 Missing events on FMC due to SFDataCorrelator process exiting  CSCwa79980 SNMP get command in FPR does not show interface index.	high

Bug ID	Headline
CSCvi96835	No validation err when changing host thats part of a group object used in a routing policy, to Range
CSCvk22190	No connection/intrusion events received on FMC following time synchronisation issues
CSCvm69294	Standby FMC sending Flood of SNMP traps
CSCvm99989	SNMP OID for SystemUpTime show incorrect value
CSCvo57004	Analyze Hit Counts displaying timestamps in UTC instead of the configured user time zone.
CSCvp54996	GNU Wget Buffer Overflow Vulnerability
CSCvp58886	Special characters in Location for SNMP FXOS (FPR2100) causes policy deployment failure
CSCvq55919	Cisco Firepower Management Center Software Stored Cross-Site Scripting Vulnerability
CSCvq89604	Cisco_Firepower_Mgmt_Center_Patch_Uninstaller-6.4.0.3-29.sh.REL.tar fails to run
CSCvr03127	Apache HTTP Server mod_proxy Cross-Site Scripting Vulnerability
CSCvr13762	NGFWHA Missing EO UUID on FMC
CSCvr46901	Analysis Connection Events doesn't show and report all the events in UI
CSCvr74896	Cannot update Security intelligence when AC Policy is imported to FMC with cloud feeds disabled
CSCvs02229	Network Time Protocol Authenticated Mode 6 Packet Processing NULL Poin
CSCvs05066	Snort file mempool corruption leads to performance degradation and process failure.
CSCvs06043	TunnelClient for CSM_CCMservice on ngfwManager not reading ACK sent from CSM_CCM service on FMC

Bug ID	Headline
CSCvs71034	Beaker registration fails with error 400 : Bad Request.
CSCvs71969	Multiple Cisco Products Snort HTTP Detection Engine File Policy Bypass Vulnerability
CSCvs74802	AnyConnect/S2S IKEv2 crypto policy occasionally not deployed to device
CSCvs79606	"dns server-group DefaultDNS" cli not getting negated
CSCvs84242	FMC Deployment Failure when removing Auto NAT and correlated network object
CSCvt29771	invalid Response message when we change the security zone from the object management page
CSCvt31292	FTD device might not send events to SSE
CSCvt43136	Multiple Cisco Products Snort TCP Fast Open File Policy Bypass Vulnerability
CSCvt49334	On the 4120 sensor, the task delete is not removing the "task_xx" files from the cron.d directory
CSCvt74194	Error getting unified2 record: Corrupt file
CSCvt74893	FMCv Ethernet driver indicates vmxnet3 TCP performance compromised
CSCvt91258	FDM: None of the NTP Servers can be reached - Using Data interfaces as Management Gateway
CSCvt93177	Disable Full Proxy to Light Weight Proxy by Default. (FP2LWP) on FTD Devices
CSCvt93999	FMC shouldn't allow a second upgrade on same device if upgrade is going on
CSCvu12608	ASA5506/5508/5516 devices not booting up properly / Boot loop
CSCvu18510	MonetDB's eventdb crash causes loss of connection events on FMC 6.6.0 and 6.6.1
CSCvu21953	FMC 6.4.0 is randomly sending "strong-encryption-disable" to FTD
CSCvu22293	FMC scheduled backup of multiple managed devices with remote storage fails
CSCvu29508	FMC manual removal and addition of FTD Cluster member causes dangling stale interfaces
CSCvu30756	User Identity does not correctly handle identical sessions in different netmaps
CSCvu34228	FTD LINA traceback & reload while processing snort return verdict
CSCvu35704	APIKEY mismatch among the FMC, Sensor and ThreatGrid results significant file submission drop
CSCvu44472	FMC System processes are starting
CSCvu54706	Cisco Firepower Management Center CWE-772 - Slow HTTP POST vulnerability
CSCvu75855	stunnel process enabled on managed device when it should not be

