New and Changed Information

The following table provides an overview of the significant changes to this guide for this current release. The table does not provide an exhaustive list of all changes made to the configuration guide or of the new features in this release.

Table 1: New Features

Feature	Description	Release	Where Documented
TCAM Carving	The Ternary Content-Addressable Memory (TCAM) carving feature implements a template-based approach that provides you with the ability to modify the default region sizes of the TCAM.	6.0(2)N2(1)	Configuring TCAM Carving
Support for DHCPv6 relay	The DHCPv6 relay agent forwards DHCPv6 configurations between source and destination ports.	6.0(2)N1(2)	Configuring the DHCPv6 Relay Source Interface

Feature	Description	Release	Where Documented
802.1X	802.1X defines a client-server access control and authentications protocol that restricts unauthorized clients from connecting to a LAN through publicly accessible ports.	6.0(2)N1(2)	Configuring 802.1X
