

# Sample AutoVNF VNFM Configuration File

This configuration file provides AutoVNF with the necessary information for communicating with a pre-existing VNFM installation. This is used when deploying VNFs through a stand-alone AutoVNF instance. Refer to [Deploying VNFs Using AutoVNF](#).

**Caution**

This is only a sample configuration file provided solely for your reference. You must create and modify your own configuration file according to the specific needs of your deployment.