Bug ID	Headline
CSCvu77689	FTP to FileZilla miscategorized as SMTP
CSCvu88005	FMC REST API user permission for GET taskstatus
CSCvu88886	Threat data deployment to managed FTD may fail after upgrade.
CSCvv00155	Deleting interface or sub-interface should also delete failover MAC address configuration
CSCvv08244	Firepower module may block trusted HTTPS connections matching 'Do not decrypt' SSL decryption rule
CSCvv12491	cloudagent_urllookup_health file still had old format after upgrading to 6.4
CSCvv14109	new FMC restored from backup file doesn't send down user ip and user group mappings to devices
CSCvv14442	FMC backup restore fails if it contains files/directories with future timestamps
CSCvv17893	Bad uip snapshot and log file causes FTD to repeatedly requests catchup, and exhausts file handlers
CSCvv20780	Policy deploy fails with "Failed to hold the deployment transaction" error
CSCvv21782	6.6.1: Prefilter Policy value shown as Invalid ID for all the traffic in ASA SFR Platform
CSCvv27084	EventHandler syslog via loggerd does not support destination host names
CSCvv27867	FMC classic theme - No scrollbar in object details for group with multiple items
CSCvv29275	FMC OSPF area limits until 49 entries. Upon adding 50th entry, process gets disabled automatically
CSCvv34523	The firewall_target_cache table is not pruned as expected which leads to large database size
CSCvv34851	6.7.0-1992: duplicate connection events with empty SSL info in one of them
CSCvv36915	"Show NTP" command does not work on multi-instance FTD
CSCvv38869	FMC fails to upgrade FTD from 6.3 to 6.7 due to database error
CSCvv40961	http-proxy setting causing upgrade failure
CSCvv43771	Unable to select multiple devices for scheduled backups
CSCvv45106	CSD does not start on 2100 due to missing csd-service.json file
CSCvv46490	Policy Deployment Failure on FMC due to ERROR in SnortAttribConfig
CSCvv50298	FTD management interface to be vulnerable to TLS poodle attack- CVE-2014-3566
CSCvv53042	DBCheck.pl output includes fatal errors that cause upgrade attempt to fail

Bug ID	Headline
CSCvv55066	FPR1010: Internal-Data0/0 and data interfaces are flapping during SMB file transfer
CSCvv56644	Cisco Adaptive Security Appliance Software and Firepower Threat Defense Software Web DoS
CSCvv57476	CSS Styles loading issue in Chrome 85, IE and Edge browsers
CSCvv59036	Static routes deleted from the FMC without user deleting it.
CSCvv60849	Memory cgroup limits should be adjusted to avoid Snort D-state
CSCvv62931	FTD does not send Server Hello & Server Certificate to the client when src.port==dst.port
CSCvv68000	bravado error when getting ra vpn group policy created by FDM UI
CSCvv68078	sybase database corrupted on secondary FMC and was not able to sync
CSCvv69862	FMC backup failed error with "Terminating long running backup" after 45 min FTDHA in leaf
CSCvv70096	Snort 2: Memory Leak in SSL Decrypt & Resign Processing
CSCvv70683	No New Notification in Task tab.
CSCvv73054	Snort libs are deleted during deployment
CSCvv74658	FTD/ASA creates coredump file with "!" character in filename (zmq changes (fxos) for CSCvv40406)
CSCvv74795	syslog-ng has extra instances running on ASA5525-X
CSCvv74816	FDM should not allow removal of local address pool while NAT exemption is in place.
CSCvv74951	Disable memory cgroups when running the system upgrade scripts
CSCvv75148	Rabbitmq queue of VPN Events does not have any size limit to avoid accumulating *.idx files
CSCvv76581	Cisco Firepower product line Evaluation of Racoon attack CVE-2020-1968
CSCvv79459	WR6, WR8 and LTS18 commit id update in CCM layer (sprint 94, seq 1)
CSCvv79897	Block "sensor restart" command for FTD units to prevent Lina crash and system reboot event
CSCvv83841	upgrade - Not enough root disk space available in 600_schema/100_update_database.sh
CSCvv84172	Dangling ref in Clustered_table and EO upon failed registration
CSCvv84385	Disk Manager incorrectly prunes unified files used by FMC e-streamer
CSCvv89715	Fastpath rules for 8000 series stack disappear randomly from the FMC

