

# Release 21.27 Features and Changes Quick Reference

- [Release 21.27 Features and Changes](#), on page 1

## Release 21.27 Features and Changes

| Features / Behavior Changes  | Applicable Product(s) / Functional Area   | Release Introduced / Modified |
|--|---|-------------------------------|
| <a href="#">Addition of Server Unreachable Field in CDR</a>                          | <ul style="list-style-type: none"> <li>• GGSN</li> <li>• P-GW</li> <li>• SAEGW</li> </ul> | 21.27                         |
| <a href="#">Capability to Record and Produce Call Transactions</a>                   | <ul style="list-style-type: none"> <li>• ePDG</li> <li>• P-GW</li> <li>• SaMOG</li> </ul> | 21.27                         |
| <a href="#">Cloud Initialization Support for Elastic Services Controller</a>         | StarOS  | 21.27                         |
| <a href="#">Configuring Access-Link Fastpath to enforce APN MTU for IPv4 Traffic</a> | <ul style="list-style-type: none"> <li>• GGSN</li> <li>• P-GW</li> <li>• SAEGW</li> </ul> | 21.27                         |
| <a href="#">Configuring SRP Checkpoint</a>   | StarOS  | 21.27.m0                      |
| <a href="#">Deprecated CLI for MME Initiated PDN Disconnection</a>                   | MME   | 21.27.2                       |
| <a href="#">ePDG Support on VPC-DI</a>   | ePDG  | 21.27                         |

| Features / Behavior Changes  | Applicable Product(s) / Functional Area | Release Introduced / Modified |
|--|---|-------------------------------|
| ePDG Interworking with SMF+P-GW-IWK Support                                      | ePDG                                    | 21.27                         |
| Enable mme clear-route-multipath-zero in CLI                                     | MME                                     | 21.27                         |
| Enforcing Detach on Last PDN Deactivation  | MME                                     | 21.27                         |
| IKEv2 Authentication Failure Counters  | ePDG                                    | 21.27                         |
| LTE-M RAT Indication Support   | MME                                     | 21.27                         |
| No IMSI or MSISDN Included in LRR for VoLTE EM Call from User of Foreign Network | MME                                     | 21.27                         |
| P2P Signing Process in StarOS  | StarOS                                  | 21.27                         |
| SaMOG Support on VPC-DI  | SaMOG                                   | 21.27                         |
| Support for 187 and 188 Information Element Types on S2b Interface               | ePDG                                    | 21.27.m0                      |
| Support for 187 and 188 Information Element Types on S5 and S8 Interfaces        | MME                                     | 21.27.m0                      |
| TCP Robustness Compliance with RFC 5961  | P-GW                                    | 21.27                         |
| Timestamp Accuracy Improvement   | P-GW                                    | 21.27                         |
| VLR Round-Robin Load Balancing   | MME                                     | 21.27                         |
