

## **Preface**

This manual describes how to use the Auto Update Server (AUS) application. It is for users who are skilled in network management and configuration, and who are responsible for configuring and maintaining PIX firewalls and Adaptive Security Appliance (ASA) devices.

- Conventions, page vii
- Product Documentation, page vii
- Obtaining Documentation and Submitting a Service Request, page viii

## **Conventions**

This document uses the following conventions:

Item	Convention
Commands or keywords	boldface font
Variables for which you supply values	italic font
Displayed session and system information	screen font
Selecting a menu item in paragraphs	Option>Network Preferences

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the publication.

Means reader be careful. In this situation, you might do something that could result in equipment damage or loss of data.

## **Product Documentation**

For a list of documentation for the Cisco Security Management Suite, see the documentation roadmap for your product release at

http://www.cisco.com/en/US/products/ps6498/products\_documentation\_roadmaps\_list.html.

## **Obtaining Documentation and Submitting a Service Request**

For information on obtaining documentation, submitting a service request, and gathering additional information, see the monthly *What's New in Cisco Product Documentation*, which also lists all new and revised Cisco technical documentation, at:

http://www.cisco.com/en/US/docs/general/whatsnew/whatsnew.html

Subscribe to the *What's New in Cisco Product Documentation* as a Really Simple Syndication (RSS) feed and set content to be delivered directly to your desktop using a reader application. The RSS feeds are a free service and Cisco currently supports RSS version 2.0.