Bug ID	Headline
CSCvv90079	No router BGP pushed after making chnages on 9300 intra chassis cluster
CSCvv92897	System might hit previously missing memcap limits on upgrade to version 6.6.0
CSCvv94165	FTD 6.6 : High CPU spikes on snmpd process
CSCvv97527	asa config timeout command breaks snort's DAQ configuration
CSCvv97902	Deployment purge doesn't happen due to deployment_info missing at policy_deployment.db
CSCvw03256	FMC dashboard shows "No Data" for intrusion table when 'Message' Field is Selected
CSCvw04171	For Readonly User, Device Summary tab is returning forbidden error page
CSCvw07352	SFDataCorrelator log spam, metadata fails after Sybase connection status 0
CSCvw10877	/var/sf/user_identity should not bring the archive with it in a troubleshoot
CSCvw13395	FMC 6.6.0 "Reset Connection Upon Timeout" Checkbox missing in Light Theme of UI
CSCvw16565	Policy Deployment fails after enabling "SMB Auto-Detect Ports" in DCE/RPC Configuration.
CSCvw21145	Duplicate NAT rule error when saving the policy (caused by duplicate Auto NAT rules)
CSCvw21161	Duplicate NAT rule error when saving the policy (different rules are detected as duplicates)
CSCvw21628	Upgrade from pre-6.6.x to 6.6.x and above breaks Intrusion Event Packet-Drill down
CSCvw27966	Policy deployment fails with object names starts with 'any'
CSCvw28894	SFDataCorrelator slow startup and vuln remap due to duplicate entries in vuln tables
CSCvw28946	When deploying VxLan config the command mtu is sent out of order causing deployment failures
CSCvw29561	FMC SLR license 'shows continuous Smart agent communication with Smart Licensing Cloud' alert
CSCvw29563	repair_users.pl script no longer works
CSCvw29581	VDB upgrade doesn't work when mysql user table is damaged.
CSCvw30252	ASA/FTD may traceback and reload due to memory corruption in SNMP
CSCvw33939	FMC Deployment failure due to VPN split-tunnel standard ACL with Network Group containing IPv6object
CSCvw34692	Not possible to change after the first time the TTL Hops for BGP neighbor

Bug ID	Headline
CSCvw38708	AC policy save, validateActivity not using cache for building blocks
CSCvw38870	FMC upgrade failure to 6.6.0, 6.6.1, 6.6.3, or 6.7.0 at 800_post/1027_ldap_external_auth_fix.pl
CSCvw41901	Deleting System Defined objects via FMC's REST API returns HTTP 500 error code.
CSCvw42497	Error during policy validation while navigating through AC policy
CSCvw45125	Block deployment while secondary nodes are in config or bulk sync
CSCvw47943	Optimization of the query for scan results in Firepower Recommendations
CSCvw51307	ASA/FTD traceback and reload in process name "Lina"
CSCvw60177	Standby/Secondary cluster unit might crash in Thread Name: fover_parse and "cluster config sync"
CSCvw79294	sftunnel logging huge number of logs to messages file
CSCvw85377	URL is not updated in the access policy URL filtering rule
CSCvx19934	Deployment gets failed for snmp settings while deleting snmpv1 and adding snmpv3 at a time in 6.6.3
CSCvx20303	ASA/FTD may traceback in after changing snmp host-group object
CSCvx26221	Traceback into snmp at handle_agentx_packet / snmp takes long time to come up on FP1k and 5508
CSCvy08798	WR6, WR8 and LTS18 commit id update in CCM layer(sprint 110, seq 10)

Resolved Bugs in Version 7.0.0
