

Preface

This manual describes how to use the Auto Update Server (AUS) application. It is for users who are skilled in network management and configuration, and who are responsible for configuring and maintaining PIX firewalls and Adaptive Security Appliance (ASA) devices.

- [Obtaining Documentation and Submitting a Service Request, page viii](#)

Conventions

This document uses the following conventions:

Item	Convention
Commands or keywords	boldface font
Variables for which you supply values	<i>italic</i> font
Displayed session and system information	screen font
Selecting a menu item in paragraphs	Option > Network Preferences

Note

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the publication.

Caution

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

Product Documentation

For a list of documentation for the Cisco Security Management Suite, see the documentation roadmap for your product release at http://www.cisco.com/en/US/products/ps6498/products_documentation_roadmaps_list.html.

Obtaining Documentation and Submitting a Service Request

For information on obtaining documentation, submitting a service request, and gathering additional information, see the monthly *What's New in Cisco Product Documentation*, which also lists all new and revised Cisco technical documentation, at:

<http://www.cisco.com/en/US/docs/general/whatsnew/whatsnew.html>

Subscribe to the *What's New in Cisco Product Documentation* as a Really Simple Syndication (RSS) feed and set content to be delivered directly to your desktop using a reader application. The RSS feeds are a free service and Cisco currently supports RSS version 2.0.
