## New and Changed Information

The following table provides an overview of the significant changes to this guide up to this current release. The table does not provide an exhaustive list of all changes that are made to the guide or of the new features up to this release.

*Table 1: New Features and Changed Behavior*

Cisco APIC Release Version	Feature	Description	Where Documented
5.1(1)	Support for dual-stack connections for (SVI) on OpenStack.	You can now configure connections using IPv6 as well as connections using IPv4. This feature enables Border Gateway Protocol (BGP) peering over Layer 3 outside connections for both IPv6 and IPv4 routes if BGP is enabled.	The section <a href="#">Dual Stack with SVI Integration</a> in the chapter "Neutron SVI Integration."
3.0(1)	--	This guide was released.	--
--	--	Added direction for creating a dummy security port group when changing DNS parameters or static routes.	The section <a href="#">Changing DNS Parameters or Static Routes</a> in the chapter "Day 2 Operations."
