Integrating Cisco Spaces with the ServiceNow Application

This chapter describes how to integrate Cisco Spaces with the **ServiceNow** application.

ServiceNow

Cisco Spaces can be integrated with the **ServiceNow** application so that you can auto transfer the data from Cisco Spaces apps to **ServiceNow** and avail its service offerings.

Note Currently the **ServiceNow** integration support is available only for Proximity Reporting.

Integrating Cisco Spaces with ServiceNow

To integrate Cisco Spaces with the **ServiceNow** application, perform the following steps::

Note Ensure that you have a **ServiceNow** account, and have created the required task IDs.

-
- Step 1** Choose the three-line menu icon displayed at the top-left of the Cisco Spaces dashboard.
 - Step 2** Choose **Integration > ServiceNow** .
 - Step 3** In the **ServiceNow Integration** window that appears, enter the ServiceNow URL, Client ID, and Secret Key for your **ServiceNow** account.
 - Step 4** Click **Register**.

- Step 5** Click **Authenticate** displayed at Step 2.
You are redirected to the **ServiceNow** log in window.
- Step 6** Enter your credentials, and click **Login**.
A message stating that Cisco Spaces would like to establish connection with **ServiceNow** is shown.
- Step 7** Click **Allow** to authenticate the integration.
Once successfully connected, the status **Active** is shown in the **ServiceNow Integration** window. You can disconnect at anytime using the **Disconnect** link.
- Step 8** Now in the Cisco Spaces app for which you want to use the **ServiceNow** application, configure the task ID. For example, in the **Proximity Reporting** app, to auto-transfer reports to the **ServiceNow** application, do the following:
- a) Open **Proximity Reporting**.
 - b) Click **Create Report**
 - c) In the **Look Up Summary** window, search for a user name or mac address for which you want to generate the report. For example, to view all the mac addresses starting with **00:**, enter **00:** in the **Search** field.
The mac addresses of all the devices found will be listed.
 - d) Check the mac addresses for which the report is to be generated.
 - e) In the **Time Range** area, specify the start date and end date of the period for which the report is to be generated.
 - f) Check **Auto-submit report data to ServiceNow task**.
Note The **Auto-submit report data to ServiceNow task** check box will appear only if you have authenticated the ServiceNow integration with Cisco Spaces as explained in Step 1 to Step 7.
 - g) In the **DiagnosticTask ID** field, enter the task ID created in the **ServiceNow** application.
Note The **DiagnosticTask ID** field will appear only if you have checked **Auto-submit report data to ServiceNow task**.
 - h) In the **Report Name** field, enter a name for the report.
 - i) Click **Generate Report**.
- Now when the report is generated, this report will be automatically transferred to the **ServiceNow** application, and the **ServiceNow** application will use this report to perform the task with respect to the task ID configured.
-
