

Introduction

- [Overview, on page 1](#)
- [Supported products, on page 1](#)
- [Supported products in emerging technology and incubation, on page 2](#)

Overview

With Cisco Security Cloud Sign On, you can easily access many Cisco Security products with one set of credentials from any device. Once you sign in with your username and password, all your Cisco Security products are displayed as apps in your customizable dashboard.

- Click an app and you're automatically signed-in, for seamless workflows across your Cisco Security products. You no longer have to remember and juggle multiple passwords.
- Integration with Duo's Multi-Factor Authentication (MFA) means adaptive, layered, and simplified authentication. One push notification, one tap, instant access.
- Optionally, use Security Cloud Control to [integrate your own identity provider \(IdP\)](#) with Security Cloud Sign On.

Supported products

This guide lists Cisco security products that support Security Cloud Sign On. Some products support Security Cloud Sign On by default and require no configuration changes. Other Cisco security products require you to opt-in to Security Cloud Sign On or migrate your users.

For each product listed below it's indicated if Security Cloud Sign On is enabled by default or requires you to opt-in or migrate your users. For products that require opt-in or user migration, links are provided to the relevant documentation.
