

# Getting Started

This section guides you on how to install and manage your device.

Click on **Getting Started** to access the page where you can use the various links and follow the on-screen instructions to configure your switch.

## Basic or Advanced Display Mode

The switch's WEB GUI includes hundreds of configuration and display pages. These pages are divided into the following display modes:

- Basic—Basic subset of configuration options.
- Advanced—Full set of configuration options are available.

When switching from one mode to another, any configuration which was made on the page (without Apply) is deleted.

## Initial Setup

Change Management Applications and Services	<a href="#">TCP/UDP Services</a>
Change Device IP Address	<a href="#">IPv4 Interface</a>
Create VLAN	<a href="#">VLAN Settings</a>
Configure Port Settings	<a href="#">Port Settings</a>

## Device Status

System Summary	<a href="#">System Summary</a>
Port Statistics	<a href="#">Interface</a>
RMON Statistics	<a href="#">Statistics</a>
View Log	<a href="#">RAM Memory</a>

**Quick Access**

Change Device Password	<a href="#">User Accounts</a>
Upgrade Device Software	<a href="#">Firmware Operations</a>
Backup Device Configuration	<a href="#">File Operations</a>
Create MAC-Based ACL	<a href="#">MAC-Based ACL</a>
Create IP-Based ACL	<a href="#">IPv4-based ACL</a>
Configure QoS	<a href="#">QoS Properties</a>
Configure SPAN	<a href="#">SPAN and RSPAN</a>

**Other Resources**

There are four hot links on the Getting Started page that take you to Cisco web pages for more information. Clicking on the **Support** link takes you to the device product support page, while clicking on the **Forums** link takes you to the Support Community page.

Clicking on the **Virtual Assistant** takes you to the virtual assistant where you can ask your questions and clicking on CBD takes you to the Cisco Business Dashboard application where you can manage your network.
